

IBM Ph.D. Fellowship Award-2013

Mr. Dheeraj Sharma, PhD Scholar, *Nanoscale Devices, VLSI/ULSI Circuit and System Design R & D Lab, Discipline of Electrical Engineering, School of Engineering, IIT Indore*, has been awarded the prestigious IBM Ph.D. Fellowship-2013, a highly worldwide competitive award that honors exceptional Ph.D. students who have an interest in solving problems that are important to IBM and fundamental to innovation in science and engineering. Recipients are selected based on their overall potential for research excellence, the degree to which their technical interests align with those of IBM and their academic progress to date, in the form of publications and faculty recommendations.

Mr. Dheeraj Sharma earned IBM PhD Fellowship-2013 for his research work under the supervision of Dr. Santosh Kumar Vishvakarma, Assistant Professor. His research is focused on “Unified and compact multigate gate-all-around MOSFETs modeling and its implementation in circuit design”.
