B. Tech. in Mathematics and Computing

ONE OF ITS KIND
With a carefully curated curriculum by subject experts including undergraduate research opportunities, many laboratory courses for plentiful hands-on training and a variety of electives across departments / institute to improve skill set in demand.

CAREER OPPORTUNITIES
- Academician
- Banker
- Business Analyst
- Computer Scientist
- Computational Engineer
- Data Analyst
- Economist
- Financial Analyst
- Information Technologist
- Programmer
- Statistician
- System Analyst

* In this program, students have the opportunity to explore the courses from mathematics as well as computer science. This degree also enables the interested students to pursue higher studies in various branches of Science & Technology including Computer Science & Mathematics.

B.Tech. in MATHEMATICS and COMPUTING

Admission starts in 2023 through All India JEE (adv.) ranking

About Us:

The Department of Mathematics at IIT Indore was established right from the inception of the institute in 2009. It has faculty members from diverse research areas of Pure and Applied Mathematics, such as Algebra, Applied Mechanics, Complex Analysis, Computational Seismology, Differential Equations, Dynamical Systems, Harmonic analysis, Linear Algebra, Machine Learning, Mathematical Modelling, Mathematical Biology, Modal Logic, Number Theory, Numerical Analysis, Optimization, Probability, Statistics, and Wavelet. The department introduced Ph.D. and M.Sc. programs in 2010 and 2015, respectively. The department has several projects funded by national and international agencies. The department also has DST-funded Bhaskaracharya Mathematics Laboratory and Brahmagupta Library. The department is actively conducting several events like weekly seminars, the Ramanujan-Hardy lecture series, national/international workshops and conferences.
