PREBID REPORT

The meeting for the Pre-bid discussion was held online on 06/07/2026 from 03.00 PM onwards for GeM Custom bidding for the Supply, Installation and Commissioning of Geotextiles Testing Equipment for Education and Skill Development. The report of the meeting is as mentioned below.

Sl. No.	Reference of the Clause/ Page No. of the Tender Document	Query raised	Query raised by	Response from IITI
01.	Section -II: Technical Specification S.no 1 Page 9 of 29	Loading and Displacement Parameters: Pull-out Load Capacity: 100 kN. In the loading and displacement parameters, the pull-out load capacity is specified as 100 kN (electromechanical).	M/s HEICO	No change, Electromechanical is required
02	Section -II: Technical Specification S.no 1 ,Page 9 of 29	Pull-out Box: Constructed in two halves with dimensions of 1500mmx1000x1000mm. Includes two smooth parallel sides, a back wall, a horizontal split removable door, a bottom plate, and a load transfer sleeve. We suggest that the pull-out box be built with hydraulic/mechanical actuator.	M/s HEICO	Electromechanical actuator is required
03	Section -II: Technical Specification S.no 1, Page 10 of 29	External potentiometric displacement transducers (LVDTs) with 2 kHz sampling rates. We suggest external potentiometric displacement transducers (4 Nos. LVDTs) with 2 kHz sampling rate and a range of 150 mm (± 75 mm).	M/s HEICO	These LVDTs must be compatible with DAQ provided with this instrument
04		Additional Offering We will provide the mechanical chain-pulling system with machine for loading and unloading.	M/s HEICO	Acceptable but not mandatory

All prospective/willing bidders are requested to take note of this report as part of the Tender document. All other terms and conditions of the tender remain unchanged.
