It gives us immense pleasure to inform you that the Workshop on High Performance Computing (HPC) in the Agriculture Domain under the National Supercomputing Mission (NSM) from Supercomputer Education and Research Centre (SERC) will be hosted by IIT Indore, ICAR-IISR Indore, and Mahindra University Hyderabad in collaboration with C-DAC Pune, IISC Bangalore, IIT Kharagpur from 14 July 2021 to 16 July 2021 in virtual mode.

This workshop aims to bring together researchers, engineers, industry experts, students, and practitioners to make them aware of the latest HPC technologies for easing practical/research work in the area of agriculture domain. Recent developments in computational techniques in various domains of science and engineering have been strongly linked with the efficient utilization of HPC resources. Therefore, it is essential to impart HPC training to the application domain researchers.
