

1. Name of the post:- Software Architect

No of post: - 1

Establish best practices in creating modules and systems by actively participating in development along with team members. Develop multi-tier scalable, high performance and reliable user-centric applications that operate 24x7. Produce high-quality software that is unit tested, code reviewed and checked in regularly for continuous integration.

Educational Qualification:- M.Tech/ME degree in Computer Science and Engineering/Information Technology.

Experience: -

- Minimum 10 years of work experience in total and at least 2 years of experience as software architect from a reputed firm having workforce of 500 employees.
- Expertise in micro service architecture-based designs and knowledge of Open API standards.
- Experience with Docker deployments.
- Experience with a version control system (GIT preferred).
- Experience with RESTful API design, ORM concepts, Django Migrations, software testing.
- Experience writing automated tests or using automated test frameworks.

Skills Required: -

- Strong understanding of end-to-end architectures and development frameworks.
- Quick Excellent Problem-solving skills for complex large-scale problems.
- Should have been part of scalable product development cycles with either large data handling or large transaction processing.
- Very Strong System design and Object-Oriented skills with ability to design clean interfaces and operate at the right levels of abstraction.
- Proven expertise in Python/Django, Elastic Search, Microservices, MySQL/PostgreSQL.
- Hands-on experience with JavaScript, Bootstrap and AngularJS/Vue.js/React.Js.

Desirable: - Candidate should have the experience of having designed at least two large scale software projects.

Consolidated Salary: - CTC of 8-10 LPA

Age limit: - 45 Years

2. Name of the post:- Database Administrator

No of post: - 1

Educational Qualification:- M.Tech/ME degree in Computer Science and Engineering/Information Technology.

Experience: - Minimum 5 years of work experience in total and at least 2 years of experience as DBA from a reputed firm.

Skills Required: -

- Should have in depth knowledge of postgres and My SQL Database incidents, installations, up gradations, migration, clustering, performance tuning activities and patching.

- Should manage creation/alteration of Database, changes to database schema, creation/alteration of user roles and privileges.
- Should be responsible for Database tuning, Performance tuning, Database troubleshooting that includes rigorous performance checks/root cause/analysis of database instances using various tools.
- Should be responsible for management and maintenance of Database Security, Backup and Recovery policies and procedures.
- Should create SOPs for various day to activities/incidents.
- Should be responsible of creating PG SQL and My SQL daily/monthly/quarterly database reports on periodic basis.
- Should follow processes for change control, problems, incidents, service calls and manage the incident/tickets at provided tool.
- Should have sound knowledge of Streaming Replication, Clustering and Connection Pooling with management and maintenance of standby databases at DR.

Consolidated Salary: - CTC of 5-6 LPA

Age limit: - 40 Years

3. Name of the post: - System Engineer

No of Post:- 1

Educational Qualification:- B.E/B.Tech / M.Tech degree in Computer Science and Engineering/Information Science

Experience: - Minimum 5 years of work experience in managing physical and virtual server and network Infrastructure.

Skills Required: -

- Should have in depth knowledge of RHEL and Debian based Linux environment, management of web servers, database servers.
- Should have experience in managing active directory tasks and backups.
- Should be able to manage network activities configuration of network switches, vSphere administration, VM backups Deployment and management of Docker instances.

Consolidated Salary: - CTC of 4.5-5.5 LPA

Age limit: - 40 Years

4. Name of the post:- Application Developer/Server Programmer

No of Post: - 2

Educational Qualification: - B.E/B.Tech / M.Tech/MCA degree in Computer Science and Engineering/Information Technology.

Experience: - Minimum 6 years of work experience in the IT industry as a programmer/developer.

Skills Required: -

- Should have developed enterprise class applications with Node Js, Angular, React, Postgre SQL, API centric applications.
- Experienced in Developing Applications in any of the leading frameworks e.g. Java Spring/Java Spring Boot/Laravel/Python/Django Highly Experienced in Web-Based Frameworks, RESTful API, Micro service based development.

Consolidated Salary: - CTC of 4 -5 LPA

Age limit: - 40 Years

5. Name of post:- Quality Assurance/Testing Engineer

No of post:- 1

Educational Qualification: - B.E/B.Tech / M.Tech/MCA degree in Computer Science and Engineering/Information Technology.

Experience: -Minimum 3 years of work experience in software testing in a reputed organisation.

Skills Required: -

- Design and implement test strategy , automate manual test cases using Java Python and cucumber
- Update Framework for new enhancements
- Provide technical support to team
- Hands on experience good knowledge on containerization and cloud docker Kubernetes

Technical Experience:

- Excellent software testing skills
- Excellent knowledge in test automation concepts
- Working experience on BDD automation framework
- Experienced in Automation framework design and development
- Good knowledge in scripting
- Cloud technology knowledge

Consolidated Salary: - CTC of 4.5 LPA

Age limit: - 40 Years

6. Academic Server Programmer

No of post:- 2

Educational Qualification: - Graduate with at least 6 years of work experience in IT industry as a programmer/developer, should have developed enterprise class applications with Node Js, Angular, React, Postgre SQL, API centric applications. Experienced in Developing Applications in leading frameworks e.g. Java Spring/Java Spring Boot/Laravel/Django.

Desirable: -

1. Highly Experienced in Web-Based Frameworks.
2. The selected candidate must be sharing the Academic Activities, online modules, and their programming.

3. Candidate should be diversified with involvement in developing ERP solutions to different sections/offices of the institute.
4. The recruited person must stay inside the campus.

Experience required:- 6 years of work experience in IT industry as a programmer/developer.

Age limit: - 40 Years

Consolidated Salary (per month):- Rs. 40,000/- to Rs. 45,000/-
