14. Ek Bharat Shresth Bharat 349
15. Student Statistics 351

Director's Message

As IIT Indore steps into the 3rd decade of 21st Century, it carries forward the culture of excellence and hard work embedded in its social environment. It maintains a high national and international rank among the institutions of higher education. Over the last eight years, our graduating students have been engaged with the best corporations in India and worldwide across different verticals. Many have also chosen the less travelled path of entrepreneurship. It is indeed a proud moment for us when our students contribute to the society by creating jobs and changing lives. Our faculty colleagues, along with their researchers in the last one decade, have also shown immense perseverance to attain new heights of excellence. The teaching and research climate in the institute has been supported by efficient administration and creation of state-of-art infrastructure.

Academic year 2020-21was no ordinary year due to 1st wave of COVID-19 during March to Nov 2020 and 2nd wave of COVID-19 pandemic during March to July 2021.It has forced redefining the normal in the education sector worldwide in a way that has posed major challenges for the students from KG to PG to PhD. IIT Indore community has responded by innovating in all the domains, across teaching, research, administration, and most importantly infrastructure creation. The institute used asynchronous as well as synchronous modes of teaching, successfully completed 2021 Autumn and 2022 Spring semesters in a timely manner and continued with academic activities without any disruptions.

The research on much needed COVID-19 related projects also continued unabated during the lockdowns. We initiated the return of researchers to the Campus with all the due precautions for everyone's safety, to restart the laboratories. Even during such trying times, our infrastructure team continued the hard work and did not allow any compromise on the high standards the institute has set for itself. Having first patent in May 2020, seven more patents have been granted during Feb to Sep 2021 and 40 patents have been published. The institute has renewed its focus on patenting along with publishing. The key focus is to engage with MSMEs, start-ups and transfer technology. Efforts are also underway towards liaison and collaboration with grassroot-level organizations, to contribute to the development of our immediate neighbourhood through technological innovation.

Nineth convocation of IIT Indore is being organized on 9th November 2021 with Principal Scientific Adviser to Govt of India Prof. K. Vijay Raghavan gracing the occasion as the Chief Guest. In this convocation total number of 496 students will be receiving their degrees which is largest number of the students graduating from IIT Indore till now. This includes 110 students of 15 PhD programs (107 PhD + 1 M.Tech and PhD dual program + 2 MSc and PhD dual degree program, largest number of PhD students graduating till now) 246 students of 5 B.Tech programs (again largest number of B.Tech students graduating till now); 41 students of M.Tech programs; 16 students of 3 MS (Research) programs; and 83 students of 5 MSc programs. First batch of students of MS (Research) programs in Electrical and Mechanical Engineering are graduating in this Convocation. There are 2 recipients of gold medal (i.e. President of India and Buti Foundation), 8 recipients for Institute Silver Medals in different categories and recipient of Best B.Tech project award. I am really happy to note that there are 4 female students of 11 recipients of medals and awards. I, on behalf of myself and on behalf of the Institute, congratulate all our graduating students, and recipients of the medals and awards and wish them in the desired success in their future endeavors.

Prof. N. K. Jain
Officiating Director, IIT Indore

Board of Governors, IIT Indore

Chairman

Professor Deepak B. Phatak
Indian Institute of Technology Indore

Members

Professor Neelesh Kumar Jain
Director (Officiating)
Indian Institute of Technology Indore, since January 01, 2020

Shri Rakesh Ranjan
Additional Secretary (TE), Govt. of India
Ministry of Education (Shiksha Mantralaya)

Shri Mukesh Chandra Gupta
Principal Secretary
Department of Technical Education & Skill Development,
Govt. of Madhya Pradesh

Professor Yogesh M. Joshi
Department of Chemical Engineering,
IIT Kanpur

Professor Dhananjay V. Bhatt
Retired Professor, Department of Mechanical Engineering
S. V. National Institute of Technology, Ichchhanath, Surat

Shri Manoj Kohli
Executive Chairman
SB Energy (Soft Bank Group) New Delhi

Dr. Krushna R. Mavani (Senate Nominee)
Professor,
Department of Physics, IIT Indore
Up to February 22, 2021

Professor Anand Parey (Senate Nominee)
Professor
Department of Mechanical Engineering, Dean,
Resources Generation IIT Indore

Mr. S.P. Hota
Registrar I/c & Secretary to BoG, IIT Indore

Institute Functionaries

Director (Officiating), IIT Indore
Professor Neelesh Kumar Jain

Dean, Academic Affairs
Dr. Devendra Deshmukh
(w.e.f. Jan 1, 2020)

Dean, Research & Development
Dr. I.A. Palani
(w.e.f. Feb 11, 2020)

Dean, Student Affairs
Dr. Srivathsan Vasudevan
w.e.f. Sept 24, 2021

Dean, International Affairs
Dr. Kapil Ahuja
(w.e.f. Aug 29, 2017 to Nov 26, 2020)

Dean, Resources Generation
Professor Anand Parey

Dean, Administration
Dr. Pritee Sharma
(w.e.f. Jan 1, 2020)

Dean, Student Affairs
Dr. Santosh Kumar Vishvakarma
(w.e.f. Sept 26, 2018 to Sept 23, 2021)

Dean, Infrastructure Development
Dr. Manish Kumar Goyal
(w.e.f. June 15, 2020)

Dean, International Affairs & Outreach
Prof. Avinash Sonwane
(w.e.f. Nov 27, 2020)

Registrar I/c, IIT Indore
Mr. S. P. Hota

Associate Deans

Academics (PG Programs)	:	Dr. Eswara Prasad Korimilli
Academics (Infrastructure)	:	Dr. Antony Vijesh
Academics (UG Programs)	:	Dr. Ram Bilas Pachori
Faculty Affairs	:	Dr. Amod C. Umarikar
Research and Development- I	:	Dr. Ruchi Sharma
Research and Development- II	:	Dr. Bhargav Vaidya
Administration	:	Dr. Santosh Hosmani
Infrastructure Development-I	:	Dr. Guru Prakash
Student Affairs	:	Dr. Sanjeev Singh
International Affairs and Outreach-I	:	Dr. Raghunath Sahoo
International Affairs and Outreach-II	:	Dr. Sanjay Kumar Singh

Heads of School

Humanities and Social Sciences	:	Dr. Nirmala Menon (w.e.f. January 4, 2020)

Heads of Departments

Computer Science & Engineering	:	Dr. Somnath Dey
		Dr. Surya Prakash (w.e.f. Oct 3, 2017 to Oct 3, 2020)
Electrical Engineering	:	Dr. Vipul Singh
Mechanical Engineering	:	Dr. Santosh Kumar Sahu
Chemistry	:	Dr. Biswarup Pathak
Mathematics	:	Dr. Neeraj Kumar Shukla
		Dr. Md. Aquil Khas (w.e.f. Sept 25, 2018 to Sept 16, 2021)
Physics	:	Dr. Pankaj R. Sagdeo
		Dr. Krushna R. Mavani (w.e.f Nov 16, 2017 to Nov 16, 2020)
Astronomy, Astrophysics and Space Engineering	:	Dr. Abhirup Datta
Biosciences and Biomedical Engineering	:	Dr. Amit Kumar
		Dr. Debashish Nayak (w.e.f Jan 8, 2021 to July 21, 2021)
		Dr. Sharad Gupta w.e.f Feb 24, 2020 to Jan 7, 2021)
Metallurgy Engineering & Materials Science	:	Dr. Vinod Kumar
Civil Engineering	:	Dr. Neelima Satyam Devarakonda

Heads of Centers and Services

Center of Advanced Electronics	:	Dr. Mukesh Kumar
Computer and Information Technology Center	:	Dr. Neminath Hubballi
Center of Futuristic Defense & Space Technology (CFDST)	:	Dr. Indrasen Singh
Center of Innovation, Incubation, Entrepreneurship and Industry Relations (CIIEIR)	:	Dr. Swaminathan R.
Centre for Rural Development and Technology	:	Dr. Sandeep Chaudhary
DST-FIST Center of Excellence in Gear Engineering	:	Prof. Neelesh Kumar Jain
Sophisticated Instrument Centre (SIC)	:	Prof. Suman Mukhopadhayay
Center for Indian Scientific Knowledge Systems	:	Prof. G. S. Murthy
Center for Electric Vehicle and Intelligent Transport Systems	:	Dr Amod C. Umarikar
Counselling Services	:	Dr. Pavan K. Kankar
Training & Placement	:	Dr. Abhishek Rajput
Central Workshop	:	Dr. Dan Sathiaraj

Constitution of Senate

Professor Neelesh Kumar Jain
Director (Officiating), IIT Indore and Chairman, Senate

General Secretary, Student Gymkhana

Indian Institute of Technology Indore

9th Convocation 2021: Recipients of Medals and Awards

President of India Gold Medal

For the best academic performance among all the graduating students

Mr. Gaurav Anil Khadse
BTech (CE)
Roll No. 170004008

Institute Silver Medal

For the best academic performance among all the graduating UG students of a particular Department

Mr. Kasturi Ajit Sharma
BTech (CSE)
Roll No. 170001026

Ms. Shruti Parag Landge
BTech (EE)
Roll No.170002049

Mr. Chinmay Hrishikesh Lote
BTech (ME)
Roll No. 170003014

Ms. Surabhi Praveen Modhe
BTech (CE)
Roll No. 170004036

Mr. AnanddevMangish
BTech (MEMS)
Roll No. 170005004

Institute Silver Medal

For the best overall performance among all the graduating PG students (MTech./MS and MSc. Programs)

Mr. Raineesh Babu KP
M.Tech (MEMS)
Roll No. 1902105016

Mr. Vinay Singh
MSc (Biotechnology)
Roll No. 1903171006

Award For Best B.Tech Project (BTP)

Amongst all the graduating UG students

Ms. Vartika Pathak
BTech (MEMS)
Roll No. 170005036

Project Title: "Machine Learning Techniques for Fractographic Analysis"

Buti Foundation Gold Medal

For the best academic performance among all the graduating female PG students

Ms. Arati Samal
MSc (Chemistry)
Roll No. 1903131007

Institute Silver Medal

For the best all round performance among all the graduating students

Mr. Shaik Nemath Ahmed
B.Tech (EE)
Roll No. 170002045

Department & Faculty Members: Profiles

Departments of Computer Science & Engineering

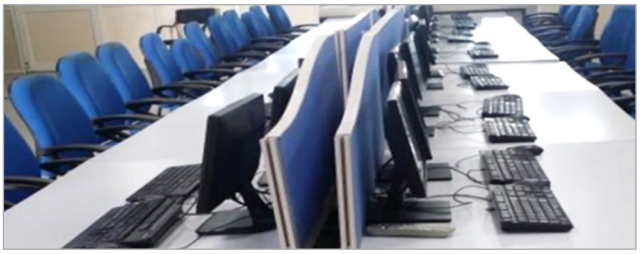

From the HoD's Desk

Dr. Somnath Dey
Associate Professor & HOD
somnathd@iiti.ac.in

The Department of Computer Science and Engineering (CSE) was set up in July 2009. It offers Bachelor of Technology (B.Tech.), Master of Science by Research(MS Research), and Doctor of Philosophy (Ph.D.) programs. The department adopts a modern approach to teaching wherein students are rendered in adequate academic freedom to innovate and learn in the process. State of the art facilities including the latest software and advanced hardware are available in various laboratories for the use in both teaching and research. This facilitates adequate implementation of major B.Tech. projects and for verification and validation of research results. The faculty members of the department are from diverse streams and specializations. Being a part of an emerging and relatively new institute, together with extremely competent research faculty, the CSE faculty of IIT Indore offer a unique interactive platform for the students to explore the arena of fundamental and applied research.

Achievements, Awards and Recognitions:

1. A total of 33 Ph.D., 10 MS Research and 396 B.Tech. students have graduated from the Department of CSE until September 2021.
2. THE World University Rankings 2022: Indian Institute of Technology Indore ranked 201–250 globally and 2nd in India in Computer Science.
3. THE World University Rankings 2021: Indian Institute of Technology Indore ranked 251–300 globally and 2nd in India in Computer Science.
4. Team Byte Bandits Vishnunarayan K, Mrigank Krishan, Vaibhav Anand & Sarthak Jain (representing IIT Indore) has secured the 1st place (India) and 8th globally in CSAW CTF (Finals) 2020 held online.
5. Graduating student, Mr. Saptarshi Ghosh, of CSE receives The President of India Gold Medal in the 2020 Convocation of IIT Indore.
6. Graduating student, Ms. Arushi Jain, of CSE receives The Institute Silver Medal in the 2020 Convocation of IIT Indore.
7. 07 PhD, 06 MS and 57 BTech students receive degree in 2020 convocation of IIT Indore held on 19-Oct-2020.
8. Team Fenment Tree of CSE, IIT Indore consisting of Mr. Kumar Abhinav, Mr. GVS Akhil and Mr. Kalpit Kothari made it to the World Finals of the ICPC 2020.
9. Prof. N.S Chaudhari served as Vice Chancellor, Uttarakhand Technical University (UTU), Dehradun (state govt university) since Jan 2019 to Mar.2021.
10. Dr. Aruna Tiwari organized pre-conference Expert Talk on Gender Issues in Science & Technology in Madhya Pradesh as convener MPVS-2021 on Oct 5, 2021.
11. Dr. Aruna Tiwari invited for panel discussion C-DAC Technology Conclave in "Artificial Intelligence and Language Computing" on July 29, 2021.
12. Dr. Aruna Tiwari represented India as an Artificial Intelligence expert in the Internationalist Podcast series on "Impact of the digital revolution on higher education", organized by the Association of Commonwealth Universities, UK on June 8, 2021.
13. Dr. Aruna Tiwari got access of two Supercomputers under the National Supercomputing Mission (NSM) funds; PARAM SHAKTI from IITK and PARAM SIDHI from CDAC PUNE in May 2021
14. Dr. Aruna Tiwari is collaborating with IIT Delhi as a Rural Technology Action Group (RuTAG) member & working on the problem of "Mobile App development for Ground Water Management".
15. Dr. Aruna Tiwari is appointed Moderator for MPPSC examination Feb 2021.
16. Dr. Anirban Sengupta is appointed as Chair, IEEE CTSoc Security and Privacy Technical Committee.
17. Dr. Anirban Sengupta is appointed as Board member, IEEE CTSoc Technical Committee.
18. Dr. Anirban Sengupta is appointed as Ex-Officio Member, IEEE Consumer Electronics Society Board of Governors, 2020.
19. Dr. Anirban Sengupta received ACM Honor: Selected to feature in 'Researcher Spotlight' of prestigious ACM SIGDA (Special Interest Group on Design Automation) Newsletter by Intel for the Jan 2020 issue for my contributions on "Hardware Security".
20. Dr. Anirban Sengupta is awarded 'IEEE Chester Sall Memorial Consumer Electronics Award - in 2020 for outstanding contribution on "DSP Design Protection in CE through Algorithmic Transformation Based Structural Obfuscation".
21. Dr. Anirban Sengupta is awarded 'IEEE Consumer Electronics Society 'Certificate of Appreciation' for outstanding services as TPC Chair of 9th IEEE Int'l Conference on Consumer Electronics (ICCE) Berlin, Germany, 2019.

22. Dr. Anirban Sengupta is awarded / elected Fellow of The Institution of Engineering and Technology (IET) - since 2019.
23. Dr. Anirban Sengupta is awarded/ Elected Fellow of British Computer Society (BCS) - since 2019.
24. Dr. Anirban Sengupta is awarded IEEE Distinguished Visitor by IEEE Computer Society - (2019 - 2021).
25. Dr. Anirban Sengupta is awarded IEEE Distinguished Lecturer by IEEE Consumer Electronics Society - (2017- 2019).
26. Dr. Anirban Sengupta is elected 'Chairman of IEEE Computer Society Technical Committee on VLSI (TC-VLSI)' for a term from Oct 2018 - 2020.
27. Dr. Anirban Sengupta is awarded 'Renowned Alumni Award' by JIS/Techno India, West Bengal in 2020.

Department Research Areas:

Current CSE faculty and students focus on a wide range of emerging research areas. These include

- Networking, Network Security, System Security, Cloud Computing, Cloud Security, Dependable Systems & Network Management, and Enterprise Management.
- Embedded Systems (Cyber-physical Systems, Internet-of-Things, Wireless Sensor Networks, etc.), their Formal Verification (Model Checking, Abstract Interpretation, Program Transformation & Generation, Program Analysis) and Semantics-based Emulation of Languages & Systems.
- Algorithms and Theoretical Computer Science, Algorithmic Graph Theory, Computational Complexity.
- Computational Science & Engineering, Numerical Linear Algebra, Numerical Analysis and Optimization.
- Big Data Analytics, Soft Computing, Computational Intelligence, Artificial Intelligence, Learning Algorithms, Neural Networks, Genetic Algorithms, Evolutionary Approaches, and Game Artificial Intelligence (AI)..
- Pattern Recognition, Computer Vision, Image Processing, Biometrics, Human-Computer Interaction, Machine Learning, and Deep Learning.
- Hardware Security, Side Channel Analysis Attacks on Cryptographic Implementations, Security Aspects in Emerging VLSI Technologies, Security of Hardware Accelerator and Machine Learning for VLSI.
- CAD-VLSI, EDA, High-Level Synthesis, IP core Security, Hardware Trojan, Fault Security, Digital Watermark in Digital Chip, Optimization of Hardware Accelerators, and Design Automation.
- Service-Oriented Systems, Dynamic Systems, Geographically Distributed Development Environments, Agile Techniques, Software-as-a-Service and Wireless Sensor Networks.
- Natural Language Processing, Social Network Analysis, Information Retrieval, and Data Mining.
- Autonomous vehicles, Certification framework for Safety Assurance in Autonomous Vehicles.

Notable General Achievements:

- Computer Science and Engineering attracts some of the most highly ranked JEE candidates to its undergraduate programme.
- The Department has a strong thrust towards the involvement of undergraduate students in its research programmes.
- Faculty members have complete freedom to tailor courses as and how they deem appropriate.
- The Department embraces the Open Sources movement and its laboratories conform to the use of Open Source Technologies for most applications.
- The Department houses some of the most advanced computing facilities.

- Faculty members in the Department come with a vast research experience behind them from the best institutions in India and abroad.
- The Department is proud of a very strong programming culture amongst its students that is in ample display in various hackathons, and prestigious programming contests like the ACM-ICPC.
- The camaraderie between faculty members in the Department is very positive and informal and makes for a great experience.
- The Department provides a secure working environment for all its members irrespective of caste, creed, gender, and background.
- Many CSE faculty members have been awarded sponsored research and GIAN (Global Initiative of Academic Networks) projects.
- CSE faculty members have active collaborations with institutes of high repute in India and across the globe (France, Germany, Singapore, Canada, USA, etc.).

Facilities in CSE

- The Department of CSE has three general purpose/undergraduate laboratories and one MS (Research) laboratory. Along with this, we have around 10 research laboratories.
- The general-purpose laboratories consist of three high-end computing servers supporting a full-fledged GPU Server functionality. We also have a Moodle Server to cater the teaching needs.
- The general-purpose laboratories have around 210 computing terminals catering to the academic requirements of undergraduate and graduate students. These laboratories also serve the need of various placement activities. All the terminals in these labs offer Windows and Linux working environments with a thrust towards the use of Open-Source Software for various applications.
- The Department also has a high-performance cluster for the development of scalable soft computing learning algorithms for big data handling as well as for running of large computational science and engineering, image processing, and cloud computing application codes.

Introducing Faculty of CSE

- Dr. Narendra S. Chaudhari
- Dr. Abhishek Srivastava
- Dr. Aruna Tiwari
- Dr. Anirban Sengupta
- Dr. Surya Prakash
- Dr. Somnath Dey
- Dr. Kapil Ahuja
- Dr. Gourinath Banda
- Dr. Neminath Hubballi
- Dr. Bodhisatwa Mazumdar
- Dr. Punit Gupta
- Dr. Nagendra Kumar
- Dr. Ranveer Singh
- Dr. Chandresh Kumar Maurya

CSE@IIT Indore has strong research groups of around 28 PhD and 17 MS (Research) scholars currently. The department has the presence of close to 250 undergraduate students.

Faculty Profiles in
Computer Science & Engineering

Dr. Narendra S. Chaudhari
Professor
nsc@iiti.ac.in

Dr. Narendra S. Chaudhari is with Indian Institute of Technology, Indore since Aug 2009 as a Professor of Computer Science and Engineering. He was Vice Chancellor of Uttarakhand Technical University (UTU), Dehradun from Jan.2019 to Mar.2021. He had been Director of Visvesvaraya National Institute of Technology (VNIT) Nagpur (M.S.) since June 2013 till June 2018 (five year term). In VNIT Nagpur, he promoted institute-wide research with multi-disciplinary projects, successfully addressed issues about nurturing human resources, introduced student mentorship program, involvement of alumni for entrepreneurship amongst students and promoted international collaborations and innovation culture. He initiated innovation Centre at VNIT Nagpur and provided leadership for product development that resulted in patents and technology transfer for engineering products.

He had additional charge of Director of Maulana Azad National Institute of Technology (MANIT), Bhopal from March 2016 to May 2017. During 2016-2017, he provided leadership for technical education at national level as: (i) Chairman, Central Regional Committee, AICTE, MHRD, Govt. of India, and, (ii) Co-convener and secretary, standing council of NITs, MHRD, Govt. of India. Since Sept 2010 to June 2013, he was Dean - Research and Development (Dean - R&D), IIT Indore, and in this duration he has sown seeds of research culture in IIT Indore, which has now shown results in 2018 with IIT Indore surpassing all old IITs in Times Higher Education World University Rankings 2019 as the second-best World University in India (next to IISc, Bangalore). Since 2001 to July 2009, he was with the School of Computer Engineering, Nanyang Technological University (NTU), Singapore. In NTU Singapore, he was Coordinator, International Exchange Program, and Dy. Director, GameLAB, the lab which initiated entertainment computing in Singapore. From 1990 to 2001, he was Professor of Computer Science in M.Sc. DRDO Program, Ministry of Defense (Govt. of India) at Devi Ahilya University, Indore and from 1988 to 1990, he was a Reader in M.Sc. DRDO Program, Ministry of Defense (Govt. of India) at Devi Ahilya University, Indore. As a Dean, Faculty of Engineering Sciences, Devi Ahilya Vishwavidyalaya (DAVV), Indore, in 1995-1998, he initiated Institute of Engineering and Technology that is now leading Engineering institute in central India.

Narendra has represented India in year 2015 and 2016 as part of six-member academic delegation accompanying with Honourable President of India in Sweden, Belarus and P.R. China.Narendra has represented India for formation of BRICS-Network University (NU) at Yekaterinburg, Russia held on 06-09 April, 2016. He was a memberof FICCI's higher education delegation to Germany, France and Netherlands for the duration of 22-27 June 2015.

Narendra has completed his undergraduate, graduate, and doctoral studies at Indian Institute of Technology (IIT), Mumbai, India, in 1981, 1983, and 1988 respectively. After his Bachelor's (B.Tech.) degree (First Class with distinction) in Electrical Engg., he had the exposure to industrial experience in the areas of electronics controllers (in Larson and Toubro, Mumbai) as well as software development (in Tata Consultancy Services, Mumbai). Since 1988, he was involved in graduate level training for the defense scientists (Ministry of Defense, Govt. of India) in the area of Computer Science till 1999. Subsequently, he was a visiting faculty member in Southern Cross University, NSW (Australia), and on another visiting assignment with Freie University at, Berlin (Germany) in 2000.

Narendra has shouldered many senior level administrative positions in universities in India as well as abroad. A few notable assignments include:

(I) Vice Chancellor, Uttarakhand Technical University (UTU), Dehradun (state govt university) since Jan 2019 to Mar.2021.

(ii) Director, Visvesvaraya National Institute of Technology (VNIT) Nagpur (M.S.) since June 2013 till June 2018.

(iii) Director, Maulana Azad National Institute of Technology (MANIT), Bhopal since March 2016 to May 2017.

(iv) Chairman – Central Regional Committee, All India Council for Technical Education (AICTE), MHRD, Govt of India, since March 2016 till June 2017.

(v) Chairman – Board of Governors, Government Engineering College, Chandrapur (M.S.) India since Nov. 2015 till Nov 2018.

(vi) Mentor Director, Indian Institute of Information Technology (IIIT), Nagpur since March 2016 till June 2018.

(vii) Member- Board of Governors of IIIT Nagpur, till June 2018.

(viii) Co-Convenor and Secretary, Standing Committee of Council of NITs: 14 July 2016 – June 2018.

(ix) Member - Board of Governors of IIT Indore (2010-2013).

(x) Member - Executive Council, Devi Ahilya University, Indore.

(xi) Coordinator - International Exchange Program, Nanyang Technological University, Singapore.

(xii) Deputy Director - Game LAB, Nanyang Technological University, Singapore.

(xiii) Dean - Faculty of Engineering Sciences, Devi Ahilya University, Indore.

(xiv) Dean - Research and Development, Indian Institute of Technology (IIT) Indore.

Narendra's significant research contributions are in the areas of Network Security and Mobile Computing, machine learning, game AI, Novel Neural Network Models, Context Free Grammar Parsing, Optimization, and Graph Isomorphism Problem. Some of his important contributions are: (i) Authentication Protocols and Security Mechanisms for Cellular Networks, (ii) generalization of notion of alignment in bioinformatics sequences to fuzzy similarity and its usage for identification of Context Free structure in languages, (iii) rerouting strategies in Multi-Protocol Label Switching (MPLS) networks, (iv) applications of soft-computing techniques like genetic algorithms for cutting stock problems, and for credit risk estimation, (v) novel neural network models for protein secondary structure prediction, (v) specialized binary neural network structures, and (vi) implementation of interior point algorithms. He has delivered invited talks and presented his research results in several countries like America, Australia, Canada, Germany, Hungary, Japan, United Kingdom, etc. A few institutes where he has given talks on his research includes Massachusetts Institute of Technology (MIT) USA, Nagoya Institute of Technology (NIT), Nagoya, Japan, Manchester Metropolitan University (MMU), Manchester (U.K.), Beijing Normal University (BNU), Beijing (P.R. China), etc.

Narendra has supervised more than fourty three doctoral students and published more than 380 papers in Journals and Conferences. He has successfully completed eight R&D Projects funded by DST, UGC, AICTE, MHRD etc. He has been a reviewer for DST and UGC projects. He has also contributed collaborative Research Work on other pilot projects on Computing techniques and Industry Interaction funded by ST-Engg, DSTA and A*STAR etc. in Singapore.

Narendra has supervised more than fourty doctoral students and published more than three hundred eighty papers. Narendra has represented India in year 2015 and 2016 as part of academic delegation accompanying with Honorable President of India in Sweden, Belarus and P.R. China. In 2017, here presented India for the formation of BRICS Network University. In Sept. 2017, he visited St. Petersburg Mining University where he initiated India's collaborations with that University in Russia.

Narendra is Fellow of the Institution of Electronics and Tele communication Engineers (IETE) (India), Senior member of Computer Society of India, Senior Member of IEEE, USA, Member of Indian Mathematical Society (IMS), Member of Cryptology Research Society of India (CRSI), and member of many other professional societies. From 2015 to 2017, Narendra had been Chairman, IEEE-MP Subsection and Computer Society of India Nagpur Chapter. Currently, heis President of Indian Academy of Mathematics, Indore.

PUBLICATIONS by Narendra S. Chaudhari

- Number of Books published / under publication : 12
- Number of Ph.D. guided: Completed : 43
- Number of M.Tech. dissertations guided : >80

Some Journal Papers :

(A) (in years 2020, 2021):

1. Shubham Gupta, Balu L Parne, Narendra S Chaudhari, "ISAG: IoT-enabled and Secrecy Aware Group-based handover scheme for e-health services in M2M communication network", Future Generation Computer Systems, Vol 125, pp. 168-187 North-Holland, Elsevier B.V. https://doi.org/10.1016/j.future.2021.06.038 (available online on 25th June 2021, scheduled for publication in Dec. 2021 issue).
2. Sneha Kanchan, Garima Singh, and Narendra S. Chaudhari, "SPSR-VCP: Secure and Privacy preserving Sign Recryption in Vehicular Cyber Physical systems", Journal of Ambient Intelligence and Humanized Computing (Springer Verlag, Berlin Heidelburg) 3 388-411, (published: Mar.02, 2021).
3. Nikhil B. Khandare and Narendra S. Chaudhari, "Secure and Location Privacy in Geographical Data with Electronic Codebook mode-advanced encryption standard," Int. Jour. Vehicle Information and Communication System, Inderscience Publishers, https://doi.org/10.1504/IJVICS.2021.113484, Vol.6, No.1, pp. 22-39 (Online on 08 Mar. 2021).
4. Prakash Chandra Sharma, and Narendra S. Chaudhari, "A Tree Based Novel Approach for Graph Coloring Problem using Maximal Independent Set", Wireless Personal Communications, Vol. 110, N0. 3 pp. 1143-1155 (Mar. 2020).
5. Sneha Kanchan, G.Singh, Narendra S. Chaudhari, "EASPSC: Efficient authentication of SignRecryption protocol using shareable clouds in VANET groups", Peer-to-Peer Networking and Applications, Vol. 13 No. 1, pp. 388-411. (Springer).https://doi.org/10.1007/s12083-019-00789-1 (Jan. 2020).

(B) Earlier: duration 2009 to 2012, some journal papers with IIT Indore affiliation):

6. Mohit Gupta and Narendra S. Chaudhari, "Anonymous Roaming Authentication Protocol for wireless network with backward unlinkability, exculpability and efficient revocation check", Journal of Ambient Intelligence and Humanized Computing, Vol 10, No. 11 pp 4491-4501 Weblink: https://doi.org/10.1007/s12652-018-1131-6 (01 Nov. 2019).
7. Neetesh Saxena, King Hwang Raymond Choo, and Narendra S. Chaudhari, "BAS-VAS: A Novel Secure Protocol for Value Added Service Delivery to Mobile Devices," IEEE Transactions on

Information Forensics & Security, Vol 15, pp. 1470-1485https://ieeexplore.ieee.org/document/8274977 /metrics#metrics (16 pages) (16 Sept. 2019).

8. Balu L. Parne, Shubham Gupta and Narendra S. Chaudhari, "PSE-AKA: Performance and security enhanced authentication key agreement protocol for IoT enabled LTE/LTE-A networks", Peer-to-Peer Netw. Appl. (Springer) (online on 13thJuly, 2019) 12: 1156. https://doi.org/10.1007/s12083-019-00785, Volume 12, Issue 5, pp1156–1177,(Sept. 2019).
9. Bhosale R. S., and Narendra S. Chaudhari, "Accelerating Speech Recognition System by Adam optimization and CNN for Real Time System using GPU," International Journal of Control and Automation, Vol. 12, No. 4, pp. 11 – 19, http://sersc.org/journals/index.php/IJCA/article/view/231.
10. Robin Sigh Bhadoria, and Narendra S. Chaudhari, "Pragmatic Sensory Data Semantics With Service-Oriented Computing", Journal of Organizational and End User Computing (JOEUC) IGI Global, Vol. 31, No. 2, pp. 22-36, DOI: 10.4018/JOEUC.2019040102 (2019).
11. Shubham Gupta, Balu L. Parne, & Narendra S. Chaudhari, "PSEH: A provably secure and efficient handover AKA protocol in LTE/LTE-A network," Peer-to-Peer Networking and Applications (Springer) ((published online 22 Dec 2018). https://doi.org/10.1007/s12083-018-0703-8, Volume 12, Issue 4, pp 989–1011 pp. 1-23 (July 2019).
12. Shubham Gupta, Balu L. Parne, and Narendra S. Chaudhari, "SRGH: A secure and robust group-based handover AKA protocol for MTC in LTE-A networks", International Journal of Communication Systems, Vol 32, Issue 8 pp. 34-39 (May, 2019).
13. Sneha Kanchan, Garima Singh, Narendra Chaudhari, "SAPSC: SignRecrypting Authentication Protocol using Shareable Clouds in VANET Groups", IET Intelligent Transport Systems, Vol. 13, No. 9, pp. 1447-1460 (May, 2019).
14. Mohit Gupta, and Narendra S. Chaudhari, "Anonymous roaming authentication protocol for wireless network with backward unlinkability and natural revocation", Annals of Telecommunications (Springer), https://doi.org/10.1007/s12243-018-0668-x, Volume 74, Issue 3–4, pp 175–184 (April 2019)
15. Robin Singh Bhadoria, and Narendra S Chaudhari, "Pragmatic sensory data semantics with service-oriented computing", Journal of Organizational and End-User Computing (JOEUC), IGI Global Publishing, PA, USA, Vol 31, No. 2, pp. 22-36 (01 April, 2019).
16. Sheha Kanchan, Narendra S. Chaudhari, "Signcrypting the Group Signature with Non-transitive Proxy Re-encryption in VANET," In: Sa Pankaj Kumar., Bakshi S., Hatzilygeroudis I., Sahoo M. (eds) Recent Findings in Intelligent Computing Techniques. Advances in Intelligent Systems and Computing, (AISC)vol 707 pp. 15-23. DOI https://doi.org/10.1007/978-981-10-8639-7_2, print ISBN 978-981-10-8638-0, Online ISBN 978-981-10-8639-7 Springer Nsture Singapore, (published online 04 Nov. 2018) (2019)
17. Mohit Gupta, Narendra S. Chaudhari, "Anonymous two factor authentication protocol for roaming service in global mobility network with security beyond traditional limit", Ad Hoc Networks, (Elsevier) Vol 84 pp. 56-67 (Mar. 2019).
18. Sneha Kanchan, Narendra S. Chaudhari, "SRCPR: SignReCrypting Proxy Re-signature in secure VANET Groups", IEEE Access, Vol. 6, pp. 59282-59295 (02 Sept 2018)
19. Shubham Gupta, Balu L. Parne and Narendra S. Chaudhari, "A Proxy Signature based Efficient and Robust Handover AKA Protocol for LTE/LTE-A Networks", Wireless Personal Communications, Vol

103, No. 3 pp. 2317-2352, (SPRINGER, DOI: 10.1007/s11277-018-5912-1 (ISSN: 0929-6212, Impact factor: 1.20) (August, 2018).

Dr. Abhishek Srivastava

Associate Professor
asrivastava@iiti.ac.in

PhD : University of Alberta, Canada

Previous Employment: Assistant Professor, Rose-Hulman Institute of Technology, USA).

Statement of Research Interests

Abhishek's group has been involved in research on service-oriented systems most commonly realised through web-services. More recently, the group has been interested in applying these ideas in the realm of Internet of Things. The ideas explored include coming up with technology agnostic solutions for seamlessly linking heterogeneous IoT deployments across domains. Further, the group is also delving into utilising Machine Learning adapted for constrained environments to effectively make sense of the huge amounts of data that emanate from the vast network of IoT deployments.

Broad research area: Web-Services, Ubiquitous Computing, Cyber-Physical Systems

Projects active during April 2020-March 2021:

- Title: Transnational Partnership for Excellent Research and Education in Disruptive Technologies for a Resilient Future

  Duration: 2020-23

  Funding Agency: SERB
- Title: Use of Hidden Markov Models to Effectively Assess Rumours on Social Networks

  Duration: 2020-23

  Funding Agency: The Research Council of Norway
- Title: Use of Machine Learning Techniques for Improved Surveillance of the Melghat Tiger Reserve

  Duration: 2020-22

  Funding Agency: DeFries-Bajpai Foundation, USA
- Title: Design and Development of Large-Scale Ambient Energy Harvesting Wireless Networks (LargEWiN)

Duration: 2019-22

Funding Agency: BRICS Multilateral Research and Development Projects

Journal Articles Published:

Dr. Aruna Tiwari

Associate Professor
artiwari@iiti.ac.in

Dr. Aruna Tiwari (PhD.: RGPV Bhopal) is an Associate Professor. She works in the areas of Artificial Intelligence, machine learning, soft-computing, Data mining and frameworks which are able to perform learning by handling real-life ambiguous situations. Related to several applications to bioinformatics, medical diagnosis. She actively collaborates with other research and academic institutions such as C-DAC Pune, CSIR-CEERI Pilani, Indian Institute of Soybean Research Indore, IIT Delhi and York University UK. Software Industries: Smarg Technologies & SRS ValuTech Ltd.

Previous Employment:

- Assistant Professor, Department of Computer Science and Engineering, IIT Indore (2012-2017)
- Associate Professor in Shri Govindaram Sakseria Instt. of Technology & Science, Indore (MP) (2008-2012)
- Reader in Shri Govindaram Sakseria Instt. of Technology & Science, Indore (2005-2008)
- Lecturer in Shri Govindaram Sakseria Instt. of Technology & Science, Indore (MP) (2001-2005)
- Lecturer in Shri Vaishanav Instt. of Tech. & Sc., Indore (MP) (1997-2001)

Statement of Research Interests: Soft computing Techniques, Neural Network Learning Algorithms, Data Mining

Broad research area: Machine Learning, Artificial Intelligence

Research Highlights:

- The research group under Dr. Aruna Tiwari, Associate Professor, Indian Institute of Technology Indore, in collaboration with ICAR-Indian Institute of Soybean Research (IISR), Indore develops the scalable machine learning algorithm for handling huge genome data. For that, the Soybean genome data is collected from ICAR-IISR, Indore. The research lab equipped with Apache Spark clusters.
- Kernel-based Learning in the absence of counterexamples: One Class Classification.
- System Evolution Analytics: Data mining and learning of Complex and Big Evolving Systems.
- Investigations in Quantum based Neural Network Learning Algorithms.

- Optimizing program structures for classifiers using Genetic Programming.
- Investigation in Tree base Genetic Programming for Data Classification.
- Methodologies for Client Oriented Discovery and Mining in Web Service Environment.
- Multilabel Classification using non-iterative and Deep Learning based approaches.
- Action Recognition in Video using Generative Adversarial Network.

Patents (filled and awarded):

- Aruna Tiwari, Ashok PencilyPoothiyat, Kunal Chaudhary, System and method for sign language gesture recognition, India, 1988/MUM/2015, 2015 (Awaiting)

Projects active during April 2020-March 2021:

- Title: Development of an Efficient Scalable Clustering Algorithms for Big Data and investigation of Integrated system for Protein Sequence Classification

  Duration: Three Years (Completed Dec 2020).

  Funding Agency: Council of Scientific and Industrial Research (CSIR), Delhi, Govt. of India.

  Brief Description: Development of efficient scalable fuzzy clustering algorithms for huge genome data and investigation of integrated system for Protein Sequence and SNP sequence.

- Title: Resource Constrained Artificial Intelligence: Design of Novel Algorithms for Action recognition using Generative Adversarial Networks.

  Duration: Three years (Started in Feb 2020)

  Funding Agency: The Ministry of Electronics and Information Technology (MeitY), Union Government of the Republic of India

  Brief Description: Design of Novel Algorithms for Action recognition using Generative Adversarial Networks.

- Title: A novel integrated scalable system for Protein sequence and SNP data analysis using clustering and classification

  Duration: Three Years (Started in March 2021)

  Funding Agency: Council of Scientific and Industrial Research (CSIR), Delhi, Govt. of India.

  Brief Description: Development of scalable system for Protein sequence and SNP data analysis using clustering and classification.

- Title: A Novel Scalable High-Performance Machine Learning Algorithms for NGS Analysis of Genomics Data at Exascale Level

  Duration: Two Years (Started in April 2021)

  Funding Agency: National Supercomputing Mission, HPC Applications Development Funded Research Project by DST in collaboration with the Ministry of Electronics and Information Technology (MeiTY).

  Brief Description: Development of a novel scalable High-Performance Machine Learning Algorithms for NGS Analysis of Genomics Data at Exascale Level

- Title: Mobility Project

  Duration: Three years (Approved in 2020)

  Funding Agency: Indo-Norwegian collaboration in intelligent offshore mechatronics systems (INMOST), Norwegian Research Council (RCN) under INTPART Scheme

Major Awards, Achievements, Recognitions:

- Dr. Aruna Tiwari organized pre-conference Expert Talk on Gender Issues in Science & Technology in Madhya Pradesh as convener MPVS-2021 on Oct 5, 2021.
- Dr. Aruna Tiwari invited for panel discussion C-DAC Technology Conclave in "Artificial Intelligence and Language Computing" on July 29, 2021.
- Represented India as an Artificial Intelligence expert in the Internationalist Podcast series on "Impact of the digital revolution on higher education", organized by the Association of Commonwealth Universities, UK on June 8, 2021.
- Got access of two Supercomputers under the National Supercomputing Mission (NSM) funds; PARAM SHAKTI from IITK and PARAM SIDHI from CDAC PUNE in May 2021
- Collaborating with IIT Delhi as a Rural Technology Action Group (RuTAG) member & working on the problem of "Mobile App development for Ground Water Management".
- External expert in RDC for a PhD thesis evaluation, MANIT, Bhopal, July 9, 2021.
- Appointed Moderator for MPPSC examination Feb 2021.
- Conducted Technical Education Quality Improvement Programme (TEQIP-3), MHRD 3-Days Short term Course on Recent Trends in Machine Learning and Soft-Computing from Dec 18 - Dec 20, 2020.
- Appointed examiner: Master Thesis evaluated for University of York UK, PhD Thesis evaluated/defense conducted of IIT, NIT (Nos. 3)
- Two PhDs Awarded, one in the area of one class classification another is in change mining. Scored overall grade A. Defense was over in May 2020. One PhD Thesis submitted in August 2021.
- Two MS research thesis Awarded. Two MS thesis submitted in August 2021.

Courses/Conferences/Workshops Organized:

- Recently organized a Workshop on High Performance Computing (HPC) in the Agriculture Domain under the National Supercomputing Mission (NSM) from Supercomputer Education and Research Centre (SERC) hosted by IIT Indore, ICAR-IISR Indore, and Mahindra University Hyderabad in collaboration with C-DAC Pune, IISC Bangalore, IIT Kharagpur from 14 July 2021 to 16 July 2021 in virtual mode.
- Organized 10th International Conference on Soft Computing for Problem Solving - SocProS 2020 (Unlocking Optimization Tools) jointly with Soft Computing Research Society, Delhi from Dec 18 - Dec 20, 2020 (virtual mode). -Editor of two Springer books for the proceedings of SocProS 2020
- Technical Education Quality Improvement Programme (TEQIP-3), MHRD 3-Days Short term Course on Recent Trends in Machine Learning and Soft-Computing from Dec 18 - Dec 20, 2020.

Any other Major Events/Development etc.:

- Proposed Special Session for the IEEE International Conf. on Fuzzy Systems 2021 (FUZZ-IEEE 2021), Luxembourg, Handling Uncertainty in Interpretable AI on "Scalable Incremental Fuzzy Learning Techniques for Big Data and Genome Sequence Analysis" from Jul 11-14, 2021.
- Two paper presented in IEEE-FUZZ 2021 (virtual mode) on July 14, 2021
- Keynote speaker on "International Conference on Paradigms of Communication, Computing and Data Sciences(PCCDS 2021)", Jointly Organized in Virtual mode with NIT Kurukshetra and Soft Computing Research Society May 7-9, 2021.

- Invited talk on "Virtual International Conference on Soft Computing, Optimization Theory and Applications (SCOTA 2021)" Organized & Sponsored by Department of Mathematics Birla Institute of Technology Mesra, Ranchi Jharkhand, INDIA, March 26-27, 2021.
- Expert talk on "Introduction to Artificial Intelligence and Computational Intelligence" in the Quality Improvement Program (QIP), AICTE on "1st Indian Workshop on Artificial Intelligence" (iWAI 2021), March 19-25, 2021orgainized by Department of Computer Science & Engineering, IIT Indore.
- Invited keynote speaker on "RTU TEQIP-III Sponsored, 3rd International Conference on Communication and Computational Technologies (ICCCT 2021)", Jointly Organized in Virtual Format by Rajasthan Institute of Engineering and Technology, Jaipur and Rajasthan Technical University Kota in Association with Soft Computing Research Society February 27-28, 2021.
- Invited to deliver a virtual talk as part of the celebration of International Women's Day 2021 on March 8, 2021 at Regional Science Centre, Bhopal.
- Expert talk on "Unsupervised Learning" in the TEQIP course on Machine Learning and Artificial Intelligence on Dec 24, 2020 at IIT Indore.
- Expert talk on "Machine Learning" in the QIP Sponsored Short-Term Course on Computational Methods in Signal Processing and Machine Learning, Dec 14-19, 2020 at IIT Indore.
- Expert talk in the Centre for Advanced Electronics, IIT Indore is organizing an NPIU/TEQIP-III Sponsored Faculty Training on Future Skill Technologies on "Internet of Things" from Dec 07-11, 2020.
- Expert talk on "Design of Kernel based One class classifier", 2020 IEEE Computational Intelligence Society Summer School on "Emerging Research Trends in Computational Intelligence: Theory and Applications" from Nov 26-30, 2020. & Session chair in session: PN Suganthan, NTU Singapore "Differential Evolution: Population Topologies, Ensemble Strategies and Adaptation.
- Expert Talk for FDP on Data Science and Intelligent Computing titled as "Artificial Intelligence: building foundation through data exploration, pre-processing and representation", Nov 21-25, 2020 at IIIT Naya Raipur.
- Expert talk on NPIU/TEQIP-III Sponsored Faculty Training on Future Skill Technologies on "Artificial Intelligence and Machine Learning" organized by the Department of Mathematics, Department of Computer Science & Engineering, and Department of Electrical Engineering, IIT Indore from Nov 20-27, 2020.
- Expert Talk on "Clustering Technique", AICTE Training and Learning (ATAL). And Academy Sponsored "Online Faculty Development Programme (FDP)" on "Artificial Intelligence" from Nov 16-20, 2020 at CSIR Advanced Materials and Processes Research Institute (AMPRI), Bhopal.
- Expert talk on "Introduction to AI and recent challenges" in the TEQIP-III Sponsored Short-Term Course on Artificial intelligence driven biomedical data analysis for disease diagnosis organized by Department of Electrical Engineering and Department of Mathematics, IIT Indore from Nov 05-10, 2020.
- Expert Talk on "Recent Trends in Data Science and Information Security" on 5 days Virtual Short Term Training Program from Jun 22-26, 2020 at Ramrao Adik Institute of Technology (RAIT), Navi Mumbai.
- Webinar on "Artificial Intelligence", Title: Computer Vision on Jun 6, 2020 at MCTE MHOW.
- Expert Talk on "Machine Learning in Bioinformatics" on Jan 30, 2020 at Pune University.

COVID Related Activities:

"Developed scalable algorithms have been tested on COVID-19 protein data"

COVID-19 (Coronavirus Disease-19), a disease caused by the SARS-CoV-2 virus, has been declared a pandemic by the World Health Organization on March 11, 2020. To solve a global problem of clustering of

COVID-19 genome, intelligent scalable machine learning techniques need to be developed to process and analyze important COVID-19 genome data by utilizing the super-computing facility. We have proposed a protein feature extraction approach named a Scalable Distributed Co-occurrence-based Probability-Specific Feature extraction approach (SDCPSF). We have built a model to preprocess the massive COVID-19 protein sequences using Apache Spark clusters. The preprocessed COVID-19 protein sequences are used as input to KSRSIO-FCM, a kernelized fuzzy clustering algorithm, which efficiently performs clustering of big data due to its in-memory cluster computing technique. The SDCPSF is applied on COVID-19 protein sequences for preprocessing, and then the KSRSIO-FCM algorithm is used to form the clusters of COVID-19 sequences. The proposed method results are investigated on COVID-19 protein sequences using KSRSIO-FCM in terms of the Silhouette index and Davies-Bouldin index.

Dr. Anirban Sengupta

Associate Professor
asengupt@iiti.ac.in

Dr. Anirban Sengupta is an Associate Professor in the Department of Computer Science and Engineering at Indian Institute of Technology (IIT) Indore. He has more than 242 publications including 11 Patents and 4 books. His is Fellow of IET, Fellow of British Computer Society, IEEE Distinguished Lecturer and IEEE Distinguished Visitor.

Major Awards and Honors

- Chair, IEEE CTSoc Security and Privacy Technical Committee.
- Board member, IEEE CTSoc Technical Committee.
- Ex-Officio Member, IEEE Consumer Electronics Society Board of Governors, 2020.
- ACM Honor: Selected to feature in 'Researcher Spotlight' of prestigious ACM SIGDA (Special Interest Group on Design Automation) Newsletter by Intel for the Jan 2020 issue for my contributions on "Hardware Security".
- Awarded 'IEEE Chester Sall Memorial Consumer Electronics Award - in 2020 for outstanding contribution on "DSP Design Protection in CE through Algorithmic Transformation Based Structural Obfuscation".
- Awarded 'IEEE Consumer Electronics Society' Certificate of Appreciation 'for outstanding services as TPC Chair of 9th IEEE Int'l Conference on Consumer Electronics (ICCE) Berlin, Germany,2019.
- Awarded/Elected Fellow of The Institution of Engineering and Technology (IET)- since 2019.
- Awarded/Elected Fellow of British Computer Society (BCS)-since 2019.
- Awarded IEEE Distinguished Visitor by IEEE Computer Society -(2019-2021).
- Awarded IEEE Distinguished Lecturer by IEEE Consumer Electronics Society -(2017-2019).
- Elected' Chairman of IEEE Computer Society Technical Committee on VLSI(TC-VLSI)' fora term from Oct 2018-2020.
- Awarded' Renowned Alumni Award' byJIS/ Techno India, West Bengal in 2020.
- Awarded' IEEE Consumer Electronics Society Service Award' for serving as Conference Chair of 37th IEEE Int'l Conference on Consumer Electronics (ICCE), Las Vegas, 2019.
- Awarded IEEE Consumer Electronics Society 'Outstanding Editor Award' for" Outstanding Contributions to the Hardware Section of the IEEE Consumer Electronics Magazine".
- Awarded IEEE Consumer Electronics Society' Best Research Award 2018' for outstanding contribution on "Intellectual Property-Based.

Loss less Image Compression for Camera Systems" in IEEECEM.

- Awarded' IEEE Consumer Electronics Society Best Paper Award 2019' in IEEECE Society's Flagship Conference- 37th IEEE Int'l Conference on Consumer Electronics (ICCE), LV.

Professional Leadership Role in Scientific Community - Editors

- Deputy Editor-in-Chief: IET Computers and Digital Techniques (2018 - Present).

Dr. Surya Prakash
Associate Professor
surya@iiti.ac.in

Dr. Surya Prakash (PhD: IIT Kanpur) is an Associate Professor. His field of research includes Biometrics, Pattern Recognition, Image Processing, Computer Vision, Machine Learning, Deep Learning, Printer Forensics and Medical Image Processing. He is currently working on the development of efficient and secure biometric techniques for human recognition using face, ear and fingerprint data. His efforts are also towards development of technologies for securing biometric templates, particularly for fingerprint based biometric systems. He is also currently working in the domain of printer forensics and exploring the usage of machine learning in securing the interface between the printers and the human. He is also utilizing the artificial intelligence and the machine learning technologies in the domain of medical image processing and automatic diagnostics.

Research Highlights:

- Biometric template security
- Human recognition using 2D and 3D data of face and ear
- Image quality assessment and enhancement
- Printer forensics
- Medical image processing and automatic diagnostics

- Technical Program Committee Member 2020 IDRBT Doctoral Colloquium (IDC 2017), 10th Colloquium, December 7-8, 2020, IDRBT, Hyderabad, India.
- Technical Program Committee and International Advisory Board Member of 2020 5th IAPR International Conference on Computer Vision and Image Processing, December 4-6, 2020, IIIT Allahabad, India. https://cvip2020.iiita.ac.in/index.php
- Session Chair in 2020 International Conference on Intelligent Systems, Data Science and Computing (ICIDC-2020), November 27-28, 2020, ROOEM Nagpur, INDIA. http://icidc.rknec.edu/Default.aspx
- Program Committee member of 2020 16th International Conference on Intelligent Computing (ICIC 2020), October 2-5, 2020, Bari, Italy. http://ic-ic.tongji.edu.cn/2020/
- Member of Preliminary Committee for evaluation of applications for various programmes/fellowships and grants for the year 2020-21 of Shastri Indo-Canadian Institute (SICI), August-September, 2020
- Technical Program Committee member of 2020 12th International Conference on Communication Software and Networks (ICCSN 2020), Chongqing University, Chongqing, China, June 12-15, 2020. http://www.iccsn.org/committee.html

Events/Seminars/Conferences Organized:

TEQIP-III Sponsored FDP on Artificial Intelligence and Machine Learning (Course Coordinators: Dr. Puneet Gupta, Dr. Surya Prakash and Dr. Vivek Kanhangad), December 14-23, 2020.

Dr. Somnath Dey
Associate Professor
somnathd@iiti.ac.in

PhD : Indian Institute of Technology Kharagpur

Previous Employment (includes post-doctoral experience):

Assistant Professor, Indian Institute of Technology Indore, [August 2013-August 2019]

Visiting Assistant Professor, Indian Institute of Technology Indore [January 2013-August 2013]

Statement of Research Interests:

Fingerprint spoof detection, face presentation attack detection, cancellable biometric security, biometric MasterPrint mitigation.

Broad research area: Biometric security

Research Highlights:

Partial fingerprint identification systems recognize an individual when the sensor size has a small form factor in accepting a full fingerprint. These systems also facilitate forensic investigators for latent fingerprint identification collected from a crime scene. However, the distinctive features within a partial fingerprint are significantly less. Hence, the uniqueness of a partial fingerprint cannot be assured, leading to the possibility that a single partial fingerprint may identify multiple enrolled users. A MasterPrint is a partial fingerprint identifying at least 4% distinct individuals from the enrolled template database. An adversary can exploit such a MasterPrint in convicting an innocent in a criminal case. A novel partial fingerprint identification method is proposed to address the vulnerability. The method extracts features from binarized and thinned partial fingerprint over eight axes emerging from a reference minutia. The results for partial datasets cropped from standard bench-marked dataset, showed remarkable performance in terms of higher identification rate while generating fewer MasterPrints using the proposed method.

Projects active during April 2020-March 2021:

- Title: Design and Development of Efficient Cancelable Template Generation Methods for Fingerprint and Iris Biometrics

  Duration: 2017-2020

  Funding Agency: SERB-DST

  Brief Description: In this project, two novel techniques are developed for generating cancelable templates for iris and fingerprint biometrics. In addition, a novel fusion scheme is proposed to combine two cancelable templates generated from iris and fingerprint biometrics.

Major Awards, Achievements, Recognitiations:

- Technical Program Committee and International Advisory Board Member of 2020 5th IAPR International Conference on Computer Vision and Image Processing, December 4-6, 2020, IIIT Allahabad, India. https://cvip2020.iiita.ac.in/index.php
- Technical Program Committee Member 2020 IDRBT Doctoral Colloquium (IDC 2017), 10th Colloquium, December 7-8, 2020, IDRBT, Hyderabad, India.

Dr. Kapil Ahuja
Associate Professor
kahuja@iiti.ac.in

Dr. Kapil Ahuja received his Ph.D. degree from Virginia Tech, Blacksburg, VA, USA. He received his Postdoctoral training at the Max Planck Institute, Magdeburg, Germany.

He is currently an Associate Professor in Computer Science and Engineering with IIT Indore, India. In the past, he was a Visiting Professor at TU Braunschweig, Germany, TU Dresden, Germany, and Sandia National Labs, USA. He is working in Mathematics of Data Science and Simulation (MODSS).

Academic Associations with other Institutions (Affiliate/Adjunct/Visiting posts):

- Visiting Professor, TU Braunschweig (2014)
- Visiting Professor, TU Dresden (2017, 2018)
- Visiting Professor, Sandia National Labs (2018)

Research Highlights:

This year's most important research breakthrough has been development of novel state-of-the art image steganography schemes. We achieved substantially higher embedding capacities than all competing techniques while preserving the visual quality of the stego-image (the image obtained after embedding the secret data into the cover image is called the stego-image). We also ensured that our schemes are resistant to steganographic attacks

Selected Publications:

- R. Agrawal and K. Ahuja. CSIS: Compressed Sensing based Enhanced-Embedding Capacity Image Steganography Scheme. IET Image Processing, WILEY, vol. 15, pp. 1909 - 1925, 2021.
- C. Gautam, A. Tiwari, S. Suresh, and K. Ahuja. Adaptive Online Learning with Regularized Kernel for One-Class Classification. IEEE Transactions on Systems, Man, and Cybernetics: Systems, vol. 51 (3), pp. 1917 – 1932, 2021.
- P. C. Mane, K. Ahuja, and N. Krishnamurthy. Stability, Efficiency, and Contentedness of Social Storage Networks. Annals of Operations Research, Springer, vol. 287, pp. 811 - 842, 2020.

Research Projects:

- IIT Indore and LU Hannover Partnership in Physics, Chemistry, Bio Science & Computational Science (Funded by DAAD, Germany).
- Biorthogonal Krylov Subspace Bases and Short Recurrences (Funded by SERB, DST, GOI).
- A Digital Narratology of Technology as Literary Actors and Artefacts of Settings in Indian English Novels (Funded by SPARC, GOI).

A. Broad Research Area:

Dr. Kapil Ahuja works in Mathematics of Data Science and Simulation (MODSS). Specifically in Machine Learning, Network Science, Algorithms, Optimization, Game Theory, and Numerical Methods.

B. Awards and Achievements:

- Dr. Kapil Ahuja's two PhD students and one MS student successfully defended their respective thesis and graduated (Mar 2021, Dec 2020, and May 2020).
- Dr. Kapil Ahuja gave an invited talk at 1st Indian Workshop on Artificial Intelligence under QIP-AICTE Program, IIT Indore (Mar 2021).

- Dr. Kapil Ahuja is appointed Editor for IETE Journal of Research (Taylor & Francis; IF 2.33; Feb 2021).
- Dr. Kapil Ahuja is invited as a panelist for the Indo – German Research Day organized by DWIH, New Delhi (Dec 2020).
- Dr. Kapil Ahuja published 7 journal papers at prestigious places in 2020-2021..

Publications (Includes Journal Articles, Books and Book Chapters):

Events/ Seminars Organized:

- 10th International Conference on Soft Computing for Problem Solving (Dec 2020).
- TEQIP-3 short term course on Machine Learning (Dec 2020).
- 3rd All IITs International Relations Conclave (Sep 2020).

Projects active during April 2020-March 2021:

- Title – IIT Indore and LU Hannover Partnership in Physics, Chemistry, Bio Science & Computational Science.

  Duration – 2019-2023.

  Funding Agency – A New Passage to India scheme of DAAD, Germany.

  Brief Description – PI from Indian side; 6 Indian and 9 German academicians.
- Title – Biorthogonal Krylov Subspace Bases and Short Recurrences.

  Duration – 2018-2021

  Funding Agency – MATRICS Scheme of Department of Science and Technology (DST-SERB), India.

  Brief Description – PI; no other investigator.
- Title – A Digital Narratology of Technology as Literary Actors and Artefacts of Settings in Indian English Novels.

  Duration – Originally 2019-2020; Extended up to 2022.

  Funding Agency – SPARC Scheme of Ministry of Education, India.

  Brief Description – Co-PI from Indian side; 2 Indian and 2 UK academicians.

Dr. Gourinath Banda
Associate Professor
gourinath@iiti.ac.in

PhD: Roskilde University, Denmark, 2010

Previous Employment (includes post-doctoral experience): Chief Engineer, Advanced Technology Group, Samsung India

Statement of Research Interests

a. Broad research area:

- Embedded Systems
- Cyber Physical Systems' Design and Verification
- Runtime Systems for Cyber Physical System
- Real-time Kernels
- Open source software
- Automomous vehicles algorithms and safety engineering

b. Research Highlights:

- Developed Hard real-time kernel HARTEX in under 10K code foot print
- Generic verification frameworks for high-level modelling formalisms for reactive cyber physical systems
- Confluence modalities for out of the sync interactions in mobile UIs
- Developed the OneIOT protocol V1 and V2
- OEDR development for Autonomous Vehicles
- Algorithms for autonomous vehicles and support systems for traffic scheduling
- Formal verification of algorithms for Autonomous vehicles

  Patents: Patent granted in the important area of Electrical Energy conservation "System for Electrical Energy Conservation" applicable to charging infrastructure

Major Awards, Achievements, Recognitions:

- VIGYAN VRITIKA grant awarded for conducting internship on "Satellite control simulation" topic
- Realtime kernel HARSARK-RS released on GitHub
- Certified in Blockchain Tech
- HARSARK-RS v1 multiform released on GitHub.

Projects:

- IMPRINT 2C: "Robotic System for Stealth Surveillance"
- VIGYAN VRITIKA grant awarded for conducting internship on "Satellite control simulation" topic

Courses/Conferences/Workshops Organized:

Delivered a QIP course in "Blockchain Foundations and Solution Architectures " March 2021

Journal articles published:

A Quadruped Robotic System based on PSA with Vertical Wall Climbing Capabilities.

Dr. Neminath Hubballi
Associate Professor
neminath@iiti.ac.in

Dr. Neminath Hubballi (PhD.: IIT Guwahati) is an Associate Professor in the department of Computer Science and Engineering. His research group works in Network Security, System Security and Fault Detection in Networks. He also leads Indo-Norway research project on Digital Forensics. Prior to joining IIT Indore, he has worked for Corporate Research Centers of Hewlett-Packard, Infosys, and Samsung where his main research was focused on distributed computing and mobile security. He was also a Visiting Professor in Norwegian University of Science and Technology in the year 2019. He has been awarded with DUO-India fellowship 2020 to visit City University of London for collaborative research work.

PhD: Indian Institute of Technology Guwahati

Previous Employment: Hewlet-Packard, Infosys Lab Samsung R&D Academic associations with other institutions (Affiliate/Adjunct/Visitingposts): Visiting Professor at Norwegian University of Science and Technology.

Statement of Research InterestsL

a. **Broad research area:** Network Security, System Security, Fault Detection in Networks, Software Defined Networking

b **Research Highlights:** Our research group works in the broad area of cyber security focusing on identification of exploitable vulnerabilities and developing defense techniques. Our recent works have been in the following areas

- Fault Detection in Networks: Our research group has been working on developing methods for monitoring Computer Networks for identifying and localizing faults. This is done with active measurements with periodic test queries sent to various network elements to assess their health status.
- Performance Optimization of Deep Packet Inspection: Deep Packet Inspection has applications in providing Quality of Service to various applications and cyber security related monitoring. This is one of the most computationally demanding operation. Our research group has been working on developing methods to improve operational speed of Deep Packet Inspection. This is achieved by minimizing the quantum of content screened and implementing Deep Packet Inspection methods on hardware platforms.
- Anomaly Detection: Despite various security methods adopted for protecting networked systems and applications, cyber-attacks are inevitable. Anomaly detection methods help in detecting any abnormal behaviors observed by monitoring various events and network traffic. Our group has developed such methods to detect anomalies against different applications like Secure Socket Shell, Dynamic Host Configuration Protocol and Hypertext Transfer Protocol.
- Routing Management in Software Defined Networking: Software Defined Networks (SDN) separate the control and data planes by implementing the control plane in software. It gives the convenience of effective network management. Our group works in optimizing routing mechanisms in the SDN.

Awards and Achievements:

- DUO-India 2020 fellowship to visit City University of London.
- Pratibha Khandait PhD student received TCS research fellowship 2020-2021

Patents, Publications, Events and Seminars

Publications (includes journal articles, books, and book chapters) Upto a selection of best three

- Nikhil Tripathi and Neminath Hubballi, "Application Layer Denial-of-Service (DoS) Attacks and Defense Mechanisms: A Survey", ACM Computing Surveys, Volume 54, Issue 4, July 2021

- Nikhil Tripathi and NeminathHubballi,"Preventing Clock Synchronization in NTP Broadcast Mode", Computers & Security Journal, Elsevier, Volume 102, March 2021
- Pratibha Khandait, Namrata Tiwari and Neminath Hubballi, "Who is Trying to Compromise Your SSH Server? An Analysis of Authentication Logs and Detection of Bruteforce Attacks", The 4th International Workshop on Networking Women In Distributed Computing And Networks (NWDCN 2021) held along with ICDCN 2021

Courses/Conferences/Workshops Organized:

- TPC chair of IEEE Advanced Networks and Telecommunication Systems 2021.
- Conducted a TEQIP sponsored course on "Recent Advances in Network Security and Blockchain Technology", Dec 2020
- Conducted a QIP sponsored course on "Recent Advances in Network Security and Blockchain Technology", Dec 2020

Projects Active during 2020-2021

- Title: Digital Forensic Knowledge Integration and Intelligence (DIREKT-Intel) Sponsoring Agency: SPARC Period:2019-2022
- Brief Description: In this project we propose techniques for digital evidence collection from different sources which are admissible in a court of law. The work also involves correlating the evidence collected for coherent view.
- Title: DPIAccelerator: Hardware Implementation of Deep Packet Inspection
- Sponsoring Agency: CSIR
- Period:2020-2023
- Brief Description: In this project we propose methods to perform Deep Packet Inspection using hardware for custom applications like network traffic classification, QoS, and security monitoring.

Dr. Bodhisatwa Mazumdar
Assistant Professor
bodhisatwa@iiti.ac.in

Dr. Bodhisatwa Mazumdar (PhD.: IIT Kharagpur) is an Assistant Professor at CSE. His primary research interest is in the area of hardware security with particular emphasis on side-channel vulnerabilities of cryptographic algorithms and implementations and IC logic locking techniques. The Cryptography and Hardware Security research group is presently involved in determining power analysis-based and fault analysis-based side-channel vulnerabilities of lightweight cryptographic implementation. Further, the research group focuses on different security aspects of present day logic synthesis techniques.

Research Highlights:

Our research group has pinpointed locations in Feistel block ciphers and lightweight cryptographic primitives that have increased vulnerabilities against fault analysis based attacks. The work is based on developing the entropy reduction model and persistent fault based models as increased fault based queries are made to such block ciphers. Further, approximation based vulnerabilities in the present-day logic locking techniques have been adopted as standard for protection against IC piracy and counterfeit production. The work has been published in IEEE Asian HOST and Springer SPACE conference and its extensive analysis is under consideration as a publication to Springer journal of Electronic testing. Prior to this work, we pinpointed side-channel vulnerabilities and removal attacks on conventional logic locking techniques.

Achievements:

- Elected as Working Group Member (WGM) in IEEE Standard 1413.1 for Selecting and Using Reliability Predictions Based on IEEE 1413, which provides a standard framework for the reliability prediction of hardware.
- Promoted to Voting Cum Working Group Member in IEEE Standard 1413.1 for Selecting and Using Reliability Predictions Based on IEEE 1413.
- Elected as Working Group Member (WGM) in IEEE 1624 Standard for Organizational Reliability and Capability.

Selected Publications

- Mahesh Joshi, Bodhisatwa Mazumdar, Somnath Dey, "A comprehensive security analysis of match-in-database fingerprint biometric system", Pattern Recognition Letters, 138: 247-266 (2020).
- Muhammad Yasin, Bodhisatwa Mazumdar, Ozgur Sinanoglu, Jeyavijayan Rajendran, "Removal Attacks on Logic Locking and Camouflaging Techniques", IEEE Transactions on Emerging Topics in Computing, 8(2): 517-532 (2020).

Dr. Puneet Gupta
Assistant Professor
puneet@iiti.ac.in

PhD: 2016, Department of Computer Science & Engineering,
Indian Institute of Technology Kanpur, Kanpur, UP, INDIA.

Previous Employment:

- Assistant Professor, Indian Institute of Technology Indore, Indore, MP, INDIA. [March 2019-Currently]
- Post-doctoral Researcher, Tampere University, Finland, [August 2018-Feb 2019]
- Scientist, TCS Innovation Labs, INDIA, [July 2016-August 2018]

Statement of Research Interests:

a. Broad research area:

- Artificial Intelligence, Deep Learning, Machine Learning, Computer Vision and Image Processing

b. Research Highlights

Developing techniques for following tasks:

- Face anti-spoofing and Deep-fake detection using human vital parameters
- Adversarial attacks and defences on well established Deep Learning systems pertaining to images, videos, biomedical applications, audio and text modalities.
- Currently supervising two PhD and three MS (Research) scholars. Also supervising several B.Tech projects.

Awards and Achievements:

- Served as session chair in MAI 2021.
- Reviewer of several reputed journals like IEEE transactions on cybernetics, Pattern Recognition, Digital Signal Processing, and so on.

Project approved:

- Title: Heart rate monitoring from non-contact face videos using Deep Learning

  Project Investigator: Dr. Puneet Gupta

  Sponsoring Agency: Science & Engineering Research Board (SERB)

  Duration: 2020-2022

  Funding Amount: INR 30,33,840

  Patents: K Maurya, R Hebbalaguppe, P Gupta, "Systems and methods for performing hand segmentation", US Patent App. 16/534,998, 2020

Publications (includes journal articles, books and book chapters) Upto a selection of best three:

- Puneet Gupta, Brojeshwar Bhowmick, Arpan Pal "MOMBAT: Heart Rate Monitoring from Face Video using Pulse Modeling and Bayesian Tracking", Computers in Biology and Medicine, Volume 121, 2020, Elsevier.
- Puneet Gupta, "MERASTC: Micro-expression Recognition using Effective Feature Encodings and 2D Convolutional Neural network." IEEE Transactions on Affective Computing, 2021, IEEE (In-Press).

Events/ Seminars organized:

- A TEQIP-III course entitled, "Deep Dive in Deep Vision" was organized in December 2020.
- A NPIU course on "Machine Learning" was organized in December 2020.

Dr. Nagendra Kumar
Assistant Professor
nagendra@iiti.ac.in

PhD : IIT Hyderabad, 2019

Previous Employment (includes post-doctoral experience) :

Institute for Infocomm Research (I2R), Agency for Science, Technology and Research (A*STAR), Singapore

Statement of Research Interests:

Dr. Nagendra Kumar is an Assistant Professor in the Department of Computer Science and Engineering at IIT Indore, India. His research interests are in Natural Language Processing, Social Network Analysis, Deep Learning, Artificial Intelligence, and Data Mining. He is currently working on a problem of Information Diffusion and Information Summarization in Social Networks.

Broad research area:

- Natural Language Processing
- Social Network Analysis
- Machine Learning
- Deep Learning
- Data Mining

Research Highlights:

- Fake News Detection
- Question-Answering
- Information Diffusion
- Semantic Text Matching
- Hashtag Recommendation

Major awards, achievements, recognitions:

- Technical Program Committee Member, 2020 IDRBT Doctoral Colloquium (IDC-2020), 10th Colloquium, December 7-8, 2020, IDRBT, Hyderabad, India.
- Technical Program Committee Member, 6th IEEE ICSC Workshop on Semantic Machine Learning (SML-2020), February 3-5, 2020, San Diego, CA, USA.

Courses/conferences/workshops organized:

1st Indian Workshop on Artificial Intelligence (iWAI 2021) During 19th to 25th March 2021 Under Quality Improvement Program (QIP), AICTE.

Journal/Conference Articles Published:

- Nagendra Kumar, Eshwanth Baskaran, Anand Konjengban, Manish Singh, Hashtag recommendation for short social media texts using word-embeddings and external knowledge, In Knowledge and Information Systems (KAIS), pp. 175-198, Springer, 2021.
- Nagendra Kumar, Jung-jae Kim, Shubhi Bansal, Semantic Text Matching using Transfer Learning and Deep Learning, In 17th International Conference on Machine Learning and Data Mining (MLDM), pp. 75-88, ibai-publishing, 2021.

Dr. Ranveer Singh
Assistant Professor
ranveer@iiti.ac.in

PhD : IIT Jodhpur

Previous Employment: Visiting Assistant Prof. IIT Dhanbad

Statement of Research Interests:

- Algorithmic Graph Theory
- Expanders and Ramanujan graphs

Broad research area: Spectral Graph Theory

Research Highlights: Expanders and Ramanujan graphs

Projects active during April 2020-March 2021:

- Title: Parametrized complexity of Matrix determinant and permanent

Duration: 5 Years

Funding Agency: DST

Brief Description: By definition, matrix determinant and permanent are two very similar quantities of a square matrix, but computationally they are extremely different. Matrix determinant is a polynomial-time solvable problem; that is, it is in class P. Whereas matrix permanent is a #P-complete problem. The question we will be mostly focusing on is to find some classes of matrices whose permanent can be expressed as the determinant of some polynomial-size matrix.

Courses/conferences/workshops organized: Advanced Agorithms, Automata Theory and Logic

Journal articles published:

- Pradumn Kumar Pandey, Ranveer Singh. "Fast Average-consensus on Networks using Heterogeneous Diffusion." IEEE Transactions on Circuits and Systems–II: Express Briefs (2021)
- Ranveer Singh, Cheng Zheng, Naomi Shaked-Monderer, and Abraham Berman. "Nonsingular (vertex-weighted) block graphs." Linear Algebra and its Applications 602 (2020): 138-156
- Ranveer Singh. "Parameterized complexity of determinant and permanent." Theoretical Computer Science 845 (2020) 50-58
- Ranveer Singh. "Permanent, determinant, and rank of bi-block graphs." Aequationesmathematicae 94, no. 1 (2020): 1-12.
- Ranveer Singh, Naomi Shaked-Monderer, and Avi Berman. "A linear time algorithm for the nullity of vertex-weighted block graphs." Discrete Applied Mathematics 2021.

Dr. Chandresh Kumar Maurya
Assistant Professor
chandresh@iiti.ac.in

PhD :IIT Roorkee, 2016

Previous Employment (includes post-doctoral experience) :

- Assistant professor at NIT Delhi, Feb 2020-July 2020
- Research Assistant professor at ELTE University Hungary, March 2019-Feb 2020
- Research Scientist, IBM Research Bangalore, Jan 2017-Jan 2019

Statement of Research Interests

- Machine learning, Natural language processing, Information retrieval, Data Mining, Deep learning, Artificial intelligence.
- Broad research area: Machine learning, Natural language processing, Information retrieval, Data Mining, Deep learning, Artificial intelligence.

Research Highlights:

- Worked on anomaly detection in nuclear power plant data
- Automation of invoice payment process
- Creative tagline generation for product advertising
- Multimodal sarcasm detection

Patents (filled and awarded):

- 1 awarded with USPTO
- 1 filed with IPO

Projects active during April 2020-March 2021:

- Title: Multimodal incident similarity inference for improving ticket resolution
  Duration: 2 years
  Funding Agency: NA
  Brief Description: In this project, we develop model for multimodal ticket similarity learning

Courses/Conferences/Workshops Organized:

- CS 307/357 parallel computing theory+lab
- CS 204/254 Design and analysis of algorithms theory+lab

Workshops:

- Organized 1 week FDP program under QIP scheme from March 19-25, 2021

Any other Major Events/Development etc.:

- Coordinated the development of Madad platform for Covid 19 infected peoples.
- https://madad-covid.in/home
- Serving as faculty coordinator for the Technical club of IIT Indore
- Coordinating the development of "Buy n sell" platform for IIT Indore users.

COVID Related Activities:

- Coordinated the development of Madad platform for Covid 19 infected peoples. https://madad-covid.in/home.
- Large Scale Contact Tracing for Covid-19

Department of Electrical Engineering

From the HoD's Desk

Dr. Vipul Singh
Associate Professor
vipul@iiti.ac.in

The vision of the Department is to impart quality education and promote inter-disciplinary, industry-oriented advanced scientific research to address the challenges and develop future technologies for societal requirements. The Department of Electrical Engineering (EE) at IIT Indore has been a major centre for both academic and research programs in various branches of electrical engineering, which includes micro/nanoelectronics, communication & bio-medical signal processing, power electronics and power systems. The discipline has grown significantly in terms of faculty strength with diversified specializations, state of the art research facilities and undergraduate and postgraduate students' strength.

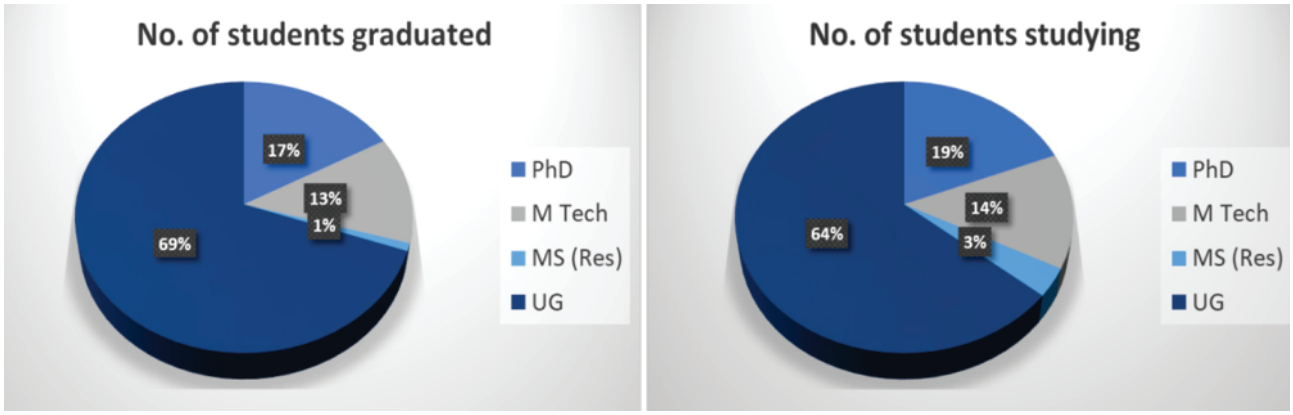

The academic programs offered by the discipline include B. Tech., M. Tech., M. S. (Research) and Ph. D. Two M. Tech. programs namely (i) Communication and Signal Processing and (ii) VLSI Design and Nanoelectronics are currently being offered. The discipline also hosts many Post-Doctoral Fellows and Scientists from time to time. In July-2021, the department faculty members contributed into the amalgamation of interdisciplinary center on Electric Vehicles, leading to a new M. Tech. program started in this area, keeping upbeat with the changing landscape of the automobile sector in the country. Pithampur auto cluster being one of the hubs of ancillary units is likely to benefit from this program and may lead to increased participation from the industry in coming times.

The Department presently has fourteen faculty members and one DST Inspire Fellow, having proven expertise in diverse areas of Power Electronics and Power Systems, Micro and Nano-electronics, Organic & Flexible Electronics, Communications, Signal Processing, Image Processing, RF-Microwave, Electromagnetics, Frequency selective surfaces, estimation and filtering and Bio-photonics etc. In addition to the state of the art UG/PG laboratories Department also has the following specialized research laboratories:-

- Bio-medical Signal Processing Laboratory
- Bio-Photonics Laboratory
- Nanoscale Devices, VLSI Circuits and System Design Laboratory
- Hybrid Nanodevice Research Laboratory
- Low Power Nano-Electronics Laboratory
- Optoelectronic Nanodevice Research Laboratory
- Molecular and Nanoelectronics Research Laboratory

- Power Electronics and Power Systems Laboratory
- Wireless Communication Research Laboratory
- Stochastic Control Laboratory
- Future Generation Communication Systems Laboratory
- Advanced Electromagnetics Laboratory
- Pattern Recognition and Image Analysis Laboratory
- Signals and Software Group

The Department currently has about 24 ongoing research projects funded by various external agencies including department of Science & Technology, SERB, Council of Scientific and various, ISRO and others. The department is consistently moving forward in research activities as evidenced by publications in various high quality International Journals and Conferences and the patents filed. During the Academic year 2020-21 the EE published more than hundred journal papers in high impact journals. During this academic year one of the key highlight was a high valued project granted by DST-Nano mission having a net worth of ~ INR 1.4 Crore. The strong footing of Department of EE is further proven by the number of Ph.D. students graduated. A total of 15 students successfully completed their Ph.D. from the Department in the AY 2020-21 alone, which is nearly one-sixth of the total number of Ph.D. students graduated till date since the inception of the Department. The Department has published eighteen patents till date and one of the patents was awarded in the recent past, all this is an indication of the quality of R & D activities carried out in the department. The percentage share of different students presently studying in the Department is shown in the pie chart below.

The faculty members of EE strive to instill analytical and practical skills in the students. This is systematically achieved by incorporating various sub-components as a part of the regular course learning and evaluation, industry-relevant projects, field trips and real-time assignments that would substantially benefit in understanding and utilization of concepts. In addition to that, students of various categories have been supported to attend numerous conferences, competitions, and winning laurels. As a result, our students have secured several foreign internships (viz. DAAD, Fulbright fellowships etc.) along with higher studies option with scholarships from top Universities and appreciation of their work in industries. In the AY 2020-21, department of Electrical Engineering graduated its first batch of MS (Res) scholars as well. A total of five students have graduated out of MS (Res) this year.

A constantly evolving environment has been created in IIT Indore, where the community interacts frequently in looking for out-of-the box solutions to solve problems, invited many industries to visit our discipline and have constant discussions on various problems with academia to get insights. An interdisciplinary approach followed by EE faculty members has emerged taking up some of these engineering problems as projects and internships that have been successfully solved by our students. This has resulted in collaborations with industry for sponsored research. Through our industry outreach

activities, the department has been instrumental in getting some consultancy projects as well. More recently department has also been taking lead in its international outreach activities, several international students have been selected for their admission into our PG programs.

Some of the notable achievements by the faculty members of the Department during the AY 2020-21, are as given below: -

- Dr. Amod C Umarikar received Best Teacher Award of IIT Indore in February 2020.
- Dr. Prabhat K Upadhyay became the editor of IEEE Communication Letters.
- Prof. Ram Bilas Pachori became the editor of IETE technical review journal.
- Prof. Ram Bilas Pachori also backed the premium award for Best paper in IET Science, Measurement & Technology Journal.
- Dr. Shaibal Mukherjee was the proud recipient of the 2020 DUO-India Professor Fellowship Award, and the 2019 DAAD Fellowship Award.
- Dr. Saptarshi Ghosh received the prestigious Matsumae International Foundation Research Fellowship Award.
- Prof. Vimal Bhatia was awarded IETE- Prof SVC Aiya Memorial Award 2019.
- Dr. Saptarshi Ghosh has been appointed as the Associate Editor in IEEE Antennas and Wireless Propagation Letters since January 2021.
- One of the research papers from Dr. Vipul Singh's research group MNRG was selected for the cover page of IEEE EDL.

Introducing Faculty of EE

- Prof. Abhinav Kranti
- Dr. Abhinoy K Singh
- Dr. Amod C Umarikar
- Dr. Mukesh Kumar
- Dr. Prabhat K Upadhyay
- Prof. Ram Bilas Pachori
- Dr. Santosh K Vishvakarma
- Dr. Saptarshi Ghosh
- Dr. Shaibal Mukherjee
- Dr. Srivathsan Vasudevan
- Dr. Swaminathan Rambadran
- Dr. Trapti Jain
- Dr. Vimal Bhatia
- Dr. Vipul Singh
- Dr. Vivek Kanhangad

Abhinav Kranti
Professor
akranti@iiti.ac.in

PhD. - University of Delhi, India

Previous Employment (includes post-doctoral experience) - Post-doctoral fellow at Université catholique de Louvain, Belgium (2002 – 2004).

Research fellow at Queen's University of Belfast, UK (2005 - 2009).

Researcher at Tyndall National Institute, University College Cork, Ireland (2010).

Assistant Professor at Indian Institute of Technology Indore, India (2010 – 2013).

Associate Professor at Indian Institute of Technology Indore, India (2013 – 2017).

Professor at Indian Institute of Technology Indore, India (since 2017).

Statement of Research Interests:

a. Broad Research Area – Capacitorless Dynamic Random Access Memory (1T-DRAM), Steep Switching Transistors, Vertically Stacked Transistors, and Material-Device-Circuit Co-design for the development of next generation logic and memory technology.

b. Research Highlights – Steep switching specific scaling methodology is showcased to attain a sharp increase in drain current in a triple-gate junction less transistor along with an associated negative value of total gate capacitance. Logic and memory functionality of vertically stacked bi-directional junction less transistor, which can be operated as nMOS or pMOS depending on the biases applied. The architecture has shown potential to reduce the transistor count to realize logic operations.

c. Awards and Achievements –

- Award for Excellence in Teaching at IIT Indore in January 2019
- Best Technology Development Award at IIT Indore in January 2019 (as part of the six member team).
- An outstanding reviewer for Nanotechnology, IOP, 2017 German Academic Exchange Service (DAAD) scholarship to visit RWTH Aachen under Bilateral Exchange of Academics Program, June 2017.
- Award for Excellence in Teaching at IIT Indore in January 2017.
- Research article featured in the Lab Talk at nanotechweb.org entitled, "Transistor 'imperfection' leads towards perfection" in October 2016.

Patents –A. Kranti and N. Navlakha, Multiple gate tunneling field effect transistor device for capacitorless dynamic memory, Indian Patent Filed, Filing date: 01/03/2016, App no. 201621007078, Publication Date: 17/11/2017, Overall status: Pending. A. Kranti and M. Gupta, Multiple gate junctionless MOSFET (Metal Oxide Semiconductor Field Effect Transistor), Indian Patent Filed, Filing date: 07/07/2015, App no. 2594/MUM/2015, Publication Date: 13/01/2017, Overall status: Pending.

Publications (includes journal articles, books and book chapters) –

- Junctionless Device Cross-Section: A Key Aspect for Overcoming Boltzmann Tyranny, A. Kranti and M. Gupta, 237th ECS Meeting – Advanced CMOS-Compatible Semiconductor Devices (Invited Talk), 237th Meeting of Electrochemical Society, Montreal, Canada, ECS Transactions, vol. 95, pp. 39-44, 2020.
- Limits on hysteresis-free sub-60 mV/decade operation of MFIS nanowire transistor, S. Semwal, V.P. Reddy, N. Jaiswal and A. Kranti, IEEE Trans. Electron Devices, vol. 67, pp. 3868-3875, 2020.

Events/ Seminars organized–Contributed to the QIP sponsored short term course (Coordinator: Dr. Vipul Singh) on Photovoltaic Devices & Systems: Challenges & Scope at IIT Indore from 8th to 13th March 2021.

Projects active during April 2020-March 2021

Title- Functionality enhancement of reconfigurable transistors by implementing standalone and embedded 1T-DRAM

Duration - 3 years (2020-2022)

Funding Agency – Department of Science and Technology, Government of India

Brief Description- A key component for dense integration is the augmented functionality attained with the same type of transistors being used for logic as well as memory blocks. In this context, it is imperative to examine the feasibility of reconfigurable transistors for dynamic memory (standalone and embedded) applications.

Dr. Abhinoy Singh
Inspire Faculty
abhinoy.singh@iiti.ac.in

PhD. - Indian Institute of Technology Patna

Previous Employment (includes post-doctoral experience)

- Adani Institute of Infrastructure Engineering, Ahmedabad, 26-06-2018 to 09-10-2018
- Postdoctoral Researcher, McGill University, Montreal, Canada 01-05-2018 to 31-05-2019.
- Assistant Professor, Shiv Nadar University, Greater Noida, India, 05-12-2016 to 26-02-2017.

Statement of Research Interests

a. Broad Research Area - Estimation and filtering, Stochastic process, Target tracking

b. Research Highlights

My research group is currently working on developing advanced nonlinear estimation and filtering algorithms for handling several irregularities in measurements. In this regard, we are broadly focusing on the following problems: i) delay in measurements, ii) missing measurements, and iii) non-Gaussian measurement noises. We are also working on introducing new technologies or advancing the existing technologies of particular domains by applying advanced nonlinear estimation and filtering. In this regard, our focusing is currently on the power system domain.

C. Awards and Achievements

Received core research grant from the Department of Science and Technology, Government of India

Publications (includes journal articles, books and book chapters) - A total of four journals published between April 2020 to March 2021.

Three Best Publications: Journals

- Abhinoy Kumar Singh, "Szego Quadrature Kalman Filter for Oscillatory Systems", IEEE Access (IF: 3.745),vol. 8, pp. 194700-194708, Oct. 2020.
- Abhinoy Kumar Singh, "Exponentially Fitted Cubature Kalman Filter With Application to Oscillatory Dynamical Systems", IEEE Transactions on Circuit and Systems I (IF: 3.60), vol. 67, no. 8, pp. 2739 – 2752, Aug. 2020.
- Abhinoy Kumar Singh, Mihailo V. Rebec and Ahmad Haidar, "Kalman-Based Calibration Algorithm for AgaMatrix Continuous Glucose Monitoring System", IEEE Transactions on Control Systems

Technology (IF: 5.31), vol. 29, no. 3, pp. 1257-1267, May 2021.

Conferences

- Sumanta Kumar Nanda, Vimal Bhatia, Abhinoy Kumar Singh, "Performance analysis of Cubature rule based Kalman filter for target tracking'', INDICON, Delhi, India, pp. 1-6, 11-13 Dec. 2020.

Events/ Seminars organized - short term courses:

Conference Organizing Committee:

Projects active during April 2020-March 2021

Title - New estimation and filtering algorithms, and their possible application in continuous glucose monitoring.

Duration - 5 Years

Funding Agency -Department of Science and Technology (DST), Government of India

Brief Description - The project is given under inspire faculty award and the sanctioned amount is 35 Lakhs INR. A PhD student has been hired and currently working under this project.

The objective is to develop new algorithms for nonlinear estimation and filtering as well as to develop new algorithms for monitoring of glucose concentration in type-1 diabetes patients.

Title -Advanced Nonlinear Filtering Using Improved Quadrature Rule

Duration - 3 Years

Funding Agency - Department of Science and Technology (DST), Government of India

Brief Description - The project is given under Core research grant and the budget is 29.37 Lakhs INR. A JRF has been hired and currently working under this project.

The objective of this project is to develop new estimation and filtering techniques specific to nonlinear systems. Further, the new techniques to be available under the class of quadrature rule based filtering.

Dr. Amod C. Umarikar

Associate Professor
umarikar@iiti.ac.in

PhD. - IISc Bangalore, 2007

Previous Employment (includes post-doctoral experience)

Post-Doctoral Associate: July 2007-January 2009: University of Minnesota

Lecturer, BITS Pilani Goa Campus: March 2009-September2009

Statement of Research Interests

a. Broad research area

- Application of power electronics in renewable energy systems.
- Modelling and simulation of power electronic systems.
- Power quality analysis

Research Highlights

- Current research in my group is on development of standalone PV system based on impedance source converters. In this we are focusing on quasi z-source converter based standalone PV system
- Another research area in which we are working is in control techniques of grid connected converters. In this area, we have focused in synchronverter control technique for grid connected and standalone inverters

- Power quality analysis is another area in which we are currently working on application of signal processing techniques in the analysis and extraction of parameters which define power quality.

c. Awards and Achievements

Publications (includes journal articles, books and book chapters) - Karthik Thirumala; Aditi Kanjolia; Trapti Jain; Amod C. Umarikar, "Empirical wavelet transform and dual feed-forward neural network for classification of power quality disturbances", International Journal of Power and Energy Conversion, 2020 Vol.11 No.1, pp.1 – 21, DOI: 10.1504/IJPEC.2020.104805

Projects active during April 2020- March 2021

Title - Modelling and Control of Grid Connected Photovoltaic Systems

Duration - November 2019-September 2020

Funding Agency - TEQIP, Phase III

Brief Description - In this project, grid connected PV inverter will be modeled for different control strategy and these will be verified in Real Time Digital Simulator (RTDS).

Dr. Mukesh Kumar
Associate Professor
mukesh.kr@iiti.ac.in

PhD. -Tokyo Institute of Technology, Japan

Previous Employment - (includes post-doctoral experience)

- Postdoctoral (JSPS) Research Fellow (2009-2010), Tokyo Institute of Technology, Japan
- Exchange Researcher (2008-09) at University of California Berkeley, USA

Academic associations with other institutions (Affiliate / Adjunct / Visiting posts) - Adjunct Faculty in Purdue School of Engineering & Technology, IUPUI, USA.

Statement of Research Interests

a. Broad Research Area

- Silicon Photonics
- Optoelectronic Devices
- Nano-scale Devices
- Device Fabrication (Micro/Nano Fabrication)

b. Research Highlights

We are working on the design, fabrication and characterization of silicon photonic devices for broadband communication, computing and information storage. Recently a silicon nanophotonic memory based on resistive switching is developed with an on-off extinction ratio of 10 dB. The proposed device is an excellent example of the combination of novel device physics and semiconductor technology. Also, a CMOS compatible optical modulator based on Si-ITO is realized with Si-ITO heterojunction enabling intensity modulation with high extinction ratio of 7dB via electrical tuning of optical absorption.

c. Awards and Achievements

Ms. Swati Rajput, PhD Scholar under Dr. Mukesh Kumar in Electrical Engineering is conferred with Young Scientist Award by Madhya Pradesh Council of Science and Technology for the Best paper presented during 34th Young Scientist Congress.

Patents -M. Kumar, Sulabh, L. Singh, S. Jain, S. Rajput, V. Kaushik, H. C. Jha, "A biochemical sensor with engineered nanophotonic structure, the process of preparation and use thereof", Indian patent, No. 202121008991; Published in March 2021.

Publications (includes journal articles, books and book chapters)

- V. Kaushik, S. Rajput and M. Kumar, "Broadband Optical Modulation in Zinc Oxide based Heterojunction via Optical Lifting," Optics Letters, Vol. 45 (2) pp. 363-366 (2020).
- S. Rajput, V. Kaushik, S. Jain ,P. Tiwari , A. K. Srivastava and M. Kumar, "Optical Modulation in Hybrid Waveguide based on Si-ITO Heterojunction," Journal of Lightwave Technology, vol 38 (6) pp. 1365-1371 (2020).
- L. Singh, S. Jain and M. Kumar, "Electrically Writable Silicon Nanophotonic Resistive Memory with Inherent Stochasticity," Optics Letters, Vol. 44, No. 16, 2019.

Projects active during April 2020-March 2021

Title - Fabrication of Silicon Photonic Devices for Optical Interconnects

Duration -2019-2022

Funding Agency -Nano Mission, DST

Brief Description - The objective of the project is to design and fabricate silicon based nanostructured photonic device (a multi-functional device with three functions: Nanophotonic Waveguide, Coupler and Phase-shifter) for multi disciplinary applications like optical communication, optical interconnects and bio-chemical sensing. The proposed device can be a building block for making nano-scale integrated devices for on-chip sensing and for large-scale photonic circuits.

The proposed project will be a promising step towards realization of high speed nanophotonic devices (Photonic Modulator and Logic Devices) for optical networks, interconnects and for Bio-chemical Sensing.

Title -Nano Optoelectronics Sensing platform for fast and efficient Lab-On-Chip applications

Duration -2016-2019

Funding Agency -SERB, DST

Brief Description - A Novel Design of slot waveguide for bio-Sensing is characterised with cost-effective fabrication process. The proposed device has shown sensing capability for surface antigen HBsAg, a principal marker of hepatitis-B viral infection, with a high sensitivity of 1200 nm/RIU with a figure of merit of 300. The device offers flexibility in accommodating the bio-sample in a desirable area.

Title - Silicon Nanophotonic Platform for Optical Guidance and Control in Broadband Communication

Duration -2020-2023

Funding Agency –CSIR

Brief Description - The objective of the project is to design, fabricate and characterize Silicon based Nanophotonic device which can prove to be a building block for making nano-scale integrated photonic circuits for various on-chip applications. The primary target would be to come up with a novel and versatile design of the on-chip device and then to study and simulate its properties.

This approach of hybrid devices naturally extends the capabilities of both plasmonics and semiconductor photonics and can be applied to subwavelength laser devices, such as visible nanolasers and terahertz lasers as well as optical integrated circuits to efficiently manipulate the light on scales much smaller than the wavelength of light.

Dr. Prabhat Kumar Upadhyay
Associate Professor
pkupadhyay@iiti.ac.in

PhD. - Department of Electrical Engineering, Indian Institute of Technology Delhi,

Previous Employment Assistant Professor, Department of Electrical Engineering, IIT Indore, Indore, Madhya Pradesh, May 2012- December 2017

Assistant Professor, Department of Electronics & Communication Engineering, BIT Mesra, Ranchi, July 2011-April 2012

Assistant Professor, Department of Electronics & Communication Engineering, BIT Mesra, Ranchi

Statement of Research Interests

a. Broad Research Area

- Wireless and Mobile Communications
- Cooperative Relaying Technologies, PHY Security
- Multiple-Input Multiple-Output (MIMO) Systems
- Cognitive Radio and Spectrum Sharing Techniques
- Molecular Communications and Nano-networking

b. Research Highlights- Wireless Communications (WiCom) Research Group, led by Dr. Prabhat K. Upadhyay, is actively involved in cutting-edge research and development to cater to the emerging needs of the next generation wireless communication systems. It has developed and analyzed various spectral-efficient algorithms and spatial diversity schemes that will help the design of future wireless networks to accommodate the increasing data traffic demands over a limited spectrum. He has been supervising many research projects and dissertations toward PhD (6 completed & 5 ongoing), MTech (7 completed & 1 ongoing), and BTech (17 completed & 2 ongoing) degrees. The research work has contributed a significant number of publications in IEEE journals and conferences.

c. Awards and Achievements

- Editor in the Journal Frontiers in Communications and Networks
- Editor of IEEE Communications Letters.
- Coordinator of BRICS Multilateral Research and Development Project.
- Associate Editor in IEEE Access.
- Technical Program Committee (TPC) Member
- IEEE International Conference on Communications (ICC), 2020, 2021 - SAC-08 SSC Track.
- IEEE Global Communications Conference (Globecom), 2020, 2021.
- IEEE 5G World Forum (WF-5G), 2020, 2021 - Track 1: 5G Technologies.
- IEEE Vehicular Technology Conference (VTC), 2020-Fall.
- IEEE Vehicular Technology Conference (VTC), 2020-Spring.
- National Conference on Communications (NCC), 2020, 2021.
- International Symposium on Wireless Communication Systems (ISWCS), 2020.
- PhD student (Vibhum Singh) awarded Student Travel Grant for the IEEE Wireless Communications and Networking Conference, Seoul, South Korea, in 2020.

Patents, Publications, Events and Seminars

Publications

During April 2019-March 2020, there are 10 publications in Journals, 9 publications in Conference proceedings, and 1 publication in Book Chapter.

Journal Articles:

- V. Singh, P. K. Upadhyay, and M. Lin, " On the Performance of NOMA-Assisted Overlay Multiuser Cognitive Satellite-Terrestrial Networks," IEEE Wireless Communications Letters, vol. 9, no. 5, pp. 638-642, May 2020.
- V. Singh, S. Solanki, P. K. Upadhyay, D. B. da Costa, and J. M. Moualeu, "Performance Analysis of Hardware-Impaired Overlay Cognitive Satellite-Terrestrial Networks with Adaptive Relaying Protocol," IEEE Systems Journal, accepted for publication, Jan. 2020.
- S. Solanki, V. Singh, and P. K. Upadhyay, "RF Energy Harvesting in Hybrid Two-Way Relaying Systems with Hardware Impairments," IEEE Transaction on Vehicular Technology, vol. 68, no. 12, pp. 11792-11805, Dec. 2019.

Book Chapters:

- V. Bankey, P. K. Upadhyay, and D. B. da Costa, "Physical Layer Security in Hybrid Satellite-Terrestrial Relay Networks," Physical Layer Security-Theory and Practice, Khoa N. Le (Ed.), Springer Nature, 2020.

Events/ Seminars Organized

- Program Committee Member, International Workshop on Big data driven Edge Cloud Services (BECS 2021), 21st International Conference on Web Engineering (ICWE), Biarritz, France, 18-21 May 2021.
- Steering Committee Member, First International Symposium on Molecular and Biological Communications (MBCom)-2021, VNIT Nagpur, 1-5 February 2021.
- International Advisory Committee Member, IEEE International Conference on Advanced Communication Technologies and Signal Processing (IEEE ACTS-2020), NIT Silchar, 4-6 December 2020.
- Advisory Committee Member, 5th IEEE International Conference on Computing, Communication and Security (ICCCS-2020), IIT Patna, 14-16 October 2020.
- Track Co-Chair, Radio Access and Softwarisation (RAS), European Conference on Communications and Networking (EuCNC) 2020, Dubrovnik, Croatia, 15-18 June, 2020.

  Projects active during April 2020-March 2021

  Title - Performance Analysis of Diffusion-Based Molecular Communication Systems with Active Receivers

  Duration - 3 Years (2018-2021)

  Funding Agency - Council of Scientific and Industrial Research (CSIR), Govt. of India

  Brief Description - The project aims to investigate the performance of the diffusion-based molecular communication (DMC) systems with more realistic and complex transmitters and receivers. With the modelling of spherical transmitter and active receivers, it is of interest to analyze the performance of DMC systems on the basis of estimation of various system parameters and evaluation of relevant performance measures.

  Title - Design and Development of Large-Scale Ambient Energy Harvesting Wireless Networks (LargEWiN)

  Duration - 2019-2022 (3 Years)

  Funding Agency - BRICS: CNPq-Brazil, DST-India, MOST & NSFC-China, and DST & NRF-South Africa

Brief Description - This project aims to empower the large-scale wireless networks with the ambient energy harvesting and the emerging communication technologies to promote the green economy in a more efficient, reliable, and sustainable manner. It seeks to address the system performance, planning, and resource allocation problems by exploiting cooperation among available network resources with renewable and/or radio frequency (RF) energy sources for implementation of Large-Scale Ambient Energy Harvesting Wireless Networks (LargEWiN). Especially, it intends to integrate the more appealing millimeter wave (mmWave) technology into LargEWiN for its potential futuristic deployment.

Title - Development of Green and Secure Communication Techniques for Future Wireless Networks

Duration - 5 Years (2017-2022)

Funding Agency - Young Faculty Research Fellowship under 'Visvesvaraya PhD Scheme for Electronics & IT' of MeitY, Govt. of India.

Brief Description - The project aims at development of energy-efficient network planning and resource allocation strategies in the context of green wireless communications. The wireless techniques used for improving spectral efficiency often lead to decrease in energy efficiency and vice-versa. Therefore, a careful design for future wireless networks is desirable in view of both energy and spectral efficiency. Moreover, owing to the broadcast nature of the medium and the associated security vulnerabilities, it is important to augment secrecy even at physical layer of communications.

Dr. Ram Bilas Pachori

Professor

pachori@iiti.ac.in

PhD. - IIT Kanpur, India

Previous Employment (includes post-doctoral experience)

- Associate Professor at Department of Electrical Engineering, School of Engineering, Indian Institute of Technology Indore, from 27 September, 2013 to 17 December, 2017.
- Assistant Professor at Department of Electrical Engineering, School of Engineering, Indian Institute of Technology Indore, from 02 December, 2009 to 26 September, 2013.
- Assistant Professor at Communication Research Center, International Institute of Information Technology, Hyderabad, India from 01 April, 2008 to 30 November, 2009.
- Post-Doctoral Fellow in the Charles Delaunay Institute, FRE CNRS 2848, System Modelling and Dependability Laboratory, University of Technology of Troyes, France from 01 April, 2007 to 31 March, 2008.

Academic Associations with other Institutions (Affiliate/Adjunct/Visiting posts)

- Visiting Scholar at Intelligent Systems Research Centre, School of Computing and Intelligent Systems, Ulster University, Magee Campus, Northern Ireland, UK from 01 December, 2014 to 31 December, 2014.
- Visiting Professor at School of Medicine, Taylor s University, Subang Jaya, Malaysia, from 01 December, 2018 to 30 November 2019.

Statement of Research Interests

a. **Broad Research Area -** Signal Processing and Machine Learning

b. **Research Highlights -** The automated identification systems based on signal processing and machine learning techniques for diagnosis of various diseases like epilepsy, glaucoma, coronary artery disease,

diabetes, congestive heart failure, septal defects, myocardial infarction, atrial fibrillation, amyotrophic lateral sclerosis, sleep disorders, alcoholism, human emotions, etc. have been developed. The new methods for analysis of non-stationary signals have been proposed.

Research Profile at Google Scholar on July 28, 2020:

Citations: 6278, h-index: 42, i10-index: 101.

c. Awards and Achievements

- Associate Editor: Electronics Letters (January 2019 to present)
- Associate Editor for 42nd Annual International Conference of the IEEE Engineering in Medicine and Biology Society (EMBC) in conjunction with the 43rd Annual Conference of the Canadian Medical and Biological Engineering Society, July 20-24, 2020, Montreal, Canada (Theme: Biomedical Signal Processing).
- Associate Editor: Biomedical Signal Processing and Control (Elsevier) (February 2018 to present).
- Editor: IETE Technical Review Journal (May 2017 to present).
- Delivered invited talks in reputed institutes.
- Subject expert for faculty selection committee in reputed institutes.
- Reviewer of reputed journals and conferences.
- External examiner of PhD theses in reputed institutes.
- Appreciation certificate from the IEEE BITS Pilani K.K. Birla Goa Campus, Goa, India for sharing expertise and experience at LUMINI 2019, 15th September, 2019.
- 2019 Premium Award for Best Paper in IET Science, Measurement & Technology journal, November 2019.
- Appreciation certificate from the Chairman, IEEE Kharagpur Section, IIT Kharagpur for making a presentation under IEEE Lecture Series at IEEE Kharagpur Section, 27 January, 2020.

Publications - (includes journal articles, books and book chapters)

Journal Articles:

Events/Seminars Organized

- Short term course on control system and signal processing: Solutions to biomedical problems, 03-04 June, 2019, Indian Institute of Technology Indore, Indore, India (with Dr. A.K. Singh).
- TEQIP-III 6-days short term course on Industrial applications of control systems and signal processing, 19-24 August, 2019, Indian Institute of Technology Indore, Indore, India (with Dr. A.K. Singh).
- Faculty training programme on data science & analytics, Sponsored by TEQIP-III, MHRD, March 02-12, 2020, IIT Indore, Indore, India (with Dr. P. Kar, Dr. M. Tanveer, Dr. A. Dutta, Dr. S. Manna, and Dr. S. Das).

Projects active during April 2020-March 2021

Title - Development of a portable acoustic sensor based canine pregnancy detection system and biomarker-based canine pregnancy test kit.

Duration - Two years (March 2018- March 2020)

Funding Agency - Department of Biotechnology (DBT)

Brief Description - Total cost: Rs. 30, 00,000. Principal Investigator: Dr. Debasis Nayak, Co-Principal Investigators: Dr. Ram Bilas Pachori, Dr. Niranjan Sahoo, and Dr. Gourinath Banda.

Title - Detection of human brain disorders using novel machine learning approaches

Duration - Three years (October 2017-October 2020)

Funding Agency – CSIR

Brief Description - Total cost: Rs. 31, 26,240 Principal Investigator: Dr. M. Tanveer, Co-Principal Investigator: Dr. Ram Bilas Pachori.

Title - A multi-class computer-aided system for diagnosis of cardiovascular disease using non-invasively measured cardiac signals

Duration - June 2019-September 2020

Funding Agency -TEQIP Collaborative Research Scheme, National Project Implementation Unit (NPIU), Government of India.

Brief Description - Total cost: Rs. 1046000, Principal Investigator: Dr. Abhay Upadhyay, Co-Principal Investigators: Dr. Ram Bilas Pachori, Dr. Rishi Raj Sharma, Mr. Shashikant Verma, Dr. Rajeev Sharma.

Title - Advanced nonlinear filtering using improved quadrature rule

Duration - Three years (February 2020-February 2023)

Funding Agency - SERB, Government of India

Brief Description - Total cost: Rs. 33, 00,000, Principal Investigator: Dr. Abhinoy Kumar Singh, Co-Principal Investigator: Dr. Ram Bilas Pachori.

Dr. Santosh Kumar Vishvakarma

Associate Professor
skvishvakarma@iiti.ac.in

PhD. - Department of Electrical Engineering Indian Institute of Technology Delhi, New Delhi

Previous Employment- Assistant Professor, Department of Electrical Engineering, IIT Indore

Post-Doctoral Fellow, UNIK, Norway

Lecturer, College of Engineering Roorkee, India

Broad research area - Energy-Efficient and Reliable SRAM Memory Design Enhancing Performance and Configurable Architecture for DNN Accelerators

a. Research Highlights

- SRAM based In-Memory Computing Architecture for Edge AI
- Reliable, Secure Design for IoT Application
- Design for Reliability

b. Awards and Achievements

Nanoscale Devices, VLSI Circuit and System Design (NSDCS) Research Group, led by Dr. Santosh Kumar Vishvakarma, is actively involved in cutting-edge research and development to in-memory computing for edge AI applications, efficient and reliable memory chip design, efficient and configurable hardware accelerator for DNN accelerators. It has developed and analyzed efficient and reconfigurable architecture for hardware accelerator algorithms. Various activation functions are developed for DNN applications. He has been supervising many research projects and dissertations toward PhD (16 completed & 6 ongoing), MTech (19 completed & 2 ongoing), and BTech (32 completed & 7 ongoing) degrees. The research work has contributed a significant number of publications in IEEE journals and conferences.

Review Editor, Editorial Board of Integrated Circuits and VLSI (specialty section of Frontiers in Electronics)

Events:

One team from my research group has been qualified for the quarter-finals and selected in the top 100 teams across India for the Semi-Finals of Swadeshi Microprocessor Challenge under the flagship of MeitY-GoI, CDAC and IITM with 1,00,000 INR seed money.

Team Members:

- Dr. Santosh Kumar Vishvakarma (Team Supervisor)
- Gopal Raut (Team Leader)
- Saurabh Karkun (Team Member)
- Shavez Malick (Team Member)
- Mukula Jogesh Kumar (Team Member)
- Sudheer Reddy (Team Member)

Projects active during April 2020-March 2021

Title Indo-South Korea Joint Network Center for Environmental Cyber-Physical Systems

Duration 3 Years (2021-2024)

Funding Agency Department of Science and Technology (DST), Government of India

Brief Description The main objectives of the JNC would be to establish an internationally renowned centre to address the various aspects of Cyber Physical System. The team of interdisciplinary experts in both nations is working in collaboration with industry and research institutes across the globe to design and develop E-CPS products, generate skilled manpower, startup ecosystems and establish a centre with international collaborators. The objectives of the JNC are:

Human Resource Development through:

- Joint Workshops for students, faculty and industry personals across the country.
- Joint PhD between the institutions.
- Development of UG/PG level courses and its adoption in partnering institutions in both the countries

.International Collaborations through:

- Technology and product development.
- Trained and skilled manpower development.
- An ecosystem to submit the IP, copyright, publications and patents.

Prototype/Product Development through:

- To develop the workable and field-tested prototype/products.
- To publish patents/publications from each institution.

Start-Up Ecosystem in ECSP:

- A start-up ecosystem is expected to be developed in both countries to bridge the lab to commercialization for the development of Environment Cyber Physical System (E-CPS).
- The JNC is expecting to develop low-cost devices for rural empowerment.

Dr. Shaibal Mukherjee
Associate Professor
shaibal@iiti.ac.in

PhD. - University of Oklahoma, USA in 2009

Previous Employment –

- Assistant Professor, Electrical Engineering, Indian Institute of Technology Indore September 2010-June 2016
- Post-Doctoral Research Scientist - Center of Quantum Devices (CQD), Electrical Engineering and Computer Science, Northwestern University, Illinois, USA, June 2009-July 2010

Statement of Research Interests

Broad Research Area

- Opto-electronics, organic electronics, nano-scale sensors and memory devices.
- Nano-scale multiple quantum well lasers, hybrid LEDs, photodetectors, solar cells.
- Nanophotonics, plasmonics.
- High electron mobility transistor (HEMT) engineering.

Awards and Achievements

- Appointed as Adjunct Associate Professor at RMIT University, Melbourne, Australia
- Recipient of 2021 Japan Society for the Promotion of Science (JSPS) Invitational Fellowship Award Executive Committee (Execom) Member of IEEE Bombay Section for 2020
- Recipient of 2020 DUO-India Professor Fellowship Award to visit Linköping University under Bilateral Exchange of Academics Program

Patents –

- Silicon compatible yttria-based memristive crossbar array and a method of fabrication thereof
  Inventors: Shaibal Mukherjee, Sanjay Kumar, Mangal Das, Kumari Jyoti
  Patent Application No. 202121013663, PUBLISHED, March 27, 2021.
- Ultrasensitive NO2 sensor based on S and N doped carbon dot functionalized tungsten oxide
  Inventors: Shaibal Mukherjee, Apurba K Das, Chandrabhan Patel, Biswajit Mandal, Rohi Gajanan Jadhav Patent Application No. 202021041967, PUBLISHED, September 28, 2020
- ∏ - conjugated compound for resistive switching, device, and method of fabrication
  Inventors: Apurba K Das, Shaibal Mukherjee, Rohit G. Jadhav, Amitesh Kumar

Patent Application No. 201921027542, FILED, July 10, 2019.

- Organo-acidified zinc oxide carbon monoxide sensor

  Inventors: Shaibal Mukherjee, Apurba K Das, Ajay Agarwal, Biswajit Mandal, Aaryashree, Sayan Maiti

  Patent Application No. 201921026594, PUBLISHED, July 31, 2020.
- Hybrid mesoporous composites gas sensors

  Inventors: Shaibal Mukherjee, Apurba K Das, Ajay Agarwal, Aaryashree, Biswajit Mandal, Ankan Biswas

  Patent Application No. 201921026576, PUBLISHED, July 31, 2020.
- A method of fabricating high two-dimensional electron gas density yielding zinc oxide heterostructure

  Inventors: Shaibal Mukherjee, Abhinav Kranti, Md Arif Khan, Rohit Singh

  Patent Application No. 201721010866, FILED, March 27, 2017.

  Patent No. 368230, GRANTED, May 31, 2021.

Events/ Seminars/Short term courses organized –

1 Technical Program Committee Member in the domain of Compound Semiconductors and Devices Committee in 21st International Workshop on The Physics of Semiconductor Devices (IWPSD), IIT Delhi, December 14-17, 2021

2 Course Coordinator and Instructor for AICTE Training and Learning (ATAL) Faculty Development Program (FDP) on "Artificial Intelligence and Internet of Things in Nanotechnology, Sensors, and Communication in the making of Aatmanirbhar Bharat", IIT Indore, December 6-10, 2021

3 Course Instructor for AICTE Training and Learning (ATAL) Faculty Development Program (FDP) on "Artificial Intelligence, Blockchain Security and Internet of Things for beyond 5G Communications", IIT Indore, July 5-9, 2021

4 Invited Lecture for AICTE Training and Learning (ATAL) Short Term Course (STC) on "Nano-Sensors", IIT Jodhpur, July 5-9, 2021

5 Education/Short-Course Committee Member in 5th IEEE Electron Devices Technology and Manufacturing (EDTM) Conference, China, April 8-11, 2021

6 Course Instructor for QIP-Sponsored Faculty Development Program (FDP) on "Nanomaterials for Next Generation Applications", IIT Indore, March 22-27, 2021

7 Course Instructor for QIP-Sponsored Faculty Development Program (FDP) on "Materials Characterization Techniques", IIT Indore, March 22-27, 2021

8 Course Coordinator and Instructor for QIP-Sponsored Faculty Development Program (FDP) on "Emerging Trends in VLSI and Nanoelectronics for Building Atmanirbhar Bharat", IIT Indore, February 15-20, 2021

9 Course Instructor for QIP-Sponsored Faculty Development Program (FDP) on "Advanced Technology for Materials Engineering", IIT Indore, January 19-24, 2021

10 Invited Lecture for AICTE Training and Learning (ATAL) Faculty Development Program (FDP) on "Photonics", Central University of Jharkhand, January 18-22, 2021

11 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "Emerging ICT Trends Towards Atmanirbhar Bharat", IIT Indore, December 28-30, 2020

12 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "Internet of Things", IIT Indore, December 7-11, 2020

13 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "AI, Blockchain and IoT for 6G Communications", IIT Indore, December 3-5, 2020

14 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "Fundamentals of Effective Manuscript Writing", IIT Indore, December 2-4, 2020

15 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "Advances in Electronic and Photonic Devices for Optical Fibre Communication and Bio-chemical Sensing", IIT Indore, November 25-27, 2020

16 Course Instructor for TEQIP-III Sponsored Faculty Development Program (FDP) on "Advanced Technology for Materials Physics and Engineering", IIT Indore, November 16-20, 2020

17 Symposium Committee Member in the domain of Emerging Logic, Memories and Neuromorphic Devices in 5th International Conference on Emerging Electronics (ICEE), IIT Delhi, November 26-28, 2020

Completed Projects

1. Development of ZnO-based heterostructures for HEMT applications (REVISED), DST SERB, INR 67,58,620, November 2017 – October 2020, Role: PI
2. Fabrication of ZnO/MgZnO based ultraviolet photodetector, CSIR, INR 6,00,000, October 2017 – October 2020, Role: PI

Ongoing Projects

1. Memristive Devices and Systems for Neuromorphic Computation, CSIR, INR 15,87,500, January 2021 – January 2024, Role: PI
2. 2D-TMD and carbon dot embedded metal-oxide nanomaterials for ultrasensitive and ultraselective H2S detection, MHRD STARS, INR 99,70,000, December 2019 – December 2022, Role: PI
3. Complex Cu-containing semiconductors and layered structures for economically-viable, environmentally-benign, and high-performance ultrathin solar cells, DST-RSF Project under India-Russia Programme of Cooperation in Science and Technology, INR 36,83,544, May 2019 - November 2021, Role: Indian PI
4. Fabrication of Silicon Photonic Nanostructured Devices for Optical Communication and Interconnects, DST Nano Mission, INR 1,50,00,000, May 2019 – May 2022, Role: Co-PI

   Special Manpower Development Program for Chip to System Design (SMDP-C2SD), Ministry of Electronics and Information Technology (Meity), INR 92,00,000, April 2015 - November 2021, Role: Co-CI

Dr. Srivathsan Vasudevan

Associate Professor
svasudevan@iiti.ac.in

PhD. - Nanyang Technological University (NTU), Singapore

Previous Employment - (includes post-doctoral experience)

Research Associate, Singapore General Hospital, Singapore

Statement of Research Interests

Broad Research Area - Biomedical instrumentation, Advanced electronics, High Performance Computing

Research Highlights

- Cost effective biomedical instrumentation for clinical applications
- Parallel processing of high-performance computing algorithms
- Instrumentation development for varied applications

Publications - (includes journal articles, books and book chapters)

- Abhijeet Gorey, Srivathsan Vasudevan, M. S. Ansari, Priyanka Bhagat, Satish Phatak, Norman Sharma and George C K Chen, Development of a compact laser-diode based frequency domain photoacoustic sensing system: Application of human breast cancer diagnosis, Review of Scientific Instruments, vol.90, pp. 114101, 2019.
- Abhijeet Gorey, Deblina Biswas, Anshu Kumari, Sharad Gupta, Norman Sharma, George C. K. Chen, Srivathsan Vasudevan, Application of continuous-wave photoacoustic sensing to red blood cell morphology, Lasers in Medical Science, 2018.
- Deblina Biswas, Srivathsan Vasudevan, George C K Chen, and Norman Sharma, Quantitative photoacoustic characterization of blood clot in blood: A mechanobiological assessment through spectral information, Review of Scientific Instruments, vol. 88, pp. 024301, 2017.

Projects active during April 2020-March 2021

Title - Development of multi-spectral photoacoustic imaging and sensing system for non-invasive imaging and characterization of tumor vasculature during angiogenesis using zebrafish xenograft and chicken chorioallantoic membrane (CAM) model

Duration - 2019-2020 Dec

Funding Agency - SERB (DST)

Brief Description - The proposed work would explore the potential of a biomedical imaging technique for detection and growth of cancer.

Title - Reducing computational complexity using FPGA to study structure and dynamical properties of nanoparticles.

Duration - 2017-2020

Funding Agency - SERB (DST)

Brief Description - The proposed work is exploring the potential of FPGA (advanced electronic board) for performing high performance computing applications.

Dr. Saptarshi Ghosh

Assistant Professor
sghosh@iiti.ac.in

PhD. - Indian Institute of Technology Kanpur, India

Previous Employment (includes post-doctoral experience):

Aug' 2017 – Nov' 2018: Postdoctoral Research Fellow in Chung-Ang University, Seoul, South Korea.

Statement of Research Interests

a. Broad research area

- Electromagnetics
- Frequency selective surfaces
- Metamaterials
- Microwave absorbers
- Microwave antennas

b. Research Highlights

- Experimental demonstration of different types of passive and active microwave absorbers
- Use of frequency selective surfaces to realize different types of microwave devices, e.g. filters, polarizers, absorbers, rasorbers, antennas
- Exploitation of metamaterial properties to construct ultra-thin and flexible structures
- Use of cutting-edge technologies, such as 3D printing, inkjet printing, liquid metal technology to realize electromagnetic devices
- Development of microwave and mm-wave antennas.

c. Awards and Achievements (April 2020-September 2021):

- Appointment of Associate Editor, IEEE AWPL: Appointed as the Associate Editor for IEEE Antennas and Wireless Propagation Letters, since January 2021.
- Outstanding Reviewer Award: Selected as one of the 2020 Outstanding Reviewers of IEEE Antennas and Wireless Propagation Letters.

Publications (includes journal articles, books and book chapters)

Journals:

- Maharana Pratap Singh, Rahul Jaiswal, Kumar Vaibhav Srivastava, and Saptarshi Ghosh, "A Miniaturized Triple-band Circularly Polarized Antenna using Meander Geometry," Accepted for publication in Journal of Electromagnetic Waves and Applications, 2021.
- Aditi Sharma, Saptarshi Ghosh, and Kumar Vaibhav Srivastava, "A Polarization-Insensitive Band-Notched Absorber for Radar Cross Section Reduction," IEEE Antennas and Wireless Propagation Letters, vol. 20, no. 2, pp. 259-263, Feb. 2021.
- Gaurav Singh, Aditi Sharma, and Saptarshi Ghosh, "A Broadband Multi-layer Circuit Analog Absorber using Resistive Ink," Microwave and Optical Technology Letters, vol. 63, no. 1, pp. 322-328, 2021.
- Saptarshi Ghosh, and Kumar Vaibhav Srivastava, "A Dual-band Tunable Frequency Selective Surface with Independent Wideband Tuning," IEEE Antennas and Wireless Propagation Letters, vol. 19, no. 10, pp. 1808-1812, 2020.

Book Chapters:

- Saptarshi Ghosh, "Active metamaterial FSS based tunable RAS," In S. Narayan, and A. Kesavan (Editors) Handbook of Metamaterial-Derived Frequency Selective Surfaces, Springer, in press, 2021.

Projects active during April 2020-September 2021:
Title - Design and Development of Millimeter-Wave Array Antenna for 5G Mobile Communication (Role: PI)
Duration -2 Years (2021-2023)
Funding Agency - DST-JSPS (International Cooperation Division)
Title - Nanophotonic Structures Based on Composite Materials For Integrated Silicon Photonic Devices (Role: Co-PI)
Duration -3 Years (2021-2024)
Funding Agency - DST-SERB
Title - Functionality Enhancement of Reconfigurable Transistors by Implementing Standalone and Embedded IT-DRAM (Role: Co-PI)
Duration -3 Years (2020-2023)
Funding Agency - DST-SERB
Title -Design and Development of Cost-Effective Compact Millimeter-Wave Antennas for 5G Wireless Communication (Role: PI)
Duration -2 Years (2019-2021)
Funding Agency - DST-SERB

Dr. Swaminathan R.
Assistant Professor
swamiramabadran
@iiti.ac.in

PhD. Indian Institute of Technology (IIT) Kharagpur, 2016

Previous Employment - (includes post-doctoral experience)

Research Fellow, Nanyang Technological University (NTU) Singapore (June 2015 to Feb 2019).

Statement of Research Interests

a. **Broad Research Area -** Wireless Communications, Communication Systems

b. **Research Highlights**

- Space-Air-Ground Integrated Networks (SAGIN)
- Hybrid Optical-RF Communication
- Non-Line-of-Sight (NLOS) Ultraviolet(UV) Optical Wireless Communication
- Blind Channel Code and Interleaver Reconstruction Techniques
- Index Modulation Techniques for Next-generation Wireless Communication
- Energy Harvesting Schemes for Integrated Optical-RF Networks
- Non-Orthogonal Multiple Access (NOMA) Techniques
- Intelligent Reflecting Surface-based Wireless Communications
- Machine Learning for Communication Systems/Wireless Communications

Publications (includes journal articles, books and book chapters)

Journal Publications:

- S. Sharma, A. S. Madhukumar, and Swaminathan R, "Performance optimization for dual-hop hybrid FSO/RF system with selection combining", IET Optoelectronics, vol. 14, no. 6, pp. 422-433, Sep. 2020.
- M. Siddharth, S. Shah, N. Vishwakarma, and Swaminathan R, "Performance analysis of adaptive combining based hybrid FSO/RF terrestrial communication", IET Communications, vol. 14, no. 22, pp. 4057-4068, Dec. 2020.

- Swaminathan R, S. Sharma, N. Vishwakarma, and A.S. Madhukumar, "HAPS-based relaying for integrated space-air-ground networks with hybrid FSO/RF communication: A performance analysis", IEEE Transactions on Aerospace and Electronic System, vol. 57, no. 3, pp. 1581 - 1599, Jan 2021

Events/ Seminars organized - Organized a TEQIP III online Short Term Course (STC) on 5G and Beyond Wireless Technologies: Modelling and Simulations using MATLAB from Dec 24 to 26, 2020

Role: Course Coordinator and Instructor, Budget: Rs. 6,00,000, No. of Registered Participants : 80

Projects active during April 2020-March 2021

Title -High-Altitude Platform Station based Hybrid FSO/RF Communication for Future Satellite Communication Systems.

Duration - Dec 2019 – Dec 2021

Funding Agency - SERB – DST, Start-Up Research Grant (SRG)

Title- Development of Landslide Early Warning System and Real Time Monitoring, Uttarakhand (Role : Co-PI)

Duration- 2020 – 2023

Funding Agency DST-NRDMS

Brief Description -The project is aimed to perform the following objectives: (a) To design efficient WSNs for landslide monitoring using the above-mentioned communication techniques. (b) To investigate the performance of the proposed networks by deriving theoretical expressions for the performance parameters and validating the same using Monte-Carlo simulations and real-time hardware testbeds.

Dr. Trapti Jain
Associate Professor
trapti@iiti.ac.in

PhD. - IIT Kanpur

Previous Employment (includes post-doctoral experience)

- Assistant Professor, IIT Mandi, H.P. (Dec. 2010 to 8th June 2012)
- Faculty member, Madhav Institute of Technology and Science, Gwalior, M.P. (May 1999 to November 2010)

a. **Broad research area -** Power System

b. **Research Highlights -** Since the operational philosophy of tomorrow's power grid is expected to change significantly with the technological advancements, the focus of our research group is towards analyzing the impact of these technologies on the operation of power systems and determining the measures needed to mitigate possible negative impact. Stable operation of microgrids, use of synchrophasor technology for security assessment of power syste, power quality monitoring and data analytics in smart grid are the few thrust areas of our research.

Publications

1. Journal publication, 1 Conference publication, 1 book chapter

Vinay K Tiwari, Amod C Umarikar and Trapti Jain, "Measurement of Instantaneous Power Quality Parameters Using UWPT and Hilbert Transform and its FPGA Implementation", IEEE Transactions on Instrumentation and Measurement, Vol. 70, pp. 1-13, 2021

Projects active during April 2020-March 2021

Title - Development of Smart Grid Research Facility

Duration - 2016-2021

Funding Agency - DST

Brief Description - Simulations have been a powerful and convenient tool for carrying out research in various areas of power system. With the advancement of power electronic converter technologies having high-frequency pulse width modulation signals, traditional offline simulations are no longer suitable to study the system having large number of switching devices. Furthermore, this type of simulation usually lacks the hardware interface with real devices. The controllers developed should ideally be validated on the actual system in real time environment. However, due to the high cost and risk involved, it is difficult to test new control schemes on the actual power system.

In order to overcome the aforementioned problems, a Real Time Simulator (RTS) capable of running a large and complex model at the physical time is required. The RTS facilitates the simulation of the power system networks, power electronic and control circuits in real time environment. It provides improved system understanding and validation of controllers through real time Hardware in-the-loop (HIL) tests.

Dr. Vimal Bhatia
Professor
vbhatia@iiti.ac.in

PhD. The University of Edinburgh, UK.

Previous Employment

- C-DOT (India), Hughes Software Systems (India), DTS (UK), AudioSoft (UK), AmberFin (UK), and Openwave Systems (UK).
- Academic associations with other institutions (Affiliate/Adjunct/ Visiting posts)
- Adjunct faculty at IIT Delhi and IIIT Delhi.

Statement of Research Interests

a. **Broad Research Area -** Future Communication and Signal Processing Systems

b. Research Highlights - Proposing new architectures and solutions for communications and signal processing problems. In particular, solutions for visible light communications for efficient high speed data transfer. The research on algorithm design for large/massive-MIMO, and NOMA schemes are currently being explored in my research group. We have also been able to demonstrate world's first standard (IEEE 802.22) compliant TV-White Space platform on open source software and hardware with improved channel estimation, spectrum sensing and data rates. We have also explored compressed sensing based techniques for ultra-wide band communications. Validation of achievable data rates and outage by the future cooperative networks is found by our work on theoretical bounds under various channel conditions, modulation techniques and practical system considerations. The quality and innovative research has been well accepted and recognized by the IEEE, Elsevier, Springer, OSA, IET and IETE publications. Published articles have featured in the most downloaded/popular article list. The research has been accepted in leading conferences/workshops in communications and signal processing including ICC, Globecom, WCNC, VTC, SPAWC, SPCOM, ANTS, NCC, EUSIPCO, SSPD, Photonics and others. Some of the papers have received travel grants from DST and IEEE SPS.

c. Awards and Achievements - IETE-Prof SVC Aiya Memorial Award 2019

Patents (filed) -12

Publications - (includes journal articles, books and book chapters)

Over 200 journals and conferences published. Three representative publication in FY 2019-20:

- V. Bhatia, P. Swami, S. Sharma, and R. Mitra "Non-orthogonal Multiple Access - an Enabler for Massive Connectivity", Special Issue on 5G and Beyond – Springer Nature Journal of IISc, 2020
- P. Swami, M. Kumar, V. Bhatia, and T. Ratnarajah, "Performance Analysis of NOMA Enabled Hybrid Network with Limited Feedback", IEEE Transactions on Vehicular Technology, 2020.
- S. Sharma, K. Deka and V. Bhatia, "Thresholdless Detection of Symbols in Nano-Communication Systems", IEEE Transactions on Nano-Bioscience, 2020.

Events/Seminars organized –

- Indo-UK Workshop on at IEEE ANTS 2019.
- CEP on at Wireless Communications 2019.

Projects active during April 2020-March 2021

Title -Edge Caching for High Capacity Wireless Networks exploiting Big Data Analytics and Machine Learning

Duration - 2 years

Funding Agency - Ministry of Human Resource and Development, India and UKIERI, UK

Brief Description - Developing machine learning algorithms for big data analytics for edge computing.

Title -6G for Sustainable Development

Duration -2 years

Funding Agency - Ministry of Human Resource and Development, India and UKIERI, UK

Brief Description - Developing machine learning algorithms for big data analytics for edge computing.

Title -Design and implementation of robust communication receiver based on OFDM in interference limited channels for TVWS

Duration -4 years

Funding Agency - Ministry of Electronics and Information Technology, India

Brief Description - Algorithm and prototype development of IEEE 802.22 receiver.

Title - Design of efficient strategies for phase estimation in optical metrology using advanced signal processing techniques

Duration - 3 years

Funding Agency - Department of Science and Technology, India.

Brief Description -To study and propose measurement of dynamic variables using advance signal processing techniques.

Title - High Capacity Wireless Network Architecture Using Machine Learning.

Duration - 3 years

Funding Agency - Department of Science and Technology, India – UKIERI, UK.

Brief Description - To study and propose machine learning algorithms for wireless networks.

Title - Indo-Finish exchange program

Duration - 6 months

Funding Agency - DST-AKA

Brief Description - Indo-Finish exchange program

Dr. Vipul Singh
Associate Professor
& Head of Department
vipul@iiti.ac.in

PhD. - Kyushu Institute of Technology, Wakamatsu, Kitakyushu, Fukuoka, Japan, 808-0196.

Previous Employment (includes post-doctoral experience)

- Associate Professor in Department of Electrical Engineering at IIT Indore (June 2016-till date).
- Assistant Professor in Department of Electrical Engineering at IIT Indore (November 2010-June 2016).
- Post-doctoral fellow at Research Institute of Electronics, Shizuoka University, Hamamatsu, Japan (April 2009 – November 2010).

Statement of Research Interests

a. Broad Research Area - Organic electronics, synthesis of nanostructured materials, Hybrid devices, bio/chemical/gas sensors, Photoluminescence spectroscopy, Novel deposition techniques, Solar blind detectors, and Piezoelectric materials.

b. Research Highlights - Molecular and Nanoelectronics Research Group (MNRG), led by Dr. Vipul Singh was established in 2011. We are into solution processed material synthesis of inorganic & organic semiconductors. We utilize the unique opto-electronic properties exhibited by these nanostructured materials towards demonstration of functional devices viz. photodetectors, photo transistors and other type of sensors. We are interested in studying the photo-generated charge carrier dynamics in semiconductors. We are also focussedtowards development organic photosensitive transistors using novel techniques. Of particular interest to us is the LSPR effect in nanostructured materials.

c. Awards and Achievements

- Delivered invited lectures on topics related to Organic electronics, under the G2E2 program by Government of Japan, from 8th-12thDecember 2019.
- Reviewer of various DST project proposals.
- Reviewer of various reputed international journals.
- Reviewer of Ph.D. theses within India.
- One of our journal papers was selected for the cover page of the IEEE Sensors Letters.
- Examiner of M. Tech. projects of Institutes within India.

Publications (includes journal articles, books and book chapters)

Best three papers out of total 10 papers published in peer reviewed Sci indexed journals during 01/04/2020 to 31/03/2021.

- Manikandan Muthu, Rajagopalan Pandey, Xiaozhi Wang, Arun Kumar Chandrashekhar, I A Palani and Vipul Singh, "Enhancement of Triboelectric Nanogenerator Output Performance by LASER 3D Surface Pattern Method for Energy Harvesting Application"; Nanoenergy, vol. 78 (2020) 105205.
- Tejendra Dixit, Akash Tripathi, Swanand V Solanke, K L Ganapathi, M S Ramachandra Rao and Vipul Singh, "Ultrawide Bandgap Copper Oxide: High Performance Solar Blind Photodetection"; IEEE Electron Device Letters, vol. 41 (2020) 1790.
- Jitesh Agrawal, Tejendra Dixit, I A Palani and Vipul Singh, "Highly Visible Blind ZnO Photodetector by Customizing Nanostructures with Controlled Defects"; IEEE Photonics Technology Letters, vol. 32 (2020) 1439.

Events/Seminars Organized

- Member organizing team of 30th Annual meeting of MRS-Japan, Symposium L: Organic Ionotronics for sustainable future, December 09-11, 2020.
- Gave Invited lecture under a G2E2 program of Government of Japan, on the topic "Solution Processable Optoelectronic Devices: Current Trends and Future Prospects" on December 23, 2020.
- QIP sponsored short-term course on "Photovoltaic Devices and Systems: Challenges and Scope", held at IIT Indore from March 08-13, 2021.

Projects active during April 2020-March 2021

Title - "Development of Low Voltage, High Sensitivity Organic Photosensitive Transistors for Near Infrared Light Sensors"

Duration - 3 years (2017-2020)

Funding Agency -Department of Science and Technology, Government of India

Brief Description - The project aims towards development of low voltage and high sensitivity OFETs, by employing conducting polymers having lower band gap and novel techniques for the development of the high sensitivity OFET. These OFETs would be sensitive towards NIR region of wavelength and can be employed for biomedical applications.

Title - "Development of High Sensitivity ZnO Nanostructures Based Gas Sensing Array for Space Applications"

Duration - 2 Years (2019-2021)

Funding Agency - ISRO, Respond Scheme

Brief Description - In this project we intend to develop high sensitivity ZnOnanostructures based gas sensors for sensing NOX gases. As a final aim of the project we intend to develop sensor based array for sensing mixture of gases in complex environments. Metal nanoparticles will be decorated on these nanostructures for improving their specificities.

Title - "Design and Development of Laser Decal Transfer Based Micro 3D Printer for Printing Microdevices"

Duration - 2 Years (2018-2020)

Funding Agency -DST, Technology Development Board, Advanced Manufacturing Technology

Brief Description - In this project we intend to utilize the Laser Induce Forward Transfer Technique (LIFTT) for transferring alloyed metal nanoparticles for development of micro three dimensional printers which can be utilized for printing 3D structures over substrate useful for device development.

Dr. Vivek Kanhangad

Associate Professor
kvivek@iiti.ac.in

PhD. - The Hong Kong Polytechnic University (HK PolyU)

Previous Employment - Visiting Faculty, International Institute of Information Technology Bangalore (IIITB) (2010-2012)

Statement of Research Interests

a. **Broad research area -** Signal and Image Processing with focus on Biometrics and Biomedical Applications

b. **Research Highlights -** Pattern Recognition and Image Analysis (PRIA) research group at IIT Indore is primarily engaged in addressing research problems related to biometric recognition. With the development of high-resolution

fingerprint scanners, high-resolution fingerprint-based biometric recognition has received increasing attention. Level-3 fingerprint features, which include very fine details such as pores, are generally observable in fingerprint images having a resolution greater than 800 dpi. Pore features have been found to be effective for fingerprint recognition. Accurate detection of pores is crucial for biometric recognition using high-resolution fingerprints. Recently, we have developed a deep convolutional neural network (CNN) based method for detecting pore coordinates in high-resolution fingerprint images. We have also developed a CNN-based framework for high-resolution fingerprint recognition.

c. Awards and Achievements

- Editorial board member of IEEE Biometrics Compendium Journal.
- Member of IEEE SMC technical committee on Biometrics and Applications.
- Technical program committee member for reputed international conferences on biometrics.

Publications (includes journal articles, books and book chapters)

- Vijay Anand and Vivek Kanhangad, "PoreNet: CNN-Based Pore Descriptor for High-Resolution Fingerprint Recognition," IEEE Sensors Journal, vol. 20, no. 16, 2020.
- Ankita Jain and Vivek Kanhangad, "Gender recognition in smartphones using touchscreen gestures," Pattern recognition Letters, vol. 125, pp. 604-611, July 2019.
- 3. Vijay Anand and Vivek Kanhangad, "Pore detection in high-resolution fingerprint images using deep residual network," Journal of Electronic Imaging, vol. 28, no. 2, April 2019.

Events/Seminars organized

- A five-day short-term course on Signal and Image Processing with Hands-on Sessions from 2 March 2020 to 6 March 2020.
- 2. Invited seminar in the department of electrical engineering by Professor S. C. Dutta Roy (A former professor of electrical engineering at the Indian Institute of Technology Delhi) on 5 April 2019.
- TEQIP Short-term course

  Course title: Deep Learning for Computer Vision

  Nov 26-28, 2020. Sanction date: Sept 30, 2020

  Rs. 3,36,000
- TEQIP Short-term course

  Course title: Signal and Image Compression: From Fundamentals to Standards

  Dec 7-9, 2020 Sanction date : Sept 30, 2020

  Rs. 2,28,000
- Short Term Course

  Faculty Training on Future Skill Technologies on " Artificial Intelligence and Machine Learning"

  From 12/14/2020 to 12/24/2020 Rs. 20,00,000

Department of Mechanical Engineering

Research Thrust/Facility

- Microchannel heat transfer, Nuclear thermal Hydraulics, combustion and Computational Fluid Dynamics
- Thermal management of power-dense electronics
- Condition monitoring and prognosis
- Micro-mechanics and Nano-Mechanics, High Entropy Alloys, Multiscale modelling
- Laser and Additive manufacturing, Smart Manufacturing
- Mechatronic and Control
- Acoustics of ducts, electromagnetic crimping

Application Areas

- Biomechanics and composite structure
- Gear Manufacturing and Noise vibration Harness (NVH)
- Smart Manufacturing
- Green energy and Bio fuels
- Robotics and Control
- Automotive and Aerospace
- Electronic and Steel Processing
- Waste Energy Harvesting
- Health prediction of the hydraulic systems

From the HoD's Desk

Dr. Santosh K. Sahu
Associate Professor
sksahu@iiti.ac.in

The Mechanical Engineering Department is committed to provide quality education by carrying out robust research programs and working closely with industry. The Department offers various programmes such as BTech, MTech, MS(Research) and PhD. Currently, the department offers two MTech programmes (i) Production and Industrial Engineering and (ii) Mechanical System Design. One of our major objectives is to provide quality engineering education with basic as well as specialized engineering training required for the present and emerging requirements of the society. The department also has a responsibility to conduct relevant social research with cutting-edge technology; to provide continuing education to practicing industrial engineers; and, to develop industry/academia collaborations. The department also organizes continuing educational programs in the cutting edge areas. It comprises of 22 regular faculty members.

Achievement of the Department in the current reporting year (2020-2021)

- Developed world class infrastructures in various cutting edge technologies including, Industry 4.0, autotronics, additive manufacturing, smart materials, spray diagnosis, thermal hydraulics, micro-channel heat transfer, computational fluid dynamics, vibration and condition monitoring, atomistic modelling among others.
- Secured funding from different external funding agencies including SERB, DST, CSIR, ISRO, DRDO, Royal Academy of Engineering, RSF and OVDF scheme.

- Strong international linkage through VAJRA faculty scheme, SPARC programme and through outreach programmes
- The research work in various areas has been recognized by the scientific community in the form of patents, book chapters, international peer-reviewed publications, lectures in national and international conferences
- Department has built strong linkage in terms of consultancies and man power training with industries such as Vovlo Eicher, WABCO India Ltd and John Deere.
- Alumnus from the department is placed in reputed industries and R&D centres including ISRO, DRDO. In addition, the students have also received scholarship to pursue their higher studies including post-doctoral fellowships in highly ranked abroad universities.

- Dr. Yogeshwar Nath Mishra

Prof. Neelesh Kumar Jain
Professor
nkjain@iiti.ac.in

PhD : IIT Kanpur (2003)

Previous Employment

(includes post-doctoral experience)

IIT Rookree (17 June 2004 to 28 Jan 2010)

Oklahoma State University, Stillwater, USA (July-Dec 2008)

South Asia International Institute, Hyderabad (June 2003-May 2004)

Netaji Subhash Institute of Technology, Delhi (July 2002-June 2003)

Statement of Research Interests:

a. Broad research areas

- Additive Manufacturing of Metallic Materials and biomedical implants
- Development of FGM and SMM by μ-Plasma Transferred Arc Process
- Micro-joining of Thin Sheets
- High Quality Gear Finishing by Advanced Finishing Processes
- Sustainable Hobbing of Gears
- Near Net-shape Manufacturing of Meso-sized Gears
- Manufacturing of Non-Circular Gears by WSEM
- Advanced and Hybrid Machining Processes
- Micromachining and Nano-finishing Processes
- Modeling and Optimization of the Manufacturing Processes

b. Research highlights

- Development of micro-plasma transferred arc (μ-PTA) wire and powder deposition processes for various meso-sized additive manufacturing (AM) of different metallic materials, knee implants from biocompatible materials, developing functionally graded materials (FGM) and shape memory materials (SMM)
- Development of electrochemical honing (ECH) and pulse-ECH process as an economical and sustainable alternative process for high quality finishing of different types of cylindrical and conical gears

- Development of abrasive flow finishing (AFF) process for high quality finishing of spur and bevel gears

  Establishing WEDM as near-net shape manufacturing process for high quality meso-sized cylindrical, conical, and non-circular gears through extensive experimental research, modeling and optimization

c. Awards and Achievements

- Surya Gaurav National Award 2021
- Best Researcher Award 2020
- Corona Warrior Certificate 2020
- Indian Panelist, VAIBHAV Summit on Advanced Mfg organized by the Ministry of Education on 23 Oct 2020
- Chief Guest, online inauguration of 72 FDP by ATAL Academy of AICTE, 5th July 2021
- Chief Guest, webinar on "Reliability of Complex Engineering Systems" organized by SRESA's Indian Institute of Risk and Reliability, 29th May 2021
- Chief Guest, valedictory function of "International Conference on "Innovations in Product, Process and System Design" organized by SVVV Indore, 6th March 2021.
- Special Guest, "2nd Winter School on Observational Astronomy" jointly organized by MPSCT Bhopal, IIA Bangalore and IIT Indore, 1st Feb 2021
- Guest of Honor, "11th International Conference on Material Processing and Characterization" jointly organized by SCRS New Delhi and IIT Indore, 15-17 Dec 2020
- Guest of Honor, "10th International Conference on Soft Computing for Problem Solving (SocProS 2020)",jointly organized by SCRS New Delhi and IIT Indore, 18-20 Dec 2020
- Guest of Honor, FDP under TEQIP-III on "Fundamentals and Advances in Powder Metallurgy" 8 Dec 2021.
- Patron, international e-conference on"Ecosystem Restoration for Resilience and Sustainability: Living with Nature" organized by NIDM New Delhi and IIT Indore, 5-7 June 2021
- Patron, Workshop on "High Performance Computing in the Agriculture Domain" SERC under NSM, 14-16 July 2021
- Patron, international e-conference on"Ecosystem Restoration for Resilience and Sustainability: Living with Nature" organized by NIDM New Delhi and IIT Indore, 5-7 June 2021
- Panelist, "Role of IITs in Imbibing Entrepreneurial Zeal to Young Minds" in National Skill and Entrepreneurship Innovation Conclave, 25th Feb 2021
- Panelist, "Industry-Academia Meet 2020" organized by RGPV Bhopal, 24 Sep 2020
- Panelist, MPCST Consultation on Science, Technology and Innovation Policy (STIP) 2020 on 17 Sep 2020
- Panelist, "Re-engineering from within" Engineer's Day Celebration, 15th Sep 2020
- Panelist, "AtmaNirbhar, Madhya Pradesh: Entrepreneurship and Self-Employment and Increasing Employability"organized by Department of Technical Education and Skill Development MP Govt. on 10th Aug 2020.

  Patents: One (complete specifications filed)

  Magnetic Field Assisted Micro-plasma Transferred Arc Powder Additive Layer Manufacturing Process (Inventors: Mayur Sudhakar Sawant, Pankaj Kumar, Neelesh Kumar Jain) Indian Patent Application No. 201921022471 published on 20th Dec 2019; First Examination Report submitted.

  Publications : (includes journal articles, books and book chapters)

Dr. Devendra Deshmukh

Associate Professor
dldeshmukh@iiti.ac.in

PhD. :IISc Bangalore (2012)

Previous Employment :(includes post-doctoral experience)

2002-2005 TVS Motors Company

2005-2007 General Motors Technical Center India Bangalore

a. Broad research area

- Combustion Engines, Laser diagnostics in Spray and Combustion and Modelling

b. Research Highlights

- Multicomponent spray modelling for biodiesel under LTC condition
- Low Temperature Combustion engine using biofuels
- Dense spray characterization with liquid volume fraction and SMD distribution in dense sprays

- Combustion diagnostics in flames using structured illumination
- Optical engine diagnostics in diesel engine.

c. Awards and Achievements

- DST-SERB project on "Dense spray characterization"
- Received grant under SPARC project for "Structured Illumination for Turbid and Turbulent Environments (SITTE)"
- Received project under special call on Combustion from SERB-NCCRD "Investigation of Biodiesel Spray in an Optical Diesel Engine.

Publications:(includes journal articles, books and book chapters)

Upto a selection of best three

- Lanjekar, R. D., & Deshmukh, D. " A review of the effect of the composition of biodiesel on NOx emission, oxidative stability and cold flow properties" Renewable and Sustainable Energy Reviews. 2016

Events/Seminars organized

- SERB School on "Combustion Diagnostics and Modelling" 2013
- A public Lecture by Prof.PeterLindstedt in collaboration with UKIRE 2014
- Workshop on "Sprays and Combustion Diagnostics" 2019

Projects active during April 2018-March 2019

Title: "Investigation of Biodiesel Spray in an Optical Diesel Engine"

Duration: 2017-2019

Funding Agency: SERB

Brief Description: Interaction of biodiesel spray with flow field inside the optical diesel engine.

Dr. Anand Parey
Professor
anandp@iiti.ac.in

PhD. : Indian Institute of Technology Delhi

Previous Employment :(includes post-doctoral experience)

- Post-Doctoral Fellowship from the University of Alberta, Edmonton, Canada from Dec 2006 to Dec 2007.
- Manager in Heavy Engineering Division, Larsen and Toubro Ltd. Mumbai, from Sep. 2008 to July 2009,
- Manager-Technology in Global R&D Centre, Crompton Greaves Ltd. Mumbai from April 2008 to August 2008.
- Lecturer in Department of Mechanical Engineering, BITS Pilani Goa Campus from Aug 2005 to Nov. 2006.

Statement of Research Interests

a. Broad research area

- Condition monitoring,
- noise and vibration isolation
- Signal processing of mechanical systems

b. Research Highlights

- Developed algorithm for fault detection of wind turbine gearbox.

Publications : (includes journal articles, books and book chapters)

Upto a selection of best three

- reciprocating compressor under limited speed variation, Mechanical Systems and Signal Processing, vol. 125, pp. 275-287, 2019.

Events/ Seminars organized

- Artificial Intelligence and Advanced Signal Processing Techniques for Engineering Applications; 05-07 October 2018.
- Research and Development in Condition Monitoring of Rotating Machines; 10-12 December 2018.
- Vibration Monitoring Techniques for Machinery Fault Diagnosis; 18-19 March 2019.

Projects active during April 2019-March 2020

- Title: Internal noise measurement, analysis, source identification and design counter measures for trucks and buses (Funded by DST UAY).
- Design, Modeling and diagnostic of wind turbines for sustainable energy efficiency (Funded by DST,India-Tunisia Joint Research).

Dr. I.A. Palani
Associate Professor
palaniia@iiti.ac.in

PhD. Indian Institute of Technology Madras, 2010

Previous Employment (includes post-doctoral experience)

Jan 2012- Sep 2016- Assistant Professor, IIT Indore

Sep 2010- December 2011 Post-Doctoral Researcher, Graduate School of Information science and Electrical Engineering.

Statement of Research Interests

a. Broad research area

- Mechatronics system design
- Laser Assisted Micro-Manufacturing
- Additive Manufacturing
- Micro-Nano Fabrication
- Shape Memory alloys
- Smart materials and structures
- Soft Robotics

b. Research Highlights

- Lead Free Triboelectric Nanogenerators has been developed to harvest energy from vibration
- SMA integrated jellyfish soft robotic structure for underwater robotic systems
- laser nitriding of Engine blocks in collaboration with industry.
- Indigenously developed wire arc additive manufacturing has been deployed in manufacturing tailor made Shape memory alloy porous structures for intelligent filters
- Shape memory thin film bi-morphs has been developed to cater the energy harvesting from waste heat
- Shape memory alloy coated optical fibers are developed for condition monitoring and temperature sensing.

c. Awards and achievements

- Mr.Karthick and Mr.Manikandan from Our Research Group got selected for SERB OVDF fellowship for the year 2020, to pursue their research in purdue university
- Ms.ShalinisinghPh.D research scholar from our group has received DORA student exchange fellowship to pursue part of their Ph.D Thesis work in Estonia
- Mr.Jayachandran from our research group has received MP you scientist award for the year 2021

Patents :Indian Application No.: 201821038754, Title: "Strained SMA bimorph & spring based condition monitoring system for fluid leak detection in hydraulic hoses".

Events/Seminars organized

- Coordinator for the TEQIP sponsored Short term course on Micro Mechatronics and Soft Robotics, December 2020.
- Coordinator for the ACITE sponsored course on Micro and Precision Manufatcuring, October 2020
- Coordinator for the course on Laser Micro manufacturing surface and Material processing, July 2020

Projects active during March 2020- April 2021

Title: Design and Development of deflecting micromirrors and micromanipulators using laser micromachined Shape Memory Alloy bimorph for optomechatronics applications

Duration: 3 years (2021- 2024)

Funding Agency :SERB Core Research Grant (Rs 62,70,429)

Brief Description: The main objective of the project is to develop high precision Shape memory alloy actuated intelligent mirrors for different optomechatronics.

Title :DESIGN AND FABRICATION OF SHAPE MEMORY ALLOY (SMA) BASED ACTUATORS FOR SOFT ROBOTIC APPLICATIONS

Duration :2 years (2021-2023)

Funding Agency :DRDO CARS Scheme(Rs 24,33,600)

Brief Description :The objective of the project is to develop high frequency Smart Shape memory alloy actuators for aerial robots.

Title: Design and development of Laser Decal Transfer based Micro 3D Printer for printing micro devices.

Duration: 2 years (2019-2021)

FundingAgency: DST:AMT (38 Lakhs)

Brief Description: The objective of the project is to develop micro-3d printers for printing metals and alloyed structures for MEMS and other functional applications.

Title: Development of thick and thin NiTi shape memory alloy porous structures using laser and wire arc additive manufacturing

Duration: 3 years (2019- 2022)

FundingAgency: DST:RSF with St Petersburg university Russia (Total cost for Indian Counterpart is 88 Lakhs)

Brief Description:The main objective of the project is to Shape memory alloy micro-porous structures for different functional applications using Additive Manufacturing Technique.

Dr. Shanmugam Dhinakaran
Associate Professor
sdhina@iiti.ac.in

PhD. IIT Kharagpur (2008)

Previous Employment

(includes post-doctoral experience)

- Assistant Professor, IIT Indore (2012 - 2016)
- Post-Doctoral Research Experience (2006 - 2012)
- Department of Fluid Dynamics and Heat Transfer, Université de Valenciennes et de Hainaut Cambresis, France
- Department of Chemical Engineering; Department of Mechanical Engineering, Faculty of Engineering, University of Porto (FEUP), Porto, Portugal
- Department of Biological Engineering, University of Minho, Braga, Portugal
- Laboratoire de Physico-Chimie des Polymères,Université de Pau et des Pay de L'Adour, Pau, France

Statement of Research Interests

a. Broad research area

- Computational Fluid Dynamics & Heat transfer;
- Heat Transfer in Porous Media;
- Biofluid Mechanics and Bioheat Transfer

b. Research highlights

Almost everything around us, at some visual resolution, is porous. We have used the underlying theory of porous media modelling in studying both fundamental and real-time problems. We proposed a technique for improving the design of a conventional Flat Plate Solar Collector (FPSC). We believe that this technique, published in Renewable Energy (Elsevier), can considerably enhance the thermal performance of FPSC.

These days, there is increasing interest in miniaturized technologies in diagnostics, therapeutic testing, and biomedicinal fundamental research. The same is true for the dermal studies in topical drug development, dermatological disease pathology testing, and cosmetic science. Myself and my research collaborators in India and Hungary published an article on the recent scientific literature and knowledge about the application of skin-on-a-chip technology in drug diffusion studies. In future, we plan to perform numerical and as well as experimental study on skin-on-a-chip devices.

Events/Seminars organized

- TEQIP-III Sponsored short-term course on "Introduction to Computational Fluid Dynamics", Dec 28-30, 2021 at IIT Indore (Role: Coordinator)
- AICTE sponsored short term course on "Computational Fluid Dynamics for Scientists and Engineers", March 26-31, 2021, at IIT Indore (Role: Coordinator).

Title: On the efficiency of Lattice Boltzmann Methods for non-Newtonian Fluid Flows

Duration: 3 Years

Funding Agency: Science and Engineering Research Board (SERB), DST

Brief Description: This project deals with the development of CFD codes based on the Lattice Boltzmann Method for non-Newtonian fluid flows.

Dr. Santosh K. Sahu
Associate Professor
sksahu@iiti.ac.in

PhD. Indian Institute of Technology Kharagpur, India

Previous Employment

- Assistant Professor, (March 2008 - October 2009), Department of Mechanical Engineering, National Institute of Technology Rourkela, India
- Assistant Professor, (October 2009-June 2016), Department of Mechanical Engineering, Indian Institute of Technology, Indore.

Academic associations with other institutions (Affiliate/Adjunct/ Visiting posts)

- Visiting Scholar, (September 2011 - January 2012), School of Nuclear Engineering, Purdue University, USA
- Visiting Researcher (October 2, 2019-October 21, 2019), School of Nuclear Engineering, Purdue University, USA

Statement of Research Interests

Broad research area

- Thermal Engineering and Fluid Flow

Research Highlights

- Thermal Engineering
- Thermal-Hydraulics of Nuclear engineering
- Nano fluids
- Gas flow through Micro channels
- Impinging Jets
- Synthetic Jet
- Heat Exchanger

- Pool Boiling Heat transfer
- Phase Change Materials3

Awards and Achievements

- Research article selected as qualified student award winner of the student paper competition for 28th Conference on Nuclear Engineering Joint with the ASME 2020 Power Conference (ICONE28-POWER2020-6524), California, USA, 2020.
- Research article selected as Best Presentation Award in Asia region in 28th Conference on Nuclear Engineering Joint with the ASME 2020 Power Conference (ICONE28-POWER2020-6524), California, USA, 2020.
- Member, American Society of Mechanical Engineering (ASME).
- Life Member, Indian Society for Heat and Mass Transfer (ISHMT).
- Track Session Chair for International Conference on Fluid Mechanics and Fluid Power (FMFP-2020) (IIT Guwahati).

Publications (includes journal articles, books and book chapters)

Projects active during April 2019-March 2020

Title

- Development of light weight heat sink integrated with phase change material (PCM) for cooling applications (Ongoing).
- Thermal management of electronic components using phase change material (Ongoing)
- A novel thermal management system for electric vehicle batteries using phase change composite (ongoing).

Duration: 3-years, 5-Years, 3-years

FundingAgency: DST India, DST India, SERB India, CSIR India

Brief Description

- DST/TMD/MES/2K17/65 (G)
- DST/INSPIRE/03/2017/000041
- CSIR/22(0807)/19/EMR-II

Dr. Kazi Sabiruddin

Associate Professor
skazi@iiti.ac.in

PhD. In ME from IIT Kharagpur (2010)

Previous Employment

- BIT Mesra as Assistant Professor (2009-2010)
- JUET Guna as Assistant Professor (2010-2011)

Statement of Research Interests

a. Broad research area

- Surface Engineering

b. Research Highlights

- Thermally sprayed ceramic coatings
- Plasma sprayed alumina coating for tribological applications
- Synthesis of hydoxyapatite powder from natural resources
- D-Gun coated alumina as TBC
- Plasma sprayed HA for biomedical application
- Explosively coated Ni-Al

Publications

Dr. Pavan Kumar Kankar

Associate Professor
pkankar@iiti.ac.in

PhD. Indian Institute of Technology Roorkee

Previous Employment

- Assistant Professor, PDPM Indian Institute of Information Technology, Design and Manufacturing (July 25, 2011-December 03, 2018)
- Visiting Research Associate, Villanova University, Villanova, Pennsylvania, USA (May 2014 to July 2014)

Statement of Research Interests

a. Broad research area

- Condition Monitoring of Mechanical Components
- Machine Design, Vibration, Soft computing, Nonlinear Dynamics

b. Research Highlights

- Force and vibration analysis during root canal shaping
- Bearing and gear condition monitoring
- Buckling analysis of telescopic hydraulic cylinder
- Health prediction of the hydraulic systems

- Skin lesion classification using transfer learning approach

c. Awards and Achievements

- Panelist in Session on Health and Usage Monitoring Systems (V8H1S3), Vertical: Aerospace Technologies, Vaishwik Bhartiya Vaigyanik Summit, October 05, 2020.

Publications (includes journal articles, books and book chapters)

Projects active during April 2020-March 2021

Title: Force and vibration analysis in biomechanical preparation of root canals using endodontic file system: In-vitro study

Duration: 3 Years

Funding Agency: Core Research Grant (CRG) of SCIENCE & ENGINEERING RESEARCH BOARD (SERB), DST

Brief Description: At present, real-time measurement of the vibration and force signals in the in-vitro RCT operation has not been much focused. Thus, as of now, it is very hard for a practitioner to predict the failure or fracture of the endodontic file during operation. This study aims to examine the force and vibration in root canal treatment during biomechanical preparation of teeth to predict the failure of the file. Time-domain data acquisition and signal processing techniques will be used for real-time condition monitoring of endodontics file.

Dr. Bhupesh Kumar Lad

Associate Professor
bklad@iiti.ac.in

Previous Employment (includes post-doctoral experience)

Research Engineer, GE Global Research, March 2010-September 2011

IIT Indore, Assistant Professor, September 2011-January 2017

Statement of Research Interests

a. Broad research area

- Industrial and Systems Engineering (Smart Manufacturing, Prognostics, Reliability)

b. Research Highlights

Globally, the manufacturing industry is gearing up for the next level of industrial revolution and it is called Smart Manufacturing or Industry 4.0. Smart manufacturing is where manufacturing machines and systems are self-aware, can communicate with each other, and are able to make decisions that will improve system performance. Smart manufacturing requires machines to have the ability to gather (and share) data about its condition and operation, ability to perform data analytics to understand how its condition and operation affects system performance, and decision-making ability to take actions that will improve/optimize system performance based on the gathered data. In line with this, my research aims to investigate various aspects of smart manufacturing and its application in industries.

c. Awards and Achievements

Distinguished International Associate (DIA) award by Royal Academy of Engineering, London, 2021.

Patents

- Method And System For Providing Smart Communications For Distributed Operations Planning In An Industrial Network, B. K. Lad, M. S. Kulkarni, V. S. Pandhare, N. Agrawal, K. Upasani, M. Bakshi, Indian Patent Office, Application No. 201621007003
- Palani, B. K. Lad, Tameshwar Nath, Pradeep Kundu, Application No.: 201621007005
- A Metal Inert Gas (MIG) based additive manufacturing technique for fabricating shape memory alloy rings, Priya Chouhan, Shiva Sekar, I.A. Palani, and B. K. Lad, Indian Patent Office, No.: 201721007136 (Filled on February 28, 2017)

Publications

- Kumar S., Manjrekar V. Singh V. and Lad B. K, (2020), Integrated yet distributed operations planning approach: A next generation manufacturing planning system, Journal of Manufacturing Systems. 54, 103-122.

Events/Seminars organized

- A workshop on Smart Manufacturing, March 2021

Projects active during April 2019-March 2020

Title: Industry-Academia Consortium for Digitization in Small and Medium Enterprises (SMEs)

Duration: April 2019 to February 2021

FundingAgency: RAE, London

Brief Description

- Structured methodology to assess SME maturity for digitalisation
- Development of four digital solutions for SMEs
- Laboratory scale validation and demonstration

- Implementation guidelines and Commercialization

Title: Industry Academia Consortium on Smart Manufacturing (InDAC-SM)

Duration: June 2020 onwards

FundingAgency: Flavorite Technologies Private Limited, Indore

Brief Description:The consortium aims at developing pathways for digital engagement that the industries can consider transforming themselves into highly efficient digitally-enabled and intelligent manufacturing businesses. The consortium provides a platform for industries and academia to share thoughts and learning; identify problems and develop solutions for realization of smart manufacturing or Industry 4.0.

Title: Digital Twin Development for Torque Tool

Duration: September 2020 (ongoing)

FundingAgency: John Deere, Pune

Brief Description

- Digital twin will identify the current assembly process (product and job), selected torque and applied torque.
- Digital twin will show basic analytics (mainly Cp/Cpk values) and associated alerts/recommendation.

Dr. Ritunesh Kumar

Associate Professor
ritunesh@iiti.ac.in

PhD. Indian Institute of Technology Delhi, India

Previous Employment

- Assistant Professor, (Oct 2009–June 2016) Department of Mechanical Engineering,IIT, India.
- Senior Design Engineer (Sep. 2008 – Sep. 2019) Tata Consulting Engineers Limited, Vikroli, Mumbai.
- Academic associations with other institutions (Affiliate/Adjunct/ Visiting posts)
- Delivered two weeks lecture at Gdansk Politechnika, Poland as Adjunct faculty.

Statement of Research Interests

a. Broad research area

- Thermal Engineering

b. Research Highlights

- Desiccant Cooling System.
- Heat Transfer at Microscale
- Renewable fuels.
- BIogas generation and purification

c. Awards and Achievements

- SERB VAJRA award to host Prof. Amitabh Narain of Michigan Tech University.

Publications

- Bubble dynamics in microchannel: An overview of the state-of-the-art: ST Kadam, I Hassan, R Kumar, MA Rahman, Meccanica, 56,481–513 (2021).
- Effect of Flow Normalization in Micro-Pin-Finned Heat Sink: Numerical Study: Singh, G., Kumar, R.*, Mikielewicz, D., J of Thermophysics and Heat Transfer, 35, 1-10 (2020).
- New approach of Triumphing Temperature Nonuniformity and Heat Transfer Performance Augmentation in Micro Pin Fin Heat Sink: Kumar, R.*, Abiev, R., Ribatski, G., Abdullah, S., Vasilev, M., ASME Journal of Heat Transfer, 142, 062501 (2020).

Projects active during April 2019-March 2020

Title:

- Heat transfer intensification in novel design micro-pin-fin heat sink for microprocessor cooling with improved temperature uniformity (Indo-Russian DST)
- Research and education partnership for development of innovative flow-boiling and thermal-systems - enabling critically needed science and technology developments for waste heat removal and recovery with emphasis on data-centers and power-plants. (VAJRA-SERB)

  Duration: 2-years, 1-Years.

  Funding Agency: Department of Science and Technology (DST), India

Brief Description:

- DST/INT/RUS/350.
- VJR/2017/000197 (Renewed)

Dr. Satyajit Chatterjee

Associate Professor
satyajit@iiti.ac.in

PhD. :Mechanical Engineering, IIT Kharagpur

Statement of Research Interests

a. Broad research area

- Surface Technology
- Coatings Tribology
- Solid Lubrication

b. Research Highlights:

Dr Satyajit Chatterjee (Associate Professor, Mechanical Engineering) and Coatings Tribology group's research endeavors include Surface Technologies, Coatings' Tribology and Solid Lubrication with a primary focus on the development of protective coatings with a suitable combination of hardness, thermal stability, wear and corrosion resistance and low friction characteristics following different methods and procedures. Hard coatings can be manufactured in-situ or ex-situ through laser surface alloying (LSA) or powder metallurgical routes. Manufacturing such hard metal matrix or ceramic matrix composite coatings can increase the potential of a metal surface in tribological applications. Weare also involved in the

development of electroless Ni plating, which is also one effective route to manufacture metal alloy or composite coatings with considerable superiority in terms of hardness and tribological properties and has relevance to aerospace, automotive, chemical and electrical industries. Presently, we are trying to find a way to incorporate lubricious phases into the electroless coating matrix with a view to improve its frictional properties.

Publications

- A new approach to study of TiB2-TiN-SiC based tribological coatings with solid lubrication: D. Misra, H. Joardar, A. Khaira, S. Mukhopadhyay & S. Chatterjee; Sādhanā 46, 198 (2021).
- Evaluation of microstructural, mechanical, and tribological characteristics of Ni-B-W-SiC electroless composite coatings involving multi-pass scratch test, V. Nemane& S. Chatterjee; Materials Characterization, 180, 1-10 (2021).
- Effect of hBN and SiC addition on laser assisted processing of ceramic matrix composite coatings: D. Misra, V. Nemane, Mukhopadhyay & S. Chatterjee; Ceramics International, 46(7), 9758-9764 (2020)

Dr. Shailesh I. Kundalwal

Associate Professor
kundalwal@iiti.ac.in

PhD. Awarding Institute: IIT Kharagpur

Previous Employment

- Associate Professor, IIT Indore, Aug 2019-present
- Assistant Professor, IIT Indore, Feb 2017-Aug 2019
- Visiting Assistant Professor, IIT Indore, Jan-Feb 2017
- Banting Fellow, University of Toronto, Canada, Oct 2015-Dec 2016
- Postdoctoral Researcher, Masdar Institute of Science and Technology, UAE, Apr-Sept 2015
- Postdoctoral Fellow, University of Toronto, Canada, Dec 2013-Feb 2015

Statement of Research Interests

a. Broad research area

- Composite Structures
- Finite Element Applications
- Flexoelectricity and Piezoelectricity
- Mechanics of Nanostructures
- Nanomechanics and Micromechanics
- Nanotechnology in Engineering
- Smart Materials and Structures

b. Research Highlights:

The Applied and Theoretical Mechanics (ATOM) Laboratory at IIT Indore, founded and directed by Dr. Shailesh. I. Kundalwal, Associate Professor of Mechanical Engineering.

The ATOM Lab undertakes research primarily in the following areas: Mechanics of Carbon- and Boron-Based Nanostructures, Nanomechanics and Micromechanics of Composites, Nanotechnology in Engineering, Finite Element Analysis of Composites and Experimental Characterization of

nanostructures. The lab's mission is to lead the advancement and application of multifunctional nano- and micro-structures addressing the challenges associated with their multifaceted aspects via numerous nanomechanical and micromechanical techniques

c. Publications

- A comparative study and optimization of phase change material based heat sinks for thermal management of electronic components: A. Kumar, R. Kothari, S.K. Sahu & S. Kundalwal; Journal of Energy Storage, 43, (2021).
- Micromechanical analysis of effective mechanical properties of graphene/ZrO2-hybrid poly (methyl methacrylate) nanocomposites, A. Rathi & S. Kundalwal; Journal of Micromanufacturing, https://doi.org/10.1177%2F25165984211038861 (2021).

d. Awards and Achievements

- Biography listed in Who's Who in the World (International)
- Recognition: Member, Spark Evaluation Committee, Swiss National Science Foundation (International)
- Runner-up in the highly competitive "Dare to Dream" DRDO Innovation Contest 2019 (Certificate Awarded by DRDO)
- Elsevier Recognized Reviewers Recognitions: Int J of Mechanical Sciences (July 19), Physica E (Aug 2019), European J of Mech – A/Solids (Aug 2019), Mechanics of Materials (Sept 119), Composite Part A (Oct 19).
- SERB International Travel Award: for presenting paper at IEEE 14th International Nanotechnology Materials & Devices Conference (NMDC 2018), Portland, Stockholm, Sweden by PhD Student-Vijay Choyal (National).
- Shastri Research Student Fellowship by Shastri Indo-Canadian Institute: for pursuing doctoral research by PhD student – Vijay Choyal (International).

Projects active during April 2019-March 2020

Title: Characterizing the flexoelectric phenomena in monolayer/layered hexagonal boron nitride nanosheets and development of their nanoelectromechanical systems

Duration: 2018-21

FundingAgency: SERB-DST

Brief Description: This project aims to determine the elastic, flexoelectric and piezoelectric properties of single as well as layered h-BNNs so that a new class of light weight and high strength piezoelectric NEMS can be formed for multifarious nanotechnology applications.

Title: Modeling of multifunctional carbon-based composite flexoelectric and piezoelectric energy harvesters: beam, cylinder, plate and shell

Duration: 2018-21

Funding Agency: CSIR

Brief Description: The broad aim of this project is to initiate research efforts to build a rational approach for

determining the elastic and piezoelectric properties of GRNC, and develop analytical and numerical models of beam, plate, cylinder and shell made of GRNC for energy harvesting and SHM applications.

Title: Unraveling the potential of graphene quantum dots for hydrogen storage in fuel cells

Duration:2019-22

Funding Agency: DST

Brief Description: This project aims at unraveling the potential of GQDs. This project undertakes each aspect at atomistic scale-level incorporating established and robust concepts such as pores, functionalization, strain, edge, GBs and temperature, and stacking sequence effects etc. for exploring the possibility of GQDs for H2 storage

Title

Modeling and development of high-strength and lightweight CNT-based composite structures for high performance electromagnetic interference shielding of space vehicles

Duration :2020-23

Funding Agency: ISRO

Brief Description :This project aims at Modeling and development of high-strength and lightweight CNT-based composite structures for high performance electromagnetic interference shielding of space vehicles.

Dr. Indrasen Singh

Assistant Professor
indrasen@iiti.ac.in

PhD.

Indian Institute of Science Bangalore (2016)

Previous Employment

(includes post-doctoral experience)

- Post-doctoral fellow at NUS, Singapore, from October 2016-April 2017.
- Software Developer at PTC software India Pvt. Ltd. July 2007 to Aug 2010.

Scientist at DRDO from Sep 2004 to July 2007.

Statement of Research Interests

a. Broad research area

- Mechanical behaviour of materials.
- Computational solid Mechanics, Fracture mechanics, finite element methods.
- Amorphous metals.
- Crystal Plasticity.
- Piezoelectric materials.

b. Research Highlights

- Deformation and fracture behavior of nanoglasses and nanoglass-metallic glass nano-composites.
- Understanding the mechanics of deformation in piezo-electric materials through experiments and complementary finite element simulations.
- Understanding the effect of Surface Mechanical Attrition Treatment (SMAT) process in FCC metals.
- Deformation and fracture response of BCC single crystals.
- Mechanical response of metallic glass composites.

- Deformation behaviour of metallic glass honey-comb structures.
- Understanding the indentation mechanics in Nanoglasses.
- Finite element modelling of additive manufacturing process. manufacturing process

4. SS Hirmukhe, KE Prasad, I Singh (2019) Finite element analysis of tensile deformation of nanoglassmetallic glass laminate composites. Computational Material Science 161, 83-92.

Events/Seminars organized

Organised one day Workshop on Opportunities in Research and Developments in Armament Establishments (ARMREB-2020)" on 26th August 2020.

Projects active during April 2019-March 2020

Title: Experimental and numerical studies of fracture in Nanoglasses

Duration: Two Years

Funding Agency: SERB

SRG/2019/000034

Brief Description: This project aims to understand the fracture behaviour of nanoglasses.

Dr. Yuvraj K Madhukar

Assistant Professor
yuvrajmadhukar@iiti.ac.in

PhD (2016)

Department of Mechanical Engineering

Indian Institute of Technology Kharagpur, India

Effect of water-jet on quality improvement of various laser material processing modalities

Previous Employment

(Includes post-doctoral experience)

- Post-Doctoral Research Associate (December 2015–November 2017)
- Heriot-Watt University, Edinburgh, Scotland, UK
- Process control of laser hybrid additive manufacturing

Statement of Research Interests

a. Broad research area

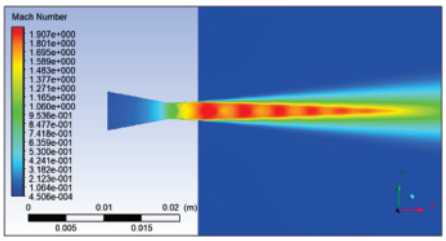

- Advanced Manufacturing Processes, Laser Material Processing, Wire Arc Additive Manufacturing

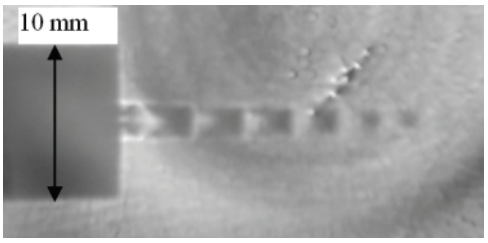

b. Research Highlights

Design, development and control of wire and arc additive manufacturing process

Development of supersonic nozzle for manufacturing applications

a. Awards and achievements

Best Technology Development Award 2020, IIT Indore

Publications

(includes journal articles, books and book chapters)

Upto a selection of best three

Events/ Seminars organized

- Coordinators: Dr. Yuvraj K Madhukar &Dr. I.A. Palani, Short term online course on LASER MICRO MANUFACTURING, SURFACE & MATERIAL PROCESSING, 15th -17th July 2020

  Coordinators: Dr. I.A. Palani &Dr. Yuvraj Madhukar, AICTE Sponsored Quality Improvement Program online course on Micro and Precision Manufacturing, 5th-10th October 2020

Dr. Ankur Miglani

Assistant Professor
(Grade 1)
amiglani@iiti.ac.in

PhD.

Indian Institute of Science (IISc) Department of Mechanical Engineering 2015

Previous Employment

(Includes post-doctoral experience)

- Jan. 2017 – Nov. 2019: Purdue University: SERB Indo-US Postdoctoral Fellow
- Apr. 2016 – Oct. 2016: Korea Advanced Institute of Science and Technology (KAIST): BK-21 Postdoctoral Fellow
- Dec. 2015 – Apr. 2016: Indian Institute of Science: Research Associate

Aug. 2008 – Aug. 2009: Chevron shipping LLC.

Statement of Research Interest

a. Broad research area

- Combustion of next-generation fuels: Gel fuels and nanoparticle laden fuels
- Thermal management of power-dense electronics: Flow boiling in microchannels
- Microfluidics
- Soft matter: Instabilities in drying colloidal systems
- Application of Machine learning based pattern recognition to energy systems

b. Research Highlights

- Designed and developed a droplet combustion facility that enables the thermo-fluidic characterization of vaporization and combustion of next-generation fuels (nanoparticle laden fuels and gelled fuels)
- Focus area: Nanofluid fuels and gel fuels/ propellants
- Highlight: First-of-its-kind demonstration of the interplay thermo-physical processes governing the burning behavior of conventional liquid fuels laden with energetic nanoparticles
- Development and updating of a two-phase microchannel heat-sink model (developed in MATLAB) to generate design guidelines for the performance prediction of a two-phase microchannel heat sink, accounting for the effects of flow maldistribution and thermal coupling between the channels
- Focus area: Thermal Management of Electronics, flow boiling in microchannels, flow instabilities in boiling microchannels
- Highlight:First-of-its-kind quantitative characterization of static instability induced flow maldistribution between boiling parallel microchannels
- Developed a numerical model that enables the characterization of the ice formation modes during flow freezing in microchannels and generates design guidelines for ice valve cooling mechanism for microfluidic platformsFocus area: Microfluidics, Phase-change microfluidic ice valves, Flow freezing in microchannels

  Highlight: Demonstration of the fastest closing time of a phase ice-valve (compared to the existing open literature) for microfluidic flow control applications

c. Awards and Achievements

- Invited article for the Special issue of ASME Journal of Electronic Packaging titled "A tribute to Prof. Avaram Bar-Cohen" (2021)
- Invited book chapter for Elsevier book entitled "Smart Electrical and Mechanical systems" (2021)

- Invited book chapter of CRC Book entitled "Intelligent Prognostics for Engineering Systems with Machine Learning Techniques" (2021)
- Academic representative for the BOS: Sanjivani College of Engineering (2021)
- Invited talk by Intel: Thermal management of Power Dense Electronics
- Faculty mentor RoboCon 2021: Team qualified for Stage II with a score of 100/100
- Research work on low-cost, Colored Bi-layered bricks featured at several media platform including Times of India, Free Press Journal, Dainik Bhaskar, Nai Dunia and Expert News
- Session Chair for Thermal modelling and Analysis II for ITherm 2021

Publications

(includes journal articles, books and book chapters)

Three recent publications

2. J. Prakash, Pavan Kankar and A. Miglani, Monitoring the degradation in the Switching behavior of a Hydraulic Valve using Recurrence Quantification Analysis and Fractal Dimensions. ASME Journal of Computing and Information Science in Engineering, accepted (2021).
3. A. Miglani, J.A. Weibel and S.V. Garimella. Measurement of flow maldistribution induced by the Ledinegg instability during boiling in thermally isolated microchannels. International Journal of Multiphase Flow, 139, 103644 (2021)

Projects active during April 2020-March 2021

Title:Proof checking of the design and drawing of different components for Moradabad Sewerage Scheme, Phase-2 (Zone -2)

Duration: --

Funding Agency: KK Spun India Limited

Brief Description: Proof checking of the design and drawing of different components for Moradabad Sewerage Scheme

Title: Proof checking of various structure design and hydraulic design of water supply scheme Naigarhi Rewa M.P.

Duration: Completed

Funding Agency: ATLC Infraconsultants Pvt. Ltd.

Brief Description: Proof checking of various structure design and hydraulic design of water supply scheme

Dr. Satyanarayan Patel

Assistant Professor
spatel@iiti.ac.in

PhD

Indian Institute of Technology Mandi, 2016

Previous Employment

(includes post-doctoral experience)

- Alexander von Humboldt Postdoctoral Research in Technische Universität Darmstadt, Germany

Nov. 2016- 2019

Statement of Research Interests

a. Broad research area

- Waste Thermal/Mechanical Energy Harvesting
- Solid-State Cooling Materials and Methods
- Dielectric Materials for High Energy Density Capacitors
- Piezoelectric and Pyroelectric Materials

b. Research Highlights

I have been working on engineering and scientific aspects of ferroelectric materials in view of high energy density capacitors, waste (thermal and mechanical energy harvesting) and solid-state refrigeration applications.

c. Awards and Achievements

- Keynote speaker in the online short term course on "Emerging Trends in Mechanical Engineering" from 8-12th June 2020 on "Solid-state Refrigeration and Energy Storage" at Dr. K.N. Modi University Newai, Rajasthan.
- Expert talk in the online Faculty Development Programme on "Recent Advances In Renewable Energy Technologies For Sustainable Development" from 21-22th August 2020 on "Not-in-kind Cooling Technologies" Organizsed by Rajasthan Technical University, Kota and Jaipur Engineering College Jaipur
- Session speaker in the online AICTE Training And Learning (ATAL) FDP on "Environment Friendly Refrigerants & Cycles for Refrigeration and Air-Conditioning Applications" from 7-11th September 2020, on "Solid-State Refrigeration Technologies" Organized by Department of Mechanical Engineering, St. Joseph's College of Engineering, OMR, Chennai. (https://www.youtube.com/watch?v=dps0Msz-dpU)

Publications

(Includes journal articles, books and book chapters)

Upto a selection of best three

1. S. Patel and N. Novak "The pyroelectric energy harvesting and storage performance around the ferroelectric/antiferroelectric transition in PNZST", J. Mater. Sci. 56, 1133–1146 (2021).
2. S. Patel "Flexo/elasto-caloric effects in 0.66Pb(Mg1/3Nb2/3)O3-0.34PbTiO3 single crystal" Mater. Lett. 287, 129301 (2021).
3. S Patel, A Chauhan and R Vaish "Flexo/electro-caloric performance of BaTi0.87Sn0.13O3 ceramics" Appl. Phys. Lett. 117 (9), 092904 (2020).

Projects active during April 2020-March 2021

Title: "Development of Porous Lead-Free Ceramics for Temperature-Independent Pyroelectric Performance and Waste Energy Harvesting".

Duration : 2 Year

Funding Agency: Science and Engineering Research Board (SERB)

SRG/2020/000188

Brief Description: The broad aim of this project is to fabricate the porous lead-free pyroelectric ceramics to enhance energy harvesting and sensing properties. For this purpose various doping and pores controlling strategies will be used.

Dr. Dan Sathiaraj

Assistant Professor

dansathiaraj@iiti.ac.in

PhD.

Indian Institute of Technology Hyderabad, India

Previous Employment

(includes post-doctoral experience)

- Postdoctoral Researcher at Institute for Solid state and Material Physics, (Metal Physics Division) TU Dresden, Germany from May 2017 to November 2019 (Alexander Von Humboldt Research award fellow)
- Worked as Assistant professor in Mechanical engineering department, SRM University, Chennai, India from July 2016 to April 2017
- Worked as Senior Research Fellow from Jan 2016 – June 2016 at IIT Hyderabad, India in MSME department.

Statement of Research Interests

a. Broad research area

Design and Manufacturing, Thermo-mechanical processing of Advanced Materials

b. Research Highlights

- Micro, Nano- machining of MEAs and HEAs (MEAs: Medium entropy alloys; HEAs:High entropy alloys).
- Surface modification Engineering
- Severe plastic deformation (SPD), Low temperature deformation, Recrystallization and grain growth study
- Finite element analysis of SPD processes
- Mechanical and functional property study

c. Awards and Achievements

- Best Alumni Award at IIT Hyderabad (Academics category)
- Alexander Von Humboldt Research Award for three months research stay at TU Dresden

Reviewer of various International Journals; Programme committee members for ICNB 2020.

Dr. Harekrishna Yadav

Assistant Professor
krishnpme@iiti.ac.in

PhD.

Indian Institute of Technology Bombay

Previous Employment

(includes post-doctoral experience)

- Postdoctoral Fellow: Faculty of Mechanical Engineering, Technion-Israel Institute of Technology, Israel (December 2017 - October 2019)
- Assistant Professor: Department of Mechanical Engineering, University of Petroleum and Energy Studies, Dehradun, India (September 2010 - June 2011)

a. Broad research area

- Shear Flow, Fluid Structure Interaction, Flow and Turbulence Measurement using Optical Techniques, Heat Transfer Enhancement, Internal Combustion Engine, Alternative Energy

b. Research Highlights

- During engine operation, many different variables influence the spray and mixture formation characteristics such as gas properties, bulk fluid motion, turbulence, location of moving parts, nozzle type, etc. The efficiency of an internal combustion engine and its exhaust emission is directly or indirectly coupled with the underlying flow field that need to be examine by optical techniques.
- Understanding the Effect of vortical structures on velocity and turbulent fields of a pulse impinging turbulent jet.
- Study of the coaxial jet, pulse jet and synthetic jet for the mixing, heat transfer and enhancement.
- The role of surface texturing on the behavior of boundary layer separation of wind turbine
- Reviewer of various international reputed Journals
- Speaker in the online course on " Recent Advances in Fluids and Thermal Engineering (RAFT-2021)" from 15 March 2021 - 20 March 2021

Publications

(includes journal articles, books and book chapters)

Dr. Girish Chandra Verma
Assistant Professor
girish.verma@iiti.ac.in

Indian Institute of Technology Delhi (2018)

Previous Employment

(includes post-doctoral experience)

Early-doctoral fellow at IIT Delhi, from November 2018-April 2019.

a. Broad research area

- Ultrasonic assisted machining processes.
- Magnetic field assisted finishing processes.
- Additive manufacturing.
- Theoretical study of machining processes.

b. Research Highlights

- Additive manufacturing of functionally graded material.
- Analytical modelling of ultrasonic vibration assisted milling process responses.
- Parametric and statistical study of ultrasonic vibration assisted machining processes.
- Parametric and statistical study of magnetic abrasive finishing process.

c. Awards and Achievements

- Gandhian Young Technological Innovation (GYTI) Awards, 2018.
- Best paper at AIMTDR 2018.
- Padmashri Manmohan Suri Project Award, 2013.

Patents:

Tool for producing variable magnetic field by permanent magnets for nano finishing holes, 1911/DEL/2014

Publications:

(includes journal articles, books and book chapters)

Upto a selection of best three

1. AkankshaChaudhari, Pavan K Kankar, Girish C Verma, Experimental Study for the Health Monitoring of Milling Tool Using Statistical Features, Advances in Manufacturing and Industrial Engineering, 1189-1198, 2021.

3. AK Singh, GC Verma, VC Shukla, PM Pandey, Experimental Investigations into Ultrasonic-Assisted Magnetic Abrasive Finishing of Freeform Surface, Advances in Unconventional Machining and Composites, 269-286, 2020

Events/Seminars organized:

Organized a 3 day short-term course on 'Advanced Manufacturing And Materials; under TEQIP-III during 18th to 20th Dec, 2020.

Dr. Ashish Rajak
Assistant Professor
a.rajak@iiti.ac.in

PhD.
Indian Institute of Technology Guwahati (03/2018)
Previous Employment
(includes post-doctoral experience)

- Assistant Prof. IIIT Jabalpur, MP, 03/2020-09/2020
- Assistant Prof. NIT Delhi, 08/2019-03/2020
- Post Doctorate, Ohio State University, USA, 04/2018-07/2019

Academic associations with other institutions (Affiliate/ Adjunct/ Visiting posts)

- Materials Science and Engineering, the Ohio State University, USA (Project Collaboration)

a. Broad research area

- Electromagnetic Welding, Forming, Crimping, Cladding & Hemming
- Explosive welding
- Conventional forming
- Additive manufacturing
- Numerical analysis of high strain rate processes

b. Research Highlights

- My research area spans from materials science to manufacturing applications, focusing on numerical modelling and simulation on high strain rate metal forming and joining techniques. My research vision is to understand the material behaviour at high strain rate forming techniques and working on metal crimping, clinching, forming, and welding using the Electromagnetic and Vaporizing Foil Actuator System.

c. Awards and Achievements

- National Science Foundation Post Doctorate Fellowship, USA 2019
- Best Research Poster, Research Conclave IIT Guwahati 2018
- Best Research Paper Award, DRDO & DRDL 2016
- University Bronze Medallist 2013
- Autodesk Indore Awardee 2012

Patents

Multi-Slot Filedshaper design for electromagnetic crimping; Reference No: 331351-001 (Indian Patent Office)

Dr. Krishna Mohan Kumar
Assistant Professor
kmkumar@iiti.ac.in

PhD.

Indian Institute of Science, Bangalore

Previous Employment

(includes post-doctoral experience)

- Assistant Professor, National Institute of Technology Tiruchirappalli. (July 1, 2020-October7, 2020)
- Assistant Professor, Maulana Azad National Institute of Technology, Bhopal. (February26, 2020-June26, 2020)
- Post-Doctoral Fellow, Indian Institute of Science, Bangalore.

(May 18, 2019-February 25, 2020)

Statement of Research Interests

a. Broad research area

- Acoustics of Ducts and Mufflers
- Industrial Noise and Vibration Control
- Automotive Noise and Vibration Control
- Designing for Quietness

b. Research Highlights

Integration of the design and analysis of a reciprocating internal combustion (RIC) engine and the exhaust muffler can be done if reasonably well estimation of the acoustic source characteristics of the RIC exhaust system is available before the inception of the engine. I have worked in past few years on two aspects related to the RIC engine exhaust system: estimation of the acoustic source characteristics of the RIC engines; and acoustic analysis of complex muffler configurations. Apart from the acoustic analysis of complex muffler configurations, I have also investigated the simple extended inlet-outlet and muffler configurations which gives wide -band noise attenuation characteristics.

Dr. Sandeep Singh
Assistant Professor
sandeeps@iiti.ac.in

PhD.

Awarding Institute: IIT Kharagpur

Previous Employment

(includes post-doctoral experience)

- 17/12/2020–Till Date: Assistant Professor, Department of Mechanical Engineering, Indian Institute of Technology Indore, Indore, India.
- 05/06/2017–14/12/2020: Assistant Professor, Department of Mechanical Engineering, Birla Institute of Science and Technology Pilani, Goa Campus, Goa, India.
- 18/01/2017–02/06/2017: Visiting Faculty, Department of Mechanical Engineering, Thapar University, Patiala, India.
- 04/07/2011–14/07/2012: Senior Engineer, Division of Compressor Design, LG Electronics Private Limited, Greater Noida, India.
- 04/08/2008–31/05/2009:Lecturer, Department of Mechanical Engineering, Patiala Institute of Engineering and Technology, Patiala, India.

Statement of Research Interests

a. Broad research area

- Solid mechanics and design,
- Finite element method,
- Theory of plates and shells,
- Computational material science,
- Multiscale modelling of nanomaterials

b. Research Highlights- Nil

c. Awards and Achievements

- Recipient of Ministry of Human Resource Development, Govt. of India Fellowship for Ph.D. / M. Tech. programs.
- Recipient of Gold Medal for securing First position in M. Tech. program among Applied Mechanics students at MNNIT Allahabad in 2011.
- Recipient of Cash Award of Rs. 25000 and Appreciation Certificate for qualifying 3D CAD Master Belt Examination organized by Head Quarters of LG Electronics, South Korea in 2011.
- Reviewer to International Journals: Journal of Engineering, Design and Technology (Emerald), Applied Mathematics and Computation (Elsevier), Journal of Molecular Graphics and Modelling (Elsevier), International Journal of Mechanical Sciences (Elsevier), Computers and Structures (Elsevier).

Publications

(Includes journal articles, books and book chapters)

1. G. Watts, R. Kumar, S. N. Patel and S. Singh (2021). Dynamic instability of trapezoidal composite plates under non-uniform compression using moving kriging-based meshfree method. Thin Walled Structures 164, pn. 107766. (SCI, IF: 4.03)

2. S. Singh (2021). Comparing different multibody reactive potentials for the elastic properties and nonlinear mechanics of the carbon nanostructures. Mechanics of Materials 158, pn. 103858. (SCI, IF: 2.99)
3. S. Singh, B. M. Raviraj, K. D. Mali and G. Watts (2021). Elastic properties and nonlinear elasticity of noncarbon hexagonal lattice structured nanomaterials based on the multiscale modelling. ASME Journal of Engineering Materials and Technology 143 (2), pn. 021006. (SCI, IF: 1.14)

Projects active during Academic Year 2020-2021

Title: Multiscale modelling of noncarbon nanomaterials and their reinforced polymer composite materials and structures

Duration: 2019-22

Funding Agency: SERB

Brief Description

The goal of the project is tp study nonlinear static and dynamic response of the noncarbon nanomaterials and their composites using multiscale modelling.

Title: Continuum finite element models for the mechanical behaviour of the nanostructures considering surface energy effects

Duration: 2021-23

Funding Agency: CSIR

Brief Description:

The goal of the project is to study nonlinear mechanics of nanostructures including surface effects in the continuum models.

Adjunct Faculty

Dr. Amitabh Narain

Professor

narain@mtu.edu

PhD

University of Minnesota

Mechanical Engineering—Engineering Mechanics, Michigan Technological University, USA

Biography

Professor Amitabh Narain completed his PhD. from University of Minnesota, USA. He is a Professor at Michigan Technological University, USA and Visiting Advanced Joint Research (VAJRA) Adjunct Faculty at IIT-Indore, India – a program initiated by the Department of Science and Technology of Government of India.. He is a Fellow of the ASME, an Associate Editor of the Journal of Heat Transfer, and Director of the Energy-Thermo-Fluids area in his department. His current research areas deal with state-of-the-art experimental and computational techniques for single-phase and phase-change (flow-boiling and flow-condensation) flows, particularly those related to energy technologies such as thermal management and power generation applications.

Areas of Expertise

Fluid Mechanics (Theory, Experiments, and CFD), Heat Transfer (Theory, Experiments, and Computations), System Design.

Recent Publication

- Yadav, V., Kumar, R., Narain, Amitabh, "Mitigation of Flow Maldistribution in Parallel Microchannel Heat Sink," IEEE Transactions on Components, Packaging and Manufacturing Technology, Vol. 9, No. 2, Jun 2018, pp. 247-261. DOI:10.1109/TCPMT.2018.2851543

Research Project

Research and education partnership for the development of innovative flow-

boiling and thermal-systems - with emphasis on data-centres and power-plants

Dr. Igor Sevostianov

Distinguished Professor at New Mexico State University

igor@nmsu.edu

PhD

St. Petersburg State University, Russia

Biography

Prof. Igor Sevostianovcompleted his PhD. from St. Petersburg State University, Russia. He is a Dwight L. and Aubrey Chapman Distinguished Professor at New Mexico State University and an Adjunct Professor at IIT Indore. His research interests are Micromechanics, Biomechanics, Advanced manufacturing, Contact mechanics, Multi-physics phenomena in solids, Inverse problems, and Mechanics of viscoelastic solids.

Areas of Expertise

Fluid Mechanics (Theory, Experiments, and CFD), Heat Transfer (Theory, Experiments, and Computations), System Design.

Recent Publication

- Seyedkavoosi, S. and Sevostianov, I. Multiscale micromechanical modeling of the elastic properties of dentin. Journal of the Mechanical Behavior of Biomedical Materials, 100 (2019) 103397. DOI 10.1016/j.jmbbm.2019.103397.

From the HoD's Desk

Dr. Neelima Satyam
Associate Professor
neelima.satyam@iiti.ac.in

The Department of Civil Engineering has been functioning since 2016 with a focus on basic and applied research to solve real world problems. The Department offers a four-year course leading to the bachelor's degree in Civil Engineering and Ph.D. in Civil Engineering. The CE faculty and students are actively involved in sponsored research projects funded by the Government of India as well as in industry/consultancy projects throughout the country and abroad. The Department has an active and dynamic faculty with international exposure having expertise in diverse field so civil engineering. The CE faculty has been recognized at different platforms across the world as committee chairs/members, outstanding reviewers, editorial board members. Our department looks forward to establishing itself, nationally and globally, as a premier academic Centre with active industry interaction and national/international collaborations.

Introducing Faculty of Civil Engineering

- Prof. Sandeep Chaudhary
- Dr. Manish Kumar Goyal
- Dr. Saikat Sarkar
- Dr. Lalit Borana
- Dr. Mohd Farooq Azam
- Dr. Guru Prakash
- Dr. Kaustav Bakshi
- Dr. Abhishek Rajput
- Dr. Priyansh Singh
- Dr. Gourab Sil

Dr. Neelima Satyam
Associate Professor
neelima.satyam@iiti.ac.in

PhD: Indian Institute of Technology Delhi

Previous Employment

(includes post-doctoral experience)

- Visiting Researcher, Indian Institute of Technology Indore [June 2018 – July 2018]
- Assistant Professor, Earthquake Engineering Research Centre, IIIT Hyderabad [Feb 2009 – November 2017]
- Visiting Scientist, JSPS Fellow, University of Tokyo [January 2013 – March 2013]

Statement of Research Interests

Broad research area:

- Geotechnical Earthquake Engineering
- Dynamic Soil Structure Interaction Analysis
- Environmental Geotechnics
- Landslide Research
- Rock Mechanics and Underground Structures

Research Highlights

- Seismic microzonation
- Landslide hazard assessment and early warning
- Liquefaction Hazard and Mitigation
- Biomediated soil improvement
- Sustainable pavement geotechnics

Patents (filled and awarded)

- Minu Treesa Abraham, Neelima Satyam, Sai Kumar Peddholla Reddy, Biswajeet Pradhan: Patent application No. 2021106606 (Filling date: 23/08/2021)
- Nitin Tiwari and Neelima Satyam: Patent application No. 2021105096 (Filling date: 07/08/2021)
- Neelima Satyam and Nitin Tiwari: Patent application No. 202021057003 (Filling date: 29/12/2020)
- Neelima Satyam and Meghna Sharma: Patent application No. 202021051658 (Filling date: 21/11/2020)

Projects active during April 2020-March 2021

Title: Landslide hazard assessment and monitoring at Chibo Pashyar, Kalimpong: Duration: Three years

FundingAgency: NRDMS, DST

BriefDescription: Landslide hazard assessment and real time monitoring for Chibo Pashyor region.

Title: Geospatial numerical modelling of debris flow for quantitative landslide risk assessment considering the entrainment

Duration: Three years

Funding Agency: ISRO

Brief Description: Development of a new numerical model, considering shallow water flow and bed entrainment.

Title: Development of Landslide Early Warning System and Real Time Monitoring, Uttarakhand

Duration: Three years

Funding Agency: NRDMS, DST

Brief Description: Development of LEWS for Uttarakhand, integrating rainfall and seismic conditions.

Title: Performance analysis of recycled plastic waste for bitumen roads

Duration: Two years

Funding Agency: GOI MP

Brief Description: Conducting field and laboratory test for evaluating the performance of recycled plastic waste in bituminous pavements.

Title: Sustainable and Innovative construction technique for rural roads on BC soil using local material and industrial waste

Duration: One year

Funding Agency: GOI MP

Brief Description: Providing guidelines for sustainable practices in road constructions using industrial waste in expansive soils.

Title: Preventing Damage from Earthquakes: Emerging Innovative Techniques for Liquefaction Mitigation of Soils

Funding Agency: DST (Vajra Scheme)

Brief Description: MICP and EICP techniques for ground improvement and liquefaction mitigation.

Major awards, achievements

- Best Research Paper Award, IIT Indore for the academic year 2020-21
- CIDC Vishwakarma Academician Award 2021, from Construction Industry Development Council (Established by Planning Commission, Government of India and the Construction Industry)
- Overseas famous scientist project (Grant no. 2020A1414010268) from Ministry of Science and Technology, Guangdong, China for visiting Shantou University, 2020- 2021
- Member, Technical committee 220 (Field Monitoring in Geomechanics) of International Society of Soil Mechanics and Geotechnical Engineering (2019- till date)
- Editor of Special issue on "Landslide: Forecasting, Assessment and Mitigation", Indian Geotechnical Journal, Springer 2020

- Member, Fact finding committee of Seogni bridge collapse, MPRRDA, Govt. of MP, 2020
- Executive Council member (Elected), Indian Geotechnical Society since 2019
- Executive member, Indian Society of Engineering Geology (Indian National group of the International Association for Engineering Geology and Environment) for the term 2020-2021
- Convener, Soil Dynamics and Earthquake Geotechnical Engineering -36 International Geological Congress 2020
- Convener, International Cooperation by Indian Geotechnical Society for the term 2019-2020
- Member, Preliminary Review Committee, Shastri Indo-Canadian Institute, MHRD for the term 2018-2019
- Chairperson for MONBUKAGAKUSHO: MEXT Scholarships of Japanese Government in Earthquake/Civil Enggstream(Since Feb 2018)
- Member (CPD), Engineering Council of India for Telangana and Andhra Pradesh States (Since Feb 2017)
- Honorable Director, Institute and Industry Interaction: Professional Development Council, Association of Consulting Civil Engineers, India (2018-till date)
- Member, Expert committee for AEE 2016, AP Public service commission, Hyderabad

Courses/conferences/workshops organized

- Organizing Committee member for First Indo- Brazilian Geotechnical Webinar, Indian Geotechnical Society 16-18 June 2021

Prof. Sandeep Chaudhary

Professor
schaudhary@iiti.ac.in

PhD: Indian Institute of Technology Delhi

Previous Employment

(includes post-doctoral experience)

- Faculty in MNIT Jaipur from October 1996 to May 2017
- Post-Doctoral Fellow, Structural System Laboratory, Kunsan National University, Kunsan, S. Korea from August 2010 to July 2011

Statement of Research Interests

Broad research area:

- Structural Engineering
- Sustainable Construction Practices
- Composite Bridges
- Novel Bricks and Blocks
- Microstructure and Durability of Concrete
- Advanced Characterisation Techniques
- Waste management in building construction materials

Research Highlights

- Development of Sustainable Building Products from the locally available waste.

Patents (filled and awarded)

Awarded:

- Gupta, Trilok; Sharma, Ravi Kumar; Chaudhary, Sandeep and Siddique, Salman(2021). "METHOD OF PREPARATION OF PAVER BLOCK INCORPORATION OF RUBBER WASTE.", Australian Patent number: 2020104280, Dated 24/02/2021
- Gupta, Trilok; Chaudhary, Sandeep; Sharma, Ravi Kumar and Jain, Sudhir(2020). "METHOD OF PREPARATION OF PAVER BLOCK INCORPORATION OF RUBBER WASTE.", Australian Patent number: 2020102838, Dated 02/12/2020

Filed

- Gupta, T., Sharma, R. K., Chaudhary, S., and Siddique, S. (2020). "Composition for preparation of Paver Block utilizing rubber waste.", Application No. 202011018399 A, The Patent Office Journal No. 25/2020 Dated 19/06/2020

Projects active during April 2020-March 2021

Title - Natural-coloured functionally graded rubberised geopolymer system: A cement-less solution for optimised concrete paver manufacturing

Duration - August 2018-December 2020

FundingAgency - DST, GOI

BriefDescription - It is an International Collaborative Project under DST UKIEIR Scheme. The collaborating institute is University of Edinburgh, UK

Title - Sustainable and economical functionally graded rubberized concrete pavements

Duration -August 2017-January 2021

FundingAgency -DST, GOI

BriefDescription -It is an International Collaborative Project under Indo Tunisia Scheme. The collaborating institute is University of Carthage, Tunisia.

Title -Safeguarding heritage structures using seismic metamaterials

Duration -March 2018-September 2021

FundingAgency -DST, GOI

BriefDescription - It is an International Collaborative Project under SPARC Scheme. The collaborating institutes are UNIVERSITÉ AIX-MARSEILLE, France and Imperial University, UK.

Title -A comprehensive rheology based thixotropic fluid flow model for improved control on 3D printing of concrete

Duration -March 2021-March 2024

FundingAgency -DST, GOI

BriefDescription –A comprehensive model will be developed for efficient 3D printing of Concrete Structures, considering the rheology.

Major awards, achievements

- Chair of Standing Committee 1 of Asian Concrete Federation
- Core member of NDMA, GoI for Development of detailed outline for Resource Material on Earthquake Engineering
- Key Note Speaker in number of training programs and Conferences

Courses/conferences/workshops organized:

- Coordinator of "QIP Short Term Course on Sustainable Construction Practices", organised from 12-10-2020 to 18-10-2020 at IIT Indore, Indore.

COVID related activities:

Fluorescent bricks and coatings with self-illuminating properties for applications in UV disinfection building chambers

Abstract: - Passenger luggage in public transportation can be a potential source of disease spread, for which large number of UV disinfection chambers will be required. For such a purpose, existing concrete buildings can be converted into the closed UV chambers or the new UV disinfection rooms can also be constructed for disinfection of public luggage at mass scale. Research studies are being carried out to develop the sustainable construction materials with self-illuminating properties for existing as well as for new UV disinfection building chambers. These materials will give the visible fluorescence under UV light and can illuminate the goods inside the chamber without any additional visible light source. For existing buildings, coatings are being developed whereas for new construction, functionally graded bricks are being developed for the required applications. These materials will be helpful for enhancing the visibility and monitoring the operations in UV disinfection rooms using normal visible range cameras without any additional visible light source in the existing as well as in the new infrastructure.

Dr. Manish Kumar Goyal

Associate Professor
mkgoyal@iiti.ac.in

PhD: Indian Institute of Technology Roorkee

Previous Employment

(includes post-doctoral experience) –

- Assistant Professor, Indian Institute of Technology Guwahati
- Erasmus Mundus Fellow, AUTH, Greece
- Indo-US WARI Fellow, University of Nebraska, Lincoln, USA
- Postdoctoral Fellow, McGill University, Canada
- Postdoctoral Fellow, Nanyang Technological University, Singapore
- Research Assistant, University of Waterloo, Waterloo, Canada,
- Manager- CNIA Pvt. Ltd., Bangalore
- Assistant Manager-Jones Lang LaSalle Pvt. Ltd., Chennai and New Delhi

Statement of Research Interests

- Water management, climate change
- Flood modelling and drought
- Water use Efficiency and crop yield Modelling

Broad research area

- Water management, climate change
- Flood modelling
- Water Supply and water audit
- Water scarcity and drought
- Water use Efficiency and crop yield Modeling

Research Highlights

- Resilience of River Basins and Hydrological Modeling

- Hydro-climatology and Statistical Downscaling
- Irrigation Management and Crop Modeling Applications
- Multivariate Statistical Analysis, Machine Learning Models and Data Mining

Projects active during April 2020-March 2021

- Identification hydropower sites and critical glacial lakes for sustainable water resources management in Himachal Pradesh
- An integral assessment of groundwater and surface water using stable isotopes of water

Major awards, achievements

- Ranked in Top 2% scientist in list prepared by Sandford University and among the top 500 of the world's more than 42000 researchers in the in the sub-area "environmental engineering (Meteorology and Atmospheric Sciences)- 2020
- Prof S N Gupta Memorial Lecture Award, Indian Society of Hydraulics, 2021
- Editor- PLOS Climate
- Associate Editor-International Journal of Cloud Applications and Computing
- Best Researcher of the Year Award 2020 by Institution of Engineers (India)
- Prof R J Garde Research Award

Courses/conferences/workshops organized

- Three days online International Conference on "Ecosystem Restoration for Resilience and Sustainability: Living with nature" jointly organized by Department of Civil Engineering, Indian Institute of Technology Indore and National Institute of Disaster Management, Delhi during June 05-07, 2021.
- TEQIP Short term course on "Advancements in Civil Engineering (with emphasis on water resources, environment engineering and climate change) Nov 02-07, 2020, IIT Indore,
- Three weeks online certificate program on Hydrometeorological and Extreme Events Disaster Risk Management jointly organized by Department of Civil Engineering, Indian Institute of Technology Indore and National Institute of Disaster Management, Delhi during 1-21 June 2020.

Dr. Saikat Sarkar

Assistant Professor
saikat@iiti.ac.in

PhD: Indian Institute of Science Bangalore

Statement of Research Interests

Failure of structures, Metamaterials, Inverse problems, Large scale computation in mechanics.

Previous Employment

(includes post-doctoral experience)

1. Indian Institute of Technology Indore, India (Dec 2018 – Present)
2. National Institute of Technology Rourkela, India (Jul 2018- Dec 2018)
3. Indian Institute of Technology Bhubaneswar, India (Jul 2017-Jun 2018)
4. Technion, Israel (Mar 2017- May 2017)
5. Texas A&M University, USA (Mar 2015- Feb 2017)

Broad research area

Structural Mechanics

Research Highlights

- We have developed a coarse-grained formulation for polymer-based metamaterials, which turns out to be very effective as backing material of protective armors.
- We have designed a novel architecture for seismic material, which is effective in stopping a earthquake from damaging a structure.
- We have developed a novel formulation protective armors.

Projects active during April 2020-March 2021

Title: A peridynamics-like framework to predict failure of concrete structures.

Duration: Mar 2019-Mar 2022.

Funding Agency: SERB, ECR (Government of India).

Brief Description: I am the sole Investigator of this project. A PhD student (FA) has been recruited from this project. We are developing derivative-free mechanics theory and computer programs for studying the crack propagation and failure of concrete structures for different strain rates.

Title: Safeguarding heritage structures using seismic metamaterials.

Duration: (Mar 2019-Mar 2021)

Funding Agency: SPARC (Government of India)

Brief Description: I am a co-PI in this project in which we have collaborators from India, France, and UK. We are developing large-scale metamaterials for designing safeguard structures against earthquake.

Courses/conferences/workshops organized

- I am the convenor of the prestigious 8th International Congress on Computational Mechanics and Simulation (ICCMS2021), which is scheduled to be held at IIT Indore in December 2021.

Journal articles published

- Varma, T. V.,Ungureanu, B., Sarkar, S., Craster, R., Guenneau, S. R. L., &Brûlé, S. (2021). The influence of clamping, structure geometry and material on seismic metamaterial performance. Frontiers in Materials, 8, 106.
- Varma, T. V., &Sarkar, S. (2021). Designing polymer metamaterial for protective armor: a coarse-grained formulation. Meccanica, 56(2), 383-392.
- Varma T. V., Sarkar, S., Mondal G. (2020), Buckling restrained sizing and layout optimization of truss structures, Journal of Structural Engineering, 146 (5), 04020048.

  Varma T. V. is my PhD student.

Dr. Lalit Borana

Assistant Professor
lalitborana@iiti.ac.in

PhD : Yes

Previous Employment: (post-doctoral at Hongkong)

Statement of Research Interests

My research focusses on the understanding the soil behaviour under different environmental conditions, utilisation of waste materials for geotechnical infrastructure applications and health monitoring of structures using advanced sensing technologies.

Broad research area: Geotechnical Engineering

Research Highlights: Soil; Optical Sensors; Consolidation

Projects active during April 2020-March 2021

Title: Development of optical sensing system for sustainable infrastructure

Duration: 18 months

Funding Agency: MSME

Title: Performance improvement of the clay soil using rock quarry dust.

Duration: 12-14 months

Funding Agency: TEQIP

Brief Description: Major awards, achievements, recognitions of the faculty / students / scientists / staff of your department:

Young Civil and Environmental Engineer Award 2020 – Hongkong

Lead Guest Editor for Special Issue on "Frontiers for Sustainable and Green Approaches in Geotechnical and Geoenvironmental Engineering," Frontiers in Built Environment.

Courses/conferences/workshops organized: Recent Advancement Geotechnical and structural engineering" March 2021, at IIT Indore.

Journal articles published: 4

Dr. Mohd Farooq Azam

Assistant Professor
farooqazam@iiti.ac.in

PhD: Earth, Universe and Environment, University of Grenoble, France.

Previous Employment

(includes post-doctoral experience)

INSPIRE Faculty at National Institute of Hydrology, Roorkee, India (March 2015 to November 2017)

Statement of Research Interests: Dr. Mohd. FarooqAzam is a glacio-hydrologists. His main research activities include Glacier mass balance, Watershed hydrology, glacier and snow energy balance, black carbon impacts on glaciers in the Himalayan region

Broad research area: Glacio-hydrology

Research Highlights: Published 2 papers in Science (one as first author) in 2021.

Projects active during April 2020-March 2021:

Title: Listening to Ice - Learning from Glaciers and Glacial Communities
Duration: 1 year
Funding Agency: British Council
Brief Description: This India-UK joint project focuses the impact of climate change on glacier water resources in the Zanskar Basin and the local communities.

Title: Mass Balance and Dynamics investigations on DrangDrung Glacier in Zanskar Himalaya
Duration: 3 years
Funding Agency: DST-SERB
Brief Description: The project focuses on dynamic and mass balance studies on DrangDrung Glacier in Zanskar Basin under changing climate.

Title: Glacier Studies on DrangDrung Glacier
Duration: 3 year
Funding Agency: Space Application Centre-ISRO
Brief Description: The project focuses on geodetic mass balance, glacier dynamics and high altitude meteorology.

Major awards, achievements, recognitions of the faculty/students/scientists/staff of your department

The research work done by Azam's lab have been covered by more than 200 national and international media houses through newspapers, magazines, Radio Podcasts and TV interviews including Sky News London, NDTV etc.

Journal articles published: 5 papers with an aggregate impact factor of 105.

Dr. Guru Prakash
Assistant Professor
guruprakash@iiti.ac.in

PhD : University of Waterloo, Canada (2013-2017)

Previous Employment

(includes post-doctoral experience) - Post-doctoral fellow (2017-2018) - University of Waterloo

Statement of Research Interests

Broad research area

- Structural Health Monitoring
- Reliability Assessment
- Impact Loading

Research Highlights

- Ballistic performance of quasi-isotropic CFRP laminates under low velocity impact.
- Damage detection and localization in bridge components using static and dynamic responses.
- Reliability assessment of bridges under fatigue loading.
- A Bayesian approach to dam health monitoring using dam responses.

Major awards, achievements

- Best paper award for conference paper: Patnaik, G., Kaushik, A., Rajput, A., Prakash, G., "Numerical study on perforation characteristics of carbon-fiber reinforced composite laminates subjected to impact loading". 5th International Conference on Structural Engineering and Construction Management 2021 (virtual conference).

- Certificate for best paper presentation award for conference paper: Kaushik, A., Patnaik, G., Rajput, A., &Prakash, G., 2021, "Quantification of C&D waste and its future application in Indian Scenario, India", International conference on ecosystem restoration for resilience and sustainability: Living with nature, jointly organised by IIT Indore and National institute of disaster management, India, June 05-June 07, India. (Virtual conference).
- Certificate of Appreciation for Keynote speaker at the webinar on "Reliability and Safety of Complex Engineering Systems", organized by SRESA's Indian Institute of Risk and Reliability (IIRR) and Safety Critical Systems Lab, IIT Madras, May 29, 2021, (virtual conference).

Courses/conferences/workshops organized

- Co-coordinator, TEQIP III Sponsored short-term course on Recent Advancement in Structural Engineering, October 7-11, 2020.
- Co-coordinator, TEQIP III Sponsored short-term course on Recent Advancement in Civil Engineering, October 8-10, 2020.
- Co-coordinator, QIP sponsored short term course on Recent advancement in Structural and Geotechnical Engineering, March 8-13, 2021.
- Session Organiser, Session Stochastic Degradation Modelling for Risk-Informed Asset Management, 7th International Symposium on Reliability Engineering and Risk Management, Jun. 5-8, 2020, Beijing, China.

Journal articles published

- Prakash, G., Yuan, X. X., Hazra, B., & Mizutani, D. (2020). Toward a Big Data-Based Approach: A Review on Degradation Models for Prognosis of Critical Infrastructure. Journal of Nondestructive Evaluation, Diagnostics and Prognostics of Engineering Systems, 4(2).
- Prakash, G. (2021). A deflection-based practicable method for health monitoring of in-service bridges. Measurement Science and Technology, 32(7), 075108.
- Patnaik, G., Kaushik, A., Rajput, A., Prakash, G., &Velmurugan, R. (2021). Ballistic performance of quasi-isotropic CFRP laminates under low velocity impact. Journal of Composite Materials, 00219983211023869.

Any other major events / development: Honorary Faculty in SRESA's Indian Institute of Risk and Reliability (IIRR), Society for Reliability & Safety (SRESA), Mumbai; www.sresa.org.in

Dr. Kaustav Bakshi
Assistant Professor
Grade I
Kaustav.bakshi@iiti.ac.in

PhD: Jadavpur University Kolkata 2017

Previous Employment

(includes post-doctoral experience)

- Assistant Professor Grade II, Indian Institute of Technology Indore [December 2018 – May 2021]
- Assistant Professor, Heritage Institute of Technology Kolkata [July 2013 – December 2018]
- Guest Faculty, Jadavpur University Kolkata [July 2010 – December 2015]

Statement of Research Interests

Broad research area

- Structural Engineering
- Structural dynamics
- Failure predictions
- Laminated Composite Structures
- Numerical simulations through finite elements
- Stability of thin walled structures
- Plates and shells with stiffeners

Research Highlights

- Static bending of laminated composite stiffened shell roofs
- Free vibration of laminated composite stiffened shell roofs
- First and progressive ply failure predictions
- Isoparametric finite element simulations with shear deformations
- Geometrically nonlinear analysis of stiffened plates and shells
- Buckling analysis of laminated composite shells

Projects active during April 2020-March 2021

Title: Structural health assessment of Old Bus Stand Building at Dhamnod, Madhya Pradesh.

Duration: One month

Funding Agency: Nagar Panchayat Dhamnod.

Brief Description: The health assessment of an old building was carried out using NDTs like rebound hammer test, UPV test and alkali test. The proposed floor extension of that building was checked using the commercial package Staad.Pro.

Major awards, achievements during April 2020-March 2021

- Acted as a reviewer for the Journal of Strain Analysis for Engineering Design.
- Acted as a reviewer for the KSCE Journal of Civil Engineering.
- Acted as a reviewer for the Journal of Vibration and Control.
- Invited as an Editor for International Research Journal of Modernization in Engineering Technology and Science.

Courses/conferences/workshops organized during April 2020-March 2021

- Short Course on "Recent Advances in Structural Engineering" from 8th - 10th October 2020 sponsored by TEQIP III, IIT Indore.

Journal articles published during April 2020-March 2021

- K. Bakshi and D. Chakravorty (2020), Numerical Study on Failure of Thin Composite Conoidal Shell Roofs Considering Geometric Nonlinearity, KSCE Journal of Civil Engineering (Impact Factor: 1.805), vol. 24, pp. 913-921
- K. Bakshi and D. Chakravorty (2020), A Finite Element Prediction of First Ply Failure and Delamination in Composite Conoidal Shells Using Geometric Nonlinearity, Sadhana (Impact Factor: 1.188), vol. 45, pp. 218.

- K. Bakshi (2020), A Numerical Study on Nonlinear Bending Performance of Transversely Loaded Composite Singly Curved Stiffened Surfaces, Journal of Strain Analysis for Engineering Design (Impact factor: 1.541), pp. 0309324720977415.
- K. Bakshi and D. Chakravorty (2020), First Ply Failure Study of Laminated Composite Conoidal Shells Using Geometrically Nonlinear Formulation, Recent Advances in Theoretical, Applied, Computational and Experimental Mechanics, pp. 119-131

Dr. Abhishek Rajput

Assistant Professor
abhishekrajput
@iiti.ac.in

PhD: Indian Institute of Technology Roorkee, 2017

Previous Employment

(post-doctoral at South Korea in 2017-18)

Statement of Research Interests

My research area focusses on the behaviour of various construction materials such as concrete, steel, composites under low, medium, and high strain, rates.

Broad research area

Structural and Impact Mechanics

Research Highlights

Prestressed concrete; CFRP; Corrosion

Projects active during April 2020-March 2021:

Sponsoring Agency	Title of Project	Sanctioned Amount	Period	Role	Status
TEQIP - GOI	Nonlinear finite element analysis of concrete damage due to impact loading	125000	14 Months	Principal Investigator	Completed
Council of Scientific and Industrial Research, India	Pre-stressed Concrete under high rate of loading at varying temperature of Indian subcontinent	2360000	36 Months	Principal Investigator	Ongoing
MSME-GOI	Development of Optical sensing system for sustainable development	1800000	18 Months	Co-investigator	Ongoing

Major awards, achievements

- IIT Hyderabad chosen and invited me among 48 young stars of the country based on the accomplishments and belongs to academia, scientists and industrialist across the country. National Frontiers of Engineering Symposium NatFoE-2021, under the flagship of Indian National Academy of Engineering INAE.
- I have been called as Panelist in the Vaishwik Bharatiya Vaigyanik Summit "VAIBHAV" inaugurated by honorable Prime Minister of India Shri Narendra Modi on 2nd Oct 2020

Courses/conferences/workshops organized

Advances in Civil Engineering" from 7th-11th October 2020, at IIT Indore.

Journal articles published: 2

Any other major events/development etc.

- Best Paper Award to my Ph.D. student Mr. Gyanesh Patnaik in Secon 21 International conference of structural engineering and construction management held on May 12-15, 202, FISSAT Kerela, India.

Dr. Priyansh Singh

Assistant Professor
priyansh@iiti.ac.in

PhD : Indian Institute of Technology Delhi, 2019

Previous Employment

(includes post-doctoral experience)

- Assistant Professor, Birla Institute of Technology and Sciences Pilani, Pilani Campus (Feb 2019 -June 2020)
- Visiting Faculty, Birla Institute of Technology and Sciences Pilani, Pilani Campus (July 2018 -Feb 2019)

Statement of Research Interests

Broad research area

Pavement Materials

Research Highlights:

- Probabilistic approach to characterise laboratory rutting and fatigue behaviour
- Incorporation of waste plastic in asphalt mixture
- Effect of compaction energy on aggregate degradation
- Characterisation of permanent deformation of asphalt mixture.
- Back-calculation methods for prediction of pavement layer moduli.

Journal articles published

Priyansh Singh &Aravind Krishna Swamy (2020) Probabilistic approach to characterise laboratory rutting behaviour of asphalt concrete mixtures, International Journal of Pavement Engineering, 21:3, 384-396, DOI: 10.1080/10298436.2018.1480780

Dr. Gourab Sil

Assistant Professor
gourabsil@iiti.ac.in

PhD: Indian Institute of Technology Bombay, 2019

Previous Employment

(includes post-doctoral experience)

- Visiting Faculty in Dept. of Civil Engineering, BITS Pilani, Pilani, Rajasthan: 333031. (September 2019 to June 2020)
- Research Associate in Dept. of Civil Engineering, Indian Institute of Technology Bombay, Mumbai. (May 2019 to September 2019.
- Assistant Professor in Dept. of Civil Engineering, Techno India College of Technology, Rajarhat, Kolkata. (July 2014 to June, 2015)

Broad research area

Traffic Engineering and Geometric Deign of Highways

Research Highlights

- Driver Behaviour Analysis and Modelling.
- Performance Based Geometric Design of Highways.
- Influence of Road Geometric Design on Safety.

Major awards, achievements

- National Associate Member of Technical Committee of Transportation Research Group of India: Transportation Safety and Security (TCT-F).
- Most Cited Work at Journal of Transportation Engineering Part-A, ASCE in March 2021.

Journal articles published

- Nama, S., Sil, G.; Maurya, A. and Maji, A. (2021). Development of Speed Distribution Model and Prediction of Geometric Parameter Influence on Driver Speed through Artificial Neural Network, Journal of the Eastern Asia Society for Transportation Studies. (Accepted)
- Sil, G., Nama, S., Maji, A. and Maurya, A.K. (2020). "Effects of Inter-Vehicle Interaction on Speed and Lateral Position for Reviewing Free-Flow Condition". European Transport\TrasportiEuropei, 78, pp. 1-16.

Department of Chemistry

From the HoD's Desk

Dr. Biswarup Pathak
Associate Professor
biswarup@iiti.ac.in

Department of Chemistry at IIT Indore, which comes in the School of Basic Sciences, aims to provide exceptional training to all the students interested in cutting-edge research and education. The strength of the department has been and continues to be excellence in research and teaching. Started in August 2009 our department is rapidly growing every semester in terms of size, research diversity, external funding and number of publications. At present we have 17 faculty members and approximately 100 Ph.D. students with research interests ranging from traditional areas (organic, inorganic, physical, and theoretical/computational) to highly interdisciplinary and collaborative research areas such as nanotechnology, polymers, biochemical, materials and analytical.

The faculty members of the department are extremely well qualified and motivated with a strong commitment to teaching and research. Our department is well equipped with state-of-art sophisticated instrumentation facilities to facilitate research in almost all areas of chemistry and interdisciplinary research. The main source of external funding comes from CSIR (Council of Scientific and Industrial Research) and DST (Department of Science and Technology).

The alumni base of the department is slowly increasing, in which, many of them have occupied research (postdoctoral) positions in academia, in India and abroad. Their accomplishments have been outstanding and reflect on the quality training imparted at the undergraduate and graduate levels.

We have an M.Sc. (Master of Science) degree program in Chemistry from the academic year of 2013. We suggest all prospective students and other visitors explore our website to learn more about our department.

Introducing Faculty of Chemistry

- Prof. Rajneesh Misra
- Prof. Suman Mukhopadhyay
- Dr. Sanjay Kumar Singh
- Dr. Apurba K Das
- Dr. Chelvam Venkatesh
- Dr. Tushar Kanti Mukherjee
- Dr. Tridib Kumar Sarma
- Dr. Satya S. Bulusu
- Dr. Sampak Samanta
- Dr. Anjan Chakraborty
- Dr. Shaikh M. Mobin
- Dr. Amrendra K. Singh
- Dr. Dipak Kumar Roy
- Dr. Abhinav Raghuvanshi
- Dr. Umesh A Kshirsagar
- Dr. Selvakumar Sermadurai

Dr. Biswarup Pathak
Associate Professor
biswarup@iiti.ac.in

Ph.D. (Theoretical Chemistry): Hyderabad Central University, December 2007

Previous Employment

(includes post-doctoral experience)

- June 2016- Present: Associate Professor (Chemistry), IIT Indore
- May 2012- June, 2016: Assistant Professor (Chemistry), IIT Indore
- September 2009 - May 2012: Postdoctoral fellow, Uppsala University, Sweden
- January 2008 - July 2009: Postdoctoral fellow, Jackson State University, USA
- August 2007 - December 2007: Research Associate, Indian Institute of Science (IISc) Bangalore

Statement of Research Interests

a. Broad research area

Computational Material Science

b. Research Highlights

- Total 175 publications in international journals (1 JACS, 2 AngewChemie, 1 Nano-Letter, Nature Communication, 13 in Journal of Physical Chemistry C, 2 Chem Comm, 8 PCCP, 4 Nanoscale, 3 Journal of Materials Chemistry A). Total No. of citations: ~3000, H-index: 31 (Google Scholar) : I-10 index (Google Scholar) : 83; Some Highlights of some of our papers: 10 Cover page articles published in reputed journals such as AngewChemie, Nanoscale, Journal of Materials Chemistry A, Applied Physics Letter, Chemistry An Asian Journal

c. Major Awards, recognitions and Achievements

- Top 5% of highly cited authors in Physical portfolio of Royal Society of Chemistry journals, 2020 & 2021
- 2020 DUO-India Professor Fellowship Award
- Featured in Journal of Physical Chemistry Young Scientist Special Issue, 2019
- Early and Mid-Career Research Fellowship from Indian National Science Academy, 2017
- Best Research Paper Award from IIT Indore, 2016

Publications (includes journal articles, books and book chapters)

- Dimensional-Dependent Effects in Platinum Core-Shell-Based Catalysts for Fuel Cell Applications, Nishchal Bharadwaj, Akhil.S. Nair and Biswarup Pathak, ACS Applied Nano Materials, 2021.
- Electronic Conductance and Current Modulation through Graphdiyne Nanopores for DNA Sequencing, Rameshwar L. Kumawat and Biswarup Pathak, ACS Applied Electronic Materials, 2021. | Front Cover Page Article
- Intertwined nontrivial band topology and giant Rashba spin splitting, Chiranjit Mondal, Chanchal K. Barman, Aftab Alam and Biswarup Pathak, Physical Review B, 2021.
- Role of atomicity in the oxygen reduction reaction activity of platinum sub nanometer clusters: A global optimization study, Akhil S. Nair, Anakuthil Anoop, Rajeev Ahuja and Biswarup Pathak, Journal of Computational Chemistry, 2021.
- Organic Cation (DMPI) Intercalated Graphite Anode for High Voltage Next Generation Dual-Ion Battery, Surya Sekhar Manna, Sandeep Das, Arunendu Das and Biswarup Pathak, Materials Advances, 2021.

- High-Performance Water Harvester Framework for Triphasic and Synchronous Detection of Assorted Organotoxins with Site-Memory-Reliant Security Encryption via pH-Triggered Fluoroswitching, Ranadip Goswami, Sandeep Das, Nilanjan Seal, Biswarup Pathak*, and Subhadip Neogi*, ACS Applied Materials & Interfaces, 2021.
- Identifying the preferential pathways of CO2 capture and hydrogenation to methanol over Mn(I)-PNP catalyst: A computational study, Shyama Charan Mandal and Biswarup Pathak, Dalton Transactions, 2021.
- Current Density Calculations of an Octahedral Fe Nanocluster for Selective Electrocatalytic for Nitrogen Reduction, Arunendu Das, Akhil S. Nair, Shyama Charan Mandal, and Biswarup Pathak, ACS Applied Nano Materials, 2021. | Front Cover Page Article
- Synthesis of 1-Indolyl-3,5,8-Substituted γ-Carbolines: One Pot Metal-Solvent Free Protocol and Biological Evaluation, P. Dudhe, M. A. Krishnan, K. Yadav, Diptendu Roy, K. Venkatasubbaiah, Biswarup Pathak and C. Venkatesh, Beilstein Journal of Organic Chemistry, 2021.
- Electronic and Transport Properties of Bilayer Phosphorene Nanojunction: Effect of Paired Substitution Doping, V. Shukla, Rameshwar L. Kumawat, N. K. Jena, Biswarup Pathak, R. Ahuja, ACS Applied Electronic Materials, 3, 733-742, 2021.
- Identifying DNA Nucleotides via Transverse Electronic Transport in Atomically Thin Topologically Defected Graphene Electrodes, Rameshwar Kumawat, Biswarup Pathak, ACS Applied Bio materials, 4, 2, 1403-1412, 2021. | Front Cover Page Article
- Computational Strategies to Address the Catalytic Activity of Nanoclusters, Akhil S. Nair, Biswarup Pathak, WIREs Computational Molecular Science , 1508, 1-19, 2021. [Impact Factor: 25.11]
- Computational Insights into Electrocatalytic CO2 Reduction Facilitated by Mn(I) Half Sandwich-based Catalysts: Role of Substitution and Solvent, Shyama Charan Mandal, Biswarup Pathak, Electrochimica Acta , 366, 137463, 2021.
- Recent Trends in Electrode and Electrolyte Designing for Aluminium Battery, Sandeep Das, Surya S. Manna,Biswarup Pathak, ACS Omega (Minireview | Invited), 6, 1043-1053, 2021. | Front Cover Page Article
- Dual-functionalization actuated trimodal attribute in ultra-robust MOF: exceptionally selective capture and effectual fixation of CO2 with fast-responsive, nanomolar detection of assorted organo-contaminants in water, N. Seal, M. Singh, Sandeep Das, R. Goswami, Biswarup Pathak, Subhadip Neogi, Materials Chemistry Frontiers, 5, 979-994, 2021.
- Unraveling the Catalytically Preferential Pathway between Direct and Indirect Hydrogenation of CO2 to CH3OH using N-heterocyclic Carbene-based Mn(I) Catalysts: A Theoretical Approach, Amitabha Das, Shyama C. Mandal, Biswarup Pathak, Catalysis Science & Technology, 11, 1375-1385, 2021.
- Polycyclic Aromatic Hydrocarbons as Prospective Cathodes for Aluminium Organic Batteries, Sandeep Das, Preeti Bhauriyal, Biswarup Pathak, Journal of Physical Chemistry C, 125, 49-57, 2021.
- Defects Engineering on Ceria and C-C Coupling Reactions Using [Au11(PPh3)7I3] Nanocluster: A Combined Experimental and Theoretical Study, A. Das, S. Mukherjee, R. Sreehari, Akhil Nair, S, Bhandary, D. Chopra, D. Sanyal, Biswarup Pathak, S. Mandal, ACS Nano, 12, 16681-16688, 2020.
- Individual Identification of Amino Acids on Atomically Thin Hydrogen Boride System using the Electronic Transport Calculations, Rameshwar Kumawat, Milan Jena,Biswarup Pathak, Journal of Physical Chemistry C, 124, 27194-27202, 2020.
- Superior Anchoring Effect of Cu-Benzenehexathial MOF as Aluminium-Sulfur Battery Cathode Host, Preeti Bhauriyal, Biswarup Pathak, Materials Advances , 1, 3572-3581, 2020.
- Synergistic Effect of Bridging Thiolate and Hub Atoms for the Aro-maticity Driven Symmetry

Breaking in Atom Precise Gold Nanocluster, M. P. Maman,$ Akhil S. Nair,$ A. Mohammad, Biswarup Pathak*, S. Mandal,* Journal of Physical Chemistry Letters, 11, 10052-10059, 2020. [$Authors contributed equally]

- Extended Topological Line Defects in Graphene for Individual Identification of DNA Nucleobases, Rameshwar L. Kumawat, Biswarup Pathak*, Materials Advances, 1, 2908-2916, 2020.
- Symmetry Protection and Giant Fermi Arcs from Multifold Fermions in Binary, Ternary, and Quaternary Compounds, C. K. Barman,$ Chiranjit Mondal,$ S. Pujari, Biswarup Pathak*, A. Alam,* Physical Review B, 102, 155147, 2020.[$Authors contributed equally]

Duration:2021-2024

Funding Agency:SERB

Title:Atomistic Modelling of Pt-Nanocluster Based Electrocatalysts for Fuel Cell Applications (PI),SPARC (MHRD)

Duration 2019-2022

Funding Agency:MHRD (SPARC)

Prof. Rajneesh Misra

Professor
rajneeshmisra@iiti.ac.in

Ph.D (2007) in Chemical Sciences. IIT, Kanpur, India.

Previous Employment: (includes post-doctoral experience)

Professor (2017)-IIT Indore
Associate Professor (2013-2017)-IIT Indore
Assistant Professor (2009-2013)- IIT Indore
University of Kyoto, Japan (2008- 2009)
Postdoc at Georgia Tech University, Atlanta, USA (2007-2008)

Statement of Research Interests

a. Broad research area

Development of new organic/inorganic materials for Photonic and electronic applications

b. Research Highlights

- Our research interest focuses on design, and synthesis of conjugated organic molecules for organic electronics, and photonics such as solar cells, field-effect transistors, light-emitting diodes, and multi-photon absorption.

Publications (includes journal articles, books and book chapters)

Brief Description: Functionalization of BTD derivatives

Title: New Iron Based Catalysts for C-H Activation

Duration: 2019-2023, Funding Agency: DAAD

Brief Description: Synthesis of ferrocene based molecules

Prof. Suman Mukhopadhyay

Professor

suman@iiti.ac.in

Ph.D degree in synthetic inorganic chemistry from Indian Association for Cultivation of Science Kolkata in 2004

Previous Employment

(includes post-doctoral experience)

2017-till date - Professor, IIT Indore, India

2013- Associate Professor, IIT Indore, India

2010- Assistant Professor , IIT Indore, India

2009- EPFL in Lausanne (Switzerland) as a Marie-Curie International Incoming Fellow

2006- FCT Post-doctoral Fellow, Institute Superior Técnico in Portugal, Lisbon

Statement of Research Interests

Prof. Mukhopadhyay's current research interests are organometallic compounds in therapeutic and mechanism, bioinspired catalysis, molecular recognition, metallogels and applications. His work also encompasses areas like self-sorting and molecular machine.

a. Broad research area

Transition Metal Chemistry

b. Research Highlights

- Metal based soft materials in sensing, catalysis and self-healing materials.
- Ruthenium(II) based anticancer compounds and their mode of action.
- Heterodonor ligands and their complexes in sensing of heavy metal ion and explosives.
- Bioinspired transition metal catalysis
- Biomimetic model complexes

c. Major Awards, recognitions and Achievements

- Prof. Suman Mukhopadhyay - conferred the Institute's Best Teacher Award on Teacher's day 2021 (September 5th 2021).

Publications (includes journal articles, books and book chapters)

- Effect of h-BN and SiC addition on laser assisted processing of ceramic matrix composite coatings, Debjit Mishra, Vaibhav Nemane, Suman Mukhopadhyay, Satyajit Chatterjee, Ceramics International, 2020, 46, 5758.

- In vitro evaluation of cytotoxicity and antimetastatic properties of novel arene ruthenium(II) tetrazolato compounds on human cancer cell lines, Komal Vyas, Deepu Sharma, Sri Krishna Jayadev Magani, Shaikh M Mobin, Suman Mukhopadhyay, Appl. Organomet. Chem. 2021, 35, 5, e6187
- Selective Anticancer Activities of Ruthenium(II)-Tetrazole Complexes and their Mechanistic Insights, Chanchal Sonkar, Novina Malviya, Nilima Sinha, Attreyee Mukherjee, Srimanta Pakhira, Suman Mukhopadhyay, Biometals, 2021, 34, 813.
- Modulation of catalytic and biomolecular binding properties of ruthenium(II)-arene complexes with the variation of coligands for selective toxicity against cancerous cells, Pragti, Bidyut Kumar Kundu, Chanchal Sonkar, Rakesh Ganguly, Suman Mukhopadhyay, Polyhedron, 2021, 207, 115379.
- Target based chemotherapeutic advancement of ruthenium complexes, Pragti, Bidyut Kumar Kundu, Suman Mukhopadhyay, Coord. Chem. Rev., 2021, 448, 214169.
- A new approach to study of TiB2-TiN-SiC based tribological coatings with solid lubrication, Debjit Misra, Hillol Joardar, Avinandan Khaira, Suman Mukhopadhyay, Satyajit Chatterjee, Sadhana, 2021, 46, 198.
- Ruthenium(II)-Arene Complexes as Anti-Metastatic Agents and Related Techniques, Chanchal Sonkar, Sayantan Sarkar, Suman Mukhopadhyay, RSC Med. Chem., 2021, in press

Projects active during April 2020-March 2021

Title: Exploring ruthenium based metallodendrimers for improved anticancer activity and mode of action

Duration: Three years (2019-2022)

Funding Agency: DST

Brief Description: It is a bilateral joint cooperation project under Indo-Bulgaria Scheme.

Dr. Sanjay Kumar Singh

Associate Professor
sksingh@iiti.ac.in

Ph.D. (Chemistry), A.P.S. University, Rewa, M.P., India 2007

Previous Employment

(includes post-doctoral experience)

Feb 2017 – Present: Associate Professor, IIT Indore, India.

May 2012-Feb 2017: Assistant Professor, IIT Indore, India.

2011-2012: Alexander von Humboldt Postdoctoral Fellow, Institute of Inorganic Chemistry, Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany. (Host Researcher: Prof. Peter W. Roesky)

2010-2011, Postdoctoral Research Scientist, National Institute of Advanced Industrial Science and Technology (AIST), Ikeda, Osaka, Japan.

2008-2010, JSPS Postdoctoral Fellow, National Institute of Advanced Industrial Science and Technology (AIST), Ikeda, Osaka, Japan

Statement of Research Interests

a. Broad research area

- **Inorganic Chemistry and Organometallics**

  Catalysis for Energy and Environment: Catalyst synthesis and design (organometallic and coordination chemistry of transition metals and Nanoparticles) for H2 production and storage, CO2 capture and utilization, biomass transformation (biofuel), and various other industrially important catalytic transformations.

b. Research Highlights

- Dr. Singh's research group has undertaken the task to development of homo- and heterogeneous catalytic systems for various important reactions of industrial applications. It includes Hydrogen generation (Storage and Production), CO2 capture and sequestration, and the transformation of biomass waste to fuel and fine chemicals. Efficient protocols have been developed and optimized to utilize waste materials including plastic and other lab wastes to value-added products. The products include H2 gas, metal-organic frameworks for H2 and CO2 capture, porous adsorbents for CCU, and biomass derived open-chain hydrocarbons and oxygenated long-chain compounds for application as fuel. The developed catalysts and reactions protocols have been appeared in several peer reviewed research journals including ACS Catal., Inorg. Chem., Catal. Sci. Technol., ChemCatChem, Chem. Asian J., Eur. J. Inorg. Chem., J. Chem. Edu., Energy & Fuels, and so on. He has also 04 patents from his postdoc, and submitted 02 patents from IIT Indore. Their work on the transforming lab waste to CO2 capture material and Hydrogen generation from methanol was also covered in Nation News Papers (Dainik Bhashkar, FreePress journals). He has several research projects from DST-SERB, CSIR, SICI-MHRD and MES. So far, 07 PhD and 07 MSc students has been graduated from his group and most of them are now pursuing their respective Post-doc and PhD positions at the renowned institutions abroad, such as in RWTH-Aachan, KAUST, KIT, Oslo University, Hokkaido University.

c. Major Awards, recognitions and Achievements

Inducted as International Advisory Board member for ChemCatChem, Wiley-VCH (2020)

Patents- Filled & Awarded

- Sanjay Kumar Singh, Nirupama Sheet, Mahendra Kumar Awasthi, Catalytic process for hydrogen production from polyethylene terpthalate (PET) waste, India Patent, Application No. 202021020639 date: May 15, 2020

Publications (includes journal articles, books and book chapters)

- Soumyadip Patra, Hemanta Deka, and Sanjay K. Singh*, Bis-imidazole Methane Ligated Ruthenium(II) Complexes: Synthesis, Characterization and Catalytic Activity for Hydrogen Production from Formic Acid in Water, Inorg. Chem., 2021, 60, 14275-14285 (IF 5.165)

- Debashis Panda, E. Anil Kumar, and Sanjay K. Singh*, Introducing Mesoporosity in Zeolite 4A bodies for Rapid CO2 Capture, J. CO2 Util., 2020, 40, 101223 (IF 5.189)

Major Events/ Seminars organized & Developments

- Involved in the organization of the National Science Day program (through International Affairs and Outreach)

Courses/conferences/workshops organized

- Organizing team of Chemistry Talks, Feb. 2021 wherein four distinguished speakers (Prof. Braunschweig, Prof. Brasholz, Prof. Halet, and Dr. Behrens, from the reputed institutions of Germany and France discussed various aspects of chemistry.

  As a special case we also request you to share a separate report on COVID related activities (Research, Academic and / or any other news) during this period conducted by the Department so that it can be compiled
- With the association of team Avana, IIT Indore, prepared several litres of hand sanitizers as per the formulation of WHO.

Projects active during April 2020-March 2021

Title: A synergistic experimental and computational approach to develop novel catalytic processes for upgrading agri-waste biomass/bio-oil to biofuel

Duration: 02 years (2020-2022)

Funding Agency: Shastri Institutional Collaborative Research Grant (SICRG), (MHRD through Shastri Indo-Canadian Institute)

Brief Description: This project is to develop efficient protocols with the joint experimental and computational approach for the transformation of pyrolysis oil as derived from biomass waste to value added chemicals.

Title: Low-Cost Air Purifier cum CO2 harnesser

Duration: 02 years (2020-2022)

Funding Agency: MSME, Govt. of India

Brief Description: This project is to develop air purifier with a provision of extracting the excess CO2 from the atmosphere.

Title: Reversible Alkali Metal Based Hydrides for High Temperature Thermal Energy Storage

Duration: 03 year (2017-2021)

Funding Agency: Materials for Energy Storage (MES)-2016, DST, New Delhi

Brief Description: This project is to develop efficient energy storage materials based on hydrogen storage materials

Title: Development of new catalytic systems for efficient transformation of biomass/biomass derivatives to biofuel components

Duration: 03 years (2017-2020)

Funding Agency: SERB, New Delhi

Brief Description : This project is to develop efficient catalytic routes for the utilization and transformation of biomass waste to biofuel components.

Dr. Apurba K Das

Associate Professor
apurba.das@iiti.ac.in

Ph.D. in Chemistry, Indian Association for the Cultivation of Science (Jadavpur University), Kolkata, India

Previous Employment

(includes post-doctoral experience)

Associate Professor (2016 onwards) in Chemistry, Indian Institute of Technology Indore, India

Assistant Professor (2009-2016) in Chemistry, Indian Institute of Technology Indore, Indore, India

Postdoctoral Research Fellow (2008-2009), University of Strathclyde, Glasgow, UK

Postdoctoral Research Associate (2006-2008), University of Manchester, UK

Statement of Research Interests

a. Broad research area

- Bio-organic Chemistry
- Supramolecular chemistry

b. Research Highlights

- Biomaterials
- Peptide and nucleobase-based nanostructured materials
- Systems Chemistry

- Supramolecular electronics
- Organic-Inorganic hybrid materials
- Electrocatalytic Organic Reactions

c. Major Awards, recognitions and Achievements

- 2020 International Research Fellowship awarded to Dr. Apurba K Das by Kyoto University, Japan

Patents- Filled & Awarded

- Ultrasensitive nitrogen dioxide sensor based on S N doped carbon dot functionalized tungsten oxideInventors: S. Mukherjee, A. K Das, C. Patel, B. Mandal, R. G. Jadhav Patent No. 202021041967, Published, September 28, 2020.

Courses/conferences/workshops organized

- Organized AICTE QIP-sponsored Faculty Development Program on ''Nanomaterials for Next Generation Applications'' at Indian Institute of Technology Indore during March 22-27, 2021. (Role: Course Coordinator)
- Organized TEQIP sponsored short-term course on ''Fundamentals of Effective Manuscript Writing'' at Indian Institute of Technology Indore during December 2-4, 2020. (Role: Course Coordinator)
- Two days international conference on ''Global Challenges in Nanomaterials Research for Environmental and Healthcare Applications (NREHA 2020)'', at CSIR-Institute of Minerals & Materials Technology, Bhubaneswar during August 27-28, 2020. (Role: Scientific Advisory Committee)

Projects active during April 2020-March 2021

Title: UCL-IITI Partnership: Development of 3D Printable Biomimetic Hydrogels (Bio-inks) (Role: Indian PI) Sponsor: DST-UKIERI, New Delhi, India.

Duration: 2018-2020

Funding Agency: DST-UKIERI, New Delhi, India.

Title: Development of Cation-Switchable Functionalized Nucleobase based Metallohydrogels for Drug Delivery (Role: PI)

Duration: 2018-2021

Funding Agency: CSIR, New Delhi, India.

Title: Effect of Mitochondrial Targeted Peptides and Modulators of Mitochondrial Activity on Tumor Cells In Vitro and In Vivo (Role: Indian Co-PI)

Duration: 2019-2021

Funding Agency: DST-Belarus, New Delhi, India.

Title: 2D-TMD and Carbon Dot Embedded Metal-oxide Nanomaterials for Ultrasensitive and Ultraselective H2S Detection (Role: Co-PI)

Duration: 2020-2022

Funding Agency: MHRD-STARS, IISc Bangalore, India

Title: Complex Cu-containing Semiconductors and Layered Structures for Economically-Viable, Environmentally-benign, and High Performance Ultrathin Solar Cells (Role: Indian Co-PI)

Duration: 2019-2021

Funding Agency: DST-RSF Project under India-Russia Programme of Cooperation in Science and Technology.

Dr. Chelvam Venkatesh

Associate Professor
cvenkat@iiti.ac.in

Ph.D., Department of Chemistry, IIT Kanpur, Kanpur India, (2005)

Previous Employment

(includes post-doctoral experience)

Associate Professor Dec. 2018-till date, IIT Indore

Assistant Professor June 2012-Dec. 2018, IIT Indore

Postdoctoral Research Associate, Department of Chemistry, Purdue University, WestLafayette, USA (August 1, 2008 to May 30, 2012).

Alexander von Humboldt Research Fellow, Institut fur Chemie und BiochemieOrganische Chemie,Freie Universitat Berlin, Germany(October 1, 2006 to May 31, 2008).

Postdoctoral Research Fellow, Institut fur Chemie und Biochemie-Organische Chemie, Freie Universitat Berlin,Berlin, Germany(May 1, 2006 to September 30, 2006).

Academic associations with other institutions (Affiliate/Adjunct/Visiting posts)

- Visiting Faculty, Purdue University, USA, March 2020
- Visiting Faculty, Leibniz University of Hannover, Germany, 2019-2023

Statement of Research Interests

a. Broad research area

- Synthesis of natural products, heterocycles, carbocycles and small molecule targeting ligands or inhibitors for therapeutic and diagnostic applications of pathological diseases.

b. Research Highlights

- Total synthesis of biologically important natural products
- Design and synthesis of heterocycles and carbocycles of biological importance
- Developing new methodologies for construction of C-C and C-X (X =N, O,S,P) bonds

- Design, synthesis and diagnostic applications of new targeting ligands for cancers and inflammatory diseases
- Drug delivery systems, near-infra red fluorescence, nuclear Imaging and bioconjugate chemistry
- Synthesis of Inhibitors for drug targets.

c. Major Awards, recognitions and Achievements

- SERB-DST-Purdue sponsored "Overseas Visiting Doctoral Fellowship Award" as Visiting Faculty to Purdue University, West Lafayette, USA, April 2019- March 2020 for collaborative research on "Cancer and Neurodegenerative Diseases".
- Department of Biotechnology sponsored Bio-Ignition Grant (BIG) by BIRAC for a Startup from Aug.2021-Feb. 2022.
- Founder Director of a company named "RONCOV Diagnostics and Therapeutics Pvt. Ltd., from the research outcome at IIT Indore to treat Cancer and Inflammatory Diseases.
- Research Grant: "Development of Novel Benzo-fused Heterocycles for the Treatment of Drug Resistant Tuberculosis", Department of Biotechnology, Govt. of India, Co-Principal Investigator.

Patents- Filed & Awarded

- Third generation tubulysin analogues and process of preparation thereof, Chelvam V., Pandit A., Reddy R.B., Yadav K., Pathak B., Roy, D. 2020, Indian Patent, Application No.202021036140.
- Metal-free solvent-free synthesis of fused-pyrido heterocycles and biomedical applications. Venkatesh C., Dudhe P., Krishnan M. A., Sonawane, A. 2020, USA patent, Application no. 16931838 (published).
- Third generation tubulysin analogues and process of preparation thereof, Chelvam V., Pandit A., Reddy R.B., Yadav K., Pathak B., Roy, D. 2021, USA Patent, Application No.17/198,918.
- Method and system for metal-free solvent-free synthesis of fused-pyrido heterocycles; Venkatesh Chelvam, Premansh Dudhe, Mena Asha Krishnan, Avinash Sonawane; Indian Patent (366986), 2019 (Granted).

Publications (includes journal articles, books and book chapters)

- Agarose micro-well platform for rapid generation of homogenous 3D tumour spheroids, Krishnan, M.A., Yadav, K., Venkatesh, C., Curr. Protoc. Chem. Biol. 000, (2021) (in press).
- Optimizing affinity to prostate specific membrane antigen by spacer modifications in a tumor spheroid model, Krishnan, M.A.,Pandit, A., Sharma, R., Venkatesh, C., J. Biomol. Struct. Dyn., 27, 1-22, (2021).
- Synthesis of 1-indolyl-3,5,8-substituted -carbolines: One-pot solvent-free protocol and biological evaluation, Dudhe, P., Krishnan, M.A., Yadav, K., Roy, D., Venkatasubbaih, K., Pathak, B., Venkatesh, C., Beilstein J. Org. Chem., 18, 1582–1587 (2021).

- Developing MicroSpherePlatform using a commercial hair brush: An agarose 3D culture platform for deep-tissue imaging of prostate cancer, Krishnan, M.A., Venkatesh, C., ACS Appl. Bio. Mater. 4, 4254–4270, (2021).

- A targeted near-infrared nanoprobe for deep-tissue penetration and imaging of prostate cancer, Krishnan, M.A., Yadav, K., Roach, P., Venkatesh, C., Biomater. Sci. 9, 2295-2312, (2021).
- Evaluation of the reducing potential of PSMA-containing endosomes by FRET imaging, Venkatesh, C., Shen, J., Putt, K.S., Low, P.S., Cancer Drug Resist., 4, 223-232, (2021).
- Revolutionising medical diagnosis with SPECT imaging: Clinical applications of a nuclear imaging technology. Biomedical Imaging Instrumentation, Elsevier Science Publishing Company, Inc. Chapter 6, Krishnan, M.A., Cherukumudi A., Oommen S., Malapure S.S., Venkatesh C. (2021).
- Serendipitous base catalysed condensation-heteroannulation of iminoesters: A regioselective route to synthesis of 4,6-disubstituted 5-azaindoles, Dudhe, P., Venkatasubbaih, K., Pathak, B., Chelvam, V., Org. Biomol. Chem., 18, 1582-1587, (2020).
- Synthesis of tubuvaline (Tuv) fragment of tubulysin via asymmetric dihydroxylation of homoallylamine, Reddy, B. R., Vijay, M, Krishnan, M.A., Venkatesh, C., Synth. Commun., 51, 797-809, (2020).

Courses/conferences/workshops organized

- Global Initiatives for Academic Network, workshop on Dec.15, 2021 - Dec.25, 2021

Projects active during April 2020-March 2021

Title: Design, synthesis and biological evaluation of Bcr-Abl inhibitors active against wild and mutant Bcr-Abl tyrosine kinases.

Duration: 2020-2023

Funding Agency: DST-SERB

Brief Description: In this project, we develop sulphonamides containing lead molecules. Further on the basis of preliminary in vitro assay studies, structural optimization and molecular modification of identified lead molecules will be performed through in silico docking and molecular modelling studies, using CADD software against virtual protein of LIMK2 then novel derivatives of 2-Benzyl-1-oxo-N-phenyl-1,2,3,4-tetrahydroisoquinoline-6-sulfonamide and N-Benzyl-N-methyl-2-(N-phenylsulfamoyl) pyrimidine-5-carboxamide will be designed and synthesized and characterized followed by in vitro assessment of novel LIMK2 inhibitors by using MTT assay in breast cancer cell lines and LIMK2 inhibition assay kit respectively. The in vivo biological activity of most active compounds will be investigated for most active LIMK2 inhibitors in mouse xenograft models. Finally Molecular dynamics simulation studies will be performed to calculate the free energy of binding of drug-like molecule with a protein.

Projects active during April 2020-March 2021

Title : Ligand Targeted NIR Dye/Fe3O4 Nanoconjugates for dual (Optical/MRI) Imaging and Hyperthermia to treat Metastatic Castration Resistant Prostate Cancer.

Duration : 2019-2023

Funding Agency : DAAD, Germany

Brief Description: As metastatic castration resistant prostate cancer (mCRPC) is resistant to anti-androgen therapies and chemotherapeutic drugs, our aim is to deliver 2-[3-(1,3-dicarboxypropyl)ureido] pentanedioic acid (DUPA, a ligand specific to PSMA overexpressed in mCRPC) conjugated Cy5.5 and Fe3O4 for dual (optical and MRI) imaging and therapeutic purposes to cancer cells. This project presents the design, synthesis and biological evaluation of a dual imaging probe containing optical imaging NIR Cy5.5 dye, which provides functional details of molecular events and Fe3O4 for magnetic resonance imaging (MRI) to obtain anatomical information required for accurate mCRPC spread. As compared to conventional spherical nanoparticles, Fe3O4 nanorods of similar material volume provide a superior T2

contrast effect with 1.5–2 times higher relaxivity (R2) value for efficient visualization in MRI. The Fe3O4 nanorods as contrast agent can also be used for therapy using hyperthermia principle. The enhanced MRI contrast and hyperthermia properties of nanorods are attributed to the higher surface area and anisotropic morphology. Furthermore, as compared to spherical nanoparticles, nanorods offer longer blood circulation times, stronger interaction with tumors, enhanced retention at tumor sites and improved targeting efficiency, making them excellent candidates as targeting carriers or MRI contrast agents.

Dr. Tushar Kanti Mukherjee

Associate Professor
tusharm@iiti.ac.in

Ph.D. (Fluorescence Spectroscopy) 2007: IIT Bombay, Mumbai

Previous Employment

(includes post-doctoral experience)

Associate Professor (May 2016-Till Date): IIT Indore, Indore, M.P.

Assistant Professor (December 2010- May, 2016): IIT Indore, Indore, M.P.

Postdoctoral Scientist (2007-2010): Columbia University Medical Center, New York, USA

Statement of Research Interests

a. Broad research area

- Single molecule spectroscopy, Fluorescence imaging

b. Research Highlights

- Protein-Protein and Protein-NP interaction
- Self-assembled Luminescent Materials
- Nanocomposite based Energy Transfer Processes
- Fluorescence Sensing

Publications

(includes journal articles, books and book chapters)

Dr. Tridib Kumar Sarma

Assistant Professor
tridib@iiti.ac.in

Ph.D. (2004), Indian Institute of Technology Guwahati

Previous Employment

(includes post-doctoral experience)

August 2009-: Assistant Professor at IIT Indore.

April 2007-June 2009: JSPS Post-doctoral Fellow, University of Tokyo, Tokyo, Japan.

June 2005-December 2006: Alexander-von-Humboldt Post-doctoral Fellow, The University of Heidelberg, Heidelberg, Germany.

August 2004-May 2005: Post-doctoral Fellow, The University Heidelberg, Heidelberg, Germany.

Statement of Research Interests

a. Broad research area

- Nanomaterials, self-assembled nanostructures, hydrogels, Heterogeneous catalysis

b. Research Highlights

- Nanomaterials
- Molecular self-assembly
- Hydrogels
- Green chemistry
- Heterogeneous catalysis
- Photocatalysis
- Chemistry at Nano-bio interface

Publications

(includes journal articles, books and book chapters)

Dr. Satya S. Bulusu
Associate Professor
sbulusu@iiti.ac.in

PhD, University of Nebraska (2006)

Previous Employment

(includes post-doctoral experience)

2018-Present: Associate Professor, IIT Indore, India

Apr 2012 - 2018: Assistant Professor, IIT Indore, India

2011 - 2012: Assistant Professor, Shobhit University, India

2010 - 2011: Postdoctoral Fellow, University of New Brunswick, Canada

2009 - 2010: Postdoctoral Fellow, York University, Canada

2007 - 2008: Postdoctoral Fellow, University of Nebraska, USA

Statement of Research Interests

a. Broad research area

- Computational Chemistry, Structural evolution of Nanoclusters and Nanoalloys, Global Optimization Methods, Algorithms for predicting Transition State, DFT Guided Monte Carlo Simulations.

b. Research Highlights

- Developing machine learning methods (Artificial neural networks) for chemical problems.
- Modelling of atomic environments
- Developing sampling algorithms
- Using hardware technologies to parallelize our programs that will help to extend the above methods to experimentally relevant sizes.

Publications

(includes journal articles, books and book chapters)

- Structural evolution in gold nanoparticles using artificial neural network based interatomic potentialsJ. Chem. Phys.152, 154302 (2020);https://doi.org/10.1063/1.5142903 Shweta Jindal and Satya S. Bulusu

Courses/conferences/workshops organized

- TEQIP course on Artificial Intelligence and Machine Learning was organized as a part of Faculty Development Program on Dec 21-30, 2020.

Projects active during April 2020-March 2021

Title: Reducing computational complexity using FPGA to study structure and dynamical properties of nanoparticles EMR/2016/006579

Duration: August 2017 to December 2020

Funding Agency: DST

Brief Description: Molecular dynamics (MD) simulations involve computations of forces between atoms and the total energy of the chemical systems. The scientific community is dependent on high-end servers for such computations that are generally sequential and highly power hungry, thereby restricting these computations in reaching experimentally relevant large systems. This work explores the concept of parallelization of the code and accelerating them by exploring the usage of High Level Synthesis (HLS) based Field Programmable Gate Array (FPGA). This work proposes a hardware and software based

interface to implement parallel algorithms in an FPGA framework and communication between the software and hardware interface is implemented. The forces of Au 147 obtained through the ANN based interatomic potentials in the proposed model shows an acceleration of 1.5 times compared with an expensive server with several nodes. Taking this work forward can result in a lab on-a-chip application and this would potentially be applied onto several large experimentally relevant chemical systems.

Dr. Sampak Samanta

Associate Professor
sampaks@iiti.ac.in

Ph.D. (Synthetic Organic Chemistry) 2004: Indian Association for the Cultivation of Science (IACS), Jadavpur, Kolkata.

Previous Employment

(includes post-doctoral experience)

June 2016-continuing: Associate Professor at IIT Indore.

October 2010-June 2016: Assistant Professor at IIT Indore.

July 2010-October 2010: Senior Research Scientist, Daiichi Sankyo Research Centre in India, Medicinal Chemistry, Gurgaon.

June 2009-June 2010: Senior Research Scientist, Ranbaxy Laboratories Limited, NDDR, R&D-III, Medicinal Chemistry, Guragon.

June 2007-May 2009: JSPS Post-doctoral Fellow, Tokyo University of Science, Tokyo, Japan.

Dec. 2004-May 2007: Post-doctoral Fellow, The University of Texas at San Antonio, Texas. USA.

Feb. 2004-Nov.2004: Post-doctoral Fellow, The University Missouri at Rolla, Missouri, USA.

Statement of Research Interests

a. Broad research area

- Asymmetric synthesis, Metal mediated synthetic transformation, Green chemistry, Total synthesis of biologically active compounds.

b. Research Highlights

- Asymmetric synthesis
- Heterocycles
- Metal mediated synthetic transformation
- Green chemistry
- Photocatalyst
- Total synthesis of biologically active compounds
- Medicinal Chemistry
- Agrochemicals

Dr. Shaikh M. Mobin

Associate Professor
xray@iiti.ac.in

PhD, University of Mumbai

Previous Employment

(includes post-doctoral experience)

Nov. 2016 onwards, Associate Professor, Department of Chemistry, IIT Indore

Feb. 2012- Oct. 2016, Assistant Professor, Department of Chemistry, IIT Indore

1999 – 2011, Worked as a X-Ray Crystallographer at National Single Crystal X-ray Diffraction Facility, IIT Bombay and Sophisticated Instrument Center (SIC), IIT Indore

Statement of Research Interests

a. Broad research area

- Dr Shaikh had develop his multi-disciplinary research group working in wide area of research including Solid-state structural transformation, Design and synthesis of newer class of MOFs / COFs and their applications in energy storage, conversion and biomedical devices, exploring metal nano-oxide materials for energy storage, conversion, optical and electro-chemical sensing, metal nano-oxide materials derived by employing metal complexes / MOFs as single-source molecular precursors as catalyst in organic transformation and developing greener c-dots for bioimaging and biomarkers. Moreover, the research group designs and synthesizes small molecules as cellular organelles target and docking.

b. Research Highlights

- The group endeavors to venture into path-breaking research in the field of solar assisted water splitting and Pb Free Perovskite Solar Cells.

c. Major Awards, recognitions and Achievements

- Fellow of Maharashtra Academy of Sciences.
- Dr. Shaikh M Mobin has been named among the Golden Authors for Dalton Trans on occassion of 50th volumes of Dalton Tansaction from Royal Society of Chemistry.

Publications

- Optical nanosensors based on fluorescent carbon dots for the detection of water contaminants: a review. Sharma, V., Tiwari, P., Kaur, N. and Shaikh M. Mobin. Environ. Chem. Lett., , 2021,000,Accepted.(Invited Review)
- Cubane Ru4(CO)8 cluster containing 4 pyridine-methanol ligands as a highly efficient photoelectrocatalyst for oxygen evolution reaction from water Singh, A., Chaudhary, N., Mathur, P. and Shaikh M. MobinJ. Organomet. Chem., 2021,000(3),Accepted.
- Design and fabrication of cost effective and sensitive non-enzymatic hydrogen peroxide sensor using Co-doped δ-MnO2 flowers as electrode modifier Ahmed, K., and Shaikh M. MobinAnal. Bioanal. Chem., 2021,413(3),789-798.

As a special case we also request you to share a separate report on COVID related activities (Research, Academic and / or any other news) during this period conducted by the Department so that it can be compiled.

- Project is under review submitted to Ministry of Textiles on Covid Research.

Projects active during April 2020-March 2021

Title : "Catalytic applications of Nanocatalysts derived from single source molecular precursor (SSMPs)".

Duration : 36 months (2021-2023)

Funding Agency : Science and Engineering Research Board (SERB), New Delhi

Brief Description : The SERB project consists of flexible energy storage devices to be developed.

Title : MOFs@Graphene hybrid smart textured nanofibers for flexible energy storage devices

Duration : 36 months (2020-2023)

Funding Agency : BRNS DAE, BARC-Mumbai

Brief Description : In BRNS project we will design and synthesis state of the art nano-materials derived from Single Source Molecular Precutsors (SSMPs) for various catalysis and energy applications.

Dr. Amrendra K. Singh
Assistant Professor
aks@iiti.ac.in

Ph.D., IIT Bombay, July 2003 – April 2009.

Previous Employment

(includes post-doctoral experience)

- June 2016 – Present: Assistant Professor, IIT Indore, India.
- October 2015 – May 2016: Research Scientist, IIT Indore, India.
- May 2012 – July 2015: Research Associate, Michigan State University, USA.
- March 2010 – February 2012: Postdoctoral Fellow, Lund University, Sweden.
- December 2008 – February 2010: Research Associate, IIT Bombay, India

Statement of Research Interests

a. Broad research area

- Inorganic and Organometallic Chemistry, Catalysis

b. Research Highlights

- Transition metal-NHC Pincer Complexes and their applications in catalysis.
- Multidentate N-heterocyclic carbene (NHC) ligands.
- Cooperative metal-metal interactions for the multi-electron reduction of small molecules.

Publications

(includes journal articles, books and book chapters)

- Yadav, D.; Singh, R. K.; Singh, S.; Shirage, P. M.; Singh, A. K., Cationic Ruthenium(II)-NHC Pincer Complexes with Hemilabile COD: Solid-state Structural Characterisation and Theoretical Study of an η2-(E,Z)-COD Ligand. J. Organomet. Chem. 2021, 953, 122061 (Part of special issue: Frontiers in Organometallic Chemistry).
- Yadav, D.; Misra, S.; Kumar, D.; Singh, S.; Singh, A. K. Cationic Ruthenium(II)-NHC Pincer Complexes: Synthesis, Characterisation and Catalytic Activity for Transfer Hydrogenation of Ketones. Appl. Organomet. Chem. 2021, 35, e6287.

- Lichchhavi; Lee, H.; Ohshita, Y.; Singh, A. K.; Shirage, P. M. Transformation of Battery to High Performance Pseudocapacitor by the Hybridization of W18O49 with RuO2 Nanostructures. Langmuir 2021, 37, 1141–1151.

Projects active during April 2020-March 2021

Title: Designing Bimetallic Complexes with Cooperative Metal-Metal Interactions for the Multi-electron Reduction of Small Molecules.

Duration: 2017-2020

Funding Agency: Science and Engineering Research Board (SERB)

Brief Description: The development of bis-pincer based hetero-bimetallic systems can, potentially, lead to the discovery of homogeneous catalysts for ammonia synthesis from dinitrogen and dihydrogen gases and bring us one step closer to the long-standing goal of a more energy efficient route than the Haber-Bosch process.

Dr. Dipak Kumar Roy

Assistant Professor
dipak.roy@iiti.ac.in

PhD- Institute: Indian Institute of Technology Madras Year: 2015

Previous Employment

(includes post-doctoral experience)

Joined IIT Indore, Assistant Prof (Feb 2019)

SERB Postdoctoral Fellow at Julius-Maximilians-Universität Würzburg, Germany (January 2018-January 2019)

Postdoctoral Fellow at Julius-Maximilians-Universität Würzburg, Germany (February 2016-December 2017)

Postdoctoral Associate at IIT Madras, India (July 2015-December 2015)

Statement of Research Interests

a. Broad research area

Main group and organometallic chemistry

b. Research Highlights

- Low-valent s- and p-block compounds and small molecule activation.
- Multiply bonded main group compounds.
- Organic-Inorganic hybrid polymers

c. Major Awards, recognitions and Achievements

- Start-up Research Grant (SRG) from SERB, Dept. of Science and Technology, Govt. of India Publications (includes journal articles, books and book chapters)
- D. K., Roy, T. Troester, F. Fantuzzi, R. D. Dewhurst, C. Lenczyk, K. Radacki, C. Pranckevicius, B. Engels, H. Braunschweig, Isolation and Reactivity of an s-Block Metal Antiaromatic. Angew. Chem. Int. Ed. 2021, 60, 3812. (IF 15.33)
- K. Saha, D. K. Roy, R. D. Dewhurst, S. Ghosh, H. Braunschweig, Recent Advances in the Synthesis and Reactivity of Transition Metal σ-Borane/Borate Complexes. Acc. Chem. Res. 2021, 54, 1260. (IF 22.38)

Major Events/Seminars organized & Developments

- Organized National Science Day 2021
- Organized "Chemistry Talks" to mark the National Science Day 2021 in the Department of Chemistry.

Projects active during April 2020-March 2021

Title: s-Block Metal Aromatics and Anti-aromatics.

Duration: Two years (2020-2022)

Funding Agency: SERB

Brief Description: Synthesis of group 2 metal containing five membered antiaromatic compounds stabilized via N-heterocyclic carbenes

Dr. Abhinav Raghuvanshi
Assistant Professor
r.abhinav@iiti.ac.in

PhD, IIT Bombay, 2009 – 2014

Previous Employment

(includes post-doctoral experience)

2018: Joined IIT Indore as Assistant Professor

2016 - 2018: Postdoc fellow (N-PDF), IIT Indore

2015 - 2016: Postdoc fellow, University of Franch-Comte, Besancon, France

Statement of Research Interests

a. Broad research area

- Inorganic and Organometallic Chemistry of late transition metals

b. Research Highlights

- Luminescent complexes of Cu(I) coordination complexes
- TADF materials based on late transition metals
- POSS derived hybrid materials

Publications

(includes journal articles, books and book chapters)

Dr. Umesh A Kshirsagar
Assistant Professor
uakshirsagar@iiti.ac.in

PhD- CSIR-National Chemical Laboratory, Pune, Year: 2011

Previous Employment

(includes post-doctoral experience)

Joined IIT Indore, as Assistant Professor (Sep. 2019).

Assistant Professor: Savitribai Phule Pune University, Pune. (Jan 2019 - Sep 2019).

DST-INSPIRE Faculty: Savitribai Phule Pune University, Pune. (May 2014 - Jan 2019).

DST-INSPIRE Faculty: CSIR-IICT, Hyderabad. (June 2013 - May 2014).

Postdoctoral Research Fellow: Ben-Gurion University, ISRAEL. (Oct. 2011- June 2013)

Research Assistant: CSIR-National Chemical Laboratory, Pune. (May 2010- Jan 2011).

Senior Research Fellow (Ph.D. work) - National Chemical Laboratory, Pune
INDIA (May 2007 to April 2010)
Junior Research Fellow (Ph.D. work) - National Chemical Laboratory, Pune,
INDIA (April 2005 to April 2007)

Statement of Research Interests

a. Broad research area

- Synthetic Organic Chemistry

b. Research Highlights

- Photo-redox catalysis in Organic synthesis
- Transition metal catalysis in Organic synthesis
- C-H Activation and Oxidative coupling
- Total Synthesis of Natural Products
- Green Chemistry

Publications

(includes journal articles, books and book chapters)

- Pd-Catalyzed Decarboxylative Ortho-Aroylation of 2-Aryl-quinazolinone Comprising Intrinsic Directing Group with α-Oxocarboxylic Acids D. S. Waghmare, S. D. Tambe, U. A. Kshirsagar* Asian J. Org. Chem., 2020, 9, 2095,
- Regioselective Coupling of 2-Arylquinazolinone C-H with Aldehyde and Benzyl Alcohol under Oxidative Condition U. A. Kshirsagar*, D. S. Waghmare, S. D. Tambe. New J. Chem., 2020, 44, 16697.

Dr. Selvakumar Sermadurai

Assistant Professor

selva@iiti.ac.in

Ph.D. (Chemistry), Indian Institute of Technology Kanpur, U.P., India 2009

Previous Employment

(includes post-doctoral experience)

Sep 2019 – Present: Assistant Professor, IIT Indore, India.

Nov 2017-Aug 2019: UGC-Assistant Professor, Central University of Haryana, Mahendergarh, India.

Nov 2013-Sep 2017: Postdoctoral Fellow, Kyoto University, Japan.

July 2009-Sep 2013, Postdoctoral Fellow, North Dakota State University, Fargo, USA.

Statement of Research Interests

a. Broad research area

- Organic Synthesis and Catalysis

b. Research Highlights

- Visible light Photoredox Catalysis
- Development of new methodologies using Hypervalent iodine reagents
- Asymmetric Catalysis
- Synthesis of biologically active natural products
- Continuous-Flow Chemistry
- Green Chemistry

c. Major Awards, recognitions and Achievements

- Early Career Research Award from SERB -2019-2022

Projects active during April 2020-March 2021

Title: Development of Hypervalent Iodine (III) Reagents Mediated Photocatalytic Si-H Functionalization and Exploration of Distal Group Migration

Duration: 2019 - 2022

Funding Agency: SERB-DST (ECR/2018/000413)

Brief Description: This project aims to develop mild photocatalytic methods for the synthesis of functionalized heterocycles.

Department of Mathematics

From the HoD's Desk

Dr. Md. Aquil Khan
Associate Professor
aquilk@iiti.ac.in

The department of Mathematics at IIT Indore has been a major centre for academic and research programs in various branches of Mathematics. The department has constantly been engaging in frontier research areas and been encouraging collaborative research with the other Science and Engineering Departments. The department currently offers Ph.D. and M.Sc. programs in Mathematics and envisages other master programs in allied fields, such as, statistics and applied computing. The department is also working on a proposal for a core B.Tech. program in the department.

The faculty members of the department are well qualified and motivated with a strong commitment to teaching and research. This is reflected through

1. various academic events of national and international importance conducted in the department,
2. ongoing research projects sponsored by several funding agencies such as NBHM, SERB, DST, CSIR, MHRD, ICMR and
3. research publications in reputed journals.

Further, the department is also engaged in promoting Mathematics among undergraduate students in India through Madhava Mathematics Competition. The department regularly organizes lectures by eminent mathematicians from reputed institutes around the world.

Introducing Faculty of Mathematics

- Dr. Sk. Safique Ahmad
- Dr. Swadesh Kumar Sahoo
- Dr. Antony Vijesh
- Dr. Anand Parkash
- Dr. Niraj Kumar Shukla
- Dr. Ashisha Kumar
- Dr. Vijay Kumar Sohani
- Dr. M. Tanveer
- Dr. Sanjeev Singh
- Dr. Bapan Ghosh
- Dr. Santanu Manna
- Dr. Vinay Kumar Gupta
- Dr. Bibekananda Maji
- Dr. Charitha Cherugondi
- Dr. Mohd. Arshad

Dr. Md. Aquil Khan
Associate Professor
aquilk@iiti.ac.in

Ph.D Indian Institute of Technology Kanpur

Previous Employment (Includes post-doctoral experience)

- Visiting Researcher, University of Amsterdam, The Netherlands, from September 2009 to August 2010

  Post-doctoral Fellow, The Institute of Mathematical Sciences (IMSc) Chennai, from Nov 2010 to March 2011

  Marie-Curie Fellow, Fraunhofer SIT, Darmstadt, Germany, from May 2011 to April 2012

Journal articles published.

- Khan, M. A. and Patel. V. S.: Knowledge and approximations: A formal study under the perspective of information systems and rough set theory. Information Sciences, 524, 97-115. Elsevier.
- Patel. V. S. and Khan, M. A. and M. K. Chakraborty: Modal systems for covering semantics and boundary operator. International Journal of Approximate Reasoning, 135, 110-126. Elsevier.
- Khan, M. A. and Patel. V. S.: A Formal Study of a Generalized Rough Set Model Based on Subset Approximation Structure, International Journal of Approximate Reasoning, Elsevier. To Appear

Dr. Sk. Safique Ahmad
Associate Professor
safique@iiti.ac.in

PhD. IIT Guwahati

Previous Employment (Includes post-doctoral experience)

Post-doctoral Fellow IISc Bangalore in 2008

Post-doctoral Fellow from TU Berlin, Germany in 2009

Visiting Researcher Ohio State University in 2018

Major awards, achievements: Awarded PhD degree: Prince Kanhya

Thesis Title: "Backward Error Analysis of Specified Eigenpairs and Its Application in Solving Inverse Eigenvalue Problems"

Projects won by the faculty:

- On inverse eigenvalue problems for structured matrix pencils Funding Agency: DST, New Delhi, SERC, Under the scheme MATRICS

Courses/conferences/workshops organized.

- Matrix Computation and its applications in systems, signal and control problems during Feb 16-21, 2021
- Wavelet via Matrices and its Applications in signals and image processing November 16-21, 2021

Journal articles published.

- Backward error analysis and inverse eigenvalue problems for Hankel and Symmetric-Toeplitz structures, S. S. Ahmad and P. Kanhya, Appl. Math. Comput., 406: 126-288, 2021.
- Perturbation analysis of matrices over a quaternion division algebra, S. S. Ahmad, I . Ali, and I. Slapnicar, Electr. Trans. Num. Anal., 54: 128–149, 2021
- Perturbation analysis on matrix pencils for two specified eigenpairs of a semisimple eigenvalue with multiplicity two, S. S. Ahmad and P. Kanhya, Electr. Trans. Num. Anal., 52:370–390, 2020.
- Structured perturbation analysis of sparse matrix pencils with s-specified eigenpairs,, S. S. Ahmad and P. Kanhya, Linear Algebra Appl., 602: 93–119, 2020.

- Manna, S., Datta, B.D. and Ahmad S. (Eds), Mathematical Model with Scientific Computing with Applications, Springer-Nature Book in Mathematics & Statistics, 2020, vol. 308, 10.1007/978-981-15-1338-1

Short term courses organized:

- Matrix Computations and its application in systems, signal and control problems, during February 16-21, 2021 under QIP Organized by Dr. Sk. Safique Ahmad and Dr. Niraj K. Shukla
- Wavelet via Matrices and its Applications in signals and image processing, during November 16-21, 2020 under QIP Organized by Dr. Niraj K. Shukla and Dr. Sk. Safique Ahmad

PhD: Indian Institute of Technology Madras

Previous Employment (Includes post-doctoral experience)

- Post-Doc at the Indian Institute of Technology Madras (2008-2010)
- Academic associations with other institutions (Affiliate/ Adjunct/ Visiting posts)
- Visiting Researcher at the - University of Turku, Finland (October-December 2008 and August-September 2009)

Major awards, achievements:

PhD Degree Awarded:

- Dr. Vibhuti Arora

Thesis Title: Analytic and geometric properties of certain univalent functions

PhD Thesis Submitted:

- Mr. Arstu

  Thesis Title: Metrics associated with the Hurwitz metric
- Mr. Shankey Kumar

  Thesis Title: Properties of certain complex integral operators

Projects won by the faculty/department.

Title: The Hurwitz metric and univalent functions

FundingAgency: DST-SERB, Under the scheme of MATRICS

Courses/conferences/workshops organized.

Convener: Ramanujan Mathematical Society (RMS) pre-conference symposium on Complex Analysis held on December 27, 2020 (virtual mode) hosted by Central University of Rajasthan

Journal articles published.

- Shankey Kumar and S. K. Sahoo, Properties of beta-Cesaro operators on alpha-Bloch space, Rocky Mountain Journal of Mathematics, 50 (2020), No. 5, 1723 - 1743.
- Arstu and S. K. Sahoo, A generalized Hurwitz metric, Bull. Korean Math. Soc. 57 (2020), No. 5, 1127 - 1142.

Dr. Antony Vijesh

Associate Professor
vijesh@iiti.ac.in

PhD. IIT Madras

Previous Employment (Includes post-doctoral experience)

Indian Institute of Space Sciences and Technology Trivandrum

Major awards, achievements:

Awarded PhD degree: Nitin Bisht

Thesis Title``A study of generalized Marcum function of the second kind.''

Projects won by the faculty/department.

- Higher Order Compact Finite Difference Methods and Monotone Iterative Algorithms for Nonlinear Partial Differential Equations. Funding Agency: DST-SERB (MATRICS)

Courses/conferences/workshops organized.

- Organized a Symposium on Iterative methods and differential equations under the auspices of the 28th FIM conference from 23rd November 2020 to 27th November 2020 held at Stella Maris College & SSN college of engineering, Chennai.

Journal articles published.

1. A. Baricz, B. Nitin, S. Singh and V. Antony Vijesh, Bounds for the generalized Marcum function of the second kind, The Ramanujan Journal (Springer), to appear. https://doi.org/10.1007/s11139-021-00440-9
2. A. Baricz, B. Nitin, S. Singh and V. Antony Vijesh, Functional inequalities and bounds for the generalized Marcum function of the second kind, Results in Mathematics(Springer), Vol.76, 35, 2021. https://doi.org/10.1007/s00025-021-01343-3

- A. Baricz, B. Nitin, S. Singh and V. Antony Vijesh, The generalized Marcum function of the second kind: monotonicity patterns and tight bounds, Journal of Computational and Applied Mathematics (Elsevier), Vol. 382, Article ID. 113093, 2021. https://doi.org/10.1016/j.cam.2020.113093

Dr. Anand Parkash

Assistant Professor
anandparkash
@Jiiti.ac.in

PhD. IIT Kanpur

Previous Employment (Includes post-doctoral experience)

- Visiting Faculty, IISER Bhopal
- Lecturer, LNMIIT, Jaipur

Journal articles publshed.

- Parkash, A., Kour, S. On Cohen's theorem for modules. Indian J Pure Appl Math (2021). https://doi.org/10.1007/s13226-021-00101-z

Dr. Niraj Kumar Shukla
Associate Professor
nirajshukla@iiti.ac.in

PhD. - University of Allahabad

Previous Employment (Includes post-doctoral experience)

- Associate Professor at Indian Institute of Technology Indore since December 11, 2018 onwards
- Assistant Professor at Indian Institute of Technology Indore from April 02, 2012 to December 10, 2018.

Courses/conferences/workshops organized.

- QIP Course: Matrix Computations and its application in systems, signal and control problems, Feb 16-21, 2021
- QIP Course: Wavelet via Matrices and its Applications in signals and image processing, Nov 16-21, 2020

Journal articles published.

- Microlocal analysis and characterization of Sobolev wavefront sets using shearlets, Constructive Approximation, 2021. (with Bin Han and Swaraj Paul)

Projects won by the faculty:

- Study of generalized TI system and wave-packet systems over LCA groups, NBHM-DAE: 2018-2022
- A study of Shearlet frames and Shearlet transform, CSIR-New Delhi: 2018-2021
- Study of sampling theorem on local fields and its applications, TEQIP-III under Collaborative research project scheme (Co-PI: Dr. S.C. Maury)

Dr. Ashisha Kumar
Assistant Professor
akumar@iiti.ac.in

PhD. IIT Kanpur (2010)

Previous Employment (Includes post-doctoral experience)

IISC Bangalore

Dr. Vijay Kumar Sohani
Assistant Professor
vsohani@iiti.ac.in

PhD. - HRI Allahabad

Previous Employment (Includes post-doctoral experience)

NBHM Post doc at IISc Bangalore

Projects won by the faculty/department.

- "Some problems on Nonlinear Schrodinger equation (NLS) and Hardy-Sobolev inequality for the twisted Laplacian" by Science and Engineering Research Board (SERB) (Mathematical Research Impact Centric Support (MATRICS))

Journal articles published.

- Dispersion Estimates for the Discrete Hermite Operator (Jointly with Devendra Tiwari), Indian J. Pure Appl. Math.https://doi.org/10.1007/s13226-021-00137-1

Dr. M. Tanveer

Associate Professor
mtanveer@iiti.ac.in

PhD. Computer Science

Previous Employment (Includes post-doctoral experience)

- 2017-2019: Assistant Professor of Mathematics, IIT Indore
- 2012021: Ramanujan Fellow of Mathematics, IIT Indore
- 2015-2016: Postdoctoral Research Fellow at Rolls-Royce@NTU Corporate Lab, NTU, Singapore.
- 2012-2015: Assistant Professor of Computer Science and Engineering, LNMIIT Jaipur

Major awards, achievements:

- Neural Networks, Elsevier (IF: 8.012) - Action Editor (2022-2025)
- Information Fusion, Elsevier (IF: 12.97) - Guest Editor (2021 - Present)
- IEEE Journal of Biomedical Health and Informatics (IF: 5.22) - Guest Editor (2021 - Present)
- International Journal of Machine Learning and Cybernetics (IF: 4.012) – Associate Editor (2021 - Present)
- Applied Soft Computing, Elsevier (IF: 6.72) - Guest Editor (2019 - Present)
- ACM Transactions on Multimedia (IF: 3.72) - (July 2021 - Present)
- IEEE Transactions on Emerging Topics in Computational Intelligence (2020 - Present)
- Annals of Operations Research, Springer (IF: 4.85) - Guest Editor (2020 - Present)
- Frontiers in Applied Mathematics and Statistics - Associate Editor (2020 - Present)
- Applied Intelligence, Springer - Board Member (2016 - Present)
- Associate Editor – IEEE SMC 2021
- Our work is received IITI Best UG Researcher Award 2021
- Ph.D. Awarded to Bharat Richhariya (July 2021)
- M.Sc. Thesis to M. Tabish (July 2021)

Projects won by the faculty/department.

- Classification and prediction of Alzheimer disease using multimodal imaging data

  Sponsoring Agency : Science and Engineering Research Board (SERB), New Delhi, INDIA under Ramanujan Scheme

  Period : 2016-2021

  Role : Principal Investigator

  Sanctioned Amount : INR 89 Lakhs

  Diagnosis of Alzheimer's disease using brain imaging data

  Sponsoring Agency : National Supercomputing Mission under DST and Miety, Govt of India

  Period : 2021-2023

  Role : Principal Investigator

  Sanctioned Amount : INR 19.06 Lakhs

- Development of novel machine learning algorithms for automated detection of seizure using EEG signals

  Sponsoring Agency : Department of Science and Technology (DST) research project under ICPS - Data Science Research Initiative Scheme

  Period : 2019-2022

Role : Principal Investigator

Sanctioned Amount : INR 15 Lakhs

- Optimization models and algorithms for non-parallel support vector machines

  Sponsoring Agency : Science and Engineering Research Board (SERB), New Delhi, INDIA under Ramanujan Scheme

  Period : 2017-2020

  Role : Principal Investigator

  Sanctioned Amount : INR 26 Lakhs

- Detection of human brain disorders using novel machine learning approaches

  Sponsoring Agency : Council of Scientific & Industrial Research (CSIR), New Delhi, INDIA under Extra Mural Research (EMR) Scheme

  Period : 2018-2021

  Role : Principal Investigator

  Sanctioned Amount : INR 31 Lakhs

- Digital forensic knowledge integration and intelligence (DIREKT-Intel)

  Sponsoring Agency : MHRD under SPARC scheme

  Period : 2019-2021

  Role : Co-Principal Investigator

  Sanctioned Amount : INR 65 Lakhs

Dr. Sanjeev Singh

Assistant Professor
snjvsngh@iiti.ac.in

PhD. Indian Institute of Technology Madras

Previous Employment (Includes post-doctoral experience)

- SERB- National Post-Doctoral Fellow, Indian Institute of Technology Indore, June 23, 2017 to September 29, 2017
- Post-Doctoral Fellow, Stat Math Unit, Indian Statistical Institute Chennai Centre, December 08, 2016 to June 22, 2017.
- Pre-Doctoral Fellow, Department of Mathematics, Indian Institute of Technology Madras, June 04, 2016 to December 03, 2016

Major awards, achievements:

- Awarded PhD degree: Nitin Bisht

  Thesis Title: A study of generalized Marcum function of the second kind
- Mathematics Newsletter: Editor (2020-present)

Projects won by the faculty/department.

Project Title: Study of Marcum function of the second kind Project Ref. No.: CRG/2020/002875

Funding Agency: Science & Engineering Research Board (SERB)

Funding Amount: ₹ 2046264

Duration: 2021 – 2024

Journal articles published.

Dr. Santanu Manna

Assistant Professor
smanna@iiti.ac.in

PhD. IIT (ISM) Dhanbad

Previous Employment (Includes post-doctoral experience)

- Royal Society-SERB Newton International Fellow, School of Computing and Mathematics, Keele University, Staffordshire, United Kingdom

Academic associations with other institutions (Affiliate/ Adjunct/ Visiting posts)

IISER Kolkata as Post-Doctoral Fellow

IIT Indore as Visiting Assistant Professor

Major awards, achievements:

- Selected for a special talk in "The Indian Science Congress Association" (108th) to be held January 3-7, 2021, Pune.

Projects won by the faculty/department.

- The dynamic behaviour of material due to torsional wave propagation in porous media at Taif University, Saudi Arabia (TURSP-2020/57)

Courses/conferences/workshops organized.

- Convener of six days TEQIP-III FDP program on Mathematics with Matlab and Mathematica during November 23-28, 2020, Sponsored by NPIU (http://shorturl.at/ajnSZ)
- Convener of six days TEQIP-III FDP program on Mathematical approaches in Mechanics during December 24-31, 2020, Sponsored by NPIU (http://shorturl.at/blHM6)

Journal articles published.

- Manna, S., and Anjali, T. C., Rayleigh type wave dispersion in an incompressible functionally graded orthotropic half-space loaded by a thin fluid-saturated aeolotropic porous layer, Applied Mathematical Modelling (Elsevier), vol. 83, pp. 590-613, July 2020, (SCI, IF: 3.633)

- Sudha, T., Umadevi, C., Dhange, M., Manna, S. and Misra J.C., Effects of Stenosis and Dilatation on Flow of Blood Mixed with Suspended Nanoparticles: A Study Using Homotopy Technique, International Journal of Applied Mechanics and Engineering, 2021, vol. 26(1), pp. 251-265.

Any other major events/development etc.

- We are developing an Applied Mathematics and Geomechanics lab for theoretical & Computational

research in Seismology at IIT Indore. My plan is to give the best facilities to the researchers, those are working in mathematical modelling and simulation in wave propagation fields. We have already deployed a high configuration workstation and three more mini workstations. For more instruments/equipment, I have submitted some research projects to the external funding agencies.

Dr. Vinay Kumar Gupta

Assistant Professor
vkg@iiti.ac.in

PhD. RWTH Aachen University, Germany

Previous Employment (Includes post-doctoral experience)

- Commonwealth Rutherford Fellow (postdoc), Mathematics Institute, University of Warwick, United Kingdom (26 March 2018 - 28 September 2019)
- Assistant Professor, Department of Mathematics, SRM Institute of Science and Technology, Chennai, India (01 September 2016 - 19 March 2018)
- Post-doctoral Fellow, Max Planck Institute for Dynamics and Self-Organization, Go ttingen, Germany (14 January 2016 - 31 August 2016)
- Associate Software Engineer, Accenture Services Pvt. Ltd., Mumbai, India (16 August 2007 - 16 July 2008)

Invited talk:

- Modelling dilute granular gases via Grad's moment method, Workshop on "Modelling and Numerical Simulation of Non-Equilibrium Processes - Part One" during September 27–October 01, 2021 at Institute for Mathematical Sciences, National University of Singapore, Singapore, September 29, 2021.

Journal articles published:

- Rana, A. S., Gupta, V. K.,Sprittles, J. E. and Torrilh on, M. (2021) H-theorem and boundary conditions for the linear R26 equations: application to flow past an evaporating droplet, Journal of Fluid Mechanics, 924, A16 (Pages: A16-1 to A16-42).

Dr. Bibekananda Maji

Assistant Professor
bibekanandamaji
@iiti.ac.in

PhD. Harish-Chandra Research Institute, Allahabad.

Previous Employment (Includes post-doctoral experience)

NPDF at IIT Gandhinagar (Dec 2016-Oct 2019).

Projects won by the faculty/department.

Project Title: An investigation on asymptotic expansion of Lambert series and Ramanujan's formula for odd zeta Values.

Funding Agency: Start-up Research Grant (SRG), SERB.

Duration: 2020-2022.

Journal articles published.

- Pramod Eyyunni, Bibekananda Maji, and Garima Sood, An inequality between finite analogues of rank and crank moments, Int. J. Number Theory (In a special issue- in honor of Prof. Bruce Berndt, 17, 405-423 (2021).

Dr. Charitha Cherugondi

Assistant Professor
charithac@iiti.ac.in

PhD. IIT Kanpur

Previous Employment (Includes post-doctoral experience)

- Assistant Professor, NIT Calicut, Dec 2009 -Sep 2011
- Postdoctoral Researcher, University of Goettingen,, Nov 2011- July 2015
- Visiting Assistant Professor, IIT Indore, July 2016- Dec 2019.

Courses/conferences/workshops organized.

- Short term course "Mathematical Optimization and Applications" under QIP Programme, March 22nd -March 27th, 2021.

Journal articles published.

- Book Chapter D. Russell Luke, C. Charitha, Ron Shefi and Yura Malitsky, Efficient, Quantitative Numerical Methods for Statistical Image Deconvolution and Denoising, Nanoscale Photonic Imaging, Springer, June 2020.

Dr. Mohd. Arshad

Assistant Professor
arshad@iiti.ac.in

PhD. - Indian Institute of Technology, Kanpur

Previous Employment (Includes post-doctoral experience)

- Assistant Professor, Aligarh Muslim University from March 2014 to July 2020.

  Academic associations with other institutions (Affiliate/Adjunct/ Visiting posts)
- Aligarh Muslim University

Major awards, achievements

- Associate Editor, The Aligarh Journal of Statistics

Projects won by the faculty/department.

Project Title: Improved Estimation Based on Records.

Funding Agency: Science and Engineering Research Board, DST, Govt. of India

Project Scheme: Mathematical Research Impact-Centric Support (MATRICS)

Courses/conferences/workshops organized.

- Organizing committee member in 2020 IEEE CIS Summer School on Emerging Research Trends in Computational Intelligence: Theory and Applications, organized at IIT Indore (November 26-30, 2020).

Journal articles published/accepted.

- An invited lecture on "आंकडों का जादू" in the Rashtriya Avishkar Abhiyan activities under Ek Bharat Shreshtha Bharat, IIT Indore (August 18, 2021).

Department of Physics

From the HoD's Desk

Dr. Pankaj R. Sagdeo
Associate Professor
prs@iiti.ac.in

Welcome to the Department of Physics at the Indian Institute of Technology Indore. The Department of Physics is committed to serve the nation through the ongoing innovation in teaching and cutting-edge research as per the new education policy of government of India.

The department is offering M.Sc. and Ph.D. programs in Physics and more than 200 students are already graduated and placed at reputed institutes across the globe. The department is in the process of establishing new academic programs such as 2-year MS program in Physics and 4-year BS program in Physics. The department is working in close collaboration with various industries to develop the technologies to support research and academic sectors of country and aimed to establish the center of scientific instrumentation in near future which will be first of its kind in the India.

The Department is highly collaborative and have close interaction between the different research groups withing the department, within IIT Indore and with various national and international institutions, including DAE, ISRO, DRDO, CERN and many more.

Our faculty conducts advanced research in condensed matter physics, high energy physics, statistical mechanics, complex systems, artificial intelligence etc. Our state-of-the-art facilities provide unique research opportunities for students across all levels of educational programs such as undergraduate, graduate, postgraduate and Ph.D. We consider research experience as a vital part in the education and nurturing the students to take up advance courses and providing practical experience across various field of Physics. The department of Physics has already established more than 10 advance research laboratories working on the various branches of Physics.

I invite you to further explore our department by visiting us in person or virtually through www.physics.iiti.ac.in

Introducing Faculty of Physics

- Dr. Subhendu Rakshit
- Dr. Krushna R. Mavani
- Dr. Sarika Jalan
- Dr. Ankhi Roy
- Dr. Manavendra N. Mahato
- Dr. Raghunath Sahoo
- Dr. Preeti A. Bhobe
- Dr. Rajesh Kumar
- Dr. Sudeshna Chattopadhyay
- Dr. Somaditya Sen
- Dr. Srimanta Pakhira
- Dr. Dipankar Das
- Dr. Debajyoti Sarkar
- Dr. Alestin Mawrie

Dr. Pankaj R. Sagdeo
Associate Professor
prs@iiti.ac.in

Dr. Pankaj R. Sagdeo has completed B.Sc. from Nagpur University, M.Sc. from the department of Physics University of Pune and Ph.D. from UGC-DAE Consortium for scientific research Indore. During his doctoral work Dr. Sagdeo demonstrated the importance of local strain on the for the various electronic and magnetic phases and their coexistence observed in Perovskite Oxides. During post-doctoral work Dr. Sagdeo designed the XMCD beamline for INDUS-2 Synchrotron x-ray source and studied the electronic structure of Ca-doped LaMnO3 using PES beamline (BL-2) on INDUS-1 Synchrotron x-ray source.

Dr. Sagdeo joined Bhabha Atomic Research Centre (BARC) in 2008 as a Scientific Officer-D and developed optics and thin film lab at BARC Visakhapatnam and worked on highly specified DAE projects. In June 2012, Dr. Sagdeo joined the Indian Institute of Technology and working on the material characterization and established Material Research Laboratory at IIT Indore. Currently, Dr. Sagdeo is serving as a Head of the department at IIT Indore and exploring the physics of highly correlated system such as Manganite, High TC superconductors, titanates, solar cells etc. Dr. Sagdeo has strong collaborations with DAE Govt. of India and STFC Rutherford Appleton Laboratory of United Kingdom.

Major awards, achievements, recognitions of the faculty/students/scientists/staff of department.

- Dr. Anil Kumar Ph.D. student working under the guidance of Dr. Sagdeo has been selected as a post-doctoral research staff at Weizmann institute in Israel.
- Dr. Aanchal Sati working under the guidance of Dr. Sagdeo has been selected as a Assistant professor at government post-graduate college Uttarakhand through Uttarakhand public service commission.

  Projects won by the faculty - Title of Project: Exploring new methodology to estimate the values of onsite coulombic repulsive energy and charge transfer energy in transition metal oxides through combined optical and structural studies.
- Sponsoring Agency: DST-SERB
- Period: 3 years
- Status: Ongoing

Courses/conferences/workshops organized:

Dr. Sagdeo is providing online research internship and research training to the under-graduate & postgraduate students of various discipline and helping the students to understand the physics of solar cell.

Journal articles published (2021)

Design and development of UV based sanitization system to disinfect Covid-19 virus: developed for IG office Indore. This work is listed on India Science, Technology and Innovation which is a government of India initiative for details please visit:

https://www.indiascienceandtechnology.gov.in/research/development-uv-based-set-deactivate-covid19-virus

Report on COVID related activities (Research, Academic and / or any other news):

Dr. Sagdeo proposed the importance of light-based technologies in disinfecting the novel COVID-19, present on the surface of phone, plastic surfaces, wallets, watches, cloths. The benefits of ultraviolet light-based strategies to combat the emergence of COVID-19 pandemic. This research work in published as a "Possibility of using ultraviolet radiation for disinfecting the novel COVID-19", Photo-diagnosis Photodynamic Therapy, 34, 102234, (2021). [Impact Factor: 2.894]]

Dr. Subhendu Rakshit
Professor
rakshit@iiti.ac.in

Prof. Subhendu Rakshit obtained his PhD degree from University of Calcutta in 2001 and moved to Harish Chandra Research Institute, Allahabad and then to the Technion, Israel for his postdoctoral research. After a brief stint at the Saha Institute of Nuclear Physics, India in 2005 he continued his postdoctoral studies at TU-Dortmund, Germany till 2008. After that he moved to TIFR, India as a Visiting Scientist before joining IIT Indore in July 2009. Currently he is interested in the physics studies related to the Ice Cube experiment located at the Antarctica measuring high-energy neutrinos coming from extra-galactic sources and explorations of physics beyond the standard model of particle physics.

Broad area of research: Theoretical High Energy Physics

Projects undertaken:

- Exploring New Physics with Dark Matter and Neutrinos (Funded by SERB-DST, GOI under Core Research Grant scheme).

- Additional scalars, neutrinos, and the origin of the Universe: The dark connection (Funded by SERB-DST, GOI under MATRICS scheme).

Selected Publications:

- Astronomy with energy dependent flavour ratios of extragalactic neutrinos, S. Karmakar, S. Pandey and S. Rakshit (IIT Indore) JHEP10, 004 (2021)

Any other major Events/Development etc.:

Undertaken a book writing project ``High Energy Astrophysical Neutrinos'' with Springers Nature Switzerland AG.

Dr. Krushna R. Mavani
Professor
krushna@iiti.ac.in

Prof. Krushna R. Mavani is working as a Professor in the Department of Physics. She joined IIT Indore in 2009 after completing her postdoctoral tenure of about 3.5 years at Osaka University, Japan and Kyoto University, Japan. She was awarded by 'Wakastayoshiki' research fund as Principal Investigator for her project at Kyoto University. Before this, she worked as a Research Fellow at Tata Institute of Fundamental Research (TIFR), Mumbai for about 3 years. In 2003, she completed her PhD. from Saurashtra University, which included major collaboration with Tata Institute of Fundamental Research (TIFR), Mumbai. She also worked as Junior Research Fellow in a collaborative project of Saurashtra University and Inter-University Centre for Acceleration (Former Nuclear Science Centre), New Delhi, on High Temperature Superconductor Thin Films.
Prof. Mavani has also taken several administrative positions.

Presently she is chosen as an expert member of the committee for start-up research grant and national postdoctoral fellowship (NPDF) by SERB, India, in the area of Physical Sciences.

In the past, she has been Head, Department of Physics, IIT Indore, from Nov. 2017 to Oct. 2020; a member of Board of Governors, IIT Indore, from March 2019 to March 2021; The convener, Department Postgraduate Committee of Physics, IIT Indore from April 2014 to November 2017; Hostel warden of Girls' Hostel IIT Indore from July 2009 to August 2010.

Three selected publications from IIT Indore

- 3. UV activated visible-blind Ga:ZnO photodetectors using the GLAD technique: a comparative study in different gas atmospheres and temperatures

  Ankit Soni, Komal Mulchandani, K. R. Mavani.

  J. Mater. Chem. C, 2020,8, 7837-7846 (2020)

Research Interests:

Prof. Mavani works in Experimental Condensed Matter Physics. Her research interests include Terahertz Spectroscopy of functional oxides, thin films, multilayered structures and nanostructures by Pulsed Laser Deposition method. She studies phenomena like first order metal- insulator transition, structure-property correlations, charge dynamics in functional oxides, strongly correlated properties and phase transitions. Currently, her research group includes five PhD. students. Six PhD. and three M.Sc. students have been graduated under her guidance.

Presently the group's research focuses on:

- Development of terahertz spectroscopy.
- Growth of high quality crystalline thin films and study of physical properties
- Growth of nanostructures using PLD

- Study of Structure-Property correlations
- Functional Oxides and Devices.

Awards/Recognitions:

- Editorial Board Member of 'Heliyon'-An international science journal by Elsevier (2016 onwards).
- Young Scientist project received from JSPS, Japan, during the postdoctoral tenure in Kyoto University (details in another column).
- Expert committee member, Physical and Mathematical Sciences, Start-up faculty scheme of SERB, Since July 2021
- Expert committee member, Physical and Mathematical Sciences, National Postdoctoral Fellowship, SERB, Since July 2021
- Editorial board member, Heliyon, An elsevier journal, Since 2016

Event organized:

Summer workshop for aspiring schoolgirls in science for three weeks under Vigyan Jyoti project (DST Initiative) at IIT Indore, June-July 2018.

Invited Talks:

"Temperature Dependent Effects of Mn-doping on Charge-Transport of NdNiO3 Thin Films" in an international conference on "Pulsed Laser Deposition" at Indian Institute of Technology Kharagpur, India, during November 2013.

"Terahertz Technologies for Condensed Matter Physics"

Conference on Condensed Matter Physics and Biological Systems, Banaras Hindu University, Varansi, India, during January 2013.

Research Projects:

- "Exploring Structure-Property Correlations and Low-Energy Charge dynamics of Doped RNiO3 (R = Rare earth ion) Thin Films by Terahertz Time-Domain Spectroscopy" as Principal investigator (no Co-PI),
- Amount: Approx. Rs. 43 Lakhs, sanctioned by DST in April 2018 (Project going on)
- "Knowledge, personality and skill Development activities for aspiring girl students"-Workshop for 30 girls and 03 weeks duration approved by DST in March 2018.
- Amount: Approx. 16.0 lakhs, Sanctioned by DST In March 2018. (Project going on)
- "Influence of Strain and Carrier Injection on Electrical and Magnetic Properties of RNi1-xDxO3 (R=Rare earth metal, D = Dopant) Thin Films and Multilayers" in collaboration with Dr. S. Prabhu, TIFR, Mumbai,
- Amount: Approx. Rs. 35.0 Lakhs, Sanctioned by BRNS in Nov. 2017. (Completed)
- "Investigations on ferroelectric, magnetic and structural correlations in RMnO3 (R = Rare earth ions) multiferroic thin films", as single investigator, supported by Department of Science and Technology India, May 2011 – April 2014. (Completed)
- Amount: Approx. Rs. 21.0 Lakhs.
- Grant-in-Aid for young scientist award for the project: "Time-resolved spectroscopic study of exotic multiferroic oxides" supported by Japanese Society for Promotion of Science, Japan, Oct. 2007- March 2009, during postdoctoral tenure at Kyoto University, Japan. (Completed)
- Amount received: JPY 26,00,000/-.

Dr. Sarika Jalan
Professor
sarika@iiti.ac.in

Prof. Sarika Jalan has done her PhD in non-linear dynamics and Complex Systems from Physical research laboratory and was Senior research fellow at the National University of Singapore, Singapore and guest Scientist and Post doctorate fellow, respectively, at Max Planck Institute for the Physics of Complex Systems, Dresden, and Max-Planck

Institute of Mathematics in the Sciences, Leipzig Germany. She is elected executive council member of international society of complex systems (CSS) 2019-2021. She is Editorial board member of Chaos Soliton & Fractals, as well as Associate Editorial Board member of Chaos: An interdisciplinary journal of nonlinear systems. She is editor-in -chief of the Journal of Computational Science.

Achievements:

- Editor-in-Chief of the Journal of Computational Science (http://www.elsevier.com/locate/jocs)
- Elected Executive Member: Complex Systems Society (https://cssociety.org/home)

  Area of Research: Complex Systems, Computational Biology and Nonlinear Dynamics

Selected Publications:

- Catalytic feed-forward explosive synchronization in multilayer networks, Vasundhara Rathore and Sarika Jalan (Submitted)
- Explosive Synchronization in Inter-pinned Multilayer and Multiplex Networks, Ajaydeep Kacchvah and Sarika Jalan, arXiv:2106.02912 (2021)
- Explosive synchronization in interlayer phase - shifted Kuramoto oscillators on multiplex networks, Anil Kumar and Sarika Jalan*, Chaos (Fast Track) 3, 041103 (2021)
- Machine learning assisted network classification using symbolic time-series, Atish Pandey, Woo Soek Lee, Subha Sanket Dutta, and Sarika Jalan*, Chaos (Fast Track) 31, 031106 (2021)
- Impact of modular mitochondrial epistatic interactions on the evolution of human subpopulations, Pramod Shinde*, Harry J. Whitwell, Rahul Kumar Verma, Mikhail Ivanchenko, Alexey Zaikin, and Sarika Jalan*, Mitochondrion 58, 111 (2021)
- Multifractal Analysis of small-world networks, Ankit Mishra, J. N. Bandyopadhyay and Sarika Jalan*, Chaos, Solitons & Fractals 144, 110745 (2021)
- Machine Learning assisted Chimera and Solitary states in Networks, N Kushwaha, NK Mendola, S Ghosh, AD Kachhvah, S Jalan*, Frontiers in Physics 9, 513969 (2021). doi: 10.3389/fphy.2021.51396
- Analysis of human mitochondrial genome co-occurrence networks of Asian population at varying altitudes, Rahul K Verma, A. Kalyakuina, C. Giuliani, P. Shinde, A. D. Kachhvah, M. Ivanchenko and S. Jalan*, Scientific Reports 11 (1) 16 (2021)
- Interlayer Hebbian Plasticity Induces First-Order Transition in Multiplex Networks, A. D. Kachhvah, X Dai, S. Boccaletti, S. Jalan*, New Journal of Physics (Fast Track) 22, 122001 (2020)
- From Spectra to Localized Networks: A Reverse Engineering Approach, P Pradhan, Sarika Jalan*, IEEE Transactions on Network Science and Engineering, DOI: 10.1109/TNSE.2020.3008999 (2020)
- Investigating mitonuclear genetic interactions through machine learning: a case study on cold adaptation genes in human populations from different European climate regions, A Kalyakulina, V Iannuzzi, M Sazzini, P Garagnani, S Jalan, et.al. ..., Frontiers in Physiology 11, 1434 (2020)
- Inter-layer adaptation induced explosive synchronization in multiplex networks, Anil Kumar, Sarika Jalan* and Ajay Deep Kachhvah, Phys. Rev. Res. 2 (2) 023259 (2020)

- Explosive Synchronization in Multilayer Dynamically Dissimilar Networks, Sarika Jalan*, AD Kachhvah, H Jeong, Journal of Computational Science, 46, 101177 (2020)
- Identification of chimera using machine learning, MA Ganaie, S Ghosh, N Mendola, M Tanveer, S Jalan*, Chaos: An Interdisciplinary Journal of Nonlinear Science 30 (6), 063128 (2020)

Research Highlights:

Dr. Jalan primarily explores into structural and dynamical behaviors of real-world complex systems where the underlying network can be expressed in multiplex framework, these can be broadly stated as:

- Complex Networks.
- Spatio-temporal Chaos.
- Synchronization in Spatially Extended Systems.
- Spectral Graph Theory.
- Computational Biology.

Visiting Positions:

- Visiting scientist at Physics of Complex Systems, IBS, Daejeon South Korea. January 2020-December 2020

Events and Seminars Organized:

- Satellite on "Dynamical systems on networks: Stability and applications" during SIAM DS21, May 23-27, 2021
- Organizing Committee: Workshop on "Learning and Reasoning with Complex Graphs" during 35th AAAI conference on artificial intelligence, 02-09 Feb 2021
- Satellite on "Machine learning perspectives to Complex Networks" during CCS 2020, 9 - 11 December 2020.
- Organizing committee member, International conference of Complex systems (CCS), annual conference organized by Complex systems society, December 7-12, 2020

Invited Talks and Colloquia:

- Invited Speaker, Mini-sympoisum on " Networks of coupled oscillators and maps: chimera states and beyond" during Dynamics Day Europe, Nice 23-27 August 2021.
- Invited Plenary Speaker, Dynamics Days Asia Pacific, Singapore 16-19 November 2020
- Invited Speaker at Satellite conference "Multilayer Networks" during Net Sci 2020, 21-25 September 2020
- Invited Speaker for focus session on "Topological Networks" organized at KPS annual meet, July 13-15, 2020
- 4th International Conference on Computational Intelligence and Networks (CINE 2020), 27- 29 February 2020 held at ISI Kolkata.

Research Projects:

- Spectral Analysis of Multiplex Networks (Funded by BRNS).
- Extreme Value Statistics and evolution of various patterns in real world complex systems (Funded by CSIR, GOI).

Dr. Ankhi Roy
Associate Professor
ankhi@iiti.ac.in

Dr. Ankhi Roy has done her PhD. from IIT Bombay. Her research interest lies in Heavy Flavour Charm and Beauty) Physics, Heavy Flavour being heavy, produced at the very early stages of the heavy on collisions and can be used as a probe to study different phases of the collisions. Her group is involved to study different properties of Quark Gluon Plasma through heavy flavours in proton-proton and Pb-Pb collisions with ALICE Experiment at CERN. Her group is also working in the upcoming Compressed Baryonic Matter (CBM) experiment at GSI, Germany. Presently, in this experiment, her group is contributing in the development of different tools for data analysis.

Recently, her group has joined Athena (A Totally Hermetic Electron-Nucleus Apparatus) at Electron Ion Collider (EIC) experiment at BNL, USA. This experiment is aiming at the precise understanding of the internal structure of proton and neutron. In this experiment, her group is currently engaged to develop the software and in the detector simulation. Her group is also working in the different phenomenological aspects of proton-proton and heavy ion collisions. Recently, her group has started some activity to implement Classical and Quantum Machine Learning in the High Energy Physics data analysis.

Research Highlights:

- Semi-leptonic decays of Heavy Flavour Hadrons using ALICE data.
- Electron-Hadron Correlation of Heavy Flavour hadrons study with ALICE data.
- Self-normalized yield of D0 meson with ALICE
- Development of Cooling system of Muon Chamber (MuCH) Detector of CBM experiment
- Simulation of Electromagnetic and Hadronic Calorimeters of Athena Experiment in EIC at BNL, USA
- Application of Classical and Quantum Machine Learning in the HEP data analysis

Publications:

- S. P. Rode, P. P. Bhaduri, A. Jaiswal and A. Roy, "Hierarchy of kinetic freeze out parameters in low energy heavy-ion collisions", Phys. Rev. C 102, 054912 (2020),
- DOI: 10.1103/PhysRevC. 102.054912 (https://arxiv.org/abs/2004.04703)
- Sumit Kumar Kundu, Yoshini Bailung, Sudhir Pandurang Rode, Partha Pratim Bhaduri, and Ankhi Roy, "Beam energy and nuclear equation of state dependence of anisotropic flow and particle production in low energy heavy-ion collisions", Accepted in Physical Review C (PRC) - Physical Review Journals on 2nd august 2021, (https://arxiv.org/abs/2102.05967)
- Co-author of 34 papers published by the ALICE Collaboration in 2020-2021
- Major achievements, recognitions of the faculty / students / scientists / staff of your department:
- PhD student Sudhir Rode awarded PhD in 2020 and two ALICE papers from his thesis work are in collaboration under IRC reviews. Currently, he has joined as Scientific Researcher in Veksler and Baldin Laboratory of High Energy Physics, Joint Institute for Nuclear Research (JINR), Dubna, Moscow.
- PhD student Yoshini Bailung presented talk titled "Measurements of heavy flavor production as a function of multiplicity with ALICE at the LHC " in International Symposium on Multi-particle Dynamics (ISMD) 2021, 16 July 2021
- PhD student Yoshini Bailung presented poster titled "Measurement of D-meson production as a function charged-particle multiplicity in pp collisions at sqrt{s} = 13 TeV with ALICE at the LHC" in Large Hadron Collider Physics (LHCP) Conference, Paris (Online) 10 June 2021
- PhD student Ravindra Singh presented poster titled "Azimuthal correlations between heavy flavour

decay electrons and charged particles in pp collisions at sqrt(s) = 5.02 TeV" at LHCP conference, Paris (Online) 10 June 2021

- Analysis by Yoshini Bailung titled "Measurement of D-meson production as a function charged-particle multiplicity in pp collisions at sqrt{s} = 13 TeV with ALICE" approved in ALICE Physics Forum in April 26, 2021
- Ravindra Singh got preliminary on the topic of "Azimuthal correlations between heavy flavour decay electrons and charged particles in pp collisions at sqrt(s) = 5.02 TeV "in May 2021.
- Paper proposal by Ravindra Singh was accepted by the ALICE Physics Forum in July 2021 on the topic of "Azimuthal correlations between heavy flavour decay electrons and charged particles in pp and p-Pb collisions at sqrt(s_NN) = 5.02 TeV".
- Dr. Ankhi Roy gave an expert talk for five days Online Short Term Course on 'Software Tools & Techniques for Scientific Publications: ROOT, GNU Plot, GeoGebra' (sponsored by TEQIP-III) at Malaviya National Institute of Technology Jaipur during September 4-September 8, 2020.

Dr. Manavendra N. Mahato
Associate Professor
manav@iiti.ac.in

Dr. Manavendra Mahato has done his PhD. from the University of Michigan, Ann arbor, USA and was Visiting fellow in TIFR, Mumbai. Dr. Manavendra Mahato's recent research includes finding quasinormal modes in the background of nh-stu black holes. Quasinormal modes are perturbations in the background of black holes with certain boundary conditions. They fall into the black hole horizon and decay far away from at spatial infinity. These modes play an important role in the thermalization of any perturbation in the black hole background. His research work also involves looking into many other aspects of black hole physics.

Selected Publications:

"Quasinormal modes for nh-stu black holes" by M. Mahato and Ajay Pratap Singh, EPJC, 2018, 78:822

Research Highlights:

Dr. Mahato works in the broad area of Theoretical high energy physics. He focuses on string theory topics in high energy physics mainly related to gauge gravity correspondence. The correspondence relates certain strongly coupled quantum field theories with certain gravitational solutions. Recently we calculated quasinormal frequencies of certain black holes numerically and studied their properties with temperature and size of the black hole. We are also looking at the dynamical evolution of black holes and its entropy. Studying formation of quantum extremal surfaces and their evolution are part of the investigation towards learning black hole physics.

Dr. Raghunath Sahoo
Associate Professor
raghunath@iiti.ac.in

Dr. Raghunath Sahoo has earned his Ph.D from Institute of Physics, Bhubaneswar and has worked as a Postdoctoral fellow in Subatech, France and INFN fellow in INFN Padova, Italy in the STAR Experiment at the Brookhaven National Laboratory, USA and European Center for Nuclear Research (CERN), Geneva, Switzerland, respectively. Dr. Sahoo was a visiting scientist at the University of Cape Town, South Africa and Institute of Physics, Bhubaneswar. He is a Fellow of Institute of Physics, United Kingdom and currently, he is a CERN scientific associate at CERN, Geneva, Switzerland. He is shouldering the responsibility of Deputy Spokesperson of ALICE-India Collaboration, a high-energy physics collaboration of 14-Indian universities and intuitions comprising of almost 100

scientists and engineers. Dr. Sahoo heads the experimental high-energy physics group at IIT Indore while working in the ALICE experiment at CERN and CBM experiment at GSI, Germany, as the team leader. He is an active researcher at the Ooty Cosmic Ray Physics laboratory, a TIFR-founded laboratory. Dr. Sahoo's research interest focuses on the search for the primordial matter of Quark-Gluon Plasma, a section of high-energy nuclear physics at the energy and luminosity frontiers. He is an expert on applications of statistical mechanics and machine learning in high-energy nuclear physics, event topology studies in particle production including the light and heavy-flavor sectors.

Dr. Sahoo presently leads the institute outreach activities as the Convener of the Institute Outreach Committee, while working as the Associate Dean of International Affairs and Outreach.

Awards and Achievements:

1. Dr. Raghunath Sahoo has been elected as a Fellow of Institute of Physics, United Kingdom (FInstP)-2020.
2. Awarded CERN Scientific Associateship at CERN, Geneva, Switzerland-2021
3. Member of Editorial board, Physics, MDPI, Switzerland (2020-present)
4. Deputy Spokesperson, ALICE-India Collaboration (2021-continuing)
5. Guest Editor, Advances in High Energy Physics, Hindawi (UK)

Projects as the PI:

1. Indian participation in the ALICE experiment at CERN, [Funding Agency: DAE-DST, Govt. of India: Rs. 5.325 Cores (2021-2026)(In-principle approval by DST)]
2. Study of High-multiplicity Proton+Proton Collisions at the LHC Energies using Event Shape Method. [Funding Agency: DAE-BRNS, Govt. of India: Rs. 25.03 Lakhs (2019-22)].
3. A Large Ion Collider Experiment (ALICE) Upgrade, Operation and Utilization [Funding Agency: DAE-DST, Govt. of India, Rs. 3.20 Crores (2014-2020)].

Courses/Conferences/Workshops:

1. Member, National Organizing Committee, DAE Nuclear Physics Symposium-2021, BARC, Mumbai
2. Member, National Advisory Committee, International Conference on Physical Sciences (ICPS-2021), SVNIT, Surat, Feb. 5-6, 2021.
3. Coordinator, TEQIP-III Faculty Development Programme (FDP) Short Term Course on "Research Methodology in Science and Engineering", 26-30 December, 2020. [Gave 8 lectures on 'Quantitative Data Analysis Techniques']
4. Coordinator, AICTE Sponsored Quality Improvement Programme (QIP) Workshop on "Statistical Methods in Physical Sciences and Engineering", 7-12 December, 2020. [Gave 8 lectures on 'Data Reduction and Error Analysis']
5. Convener, Public Lecture Series on "Nobel Prizes-2020".
6. Convener, Public Lecture Series on "Frontiers in Physics-2020-21".
7. Convener, 3rd ALICE-India School on Quark-Gluon Plasma, 5-20 November, 2020.
8. Taught courses on Relativistic Kinematics (MSc/Ph.D.) [3rd ALICE-India School on Quark-Gluon Plasma, 5-20 November, 2020 (5-Lectures)].
9. Quark-Gluon Plasma: The Primordial Matter (MSc/Ph.D.) [e-Short Term Course on Advances in High Energy Physics, NIT Jalandhar, India, 18-22 Sept. 2020 (2-Lectures)].

19. Multiplicity Dependence of J/Ψ Production and QCD Dynamics in p+p Collisions at √s = 13 TeV. Suman Deb, Dhananjaya Thakur, Sudipan De, and Raghunath Sahoo, arXiv:1808.01841, Eur. Phys. J A 56, 134 (2020) [Impact Factor: 3.043].

20. Event multiplicity, transverse momentum and energy dependence of charged particle production, and system thermodynamics in pp collisions at the Large Hadron Collider.

    Rutuparna Rath, Arvind Khuntia, Raghunath Sahoo, and Jean Cleymans, arXiv:1908.04208, Journal of Physics G: Nuclear and Particle Physics 47, 055111 (2020) [Impact Factor: 3.534].

21. J/Ψ Production Dynamics: Event shape, Multiplicity and Rapidity dependence in Proton+Proton Collisions at LHC energies using PYTHIA8.

    Anisa Khatun, Dhananjaya Thakur, Suman Deb, and Raghunath Sahoo, arXiv:1909.03911, Journal of Physics G: Nuclear and Particle Physics 47, 055110 (2020) [Impact Factor: 3.534].

22. Inclusive heavy-flavour production at central and forward rapidity inXe-Xe collisions at √sNN =5.44 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2011.06970, Phys. Lett. B 819 (2021) 136437 [Impact Factor: 6.131].

23. Pion-kaon femtoscopy and the lifetime of the hadronic phase in Pb-Pbcollisions at √sNN = 2.76 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2007.08315, Phys. Lett. B 813 (2021) 136030 [Impact Factor: 6.131].

24. Centrality dependence of J/Ψ and Ψ (2S) production and nuclearmodification in p-Pb collisions at √sNN= 8.16 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2008.04806, Journ. of High Eng. Phys. 02 (2021) 002 [Impact Factor: 5.831].

25. Transverse-momentum and event-shape dependence of D-meson flow harmonicsin Pb-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2005.11131, Phys. Lett. B 813 (2021) 136054 [Impact Factor: 6.131].

26. Elliptic flow of electrons from beauty-hadron decays in Pb-Pb collisionsat √sNN = 5.02 TeV. S.

Acharya,....., R. Sahoo et al., ALICE Collaboration, arXiv:2005.11130, Phys. Rev. Lett. 126 (2021) 162001 [Impact Factor: 9.161].

27. First measurement of quarkonium polarization in nuclear collisions atthe LHC. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2005.11128, Phys. Lett. B 815 (2021) 136146 [Impact Factor: 6.131].
28. Elliptic and triangular flow of (anti)deuterons in Pb-Pb collisions at √sNN = 5.02 TeV. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:2005.14639, Phys. Rev. C 102 (2020) 055203 [Impact Factor: 3.308].
29. Production of ω mesons in pp collisions at √s = 7 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2007.02208, Eur. Phys. J. C 80 (2020) 1130 [Impact Factor: 5.436].
30. Measurement of the low-energy antideuteron inelastic cross section. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:2005.11122, Phys. Rev. Lett. 125 (2020) 162001 [Impact Factor: 9.161].
31. Multiplicity dependence of π, K, and p production in pp collisionsat √s= 13 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2003.02394, Eur. Phys.J. C 80 (2020) 693 [Impact Factor: 5.436].
32. J/Ψ elliptic and triangular flow in Pb-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2005.14518, Journ. of High Eng. Phys. 10 (2020) 141 [Impact Factor: 5.831].
33. Z-boson production in p-Pb collisions at √sNN = 8.16TeV and Pb-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2005.11126, Journ. of High Eng. Phys. 09 (2020) 076 [Impact Factor: 5.831].
34. Multiplicity dependence of J/Ψ production at midrapidity in ppcollisions at √s = 13 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2005.11123, Phys. Lett. B 810 (2020) 135758 [Impact Factor: 6.131].
35. Search for a common baryon source in high-multiplicity pp collisions atthe LHC. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:2004.08018, Phys. Lett. B 811 (2020) 135849 [Impact Factor: 6.131].
36. Measurement of nuclear effects on $\psi\rm{(2S)}$ production in p-Pbcollisions at √sNN = 8.16 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2003.06053, Journ. of High Eng. Phys. 07 (2020) 237 [Impact Factor: 5.831].
37. Probing the effects of strong electromagnetic fields withcharge-dependent directed flow in Pb-Pb collisions at the LHC. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14406, Phys. Rev. Lett. 125 (2020) 022301 [Impact Factor: 9.161].
38. Global baryon number conservation encoded in net-proton fluctuationsmeasured in Pb-Pb collisions at √sNN = 2.76 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14396, Phys. Lett. B 807 (2020) 135564 [Impact Factor: 6.131].
39. (Anti-)Deuteron production in pp collisions at √sNN =13 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2003.03184, Eur. Phys.J. C 80 (2020) 889 [Impact Factor: 5.436].
40. $\rm{K}^{*}(\rm{892})^{0}$ and $\phi(1020)$ production at midrapidity inpp collisions at √s = 8 TeV. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:1910.14410, Phys. Rev. C 102 (2020) 024912 [Impact Factor: 3.308].
41. Non-linear flow modes of identified particles in Pb-Pb collisions at√sNN = 5.02 TeV.S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1912.00740, Journ. of High Eng. Phys. 06 (2020) 147 [Impact Factor: 5.831].

42. Jet-hadron correlations measured relative to the second order eventplane in Pb-Pb collisions at √sNN = 2.76 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14398, Phys. Rev. C 101 (2020) 064901 [Impact Factor: 3.308].
43. Coherent photoproduction of ρ^{0} vector mesons in ultra-peripheralPb-Pb collisions at √sNN = 5.02$ TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2002.10897, Journ. of High Eng. Phys. 06 (2020) 035 [Impact Factor: 5.831].
44. Υ production in p-Pb collisions at √sNN = 8.16 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14405, Phys. Lett. B 806 (2020) 135486 [Impact Factor: 6.131].
45. Measurement of electrons from heavy-flavour hadron decays as a functionof multiplicity in p-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14399, Journ. of High Eng. Phys. 02 (2020) 077 [Impact Factor: 5.831].
46. Evidence of rescattering effect in Pb-Pb collisions at the LHC throughproduction of $\rm{K}^{*}(892)^{0}$ and $\phi(1020)$ mesons. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14419, Phys. Lett. B 802 (2020) 135225 [Impact Factor: 6.131].
47. Longitudinal and azimuthal evolution of two-particle transverse momentumcorrelations in Pb-Pb collisions at √sNN = 2.76 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14393, Phys. Lett. B 804 (2020) 135375 [Impact Factor: 6.131]}.
48. Measurement of the (anti-)^{3}He elliptic flow in Pb-Pb collisions at√sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration, arXiv:1910.09718, Phys. Lett. B 805 (2020) 135414 [Impact Factor: 6.131].
49. Global polarization of Λ and $\overline{\Lambda}$ hyperons inPb-Pb collisions at the LHC. S. Acharya,....., R. Sahoo et al., ALICE Collaboration, arXiv:1909.01281, Phys. Rev. C 101 (2020) 044611 [Impact Factor: 3.308].
50. Measurement of prompt D^0, D$^+$, D^{*+}, and D^+_s production inp$-$Pb collisions at √sNN = 5.02 TeV. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:1906.03425, Journ. of High Eng. Phys. 12 (2019) 092 [Impact Factor: 5.831].
51. Measurement of strange baryon-antibaryon interactions with femtoscopiccorrelations. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1903.06149, Phys. Lett. B 802 (2020) 135223 [Impact Factor: 6.131].
52. Centrality and transverse momentum dependence of inclusive J/Ψ production at midrapidity in Pb-Pb collisions at √sNN = 5.02TeV. S. Acharya,.....,R. Sahoo et al., ALICE Collaboration,arXiv:1910.14404, Phys. Lett. B 805 (2020) 135434 [Impact Factor: 6.131].
53. Production of (anti-)^{3}He and (anti-)^{3}H in p-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14401, Phys. Rev. C 101 (2020) 044906 [Impact Factor: 3.308].
54. Underlying Event properties in pp collisions at √s = 13 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14400, Journ. of High Eng. Phys. 04 (2020) 192 [Impact Factor: 5.831].
55. Production of charged pions, kaons and (anti-)protons in Pb-Pb andinelastic pp collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.07678, Phys. Rev. C 101 (2020) 044907 [Impact Factor: 3.308].
56. Measurement of Λ(1520) production in pp collisions at √s= 7 TeV and p-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1909.00486, Eur. Phys.J. C 80 (2020) 160 [Impact Factor: 5.436].

57. Scattering studies with low-energy kaon-proton femtoscopy inproton-proton collisions at the LHC. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1905.13470, Phys. Rev. Lett. 124 (2020) 092301 [Impact Factor: 9.161].
58. Exploration of jet substructure using iterative declustering in pp andPb-Pb collisions at LHC energies. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1905.02512, Phys. Lett. B 802 (2020) 135227 [Impact Factor: 6.131].
59. Higher harmonic non-linear flow modes of charged hadrons in Pb-Pb collisionsat √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:2002.00633, Journ. of High Eng. Phys. 05 (2020) 085 [Impact Factor: 5.831].
60. Investigation of the p-Σ^{0} interaction via femtoscopy in ppcollisions.S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1910.14407, Phys. Lett. B 805 (2020) 135419 [Impact Factor: 6.131].
61. Measurement of electrons from semileptonic heavy-flavour hadron decaysat midrapidity in pp and Pb-Pb collisions at √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv: 1910.09110, Phys. Lett. B 804 (2020) 135377 [Impact Factor: 6.131].
62. Multiplicity dependence of (multi-)strange hadron production inproton-proton collisions at √s = 13 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1908.01861, Eur. Phys.J. C 80 (2020) 167 [Impact Factor: 5.436].
63. Studies of J/Ψ production at forward rapidity in Pb-Pb collisionsat √sNN = 5.02 TeV. S. Acharya,....., R. Sahoo et al., ALICE Collaboration,arXiv:1909.03158, Journ. of High Eng. Phys. 2002 (2020) 041 [Impact Factor: 5.831].

Any other major Events/Development:

1. Deputy Spokesperson, ALICE-India Experimental Collaboration [@CERN, Geneva, Switzerland] (2021-continuing).
2. Associate Dean, International Affairs and Outreach, IIT Indore (27 Nov. 2020-continuing).
3. Member, Expert Committee for Kishore VaigyanikProtsahan Yojana (KVPY), IISER Bhopal- 2020.

COVID Related Activities:

1. A new logistic growth model applied to COVID-19 fatality data.

   S. Triambak, D.P. Mahapatra, N. Mallick and Raghunath Sahoo,(Epidemics: Under Review).
2. Given several national and international webinars during Covid-19 time for popularization of Science, as outlined below.

Outreach/Public Lectures:

1. The Exciting Journey from Atoms to Quarks, Ek Bharat Shrestha Bharat, IIT Indore and Ministry of Education, M.P. Govt. (Public Lecture in Hindi), 22 September 2021
2. From WWW to Hadron Therapy: Applications of High-energy Nuclear Physics, Workshop on Advances in Applied Physics (AAP-2021), SVNIT, Surat, Gujurat, 18 January 2021
3. Accelerating Science: Atto-scale Physics, Evening Lecture, VIT, Vellore, Tamil Nadu, 15 December 2020
4. Quark-Gluon Plasma: The Primordial Matter, e-Short Term Course on Advances in High Energy Physics, NIT Jalandhar, India, 21 Sept. 2020 (2-Lectures)

5. The Societal Benefits of Big Bang Collisions at the Large Hadron Collider, CERN International Webinar, Pabna University of Science and Technology, Pabna, Bangladesh, (9th August 2020)
6. The Big Bang Experiment and Technological Spin-offs, Webinar, MIT, Muzaffarpur, India (31st July 2020)
7. Collider Experiments And Societal Benefits, Webinar, Central University of South Bihar, Gaya, India (25th July 2020)
8. Recreating the Big Bang in Laboratory: Science and Technology, DAE, DST and Ministry of Culture Organized Vigyan Samagam (MegaScience Exhibition), National Science Center, New Delhi, 25 Jan. 2020 (Public Lecture).

Dr. Preeti A. Bhobe
Associate Professor
pbhobe@iiti.ac.in

Dr. Preeti A. Bhobe is an experimental condensed matter physicist. She has done her PhD. from Goa University and was JSPS postdoctoral fellow at Institute for Solid state physics (ISSP), University of Tokyo and RIKEN, Spring8 synchrotron source, Japan and postdoctoral fellow at Tata Institute of Fundamental Research, Mumbai, before joining IIT Indore in December 2011. She was a visiting scholar at the Texas A&M University, College Station, Texas, USA in 2018-19.

Specialization: X-ray Absorption Fine Structure (XAFS), Photoemission Spectroscopy (PES), and Magnetism. Employs advanced experimental probes like XAFS, XMCD, and PES to investigate functional materials like Half-metals, Spin-glasses, transparent conducting oxides, and Thermoelectric materials.

Research Highlights:

Over the past one year, Dr. Bhobe's research group carried out a thorough study of the magnetic and structural properties of Heulser alloys from the point of view of is application into spintronic technology, and demonstrated the presence of half-metallic ground state in two such composition prepared in her laboratory. Thermoelectric application of composite Chalcogenides and engineering of such materials with an aim to reduce its thermal conductivity, was also explored. In another study, the defects formed in Chalcogenides was investigated and a fundamental understanding of role played by them in controlling the figure – of – merit of the thermoelectrics was understood. This work led to submission of three PhD theses and one Master thesis at IIT Indore.

Selected Publications for 2020-21:

Research Projects in 2020-21:

- Half- Metallic Heusler Alloys for Spintronics Applications (P.I. Funded by SERB, GOI).
- DST-DAAD IIT Indore – LUH, Germany joint project (Co-P.I. Funded by DST and DAAD)

Invited Talks/Webinars:

- Faculty Development Program on Current Trends on Physical Sciences on July 24, 2020 organized by IAPT Lucknow chapter and Christ Church College, Kanpur.
- Science Lecture Series on August 29, 2020 organized by Dept. of Physics, South Bihar Central University, Gaya.
- Spintronics Workshop on September 9, 2020 organized by Mepco Schlenk Engineering College, Sivakasi.
- Physics Fest on Friday June 4, 2021 organized by SICA College, Indore.

Any other major Events/Development:

- Appointed as the Member of Board of Studies in Physics a Goa University, Goa.

Dr. Rajesh Kumar
Associate Professor
rajeshkumar@iiti.ac.in

Dr. Rajesh Kumar is an experimental solid-state physicist. He completed his PhD. from IIT Delhi and was a post-doctoral Scientist at NRC-NINT, University of Alberta, Canada before joining IIT Indore. His area of interest includes Nanoscience & Nanotechnology, Raman Spectroscopy, Electrochromic Devices, Silicon nanostructures, synthesis and applications of functional nanomaterials, organic and inorganic semiconductors, Sensors.

Selected Publications:

Research Highlights:

His approach towards research is two fold where he not only investigates the basic physical phenomena taking place at microscopic level but also designs materials for real applications like field emission and electrochromic displays, sensors and energy storage. Inspired by nature, recently his group has synthesized different organic, inorganic, hybrid as well as Herbal nanomaterials for such applications. His group has discovered a new method for quantification of short-range order in amorphous materials by simply utilizing Raman spectroscopy.

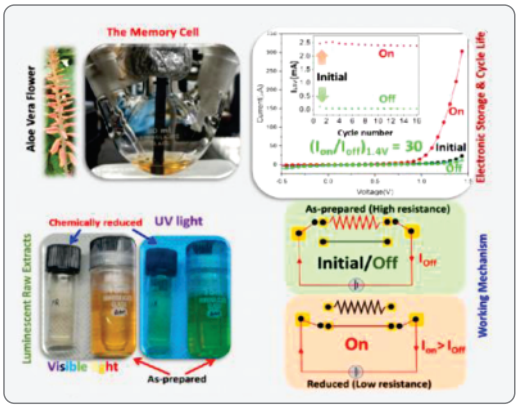

His recent interest includes addressing science and technological problems through Indian Knowledge System. As a pert of this he devotes research towards identifying natural components in herbs for fabricating electronic and optical devices.

Events and Seminars Organized:

- Demonstration in outreach activity on Science Day-2021.
- Popular Science lecture-RashtriyaAavishkar Abhiyan-2021

Research Projects/Achievements:

- Subject Editor-IET Nanodielectrics (Wiley)-(2020-2022)
- Fabrication and Investigation of Electrochromic Electrodes for Improving Device Performance (Funded ~ 30Lakhs INR by SERB, GOI). (2020-2022)

Covid19 Related activity:

Published review article, on the origin of COVID Spread, in collaboration with Dr H.C. Jha (BSBE-IIT Indore) and got pan-India media coverage.

Research highlighting "Herbal Electronics"

- Figure: Aloe Vera Flower and its raw extract under natural and UV lights along with the "memory cell". Right panel shows the performance of the cell along with the operation mechanism.
- Other details: Due to its importance the above work got wide pan-India electronic, digital and print media coverage.

Dr. Sudeshna Chattopadhyay
Associate Professor
sudeshna@iiti.ac.in

Dr. Sudeshna Chattopadhyay (Bandyopadhyay) is an Associate Professor in Department of Physics at IIT Indore. Dr. Chattopadhyay has done her PhD. from the Saha Institute of Nuclear Physics, Calcutta, India, and postdoctoral research at the Department of Physics, Northwestern University, USA (2008-2010), and subsequently joined as a Research Associate in the Department of Materials Science and Engineering, Northwestern University, USA, under Energy Frontier Research Center (EFRC) project in collaboration with Argonne National Lab, (2010-2012), before starting to work as an Assistant Professor at IIT Indore from June 2012. She holds an affiliated Assistant Professor of Physics in Department of Physics, New Mexico State University (NMSU), USA (since Sept 1, 2015). She is a recipient of Deutscher Akademischer Austausch Dienst (DAAD) Faculty Award (2013).

Selected Publications (2020-2021):

- "Recent Progress in Al, K and Zn-ion Batteries: Experimental and Theoretical Viewpoints"
- Dipayan Pal, Sudip Chakraborty,* and Sudeshna Chattopadhyay*, Energy Technology, 2100382 (pg.1-22) (2021) .

- Book chapter: "Surface and Interface Effects: Properties of Nanostructured ZnO" by Dipayan Pal and Sudeshna Chattopadhyay* (of book "Nanostructured Zinc Oxide: Synthesis, Properties and Applications"), Elsevier, 2021 (accepted), Paperback ISBN: 9780128189009, Published date: August 13, 2021 (or expected release date: August 13, 2021).

- Aakash Mathur, Dipayan Pal, Ajaib Singh, Rinki Singh,Parasmani Rajput, R. J. Chaudhary, and Sudeshna Chattopadhyay*, Journal of Non-Crystalline Solids, 536, 120009 (2020).

Research Highlights:

- Her research is focused on Experimental Condensed Matter Physics:
- Study of Surface and Interfaces – nanomaterials, thin-films, structure property relationship - optical properties, photocatalytic activity, application in solar cell.
- Electrical Energy Storage- building better batteries and supercapacitors – Li and Al ion batteries.
- Soft matter physics.
- Biomedical Applications of Nanotechnology: Bio-instrumentation, Wastewater treatment and Environmental Remediation.

Events and Seminars Organized:

- Invited Talk in the Science and Technology for the New Age: Acquisition, Analyses and Adaptation, March 4-5, 2021. The Agri-Tech conference is jointly being organized by IIT Delhi with University of Alberta and is funded by Ministry of Education, Govt of India and the Shastri Indo-Canadian Institute (SICI) as part of its Indo-Canada bilateral programs; Title: "Effect of Interface Engineering - Rechargeable Thin Film Batteries".
- Lectures in AICTE sponsored Faculty Quality Improvement Program (QIP), a short-term course on Computationally Designing of Materials for Materials Genome, March 1-6, 2021, IIT Indore, India.
- Lectures in AICTE sponsored Faculty Quality Improvement Program (QIP), a short-term course on Advanced Technology for Materials Engineering", Jan 19- 24, 2021, IIT Indore, India.
- Coordinator and Lecturer of TEQIP-III Sponsored Faculty Development Program (FDP), A Short-Term Course on Advanced Energy Science and Technology, Dec 7-9, 2020, IIT Indore, India.
- Invited Talk in the 4th International Conference on Soft Materials, ICSM-2020, Dec13-18, 2020, Title: "Soft-matter Nanocomposites and its Applications: Effect of interface to tune structure-properties", India.
- Lectures in TEQIP-III Sponsored Faculty Development Program (FDP), A Short-Term Course on course on Advanced Technology for Materials Physics and Engineering, Nov 16- 20, 2020, IIT Indore, India.

- Invited Talk inthe 2nd Indian Materials Conclave and 31st Annual General Meeting of MRSI", Feb 11-14, 2020, Kolkata, India. Title: "Effect of Surface and Interfaces: Tailoring Structural and Electronic Properties of Semiconductors and its Applications".

Research Projects:

- "Solid-state thin-film rechargeable batteries with solid electrolyte to achieve a wider electrochemical/thermal stability, better safety and long cycle lives with good capacity retention". Funding agency: Science and Engineering Research Board (SERB). Dec 2020-Dec 2023.
- IIT Indore and LU Hannover Partnership in Physics, Chemistry, Bio Science & Computational Science. Funding agency: German Academic Exchange Service (DAAD) funded project LUH-IIT Indore Partnership (2019-2023) under the "A New Passage to India program". The proposal from Leibniz University Hannover (LUH) with IIT Indore. Dr. Sudeshna Chattopadhyay is one of the Investigators from Indian side among 6 Indian and 10 German academicians.
- "Structural orientation effects of new low dimensional hybrid perovskites on their physical properties", as Co-PI in collaboration with TIFR, India. Funding agency: Science and Engineering Research Board (SERB). Jan 2020- Dec 2022.
- DST-FIST grant proposal for Raman Spectrophotometer from Department of Physics, IIT Indore, as a contributor from the Department. Funding agency: DST-FIST. SR/FST/PSI-225/2016.

Dr. Somaditya Sen
Associate Professor
sens@iiti.ac.in

Dr. Somaditya Sen is an experimental condensed matter physicist. His interest is in structure correlated physical properties analysis on modified simple and complex oxide materials and thereby finding applicability of these materials in the field of semiconducting and ferroelectric memory devices, dielectric resonator antennas and bio-interface. His research interest includes Ferroelectricity, Magnetism, Semiconductors and Nanomaterials, Thin Film devices and Dielectric Resonator Antennas. He received his PhD. from Indian Association for the Cultivation of Sciences, Jadavpur University and spent a few years as postdoc in Taiwan, Japan and USA. Prior to joining IIT Indore in 2013, he served as Research Associate and Scientist in the Dept. of Physics, UWM. At IITI, he has taken leading roles in the initial years of establishment of the institute serving as member of the Board of Governors and executing Dean Planning. He has served as an Adjunct Associate Professor at the Ming Chi University of Technology, Taiwan for two years and is presently a Consultant Associate Professor at the King Fahd University of Petroleum and Minerals, Saudi Arabia.

Selected Publications:

- Pbnm to R3-c phase transformation in (1-x) LaFeO3. xLaMnO3 solid solution due to modifications in structure, octahedral tilt and valence states of Fe-Mn; EG Rini, M Gupta, R Mittal, A Mekki, MHA Saeed, S Sen, arXiv preprint arXiv:2012.13824 2020
- Fe-doped Na0. 47Bi0. 47Ba0. 06Ti0. 98-xV0. 02FexO3: Structure correlated vibrational, optical and electrical properties; KS Samantaray, R Amin, EG Rini, S Sen, Journal of Alloys and Compounds 848, 156503 2020

- Effect of cobalt-doping on dielectric, magnetic and optical properties of BiFeO3 nanocrystals synthesized by sol–gel technique; AK Sinha, B Bhushan, N Gupta, S Sen, CL Prajapat, J Nuwad, P Bhatt, ..., Solid State Sciences 102, 106168 8 2020
- Ensuring origin of intrinsic magnetism from structural studies in Cu0. 945Fe0. 055-xMnxO; M Nasir, S Kumar, N Patra, MA Ahmed, DK Shukla, EG Rini, ..., Ceramics International 46 (4), 4191-4196 2 2020

Research Highlights:

- Modified Ferroelectrics with Multiferroic properties
- Graduated 12 PhD students
- Supervised 9 Masters project thesis
- Supervised 6 BTech project thesis
- Sol gel synthesis, Hydrothermal synthesis, Solid-State reaction, Thin film deposition by CVD, RF-sputtering, Spin coating process.
- Detailed structural analysis, including lattice parameter, and bond length analysis
- Vibrational properties assessment
- Electronic properties studies: bandgap and defect studies, carrier concentration and type determination, mobility factor, light and gas sensing properties,
- Electrical Conductivity and Dielectric properties measurement
- Dielectric resonator properties for antenna research
- Pressure and Magnetic field induced electronic properties, electrochemical properties, etc.
- Graduated students have secured positions in internationally recognized universities like Cornell University (USA), UCLA (USA), NTU (Taiwan), Technion etc.

Events and Seminars Organized:

- Delivered Invited Public Lecture on

1. "Importance of Higher Education in Science and Technology in India"
2. "Materials Characterization"

Research Projects/Achievements:

- Project Title: "Large scale production of nanomaterials and thin films for semiconducting devices and
- astronomical research" DST AMT Project Proposal ~50 Lakhs

Dr Srimanta Pakhira
Assistant Professor
spakhira@iiti.ac.in

Dr. Srimanta Pakhira is working as an Assistant Professor in The Department of Physics Since August 2019 and a Ramanujan Faculty Fellow in the Department of Metallurgy Engineering and Materials Science (MEMS) since January 2018. Dr Pakhira has done his PhD. from the Indian Association for the Cultivation of Science (IACS) and Jadavpur University, Calcutta, West Bengal, India and he was Postdoctoral fellow in University of California at Berkeley and Lawrence Berkeley National Laboratory (LBNL), Berkeley, CA, USA; Nagoya University, Nagoya, Aichi, Japan; Florida State University, National High Magnetic Field Laboratory, Florida State University (FSU), Tallahassee, Florida, USA. He was a highly prestigious Japan Society for the Promotion of Science (JSPS) International Post-

doctoral Fellow for outstanding Foreign Researcher in Japan, and he was awarded highly prestigious Alexander von Humboldt Fellowship (AvH) International Post-doctoral Fellowship for Foreign Researcher in Germany. Dr Pakhira was conferred highly prestigious Ramanujan Fellow and Early Career Research Award (ECRA) from the Science and Engineering Research Board (SERB), Department of Science and Technology (DST), Govt. of India.

Research Highlights:

Dr. Pakhira's research group is active in Condensed Matter Theory, Electronic Structure Theory, Quantum Theory, Computational Materials Science and Engineering, Materials Physics and Materials Engineering, Semi-conductor Physics, Magnetism, Physics of Novel Solar Cells, Renewable Energy Technology, Perovskite, 2D TMDs, H2 evolution, Electrocatalysis, O2 Reduction, Porous Materials and Their Applications, CNT, Alkali-ion Battery, H2-Storage, CO2 capture, Computational Physics and Condensed Matter Nanoscience. He has also contributed to the understanding of Density Functional Theory (DFT) and applications in various areas of science.

Active Research Projects (2020-2021):

2.	P1	Development of New Two Dimensional Layer Structure Materials and Technique for Water Splitting: Applications in Hydrogen and Oxygen Evolution Reactions	DST-SERB, Govt. of India, 2019-2022	53.14 Lakhs

Theoretical Condensed Matter Physics and Advanced Computational Materials Science Laboratory

- Dr Pakhira organised a Five Day Online Faculty Development Program through the TQIOP-III sponsored Short-Term Course on "Advanced Technology for Materials Physics and Engineering" during 16th to 20th November 2021.
- Dr Pakhira organised a Six Day Online Faculty Development Program through the AICTE sponsored Quality Improvement Program (QIP) Short-Term Course on "Advanced Technology for Materials Engineering" during 19th to 24th January 2021.

Achievements/Accomplishments (affiliated to IIT Indore): (April 2020-March 2021 at IIT Indore)

- Total No. of Short-term courses: 02
- Total No. of Active Projects: 02
- Total No. of Journal articles: 06
- Total No. of Books (edited): 02 (Book Chapter)

Invited Talks and Organized Short-Term Courses:

- Lectures in AICTE sponsored Faculty Quality Improvement Program (QIP), a short-term course on Advanced Technology for Materials Engineering", Jan 19- 24, 2021, IIT Indore, India.
- Coordinator and Lecturer of TEQIP-III Sponsored Faculty Development Program (FDP), A Short-Term Course on Advanced Energy Science and Technology, Dec 7-9, 2020, IIT Indore, India.
- Invited Talk in the 4th International Conference on Soft Materials, ICSM-2020, Dec13-18, 2020, Title: "Soft-matter Nanocomposites and its Applications: Effect of interface to tune structure-properties", India.
- Lectures in TEQIP-III Sponsored Faculty Development Program (FDP), A Short-Term Course on course on Advanced Technology for Materials Physics and Engineering, Nov 16- 20, 2020, IIT Indore,

Dr. Dipankar Das
Assistant Professor
d.das@iiti.ac.in

Dr. Dipankar Das is a theoretical physicist working on Particle Physics. He completed his PhD. from Saha Institute of Nuclear Physics, India and after that he worked as a postdoctoral researcher at the University of Valencia, Spain. Then he joined University of Calcutta, India as an Assistant Professor. From there, he moved to Lund University, Sweden to work as a Researcher. Dr. Das joined IIT-Indore on 31stOctober, 2019.

Selected Publications (Year 2020)

- Md Raju, J. P. Saha, D. Das, A. Kundu "Double Higgs boson production as an exclusive probe for a sequential fourth generation with wrong-sign Yukawa couplings", Phys. Rev. D 101 (2020) 5, 055036.
- G. C. Branco, D. Das, M. Levy, P. B. Pal, "Crossed two Higgs-doublet models: reduction of Yukawa parameters in the low-scale limit of left-right symmetry and other avatars", Phys. Rev. D102 (2020) 3, 035007.

Research Highlights:

His current interests involve models of radiative neutrino mass and their impacts on lepton flavor violation. He is particularly interested in extending the simple Zee model with some additional flavor symmetries that can produce predictive textures for the neutrino Majorana mass matrix and thus can provide correlated LFV signals. Apart from this, he also works on the extensions of the Scotogenic model that can provide a coherent connection between the neutrino mass and Dark Matter.

Funded Project(s):

- "Exploring flavor models in the light of the Higgs precision data" funded by DST SERB (Nov, 2020 to Oct, 2022).

Short term course(s):

- QIP course on "Statistical Methods in Physical Science and Engineering" (Dec 7-12, 2020). (Co-instructor).

Other activities:

- Invited public lecture on the "Physics of the higgs Boson" organized by Vivekananda College, Kolkata (3rdSep, 2020)
- Convener of departmental level committee to provide specific and detailed guidelines for restarting the activities after the lockdown.
- Member of Departmental safety & security committee.

Dr. Debajyoti Sarkar
Assistant Professor
dsarkar@iiti.ac.in

Dr. Debajyoti Sarkar obtained his PhD. from the City University of New York (CUNY), USA and completed his first postdoc jointly from the Ludwig Maximilians University (LMU) and from the Max Planck Institute (MPI) in Munich, Germany. He did his second postdoc from the University of Bern in Switzerland. Before joining IIT Indore he was a visiting scholar at the Institute for Advanced Study (IAS), Tsinghua University in Beijing, China.

Research highlights:

Dr. Debajyoti Sarkar's current research broadly includes string theory and its applications in gravity (general relativity) and quantum fields (quantum field theory). In particular, he is interested in the framework of Anti de Sitter (AdS)/

Conformal Field Theory (CFT) correspondence within string theory and their inter-connections with black hole physics, condensed matter and quantum information theory. His research group at IIT Indore currently consists of two PhD students and two M.Sc. project students.

Latest publications from last year:

1. Daniel Kabat, Gilad Lifschytz, Phuc Nguyen and Debajyoti Sarkar. ``Light-ray moments as endpoint contributions to modular Hamiltonians,'' JHEP 09 074 (2021).
2. Debajyoti Sarkar and Manus Visser ``The first law of differential entropy and holographic complexity'' JHEP 11 004 (2020).
3. Daniel Kabat, Gilad Lifschytz, Phuc Nguyen and Debajyoti Sarkar. ``Endpoint contributions to excited-state modular Hamiltonians,'' JHEP 12 128 (2020).

Covid-19 related activities:

- Member of departmental level committee to provide specific and detailed guidelines for restarting the activities after the lockdown. Committee formed on June 2nd, 2020.

Invited talks:

1. Talk at Indian Association for Cultivation of Sciences in Kolkata, India. September 2020.
2. Talk at Institute for Advanced Studies (IAS) at Tsinghua University in Beijing, China. September 2020

Departmental Duties:

1. Convener of departmental counselling committee.

Dr. Alestin Mawrie
Assistant Professor
amawrie@iiti.ac.in

Dr. Alestin Mawrieis a theoretical condensed matter physicist. He completed his PhD. from IIT Kanpur in 2018, February and was a Post Doctoral Fellow at IIT Bombay till 2019. Before joining IIT Indore on August, 2021, he worked as an Assistant Professor at Mizoram University. He is also a DST INSPIRE faculty (2019-24) batch.

Specialization: Theoretical Condensed Matter Physics.

Selected Publications:

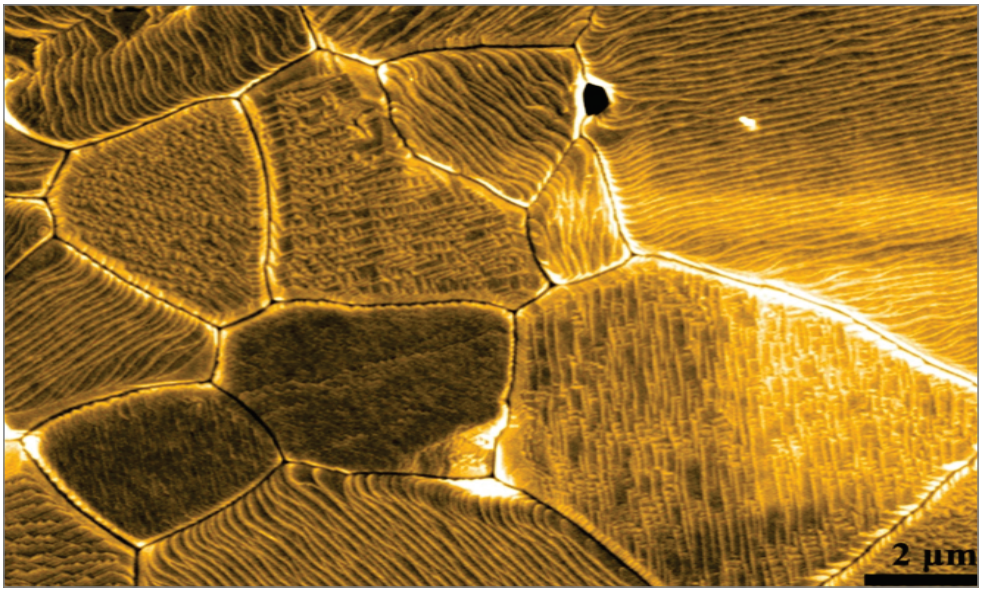

1. Effect of electron-hole assymetry on optical conductivity in 8-Pmmn borophene, S. Verma, A. Mawrie, T. K. Ghosh, Physical Review B, 96, 155418 (2017)
2. Direction-dependent giant optical conductivity in two-dimensional semi-Dirac materials, A. Mawrie, B. Muralidharan, Physical Review B, 99, 075415 (2019)
3. Quantum thermoelectrics based on two-dimensional semi-Dirac materials, A. Mawrie, B. Muralidharan, Physical Review B, 100, 081403 ® (2019)

Research Highlights:

Our group focuses on the phenomena of quantum transport in low-dimensional meso/nano-scale systems. These low-dimensional systems involve graphene and its derivatives, silicene, mesoscopic hybrid junctions, and Weyl semi-metal, to name a few. We are also giving our attention to systems that exhibit band inversion to form topological band structures.

Ongoing Research Projects: Quantum Transport in Low Dimensional Systems, (P. I. Funded by DST, India)

Department of Metallurgy Engineering & Materials Science

From the HoD's Desk

Dr. Vinod Kumar
Assistant Professor
vkt@iiti.ac.in

The focus of the Department of Metallurgy Engineering and Materials Science (MEMS) is to carry out interdisciplinary research in materials science and metallurgy fields to find solutions for intricate real-world problems which benefit society. Our goal is to understand the processing and structure of several classes of materials; and then correlate these to the properties, thus enhancing their performance. The department has 15 core faculty members and 1 Ramanujan fellow. MEMS faculty members are working in various research areas, ranging from conventional metallurgy to modern materials science. The major research areas are spread across structural materials (Steels, Titanium alloys, High entropy alloys, Magnesium Alloys, and Composite materials), energy conversion and storage materials (Solar Cells, Supercapacitors, Li-ion batteries, etc.), functional materials (Piezoelectrics, Gels, and Shape memory alloys), and computational materials science. MEMS department offers several courses at undergraduate and graduate levels. Besides the Ph.D. program, there are currently 2 M.Tech programs (Materials Science & Engineering and Metallurgy Engineering) and an undergraduate program.

MEMS Faculty members

Research Thrust/Facility

- Physical & Mechanical Metallurgy
- Welding & Failure Analysis
- Non-destructive Evaluation of Materials
- Electronic & Energy Materials
- Nano Materials, Soft Materials
- Corrosion & Surface Engineering

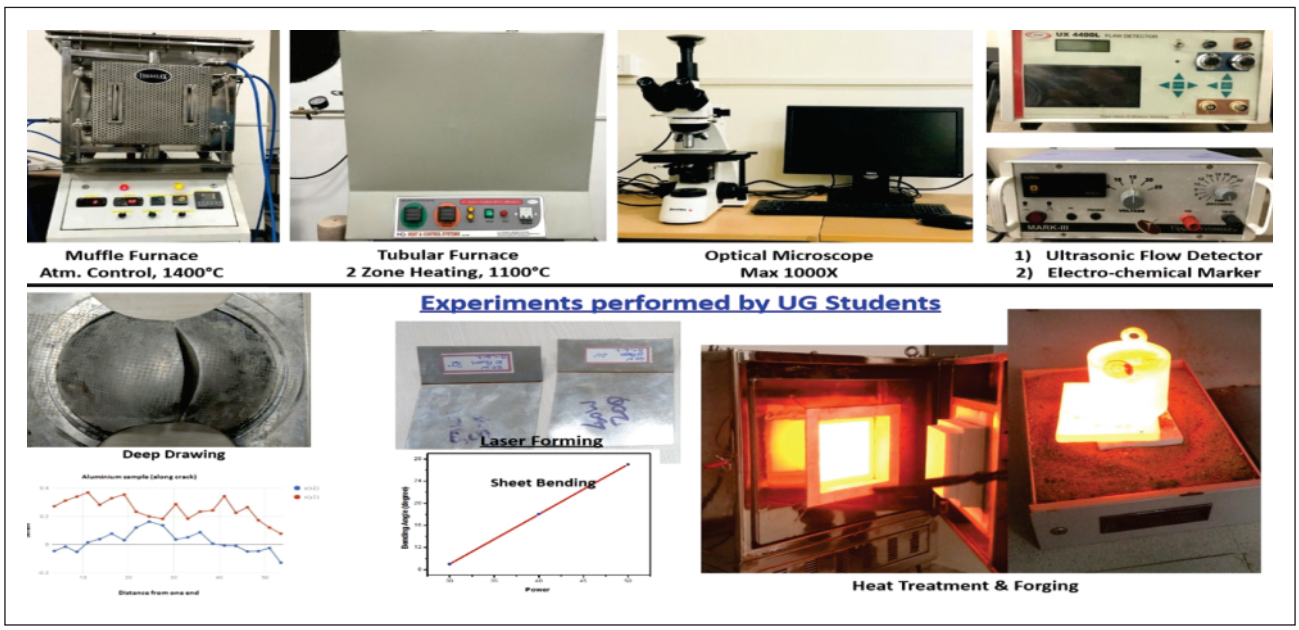

Application Areas

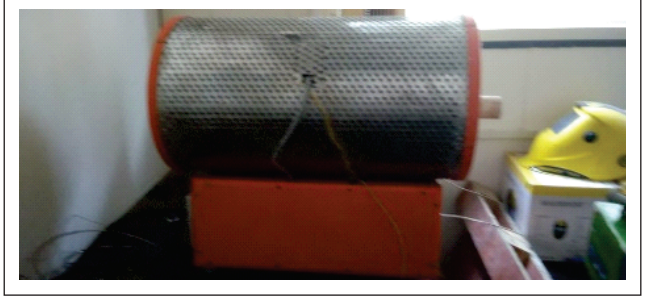

- Alloy Development for Light weight Automotive applications
- Alloy designing for high-temperature applications
- Surface Engineering of Materials
- Synthesis & Design of Novel Materials for Energy Applications
- Characterizing the Physical & Mechanical Properties of Materials

Facilities in MEMS:

The discipline is well-equipped with state-of-the-art facilities for synthesis/fabrication and characterization of a wide range of materials for various physiochemical and mechanical properties.

Experiments for UG students

Tube Furnace

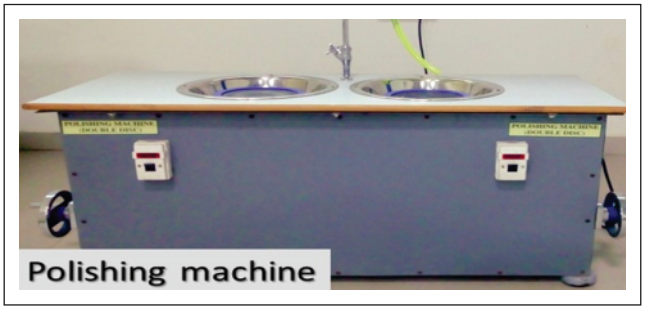

Polishing Machine

Specimen preparation equipment

High speed saw

Polishing machine

Mechanical testing equipment

Automatic Ball Indenter

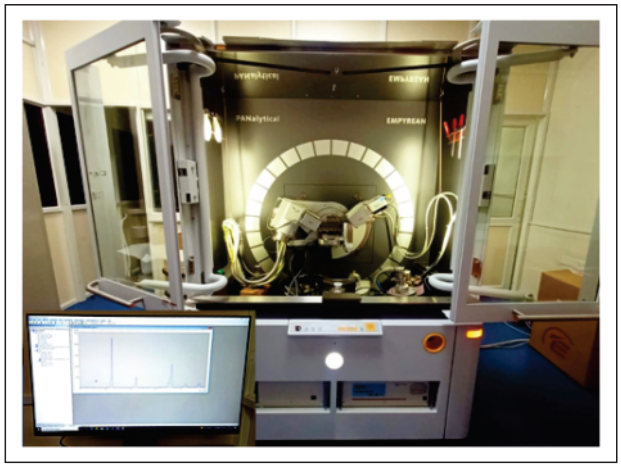

Tensile testing m/c

Impact testing m/c

Metallurgy Engineering & Materials Science (MEMS)

FESEM-EDS-EBSD

X-ray diffractometer

MEMS began as the Centre for Materials Science Engineering comprising of faculty from the Schools of Basic Sciences and Engineering and transitioned into a full-fledged discipline in 2016. Amongst its notable practices include TEQIP sponsored short-term courses, international workshops, and consultancy projects to provide advanced knowledge in various areas of MEMS to students and faculty from other institutions.

Achievements/ Accomplishments:

- Short term courses: 15
- Active Projects: 24
- Journal articles: 90
- Workshops: 2
- Awards: 8
- Book (edited): 3

Awards and Recognitions:

- 'Chinese Journal of Physics' Elsevier publishers --Recent Impact Factor = 3.237 (Editor: Dr. Rupesh Devan, MEMS faculty)
- Dr. Rupesh Devan was honored as Guest Editor --'Proceeding of International Conference on Materials & Environmental Science' in Materials Today: Proceedings, Elsevier, (2020).
- Dr. S.S. Hosmani was invited Resource Person for Online Lecture on "Boronizing of Steels" organized by ASM International India Chapter, India. (April 03, 2021).
- Dr. S.S. Hosmani was invited Resource Person for Online 5 Days Short Term Course (STC) on Advances in Materials Manufacturing Processes and Properties, Malaviya National Institute of Technology, Jaipur, India. (July 10, 2020).
- Dr. Eswar Prasad's group received Best presentation award: SICE 2020 (December 11-13 & 18-20, IIT Bombay) (K. P. Raineesh, K. Sairam, K. Rajesh, K. Eswar Prasad, Understanding deformation response of Mg underneath the indentation)
- Dr. Ajay Kushwaha's group received Best paper Award:5NANO-2021; Organized by IEEE Photonics Society Student Chapter, Mangalam College of Engineering, Kerala.
- Dr. S.S. Hosmani was invited as one of the honourable jurors for the selection round of Tata InnoVista, which is Tata Group's flagship annual event for recognizing and celebrating innovations of Tata companies (October 8, 2021).
- Dr. Sunil Kumar is serving as a Guest Associate Editor for the journal Frontiers in Materials (Impact Factor: 3.515).

Introducing Faculty of MEMS

- Dr. Parasharam M. Shirage
- Dr. Rupesh S. Devan
- Dr. Santosh S. Hosmani
- Dr. Mrigendra Dubey
- Dr. K. Eswara Prasad
- Dr. Jayaprakash Murugesan
- Dr. Sumanta Samal
- Dr. Ajay Kumar Kushwaha
- Dr. Dhirendra Kumar Rai
- Dr. Abhijit Ghosh
- Dr. Hemant Borkar
- Dr. Sunil Kumar
- Dr Ram Sajeevan Maurya
- Dr. Dudekula Althaf Basha
- Dr. Srimanta Pakhira

Dr. Parasharam M. Shirage
Associate Professor
pmshirage@iiti.ac.in

Dr. Parasharam M.Shirage did his PhD. from Shivaji University, Kolhapur, India; and worked as Postdoc Scientist at various institutions including: Tata Institute of Fundamental Research, India (2012-13); Institute postdoctoral Fellow: AIST, Tsukuba, Japan (2008-2012); JSPS Postdoc. Fellow: AIST, Tsukuba, Japan (2006-2008); Visiting Scientist: KERI, Changwon, South Korea (2004-2006); and he was lecturer at Rajaram College, Kolhapur (Maharashtra Govt.) (2003-2004). Dr. Shirage is Visiting Fellow at Toyota Technological Institute Nagoya, Japan and National Institute of Advanced Industry, Science and Technology (AIST, Tsukuba, Japan

Research Highlights:

The research work of Dr. Parasharam Shirage focuses on Materials for Energy and Environment addressing: (i) Technology Development: Batteries, Supercapacitors, Solar cells, Sensors; (ii) Materials: For batteries, Supercapacitors, Solar cells, Sensors and Single Crystal Growth of Superconductors; and (iii) Processes: Process to grow large single crystals of NbSe2 and related materials, Controlled growth of Nanostructures for Multi functional applications.

His work on the next generation solar cells has led to solar efficiency of ~20 % in Pb-based and 3 % in Bi-based Pervoskite solar cells. He has contributed in the establishment of highly stable Pervoskite solar cell at varying temperatures, which has been a major drawback of the perovskite solar cells. Temperature stability has been attained by introducing a layer of a polymer between the Pervoskite layer and hole transport layer. The research work of Perovskite materials coating on the flexible substrates to fabricate the flexible solar cells is in progress. Different natural bio-based dyes were extracted to fabricate the TiO2 based dye sensitized solar cells (DSSC's). So far 3 % efficiency has been achieved with one of the natural dyes.

Dr. Shirage has contributed a significant research work inthe field of Supercapacitor and Batteries. It includes the new materials synthesis, structure solution and applications in batteries and supercapacitors. He has developed the metal oxide-, polymers- and carbon-based materials for the supercapacitor and battery applications with excellent energy density and power capacity and the portable device.

ZnO nanostructures were grown in controlled shape and size with well-regulated processing parameters and were tested for the multi functional applications. The ZnO nanostructures were applied in Gas Sensing, Batteries and Supercapacitors, Field emission, Two photon absorption, humidity sensing, biosensing, solar cells, algal lipid extraction, etc.

A highly sensitive and selective nonenzymatic detection of glucose that has been achieved by hybridization of 1D α-MnO2 nanorods modified with surface decoration of Co3O4 nanoparticles exhibited a high sensitivity of 127 μA mM−1 cm−2 (S/N = 3) with a detection limit of 0.03 μM.

He has done substantial work on the reduced graphene oxide rGO-polymer-Au nanomaterials based piezoelectric materials for energy harvesting. The Ag-rGO antifungal activity has also been tested. He has developed Cobalt ferrite shape and size tuned nano-particles synthesis and applications in magnetic energy storage and humidity sensing.

In the area of superconductivity, he has grown large (2 cm x 2 cm) single crystals of NbSe2 and doped NbSe2. These single crystals were employed for the physical properties (Tc, Jc and Hc) measurements to understand the origin of superconductivity and to provide the guiding principles for designing room temperature superconductors. He has invented several new superconductors and he is the first researcher to experimentally demonstrate an inverse isotope effect in high-Tc superconductors. He has done considerable amount of work on recently invented topological insulators (TI). He has grown Tl's large single crystals and evaluated their physical properties to understand the underlying pairing mechanism of superconductivity. The innovative applications of the Tl for humidity sensing and field emission studies were also examined.

He has delivered many invited talks at national and international level during AY 2020-21. He has successfully guided 6 PhD and 3 master students to complete their degree in AY 2020-21.

Sl. No.	Name of the student	Title of the thesis	Year and Month of completion

Incubated a company to manufacture "Sustainable, Engineered Sodium-ion Batteries for Renewable Energy Storage" MEMS Govt of India grant 18 Lakh INR.

Dr. Rupesh S. Devan
Associate Professor
rupesh@iiti.ac.in

Dr. Rupesh S. Devan is an Associate Professor (since Dec. 2018) in the Department of Metallurgy Engineering and Materials Science, Indian Institute of Technology Indore, India. He is also Adjunct faculty at Centre for Electric Vehicle & Intelligent Transport Systems at IIT Indore. He has joined IIT Indore as Assistant Professor in Mar. 2017. He post-graduated in Physics (Materials Science) and received his Ph.D. in Physics (Materials Science) from Shivaji University, Kolhapur, India. In 2007, he received a fellowship from the Ministry of Science of Technology (MOST) Taiwan and joined as Post-Doctoral Fellow at National Dong Hwa University, Taiwan. After availing the 'INSPIRE Faculty Award' (2014) from the Department of Science and Technology (DST) India, he joined the University of Pune, India (2014-2016). After that, he moved to the Central University of Punjab (2016) as Associate Professor. He is the Editor of the 'Chinese Journal of Physics (Elsevier, Since Jan. 2018). He has published a book on 'Application of one-dimensional nanomaterials (Am. Scientific Publishers)'. He was also a guest editor for the special issue in J. of Nanomaterials (Hindawi) and Materials Today: Proceedings (Elsevier). His research is focused on materials for energy storage and conversion, and photo-active materials. In his research field, he has published 1 book, 2 book chapters, and 107 research articles in SIC journals (Citation: > 4734, h index: 41, and i10-index: 80).

Research Highlights:

Our group has explored metal oxides for applications in water remediations, energy storage, and conversion. The major research highlights of our group are,

- Perovskite material (i.e., Ba(Sb/Ta)2O6) and metal oxide (i.e., NiO) have been introduced as excellent photoactive materials for the removal of organic pollutants.
- The supercapacitor consisting of mesoporous ABO3 material had delivered excellent stability and power density.
- The inverted planner perovskite solar cell fabricated at ambient atmosphere had delivered efficiency of 9.7 %.

Invited Talks/Lecture delivered:

1. "Research Innovation and Ranking" Online Webinar Series on "One year of Transformative Reforms under National Education Policy, 2020"Indian Institute of Information Technology, Surat, 9th-10th August 2021.
2. "Research opportunities and future development in nanotechnology" Student Aid Fund, Student Activity and Meritorious Students Ceremony Committee of Y.C. Institute of Science, Satara, 24th June 2021.
3. "Hetero-architectured materials for displays and energy storage electrodes" Sixth International Conference on Advances in Materials Science (Online), Post-Graduate Centre, Raje Ramrao Mahavidyalaya, Jath, 23rd–24th April 2021.
4. "Ethics in research publications" Online Lecture Series Program Under 'UGC STRIDE Component 1', Department of Physics, Shivaji University, Kolhapur, India, 7th – 10th April 2021.
5. "Designing nano-hetero-architectures for display and energy applications" International Conference on Nanomaterials and Nanotechnology (ICoNN-2021), Department of Physics, University of Mumbai, 25th – 27th March 2021.
6. "X-ray Photoelectron Spectroscopy for Chemical Analysis of Nanomaterials," 6 days QIP course on 'Materials Characterization Techniques' Department of Metallurgy Engineering and Materials Science, Indian Institute of Technology Indore, India 22nd -27th March 2021.
7. "Influence of nano-hetero-architectures in technology development," One week faculty development program on "Functional Materials for Engineering Applications" B.M.S. College of Engineering, Bengaluru, & FET M.J.P. Rohilkhand University, Bareilly15th–19th Feb. 2021.
8. "Morphology controlled nano-hetero-architectures for energy and display applications," International Conference on Materials Science and Nanotechnology (e-ICMSN 2020), Dayanand Science College, Latur- 413512, 17th–19th December 2020.
9. "Impact of nanoscience on the welfare of society," Vigyan Prasar, Department of Science and Technology, Gov. of India, India 15th December 2020.
10. "Nanotechnology: pros and cons of inventions," 3rd International e-Conference on Frontiers in Mechanical Engineering and Nanotechnology (ICFMET 2020), Sanjeevan Engineering & Technology Institute, and Yashwantrao Patil Science College, Kolhapur, 27th – 28th Nov. 2020.
11. "Mechanics of nano-heterostructures," ATAL Faculty Development Program on Molecular Manufacturing, Department of Chemistry, Central University of Punjab, Bathinda, 23rd – 27th November 2020.

12. "Hidden diversity of nano-hetero-architectures," National Conference on Materials Physics 2020 (NCMP 2020), REVA University, Bengaluru, Karnataka, India, 5th – 6th November 2020.
13. "Morphology controlled nano-hetero-architectures for energy and display applications," Five days online workshop on (Nano-Elecro-Mechanical-System) NEMS Technologies: Modern Interdisciplinary approach in Engineering (NEMSTech 2020), National Institute of Technology, Silchar, Assam, 17th-21st Aug. 2020.
14. "X-ray Photoelectron Spectroscopy (XPS): New Way for Chemical Analysis of Nanomaterials," Five Days Faculty Development Program on 'Nanomaterials characterization techniques and results analysis methodology: Ideas, Innovations & Initiatives,' UGC-HRDC, Savitribai Phule Pune University, Pune, 27th - 31st July 2020.
15. "Controlled nano-hetero-architectures for enhanced field electron emission," Indus Synchrotrons Users' Meeting (ISUM-2), UGC-DAE Consortium for Scientific Research, Indore, India, 28th – 29th July 2020.
16. "Ethics in research publications," National Seminar on Research Panorama of Life Sciences, Rajaram College Kolhapur, Govt. of Maharashtra, Kolhapur, 15th – 18th June 2020.
17. "Multifunctional materials for energy storage applications," A National Workshop on Multifunctional Materials and Instrumentation for Emerging Applications, Savitribai Phule Pune University, Pune, India, 16th – 18th January 2020.

Dr. Santosh S. Hosmani
Associate Professor
sshosmani@iiti.ac.in

Dr. Hosmani joined IIT Indore on 17-4-2017. He did his B.E. in Metallurgical Engineering from REC (currently NIT) - Nagpur and M.Tech. in Process Metallurgy from IIT-Bombay. He was the recipient of DAAD-scholarship for doing M.Tech. research at the University of Stuttgart. He did his Ph.D. work at Max-Planck Institute for Metals Research, Stuttgart, Germany, and got a degree from the University of Stuttgart in 2006. Since June-2006, he has about 15 Years of Post-PhD experience in research, academics, and management. He held a regular faculty position at NIT-Surathkal, IIT-Delhi, and COE-Pune. He also gained industrial experience as a Senior Manager at Bharat Forge Ltd, Pune.

Dr. Hosmani is leading the 'Surface Engineering and Heat Treatment (SEHt)' research group in the Department of MEMS at IITI. The research interests of his group are surface engineering, tribology, physical metallurgy, and micro structure-properties correlation.

Selected Publications (2020-2021, 3 publications):

Research Highlights:

There are various engineering applications where the surface must perform a job different from the bulk of a component. On many occasions, just by altering 1–2 % of the total thickness of the components, the properties enhance their performance considerably. The list of applications requiring the manipulation of surface properties is unlimited, especially in automobiles, petrochemical, food processing, nuclear, etc. Dr. Hosmani's SEHt group is currently working on the novel and promising approach of severe plastic deformation (SPD) of surfaces to manipulate the micro structure and the properties of ferrous and non-ferrous alloys. The group also focuses on the scientific aspects of surface-alloying and coatings.

The effect of surface mechanical attrition treatment (SMAT) and subsequent treatments (like plasma nitriding) on the microstructure and properties of stainless steels is investigated by this group. SMAT processing of Mg-alloy is also successfully studied. SMAT improved the corrosion resistance and nitriding kinetics of AISI 304L SS.Mg-alloy responds very well to the SMAT treatment. A thick layer (about 0.5 mm) with improved surface hardness (more than two times the as-received alloy) is successfully obtained on the AZ91D alloy surface. SMAT process has induced compressive residual stress in the SMATed layer. Nanoscale grains in the near-surface region and multiple deformation twin-modes are observed in the SMATed layer.

Recently, this group has also investigated the boronizing behaviour of low alloy steels. The critical role of alloying elements in the steel is explored in terms of their migration behaviour during the growth of the boride front and, consequently, in understanding their role in the formation of boride, matrix, and transition region within the boronized layer. Synthesis of multilayer architecture by producing a DLC/CrN layer over the boronized surface effectively enhances the tribological performance of the steel.

Active Research Projects (2020-2021):

- "Wear Behavior and Microstructural Studies of Surface Mechanical Attrition Treated (SMAT) and Post-Treated Stainless Steels," Sponsoring Agency: DST-SERB(EMR Project Grant), Sanctioned amount: Rs. 50,85,520/- (March 2018 – September 2021).

Research Facilities:

- Metal forming, Heat-treatment, Tribology

Research Lab Name:

- Metal Forming and Surface Engineering & Heat Treatment Lab

Awards and Recognitions (2020-21):

- Dr. S.S. Hosmani was invited as one of the honourable jurors for selection round of Tata InnoVista, which is Tata Group's flagship annual event for recognizing and celebrating innovations of Tata companies (October 8, 2021).
- Resource Person (Invited) for Online Lecture on "Boronizing of Steels" organized by ASM International India Chapter, India. (April 03, 2021).
- Resource Person (Invited) for Online 5 Days Short Term Course (STC) on Advances in Materials Manufacturing Processes and Properties, Malaviya National Institute of Technology, Jaipur, India. (July 10, 2020).
- External Examiner/Reviewer of PhD Thesis: 05 nos.
- Invitation as an expert for the online Curriculum Development Workshop, Dept. of Metallurgical & Materials Engineering, Malaviya National Institute of Technology, Jaipur, India. (July 02, 2021).

Dr. Mrigendra Dubey
Assistant Professor
mdubey@iiti.ac.in

Dr. Mrigendra Dubey working as Assistant Professor at Indian Institute of Technology Indore in the area of synthesis of Soft Materials particularly Metallogels with an objective to achieve conductance, catalysis, superabsorbent, morphology, rheological and optical properties for various kind of applications

He received M.Sc. degree in Chemistry with merit from University of Allahabad, Allahabad in year 2005 and Ph.D. degree with Prof. Manabendra Ray from Indian Institute of Technology Guwahati in year 2011. After PhD, he joined Prof. S. S. Sun group, supramolecular materials at Institute of Chemistry, Academia Sinica, Taiwan as post-doctoral fellow in 2011 followed by Prof. D. S. Pandey group at Department of Chemistry, Banaras Hindu University as DS Kothari Post Doc Fellow in 2012.

His one of paper has been selected for Vice Chancellor Award for Excellence in Research at BHU Varanasi. Further, Dr. Dubey has been awarded prestigious DST-INSPIRE Faculty award and joined Indian Institute of Technology (BHU) Varanasi in 2015, started his independent research carrier. In May 2017, he joined IIT Indore as Assistant Professor in Department of Metallurgy Engineering and Materials Science and established laboratory for synthesis of Soft Materials.

He is the recipient of Young Scientist Award, International Academy of Physical Sciences, Allahabad, India- 2017. He has been invited to France at various institutes (ENS Lyon, University of Rennes, Grenoble, Paris VI University and Burgundy) in the year 2015, 2016, 2017 and 2019 as invited research visitor. He established collaboration at ENS Lyon and University of Rennes, France and published quality papers. Dr. Dubey is life-member of Society for Materials Chemistry, Bhabha Atomic Research Centre, Mumbai, Soft Materials Research Society, Jaipur and International Academy of Physical Sciences, Allahabad.

Selected Publications (2020-2021, 3 publications):

  Journal of Materials Chemistry C, 2020, 8, 11008-11012; Impact factor: 7.393.

- 2. Nanofabrication of Au nanoparticles over conductive metallohydrogel nanofibers for nanocatalysis application M. K. Dixit, D. Chery, C. Mahendar, C. Bucher and Mrigendra Dubey* Inorg. Chem. Front., 2020; 7, 991-1002; Impact Factor: 6.569

- Li+-Zn2+ tailored nanostructured metallohydrogel based mixed ionic-electronic conductor Yeeshu Kumar, Chinthakuntla Mahendar, A Kalam and Mrigendra Dubey* Sustainable Energy Fuels, 2021, 5, 1708-1713; Impact factor: 6.367

Research Highlights:

Gels have attracted substantial interest owing to their fascinating morphology, optical, rheology and various physical properties. In the present era, gels are directly applicable in human daily routine life like medicine, cosmetics, electronic devices, tissue engineering etc. The direct applications as well as interesting chemistry of gels motivated me to establish my research lab for the synthesis of chiral inorganic gelators. Chirality tunes the morphology and exhibits the chiro-optical effects. The incorporation of metal with gelators may be associated with additional physicochemical properties such as magnetism, color, rheology, adsorption, emission, catalytic activity and redox behavior. Thus, I am actively involved in development of various kinds of soft materials (particularly gel materials) with special attention to - (i) Superabsorbent for agriculture application, (ii) Conductive, (iii) Charge transfer, (iv) Aggregation induced emission, (v) Chiro-optical, (vi) photophysical, (vii) morphological, (viii) Rheological and (ix) crystal engineering importance.

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	Mrigendra Dubey	DST-INSPIRE Faculty Award	DST New Delhi, 5 Years	35 Lacks
2.	Manish Kumar Dixit Mrigendra Dubey	National Post-Doctoral Fellowship	SERB New Delhi	15 Lacks

Research Lab Name: Soft Materials Research Laboratory and Corrosion Engineering

Events and Seminars Organized (2020-2021):

- Lecture series Rastriya Aawiskar Abhiyan, EBSB January- March 2021.
- TEQIP FDP (Advances in Corrosion Science and Engineering) at IIT Indore- 2020.
- TEQIP FDP (Advanced Technology for Integrated Computational Materials Engineering Education) at IIT Indore- 2020.
- QIP STC (Advanced Technology in Materials Engineering) at IIT Indore- 2021.
- QIP STC (Fundamentals and Applications of Nano and Soft- Materials) at IIT Indore- 2021.
- QIP STC (Fundamentals of Corrosion Science and Technology) at IIT Indore- 2020.
- Workshop on Corrosion Science and Engineering- 2020.
- Fluxus as Cultural Coordinator- 2020.

Delivered Invited Lectures (2020-2021):

- Invited Lecture, Emerging Technologies in Chemistry, CMP Degree College, Allahabad- March 2021
- Recent advancement in Structural and Geotechnical Engineering, IIT Indore- March 2021
- GYAN GANGA PROGRAMME at Department of Chemistry Government College Kota- Feb 2021
- Invited Lecture, 'Materials Characterization Techniques' at IIT Indore, 22nd-27th March 2021
- Invited Lecture, Short Term Training Program, NIT Raipur- January 2021
- Lecture at Quality Improvement Programme (Advanced Materials Science) at IIT Indore- 2020
- Lecture at Quality Improvement Programme (Failure Analysis) at IIT Indore- 2020
- Lecture at Quality Improvement Programme (Corrosion Engineering) at IIT Indore- 2020.
- Webinar for Don Bosco College Tura, Meghalaya- 2020.

Dr. K. Eswara Prasad
Assistant professor
eswar@iiti.ac.in

Dr. Eswara Prasad Korimilliearned his ME and PhD from the Department of Materials Engineering, Indian Institute of Science, Bangalore. Priortojoining IIT Indore, he worked as an Assistant Professor at the School of Engineering, Mahindra Ecole Centrale, Hyderabad and Post doctoral fellow at Hopkins Extreme Materials Institute and the Department of Mechanical Engineering, Johns Hopkins University, Baltimore, USA and. He is also a Visiting Faculty at the Institute of Nanotechnology, Karlsruhe Institute of Technology, Germany (May-July, 2019); and Center for Advancing Materials Performance from the Nanoscale, Xi'an Jiaotonguniversity (December 2017, May – July 2018), China. He heads the Mechanics of Materials group at IIT Indore and works in the broad are a of mechanical behavior of materials.

Selected Publications (March 2021 – September 2021):

- V.S. Kathavate, H. Sonagara, B. Praveen Kumar, I. Singh, K. Eswar Prasad, Direct observations of changes in ferroelectric domain configurations around the indentation and ahead of the crack front, Materialia 19, 101191, (2021)

Research lab name: Mechanics of Materials Lab

Research facilities: Miniature Kolksy bar, Metallographic samples preparation unit, Hardness testers (Brinell and Rockwell testers), High temperature tensile testing machine, Impact tester.

Research Highlights:

- Understanding the deformation mechanisms in nanoglasses.
- Role of ferroelectric domain configurations on the deformation response of Piezoelectric materials using nanoindentation.
- Investigating the effect of processing parameters (e.g. scan strategy, scan rotation, and powder layer thickness) on the deformation response of additively manufactured Ti6Al4V alloys
- Effect of crystallographic orientation on the single crystal Magnesium.
- Understanding the ultrahigh strain rate deformation response of materials

Events and Seminars Organized:

- Core organizing committee member, 12th International conference on Materials Processing and Characterization to be held from October 6-9, 2021, NITTR Chandigarh, India

Invited talks/Lecture delivered (March 2021 to October 2021):

- Guest lecture on Nanomechanics and nanondentation in the ATAL workshop on "Nano-materials & Nano-mechanics and their application in devices and sensors" June 28-July-2, 2021 IIT Hyderabad

Awards and recognitions:

- Best Oral presentation, NMD ATM February 2020, V.S. Kathavate and K. Eswar prasad, "Role of ferroelectric domains on the indentation behavior of Piezoelectric materials"
- Best presentation, SICE 2020 (December 11-13 & 18-20, IIT Bombay), K. P. Raineesh, K. Sairam, K. Rajesh, K. Eswar Prasad, Understanding deformation response of Mg underneath the indentation

Research Projects (on going):

- "Creep and fatigue of selective laser melted Ti-6242 alloy, ARDB 2021 – 2024 (PI - Dr. Srikant Gollapudi (IIT BBSR)
- "Design and manufacturing of miniature Kolsky bar or Split Hopkinson Pressure Bar (SHPB) setup to characterize the very high strain rate deformation behavior of metals" DST-SERB 2019-2021

Dr. Vinod Kumar
Assistant Professor
vkt@iiti.ac.in

Educational Background

- Ph.D. (First Class), Materials Science and Engineering, Indian Institute of Technology Kanpur, India, May 21, 2012.
- M. Tech. (First Class), Metallurgical and Materials Engineering, Indian Institute of Technology Kanpur, India, December 07, 2007.
- B. Tech. (First Class), Metallurgy and Materials Engineering, National Institute of Foundry and Forge Technology, Ranchi, India, August 10, 2004.
- Assistant Professor in the Department of Metallurgy Engineering and Materials Science at Indian Institute of Technology Indore (March 30, 2017 – till date).
- Adjunct Faculty in Materials Research Centre at Malaviya National Institute of Technology Jaipur (22nd Aug. 2013 to 21st Aug. 2015).
- Assistant Professor in the Department of Metallurgical and Materials Engineering at Malaviya National Institute of Technology Jaipur (July 6, 2012 – March 29, 2017).

Research Interests

- Structure-Property Correlation in High Entropy Alloys
- Phase Transformation
- Corrosion Engineering
- Structural Nanomaterials
- Thermomechanical Processing of Magnesium Alloys and Steels
- Failure Analysis

Selected Publications (2020-2021, 3 publications):

- Sheetal Kumar Dewangan, Priyanka Sahu, V. K. Sharma, Vinod Kumar, Synthesis and Characterization of Hydrogenated Novel AlCrFeMnNiW High Entropy Alloy , International Journal of Hydrogen Energy, 2020.

- Akshay Kumar; Vinayaka R. Kiragi; Saurav Kumar; Amar Patnaik; Vinod Kumar, & M. K. Banerjee , Synthesis and Characterization of Metallic Iron Reduced from Low-grade Coal in Rajasthan, Mining, Metallurgy & Exploration, 2020.
- Samal, Vinod Kumar, Microstructure exploration and an artificial neural network approach for hardness prediction in AlCrFeMnNiWx High-Entropy Alloys, Journal of Alloys and Compounds

Research Highlights: Powder Metallurgy and Physical Metallurgy

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	P1	Design and development of equiatomic multicomponent FeCoNiAx (A= Nil, Al/Ti/Mg, Cr, Si/Cu) alloys for electromagnetic applications (sanctioned on March 01, 2021)	Indo-Poland Joint Project; DST, GoI	624000 (2 Years)

Research Facilities: Inverted microscope, TGA, Planetary Ball mill, High-temperature furnace, abrasive cutter, polishing machine

Research Lab Name: Non-equilibrium Advanced Materials Engineering (NAME) Lab

Events and Seminars Organized (2020-2021):

- Six-days AICTE sponsored Online Short-term Course (QIP) on "Fundamentals and Advances in Powder Metallurgy" during 15-20 march, 2021.
- Five-days TEQIP sponsored online course on "Research Methodology in Science & Engineering" during Dec. 26-30, 2020.

Dr. Jayaprakash Murugesan
Assistant Professor
jayaprakash@iiti.ac.in

PhD : 2010 (Nagaoka University of Technology, Japan)
Materials science and Engineering
Master : IIT Madras (Metallurgical and Materials Engineering)
UG : Govt College of Engg Salem (Metallurgical Engineering)
Post PhD Research experience : 11 Years

Active Research Projects (2020-2021):

Research Facilities:

- Fusion welding facilty (Gas welding, Arc welding, TIG< MIG welding)
- CMT welding, 3. Friction stir welding 4. Diffusion Bonding 4. Wear tester

Research Lab Name: Welding Engineering Lab, Advanced Materials Joining and Materials Testing Lab.

Events and Seminars Organized (2020-2021):

- Organized (convener) 5 days TEQIP-STC on "Fatigue Fracture , Creep and Failure analysis of advanced materials", at IIT Indore, Dec 7 -11, 2020
- Organized (convener) 6 days QIP-STC on "Advances in welding technologies and failure analysis" at IIT Indore, Aug, 2020
- Organized (convener) 6 days QIP-STC on "Advances Materials", at IIT Indore, Sep, 2020.

Dr. Sumanta Samal
Assistant Professor
sumanta@iiti.ac.in

Dr. Sumanta Samal earned his doctorate from the department of Materials Science and Engineering, Indian Institute of Technology Kanpur in 2014, followed by three years of Post-Doctoral research experience in the Department of Metallurgical and Materials Engineering at the Indian Institute of Technology Madras.

His research and teaching interests include solidification, physical metallurgy, phase transformations and phase equilibria in materials, hot deformation behaviour in multicomponent/high entropy alloys, Phase selection kinetics in deeply undercooled metallic melts, phase field simulation for microstructural evolution.

Selected Publications (2020-2021, 3 publications):

- Reliance Jain, M.R. Rahul, Poulami Chakraborty, Rama Krushna Sabat, Sumanta Samal, Gandham Phanikumar, Raghavendra Tewari. Design and deformation characteristics single-phase Fe-Co-Ni-Cr-V high entropy alloy, Journal of alloys and compounds, Vol. 888, pp. 161579, 2021.

- Chandra Sekhar Tiwary, Prafull Pandey, Suman Sarkar, Rakesh Das; Sumanta Samal, Krishanu Biswas, Kamanio Chattopadhyay, Five decades of research on development of eutectic as engineering materials, Progress in Materials Science, 2021,doi: 10.1016/j.pmatsci.2021.100793.
- Reliance Jain, Sheetal K. Dewangan, Priyanka Umre, Vinod Kumar, Sumanta Samal, Microhardness prediction of seven component FeCoNiCrMnVNb eutectic high entropy alloys using an artificial neural network approach, Trans Indian Inst Met, 2021, doi: 10.1007/s12666-021-02335-1.

Research Highlights:

Our research interests include phase transformations and phase equilibria in materials, Processing-Structure-Property correlation in multicomponent/high entropy alloys, metastable phase formation in deeply undercooled alloys, Phase field simulation for microstructure evolution. The main are as of research are:

- Solidification: Experiments and Simulation
- Processing-Structure-PropertyCorrelations in Multicomponent/High Entropy alloys
- Material design for high temperature applications
- Phase equilibria: Materials for future
- Thermo-mechanical Processing of structural materials

Research Projects:

Development of novel eutectic high entropy alloys for high-temperature applications, 2020-23. (Funded by BRNS, GOI)

Dr. Ajay Kumar Kushwaha
Assistant Professor
akk@iiti.ac.in

Dr. Kushwaha is a materials scientist, working in the area of design and synthesis of nanomaterials for energy devices. He received M.Sc. degree in Physics (Electronics) from C.S.J.M. University, Kanpur, India, in year 2006 and Ph.D. degree in Physics (Nanomaterials) from IIT Bombay in year 2014. He joined IIT Indore as Assistant Professor in Department of Metallurgy Engineering and Materials Science in September 2017. Since May 2019, he is also having administrative responsibility as Associate Dean of Students Affairs IIT Indore. He was Inspire Faculty at School of Engineering in IIT Indore during July 2016 to September 2017. Prior to join IIT Indore, he worked as a Scientist-I in Institute of Materials Research and Engineering, A*STAR, Singapore from Feb 2014 to July 2016. He also worked as Lecturer in Department of Physics at KCNIT Banda (2006-2007) and PSIT, Kanpur (2007). He is the recipient of DST-INSPIRE Faculty Award (2016) and SERB-Early Career Research Award (2017) from Government of India. Dr. Kushwaha is life-member of Indian Physics Association (IPA), Electron Microscope Society of India (EMSI) and Luminescence Society of India (LSI). He has published more than 50 research articles, International Patent (Technology is licensed) and several book chapters.

Research Laboratory: Nano & Energy Materials Laboratory
(https://kushwaha09.wixsite.com/ajay/research)

Research Highlights:

Dr. Kushwaha works on Nano and Energy Materials, especiallyemphasizing on following:

- Synthesis, characterization and application of metal oxides, chalcogenides and 2-D Materials (Graphene &Mxenes); surface modification, photo-electrochemistry & opto-electronic properties.

- Next generation solar cell; photo/electrochemical water-splitting, electrodes for next generation batteries
- Biosensors; sensors for food quality and medicinal plants, soil & environmental pollutants
- Bio-inspired artificial electronic synapse; memristive anodic oxides for neuromorphic computing; electrochemical metallization memristive switching
- Corrosion in nanostructured metals and alloys; corrosion protection applying coatings; extraction of metals from e-waste.

Selected Publications (2020-2021):

- Nagaraju Mukurala, Krishnaiah Mokurala, Siddhartha Suman, Ajay K Kushwaha Synthesis of porous Cu2FeSnS4 particles via solvothermal process for removal of organic acid fuchsin dye pollutant from wastewater, Nano-Structures& Nano-Objects 26 (2021) 100697.

Awards and Achievements:

Best paper Award: 5NANO-2021; Organized by IEEE Photonics Society Student Chapter, Mangalam College of Engineering, Kerala.

Projects active during April 2019-March 2020

Title: Wet-chemical approach to fabricate visible-near infrared light harvesting photoelectrodes

Duration :2016-2021

Funding Agency :DST

Brief Description: The efficient and safe generation of clean hydrogen is an exciting research area and PEC water splitting process has shown good possibility for hydrogen production, if suitable photocatalytic material is available. Though, various photocatalytic materials have been investigated, however, the overall water splitting efficiency is very low. The band engineering is unclear and complex as well as photocatalytic mechanism is not established. Metal oxides are the most studied photo catalyst and water splitting mechanism has been well investigated. Thus, hybrid electrodes could be the ideal candidates to harvest VIS-NIR light.

Title: Lead Free Inorganic Halide Perovskite Nanostructures for Solution-Processable Photovoltaic cell

Duration: 2018-2021

Funding Agency: SERB

Brief Description: Perovskite materials have excellent light absorption, charge carrier mobility and lifetime that leads to high device efficiency with possibility to realize a low-cost, scalable solar cell device, if

issues of stability and environmental compatibility is addressed.

Title: Development of All Earth Abundant Elements based Nano-heterostructures for Solar Driven Water Splitting.

Duration: 2019-2022

Funding Agency : CSIR

Brief Description: All abundant earth element-based nano-heterostructures can harvest the wider segment of solar energy. The cost of the materials also reduced due to use of earth abundant elements.

Title: "Indo-South Korea Joint network Centre for Environmental Cyber Physical Systems

Duration: 2021-2024

Funding Agency : DST

Brief Description: Enhance collaboration between the Indian and South Korean academic institutions.

- Prepare a workforce that is in synchronize with the international developments in environmental cyber-physical systems
- Design and development of various components of the proposed cyber-physical systems.
- Development of low-cost environmental monitoring cyber-physical systems for rural empowerment.

Students information (Ph.D., M.Tech., B.Tech students):

Dr. Dhirendra Kumar Rai
Assistant Professor
dkrai@iiti.ac.in

Dr. Dhirendra Kumar Rai did his PhD. from: Indian Institute of Technology Bombay Before joining IIT Indore as Assistant Professor, Dr. Rai has been DST Young Scientist and a Post doctoral research at IIT Indore. The primary research focus of Dr. Rai's research group is to develop new hybrid materials through surface tailoring of compatible inorganic colloidal nanoparticles with specific organic functionalities for particular applications. Such surface functionalized materials with a suitable organic moiety can be employed for biological probing.

Selected Publications (Academic year Apr. 2020-Mar. 2021):

- A new hierarchically porous Cu-MOF composited with rGO as an efficient hybrid supercapacitor electrode material Journal Energy Storage, doi.org/10.1016/j.est.2021.103301, M. K. Singh, A. K. Gupta, S. Krishnan, N. Guha, S. Marimathu, D. K. Rai.
- Environmentally benign melamine functionalized silica-coated iron oxide for selective CO2 capture and fixation into cyclic carbonate. Journal of CO2 Utilization, 49 (2021)101575., N. Guha, A. Gupta, S. Chatterjee, S. Krishnan, M. K. Singh, D. K. Rai.

- Aminotetrazole-Functionalized SiO2 Coated MgO Nanoparticle Composites for Removal of Acid Fuchsin Dye and Detection of Heavy Metal Ions. ACS Appl. Nano Mater., 3(2020) 11203–11216. S. Krishnan, S. Chatterjee, A. Solanki, N. Guha, M.K. Singh, A.K. Gupta, D. K. Rai.

Research Highlights:

Dr. Rai's research group works on Environmental Remediation and Sustainable energy conversion and storage.TherapidincreaseinCO2levelduetotheburningoffossilfuels(Coal,PetroleumoilandNatural gas) to meet the energy demand of the present days is leading to serious environmental issues such as globalwarming.TomitigatetherampantCO2emission,itisimperativetoaddresstheproblemnotonlyby CO2sequestrationbutalsobybreakingourrelianceonfossilfuelandseekingothersustainableenergy sources that are eco-friendly. In this regard, Dr. Rai's research group is actively engaged in the design of new multi functional materials that can capture and fix the environmental CO2 in to valuable feed stock and can also be used for storage of electro chemical energy.

Other achievements from the group:

- Mr. Sarathkumar K received Overseas Visiting Doctoral Fellowship from SERB, India for twelve months research internship in Canada
- Ms. Nikita Guha received InSc Young Researcher Award 2021 from the Institute of Scholars, India
- Mr. Mayank Kumar Singh received 36th M.P. young scientist award from MP council of Science and Technology
- Mr. Mayank Kumar Singh received ACS Nano Letters best oral presentations award in World Nano Congress on Advanced Science and Technology 2021
- Dr. Senthilkumaran M received RSC Nanoscale best oral presentations award in World Nano Congress on Advanced Science and Technology 2021

Dr. Abhijit Ghosh
Assistant Professor
aghosh@iiti.ac.in

Ph.D., Metallurgical and Materials Engineering, Indian Institute of Technology Kharagpur, India, 2016.

- M. Tech., Metallurgical and Materials Engineering, Indian Institute of Technology Kharagpur, India, 2011.
- B. E., Metallurgy and Materials Engineering, Bengal Engineering and Science University, Shibpur, India, 2009.

Dr. Abhijit Ghosh Joined IIT Indore on 01stNovember, 2017 as an Assistant Professor. He worked as a post-doctoral fellow at Indian Institute of Science, Bangalore before joining IIT Indore. His broad field of expertise is in Physical and Mechanical Metallurgy of steel. He has research experience in the field of crystallographic texture, grain boundary engineering, small scale mechanical testing, fracture micro mechanism and creep. Apart from experimental expertise, he also has a strong interest on the theoretical aspects of metallurgical fundamentals.

Selected Publications (2020-2021, 3 publications):

- Barik, R.K., Ghosh, A., Basiruddin Sk, M., Biswal, S., Dutta, A. and Chakrabarti, D., 2021. Bridging micro structure and crystallography with the micromechanics of cleavage fracture in a lamellar pearlitic steel. Acta Materialia, p.116988. doi: 10.1016/j.actamat.2021.116988
- Jain, V., Chatterjee, A., Patra, S., Chakrabarti, D. and Ghosh, A., 2020. Effect of tilt and twist angles on the cleavage crack propagation in ferritic steel. International Journal of Fracture, 225(1), pp.115-121.
- Hasan, S.M., Ghosh, A., Chakrabarti, D. and Singh, S.B., 2020. Orientation Dependence of Deformation-Induced Martensite Transformation During Uniaxial Tensile Deformation of Carbide-Free Bainitic Steel. Metallurgical and Materials Transactions A, 51(5), pp.2053-2063.

Research Highlights:

- Developing Cold Rolled Grain Orientated (CRGO) electrical steel.
- (c) Understanding the cleavage crack deviation at grain boundaries.

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	Abhijit Ghosh	Development of Cold Rolled Grain Oriented Electrical steel with high Si Content	DST Inspire	35 Lakh

Research Facilities: Creep testing facility, Polishing facility, Computer Server.

Research Lab Name: Microstructure and Texture Engineering Lab

Dr. Hemant Borkar
Assistant Professor
h.borkar@iiti.ac.in

Dr. Hemant Borkar has been working at IIT Indore since Dec 2017. He has completed his doctoral studies in Materials Engineering from McGill University, Canada. Subsequently, he had a postdoctoral position at Jonkoping University, Sweden for 2 years followed by Senior Teaching Fellow position for 2 years at University of Warwick, UK.

The broader area of his research revolves around Process-structure-Property relationships in metals and Lightweight materials for automotive applications.

Selected Publications (3 publications):

- Effect of Squeeze Casting on Micro structure and Wear Properties of Aluminium Al–Si Alloy R Tamuly, A Behl, H Borkar - Advances in Lightweight Materials and Structures, 2020
- Micro structure, texture and mechanical properties of Al Alloy A380 prepared by directional solidification method, H Borkar, S Seifeddine, AEW Jarfors - Solid State Phenomena, 2019
- In-situ EBSD study of deformation behavior of Al–Si–Cu alloys during tensile testing H Borkar, S Seifeddine, AEW Jarfors - Materials & Design, 2015.

Research Highlights:

- Materials and manufacturing
- Process-structure-property relationships in metals
- Lightweight components for transport applications
- Casting of light metals (Al and Mg)

- Deformation processing
- Electron back scattered diffraction, in-situ deformation studies, crystallographic texture

Research Facilities:

- Electro polishing machine
- Vibratory polisher
- Muffle furnace
- Semi automatic polishing machine
- Hot extrusion machine

Research Lab Name: Advanced Mechanical and Physical Metallurgy Laboratory

Events and Seminars Organized (2020-2021):

- Teaching Faculty, QIP Short Term Course on Fatigue, Creep, Fracture and Failure Analysis of Advanced Materials" Dec 7-11, 2020.
- Teaching Faculty, QIP short-term course (STC) on "Advanced materials for structural applications Sept 29 – Oct 4, 2020.

Dr. Sunil Kumar

Assistant Professor
sunil@iiti.ac.in

Dr. Sunil Kumar (PhD: Indian Institute of Science Bangalore; Visiting Researcher: Polytechnic University of Catalonia- Barcelona Tech, Spain; Research Fellow: National University of Singapore). Dr. Kumar has joined IIT Indore as an INSPIRE Faculty in November 2015 and continuing as Assistant Professor since December 2018. Dr. Kumar's research focuses on the experimental investigations of structure-property–processing relationship in functional materials as a means to develop technologically important novel materials with tailored properties. Of particular interest are materials for energy storage applications and lead-free piezoceramics. The research group led by Dr. Sunil Kumar is currently on the development of ceramic-polymer composite solid electrolytes as a means to have safer, cheaper, and better performing electrochemical energy storage systems. More details about his research interest and research group can be found at Solid State Ionics Lab.

Selected Publications (2020-2021, 3 publications):

- S. Dwivedi, M. Badole, T. Pareek, and S. Kumar |Multifunctional Lead-Free K0.5Bi0.5TiO3-based Ceramic Reinforced PVDF Matrix Composites, Journal of Alloys and Compounds,871 (2021) 159616
- T Pareek, S Dwivedi, M Badole, S Kumar | On processing structure–conductivity relations in NASICON-type LiSn2(PO4)3, Bulletin of Materials Science,44(2021)177
- S. Dwivedi, M. Badole, K. Gangwar, and S. Kumar |Relaxation processes and conduction behaviour in PVDF-TrFE and KNN-based composites, Polymer, 232 (2021) 124164

Research Highlights:

- The lead-free composite PVDF/KBT-5BA with different volume fraction of ceramic filler was obtained via hot-pressing and have shown a significant improvement in the dielectric and piezoelectric properties. The dielectric permittivity of the composite with respect to filler volume was found to be well fitted by the Yamada model, and a noticeable change in shape parameter was observed for the higher volume fraction of filler.

- The polymer-in-ceramic type composite electrolyte with LiSn2(PO4)3 as ceramic, PEO as polymer, and LiClO4 as salt at room temperature was fabricated via hot press method. The addition of PEO+LiClO4 to LSP results in an improvement in Li+ conductivity, and CCE-70 showed the highest room temperature conductivity (~ 3.48 × 10−5 Scm−1) among all compositions investigated in this work. All-solid-state Li | CCE-70 | LiMn2O4 cell delivered a specific discharge capacity of ~ 103.3 mAhg−1 at a current density of 0.1 mAcm−2, which decreased to 76.7 mAhg−1 after 10 cycles with Coulombic efficiency improving to 97.7% from 87.7% for the 1st cycle.
- (1-x)(K0.5Bi0.5)TiO3-xBiAlO3 solid-solution was synthesized and systematically investigated for variation in the crystal structure, microstructure, dielectric, and piezoelectric properties with an increase in x. Tm was found to increase from 351 °C for pure KBT to 372 °C (at 1 MHz) for 1% BA doped sample. Moreover, the diffuse dielectric anomaly with strong frequency dispersion reflects the strengthening of relaxorbehaviour in the present system with the increase in BA content. The 5% BiAlO3 doped sample showed 80 % increment in the piezoelectric charge coefficient with (d33) 109 pC/N.

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)

Awards and Recognitions (2020-2021):

- Early Career Research Award (year 2017-2020), Science and Engineering Research Board (SERB), Government of India.
- DST- INSPIRE Faculty Award (year 2015-2020).

Dr Ram Sajeevan Maurya
Assistant Professor
ramsajeevan@iiti.ac.in

Dr Ram Sajeevan Maurya is an Assistant Professor at the Department of Metallurgy Engineering and Materials Science, IIT Indore. He joined the institute on 19th of September 2019. His Academic Journey started with a B.Tech Degree in the Metallurgical and Materials Engineering department at NIT Durgapur in 2011, followed by Ph.D degree in the Metallurgical and Materials Engineering department at IIT Kharagpur. Further, after five months of post-doctoral research at IIT Madras, Dr Maurya worked as an Assistant Professor in the department of Metallurgical and Materials Engineering at NIT Rourkela for approx. one and half year, followed by joining IIT Indore. His field of interest are Bulk Metallic Glasses, High Entropy Alloys, ODS Alloys, WHA Alloys, Powder Metallurgy, Sintering etc.

Selected Publications (2020-2021, 3 publications):

- RS Maurya, A Sahu, T Laha, Nanoindentation study on Al86Ni8Y6 glassy alloy synthesized via mechanical alloying and spark plasma sintering, International Journal of Materials Research, 111 (2020) 160-167
- A Sahu, RS Maurya, T Laha, Non-isothermal crystallization behavior of Al86Ni8Y6 and Al86Ni6Y4.5Co2La1.5 melt-spun ribbons, milled ribbon particles and bulk samples consolidated by spark plasma sintering, Thermochimica Acta, 684 (2020) 178486
- Ashutosh Sahu, RS Maurya, Soumitra Dinda, Tapas Laha, Phase Evolution-Dependent Nanomechanical Properties of Al86Ni8Y6 and Al86Ni6Y4.5Co2La1.5 Spark Plasma-Sintered Bulk Amorphous Composites, Accepted in Metallurgical and Materials Transactions A, 2020.

Research Highlights:

- Development of Tungsten Heavy Alloys for Defense application
- Development of Light Weight Eutectic High entropy alloys (HEAs)

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	PI	Development of Light Weight Eutectic High Entropy Alloys	SERB, June 2019-June 2022, 3 Years	35,00,000 (research grant component)
2.	PI	Development of oxide dispersion strengthened-tungsten heavy alloys (ODS-WHA) for defense application	CSIR, March 2021-March 2024, 3 Years	47,36,200

Research Facilities: Abrasive Cutter, Optical Microscope, Polishing Machine, Vacuum Mini Hot Press, Ball Mill etc.

Research Lab Name: Advanced Powder Technology Laboratory

Events and Seminars Organized (2020-2021):

- QIP-TEQIP-III Sponsored Three-days Short-term Course (Faculty Development Program) on "Fundamentals and Advances in Powder Metallurgy" at IIT Indore, during March 15-20, 2021, Role: Course Coordinator.
- QIP-AICTE Sponsored Six-days Short-term Course (Faculty Development Program) on "Fundamentals and Advances in Powder Metallurgy" at IIT Indore, during March 15-20, 2021, Role: Course Coordinator.
- QIP-AICTE sponsored Six-days Short-term Course (Faculty Development Program) on "Materials Characterization Techniques" atIIT Indore, during March 22-27, 2021, Role: Course Co-Coordinator 4. Conducted an online ThermoCalc software and database training programme on 8th and 15th December 2020 at IIT Indore.

Dr. Dudekula Althaf Basha
Assistant Professor
bashada@iiti.ac.in

Dudekula Althaf Basha is working as an Assistant Professor at IIT Indore since 14th October 2019. He completed his Ph.D from Indian Institute of Science, Bangalore in 2014. Before joining as a faculty member at IIT Indore, he worked as a Post Doctoral Researcher at National Institute for Materials Science, Japan. His research interests are: Deformation behaviour of magnesium alloys, Phase transformation behaviour of alloy nanoparticles, Crack propagation behaviour study through in-situ microscopy techniques.

Selected Publications (2020-2021, 3 publications):

[1] Digvijay Singh, DA Basha, Lars Wadsö, Dmytro Orlov, Yoshitaka Matsushita, Alok Singh, and S.S. Hosmani, "Evolution of Gradient Structured Layer on AZ91D Magnesium Alloy and Its Corrosion Behaviour", Journal of Alloys and Compounds, Vol. 882, 15 November 2021, Pages 160659-1 to 160659-14 (2021).

[2] Digvijay Singh, DA Basha, Alok Singh, Rupesh S. Devan, and S.S. Hosmani, "Microstructural and Passivation Response of Severely Deformed AISI 304 Steel Surface: The Role of Surface Mechanical Attrition Treatment," Journal of Materials Engineering and Performance, Vol. 29, No. 10, October 2020, Pages 6898 to 6911 (2020).

[3] H Somekawa, DA Basha, ,Change in damping capacity due to twin boundary segregation in solid solution magnesium alloys. Philosophical Magazine Letters, (2020) 1-12.

Research Highlights:

1. Y segregation at grain boundaries leads to the change in crack propagation in Mg-Y alloys
2. Change in damping capacity due to twin boundary segregation in Mg-Y alloys.
3. Non-basal dislocations observed near the grain boundaries.
4. Segregation of Zn element to various boundaries in ultrafine grain sized magnesium alloys

Events and Seminars Organized:

- QIP-AICTE sponsored Six-days Short-term Course (Faculty Development Program) on "Materials Characterization Techniques" atIIT Indore, during March 22-27, 2021.
- Organized expert lecture on "TEM imaging and EELS" on 14th September 2020. (Speaker: Dr. Paolo Longo, GATAN Company Global Director, California, USA)

Research Lab Name: Severe Plastic Deformation Processing Lab

Dr Srimanta Pakhira
Assistant Professor
spakhira@iiti.ac.in

Dr. Srimanta Pakhira is working as a Ramanujan Fellow in the Department of Metallurgy Engineering and Materials Science (MEMS) since January 2018. Dr Pakhira has done his PhD. from the Indian Association for the Cultivation of Science (IACS) and Jadavpur University, Calcutta, West Bengal, India and he was Postdoctoral fellow in University of California at Berkeley and Lawrence Berkeley National Laboratory (LBNL), Berkeley, CA, USA; Nagoya University, Nagoya, Aichi, Japan; Florida State University, National High Magnetic Field Laboratory, Florida State University (FSU), Tallahassee, Florida, USA. He was a highly prestigious Japan Society for the Promotion of Science (JSPS) International Post-doctoral Fellow for outstanding Foreign Researcher in Japan, and he was awarded highly prestigious Alexander von Humboldt Fellowship (AvH) International Post-doctoral Fellowship for Foreign Researcher in Germany. Dr Pakhira was conferred highly prestigious Ramanujan Fellow and Early Career Research Award (ECRA) from the Science and Engineering Research Board (SERB), Department of Science and Technology (DST), Govt. of India.

Selected Publications (2020-2021, 3 publications):

http://dx.doi.org/10.1021/acssuschemeng.0c06147

Research Highlights:

Dr. Pakhira's research group is active in Computational Materials Science and Engineering, Condensed Matter Theory, Electronic Structure Theory, Semi-conductor Physics, Magnetism, Physics of Novel Solar Cells, Renewable Energy Technology, Perovskite, 2D TMDs, H2 evolution, Electrocatalysis, O2 Reduction, Porous Materials and Their Applications, CNT, Alkali-ion Battery, H2-Storage, CO2 capture, Computational Physics and Condensed Matter Nanoscience. They have also contributed to the understanding of Density Functional Theory (DFT) and applications in various areas of science.

Active Research Projects (2020-2021):

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	PI	Construction of Porous Metal-Organic Frameworks (MOFs) and Covalent-Organic Frameworks (COFs) and Its Applications	DST-SERB, Govt. of India, 2018-2023	135 Lakhs
2.	PI	Development of New Two Dimensional Layer Structure Materials and Technique for Water Splitting: Applications in Hydrogen and Oxygen Evolution Reactions	DST-SERB, Govt. of India, 2019-2022	53.14 Lakhs

Research Lab Name: Theoretical Condensed Matter Physics And Advanced Computational Materials Science Laboratory

Events and Seminars Organized (2020-2021): NIL

1. Dr Pakhiraorganised a Five Day Online Faculty Development Program through the TQIOP-III sponsored Short-Term Course on "Advanced Technology for Materials Physics and Engineering" during 16th to 20th November 2021.
2. Dr Pakhiraorganised a Six Day Online Faculty Development Program through the AICTE sponsored Quality Improvement Program (QIP) Short-Term Course on "Advanced Technology for Materials Engineering" during 19th to 24th January 2021.

Achievements of under graduates (UG) students of Metallurgy Engineering & Materials Science (MEMS)

Following UG students have secure top 10 all India rank (AIR) in national level examination i.e. GATE 2021 with AIR 3rd, 5th& 6th .

1) Ms. NISHITA CHITTORA (Roll No. – 170005021) - 3rd Rank
2) Mr. ANANDDEV MANGISH (Roll No. – 170005004) - 5th Rank
3) Mr. DIVIK PATRE Roll No. - (Roll No. – 170005008) - 6th Rank

S.No	PI (& Co-PI, if any)	Title of the Project	Funding Agency & Duration	Project's cost (in rupees)
1.	Dr. P. M. Shirage	Incubated a company to manufacture "Sustainable, Engineered Sodium-ion Batteries for Renewable Energy Storage"	MEMS, Govt of India	18,00,000
2.	Dr. S S Hosmani	Wear Behavior and Microstructural Studies of Surface Mechanical Attrition Treated (SMAT) and Post-Treated Stainless Steels	DST-SERB (March 2018 – September 2021)	50,85,520
3.	Dr. Rupesh S. Devan (PI)	Role of Boron passivated 1D NiO nanostructures in the next generation charge/energy storage devices.	UGC-DAE, CSR 4 years 2017-2021	17,20,000
4.	Dr. Rupesh S. Devan (PI)	Solar thermal steam generation for water desalination utilizing hybrid perovskite solar cells.	SERB, DST 3 years 2019-2022	18,30,000
5.	Dr. Rupesh S. Devan (PI)	Nano-hetero-architectures of mesoporous ABO_3 compounds for photocatalytic applications	MST, DST, 5 years 2018-2023	24,24,640
6.	Dr. Mrigendra Dubey (PI)	Novel Homochiral Metal-Organic Framework for Chiral, Achiral molecules inclusion and Reversible Gas Storage Applications	DST-INSPIRE Faculty Award	35,00000/-
7.	Manish Kumar Dixit and Dr. Mrigendra Dubey	National Post-Doctoral Fellowship	SERB New Delhi	15,00,000
8.	K. Eswara Prasad	Design and manufacturing of miniature Kolsky bar or Split Hopkinson Pressure Bar (SHPB) setup to characterize the very high strain rate deformation behavior of metals	DST-SERB & 2019-2021	31,00,000

9.	Dr. Vinod Kumar (PI)	*Design and development of equiatomic multicomponent FeCoNiAx (A= Nil, Al/Ti/Mg, Cr, Si/Cu) alloys for electromagnetic applications (sanctioned on March 01, 2021)*	Indo-Poland Joint Project; DST, GoI	624000 (2 Years)
10.	Dr. Jaya Prakash (PI)	Fatigue behavior of FSW Al-Stainless steel joint under hydrogen atmosphere.	SERB-SRG, Dec 2019-Dec 2021	28,00,000
11.	Dr. Jaya Prakash (PI), Co PI: (Dr. Lakhan Patidar, MBM Engg. College, Jodhpur)	Development if Al MMC through FSP route	TEQIP III, Sep 2019-Aug 2020	1,25,000
12.	Dr. Jaya Prakash (As a mentor & Co-PI) PI (Ram.S. Yadav, SGITIS, Indore)	Fretting wear behaviour of porous Ti alloy	TEQIP III, Colloboratory research Sep 2019-Sep 2020	19,00,000
13.	Dr. Sumanta Samal (PI)	Development of novel eutectic high entropy alloys for high-temperature applications	BRNS, GOI & 2020-21 to 2022-23	22,46,450
14.	Dr. Ajay K Kushwaha(PI)	Wet-chemical approach to fabricate visible-near infrared light harvesting photoelectrodes	DST (2016-2021)	85,00,000
15.	Dr. Ajay K Kushwaha(PI)	Lead Free Inorganic Halide Perovskite Nanostructures for Solution-Processable Photovoltaic cell	SERB (2018-2021)	31,50,000
16.	Dr. Ajay K Kushwaha(PI)	Development of All Earth Abundant Elements based Nano-heterostructures for Solar Driven Water Splitting	CSIR (2019-2022)	13,50,000

17.	Dr. Ajay K Kushwaha(PI)	"Indo-South Korea Joint network Centre for Environmental Cyber Physical Systems	DST (2021-2024)	
18.	PI: Dr. Abhijit Ghosh	Development of cold rolled grain orientated electrical steel with high Si content	DST Inspire	35,00,000
19.	Dr. Sunil Kumar (PI)	*Development of Solid Electrolyte for All-Solid-State Rechargeable Lithium Batteries*	Department of Science and Technology (DST) under INSPIRE Faculty Scheme. 5 years (2015-2020)	(35,00,000 Research Grant component) Total: 89,00,000
20.	Dr. Sunil Kumar (PI)	*Compositionally and Microstructurally Engineered Lead Free Ceramics for Piezoelectric Applications*	Science and Engineering Research Board (SERB), under Early Career Research Award. 3 years (2017-2020)	46,37,600
21.	Dr. R.S. Maurya (PI)	Development of Light Weight Eutectic High Entropy Alloys	SERB-DST June 2019-June 2022	18,00,000
22.	Dr. R.S. Maurya (PI)	Development of oxide dispersion strengthened-tungsten heavy alloys (ODS-WHA) for defense application	CSIR, March 2021-March 2024, 3 Years	14,00,000
23.	Dr Srimanta Pakhira, PI	*Construction of Porous Metal-Organic Frameworks (MOFs) and Covalent-Organic Frameworks (COFs) and Its Applications*	SERB-DST & 2018-2023	1,35,00,000 (Including Ramanujan Fellowship)
24.	Dr Srimanta Pakhira, PI	*Development of New Two Dimensional Layer Structure Materials and Technique for Water Splitting: Applications in Hydrogen and Oxygen Evolution Reactions*	SERB-DST & 2019-2022	54,18,000

School of Humanities and Social Sciences

From the Head's Desk

Dr. Nirmala Menon
Associate Professor
nmenon@iiti.ac.in

The School of Humanities and Social Sciences at IIT Indore is an exciting and vibrant place of Research and pedagogy. We have 14 faculty members and more than 40 PhD research students working in exciting projects and problems. The faculty members of the School are an eclectic mix of researchers from varied disciplines of Economics, English, History, Philosophy, Psychology and Sociology. Apart from their disciplinary affiliations each of the faculty members are engaged in their specialised areas of research and write, publish and speak about their work. The interdisciplinary nature of the research within the school is reflected in two ways:

1. By the established research groups and their works that span different disciplines and areas of intellectual discourse. The following focused research groups are active within the School:

- Digital Humanities and Publishing Lab
- Human Factors & Applied Cognition Lab
- Innovation Studies and Econometrics Lab
- Linguistics
- Performance Studies in Literature and other Arts
- Philosophy of Ethics Studies
- Sustainability Studies Lab
- Sociology of Religion
- Sociology of Film and Media Studies
- Water Governance and Policy Studies

2. The research collaborations of the faculty members across these areas both within the school, across other Engineering and Science disciplines in the Institute as well as with other colleagues both nationally and internationally demonstrate the truly interdisciplinary nature of the research of the faculty members of the school. We therefore have a vibrant PhD programme that comprises course work and a rigorous dissertation and project work. Our students have won prestigious national and international scholarships, fellowships and awards and we are very proud of their achievements when they are part of the school and all of our graduating students have gone on to excel themselves in their chosen careers too. In this last year with the pandemic, the School has continued to innovate ideas, graduate Ph.D students and develop courses and programmes. We are proud of our students and faculty members who kept the wheel turning not losing sight of our commitment to our research and academics. This included, apart from regular academic work, hosting online seminars, conferences, invited talks and lectures and our students have been actively involved in every one of those events,

often leading from the front in organizing and facilitating them. We are particularly excited to announce that the School of HSS at IIT Indore inaugurated its first master programme a MS (Research) with the same interdisciplinary focus with new courses and projects for the incoming students. The first batch will commence from Autumn 2021.

Introducing Faculty of School of Humanities and Social Sciences

- Dr. C. Upendra
- Dr. Ruchi Sharma
- Dr. Pritee Sharma
- Dr. Sanjram P. Khanganba
- Dr. Neeraj Mishra
- Dr. Ashok Kumar Mocherla
- Dr. Akshaya Kumar
- Dr. Ananya Ghoshal
- Dr. Shomik Dasgupta
- Dr. Kalandi Charan Pradhan
- Dr. Mohanasundari Thangavel
- Shri. Ambassador Gurjit Singh
- Dr. Sanchita Verma

Dr. Nirmala Menon
Associate Professor
nmenon@iiti.ac.in

Dr. Nirmala Menon is an Associate Professor in the School of Humanities and Social Sciences (HSS), Department of English, IIT Indore. She leads the Digital Humanities and Publishing Research Group at the Indian Institute of Technology (IIT), Indore, India. Dr. Menon is the author of Migrant Identities of Creole Cosmopolitans: Transcultural Narratives of Contemporary Postcoloniality (Peter Lang Publishing, Germany, 2014) and Remapping the Postcolonial Canon: Remap, Reimagine, Retranslate (Palgrave Macmillan, UK 2017). She is the Co-Editor of the first multilingual Volume of E-literature to be published from India. Apart from the books, she has published more than 50 research papers in numerous international journals (Oxford University Press, Taylor and Francis, Sage among others) and speaks, writes and publishes about Postcolonial studies, Digital Humanities and scholarly publishing.

She mentors research scholars and runs DH projects from the research lab at IIT Indore. Her research group works on Digital Projects relating to Cultural Heritage through both creation and curation of Archives and Databases. She is the Project Director for KSHIP (Knowledge Sharing in Publishing), an Open Access Publishing platform. While her primary area of research is Postcolonial studies and Digital Humanities; Globalization and Translation studies are additional areas of research. Dr. Menon has received various national and international grants and awards (MHRD, SPARC, UKEIRI, Academia Europaea among others). She has also hosted Fulbright Scholars in her lab and she along with her students have received international awards such as Charles Wallace Fellowship, Zubaan Saaskawa Publishing prize and ASEM-DUO fellowship. She has given more than 50 lectures and keynotes at various national and international forums and lead or facilitated workshops in Digital Humanities in India and internationally. As Vice President of CenterNet (Consortium of Digital Humanities Research Groups globally), Dr. Menon has put DH in India on the global map. She is also on the Advisory Board of the Open Library of Humanities (OLH), Advisory Board member of Ubiquity Press, UK and Advisory Board Member, Open Access India and Chair, (2016-17) CLCS Global South Forum, Modern Language Association (MLA). Dr. Menon is one the founder members and current President of Digital Humanities Alliance in Research and Teaching Innovation (DHARTI).

Awards and Recognitions

Dr Nirmala Menon is nominated for University of Oxford's TORCH Research Professorship award Students:

ASEM-DUO fellowship for PhD scholar, Ms Shaifali Arora

Postdoctoral Fellowship, Lancaster University, Ms Shanmugapriya T

Postdoctoral Fellowship, University of Toronto, Ms Shanmugapriya T

Projects Sanctioned between April 1, 2020-March 31,2021

1 project shortlisted by ICCSSR and presentation over: 17 lacs

Courses Taught

HS 159: English Language and Communication

HS 745: Post-Colonial Theory and Criticism

HS 618/418: Sustainability Studies

HS 601: Research Methods in Social Sciences

Conferences and Workshops organized

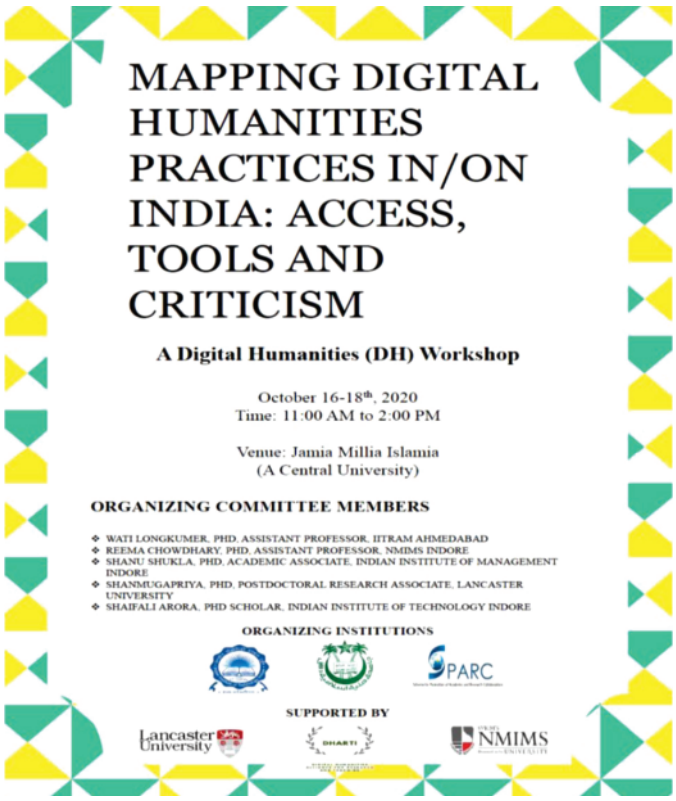

- SPARC Workshop: Mapping Digital Humanities Practices in/on India: Access Tools and Criticism: October 2020
- UKEIRI SPARC Workshop: Digital Heritage Workshops: March 2021

Publications

4 journal articles have been published during the year. Additionally, a monograph is also under progress.

Select Keynote addresses

- Menon, Nirmala Keynote Speaker, Japanese Association of Digital Humanities (JADH) Annual Conference, December 2020
- Menon, Nirmala Panelist, ADHO Conference at Ontario, Canada (held online due to pandemic) Towards and Indian Decolonial/Postcolonial DH https://www.youtube.com/watch?v=pLJgOsC-8ds&t=842s
- Menon, Nirmala Electronic Literature as DH: perspectives from Ghana and India https://www.youtube.com/watch?v=vlJPu_ZFjsE
- Menon, Nirmala Invited panelist on UKEIRI lectures series "Artificial Intelligence and Machine Learning" June 2020
- Menon, Nirmala DHARTI Speaks series Beyond Defaults: Multilingual DH meets Cultural Analytics https://www.youtube.com/watch?v=rxJTFsvvTC8
- Menon, Nirmala Digital and Humanities: Fellow Travelers or Inconvenient Bedfellows? Interview with Thilini Prasadika, Who is Afraid of the Humanities? A Lankan Podcast September 2020 https://www.youtube.com/watch?v=DUXvYFWIFyY&t=19s
- Menon, Nirmala Keynote Speaker, University of Pondicherry conference on Digital Humanities SPARC-Australia Conference 2020
- Menon, Nirmala Keynote Speaker, Midnapore College, West Bengal Conference on Literature and Recent Developments
- Menon, Nirmala Presiding Expert, 'Imagining Digital Humanities in India', with panelists from IIT Jodhpur, IIT Delhi, Australia and others
- Menon, Nirmala Keynote Speaker, Digital Humanities Lecture series, East West University, Bangladesh 2021
- Menon, Nirmala Keynote, Annual Conference on Communications and Publishing Electronic Literature in India: Does it exist? Amity University, 2021.

Dr. C. Upendra

Associate Professor
cupendra@iiti.ac.in

Dr. C. Upendra is an Associate Professor in the School of Humanities and Social Sciences (HSS), Department of Philosophy. He received his doctoral degree in Philosophy from the Department of Humanities & Social Sciences, Indian Institute of Technology Bombay. His doctoral work is in the area of Moral Philosophy with some linkages to Political Philosophy. The focus of the work was on the logic of reasoning about morality and good. Prior to joining IIT Indore as Assistant Professor, he served the Ford- Foundation funded research library; Forum on Contemporary Theory at Baroda in Gujarat. His broad research area is on Moral-Political Philosophy, History of Ideas, Radical Philosophy, Philosophy of Film & Music.

Currently, Dr. Upendra's research focuses on the identification of the radical – whether immanent and veiled by certain existential processes or it is a consequent of the conditions under one lives. The focus is on what kind of grasp we can have about the human condition. Further it investigates the possible ontological nature of equality, justice and freedom – while also admitting to the paradox that they are mutually irreconcilable.

Courses Taught

UG

HS 206: Paradigms and Turning Points
HS 313: History of Early Cinema
HS 402: Twentieth Century World History: Critical Perspectives

PG

HS 603: Epistemology
HS 605: Social and Political Philosophy
HS 606: Moral Philosophy

Dr. Ruchi Sharma
Associate Professor
ruchi@iiti.ac.in

Dr. Ruchi Sharma finished her PhD from Indian Institute of Technology Kanpur in 2009 and worked as an Assistant Professor at IITs Indore and Delhi and has held Visiting Faculty position at IIM Indore. She has been an Associate Professor at IIT Indore from 2016. She has published in Journals like Research Policy, Economics of Innovation and New Technology, Economic Modeling, Journal of Policy Modeling, Technology Analysis and Strategic Management, among others. She was a recipient of Kusuma Young Faculty Incentive Fellowship from IIT Delhi. She has presented research papers in various national as well as international conferences. She has received best paper awards during MIPS conferences at IIT Bombay and other conferences. She also won the award of Best Teacher at IIT Indore in 2020 for the large class. She organized GIAN courses with the broad theme of Economics of Innovation. She has been working on various research projects in the areas of intellectual property rights and innovation sponsored by agencies like ICSSR and DST. She was a member Member, Drafting Committee for Science, Technology, and Innovation Policy (STIP 2020), DST, GoI.

Awards

Best Teacher at IIT Indore in 2020 for the large class.

Courses Taught

UG

HS 108: Fundamentals of Economics

HS 210: Indian Economy

HS 323: International Economics

PG

HS 426: Economics of Innovation

Ph.D. Students Graduated

Manu Jose: R&D Tax incentives and innovations: Evidence from manufacturing firms in India. Defended in May 2021. Mohd. Shadab Danish: Essays on Economic Valuation of Patents in India. Defended in July 2021.

Workshops and Conferences

- Workshop on Educational Dynamics on Real & Virtual Platforms….Copyright Implications on October 10, 2020. Speakers: Professor Prabuddha Ganguli, CEO Vision-IPR and Adjunct Faculty, IIT Jodhpur, Co-Principal Investigator, National Digital Library of India, IIT Kharagpur and Mr Jagdish Sagar (IAS retired) Advocate, Delhi (IAS Retired)
- Budget 2021: Panel Discussion along with Dr. K.C. Pradhan on 4 February 2021. Speakers: Prof. N.R Bhanumurthy (Vice-Chancellor of Bengaluru Dr. B.R. Ambedkar School of Economics University (BASE University). Prof. Neeraj Hatekar (Prof. at University of Mumbai)

Publications

12 (from April 1, 2020-March 31, 2021); 44 total

Dr. Pritee Sharma
Associate Professor
psharma@iiti.ac.in

Dr. Pritee Sharma is an Associate Professor in the Department of Economics of the School of Humanities and Social Sciences (HSS). She obtained her PhD. from IIT Bombay on, 'Implications of Input Subsidies on Agricultural Productivity and Rural Poverty in India'. Her research is concerned with food security, agricultural productivity, rural poverty, and international trade in agriculture sector. Her main research interests are in the areas of Environmental Economics and Development Economics. She previously worked at Indian Institute of Management Ahmedabad (IIMA) and Gujarat Institute of Development Research (GIDR). She was also a team member for research assignments undertaken for the Ministry of Agriculture (MoA), Ministry of Statistics, Planning and Implementation (MoSPI), Ministry of Environment and Forests (MoEF), Government of India. She has also done research assignments for the Rockefeller Foundation and the World Bank and is a Research Fellow of Earth System Governance International Association based at Utrecht, The Netherlands. Her research assignments and the supervision of doctoral research work mainly consist of understanding and analysing food security, agricultural productivity, rural poverty and international trade concerns for India. Her research group includes PhD. students and external honorary members working on Sustainability Issues from various perspectives. She also teaches undergraduate and post graduate level courses in environmental economics, sustainability studies and institutional economics. Dr. Pritee also researches on stakeholder issues in climate change governance, resilience building, adaptive capacity aspects of climate change, and land and forest degradation from urban and rural poor's perspectives. All her work has been till date pertaining to governance, efficiency and policy in Indian context.

Awards

- Keynote Speaker on Economic Policy at International Workshop on Nutrition Sensitive Agriculture held at Bhopal (2018)
- Panel discussant and speaker at the Earth System Governance International Project meeting at University of Lund, Lund, Sweden (2017)
- Expert in Energy Security Analysis at "The Energy Workshop," at EPFL, Lausanne, Switzerland (2017)
- Referee for OPSEARCH Journal of Operational Research Society of India (2016-17)
- Invited as speaker at International Lecture Series Programme, Penang, Malaysia (2015) Invited as DRR (Disaster Risk Reduction) expert at International Council for Local Environmental Initiative, ICLEI, Bangkok (2015)

Courses Taught

UG

HS 108: Fundamentals of Economics

HS 210: Indian Economy

HS 323: International Economics

PG

HS 418/618: Sustainability Studies

HS 628: Institutional Economics

Dr. Sanjram P. Khanganba
Associate Professor
sanjrampk@iiti.ac.in

Dr. Sanjram Premjit Khanganba works as a human factors research practitioner. His scientific research revolves around investigating aspects of applied cognition in system development, design, and evaluation. He has strong dedication towards addressing issues related to human-system interaction in the pursuit of technological innovation, improvement, and optimal utilization of human capabilities. He emphasizes on community level intervention in addressing real-world problems. He engages local community members in conducting user testing and conceptualizing services. His research contexts range from road safety and complex technological environments to social design. He employs experimental investigation in the laboratory as well as field-testing involving analysis of gaze and electrophysiological data. His research group is actively involved in constantly promoting research activities related to ICT in Community Systems primarily connected with remote areas of India's Northeast Region (NER). His social-centric research activities are aligned with schemes promoted by the Government of India in critical thrust areas of national importance, such as- Technology Interventions for Disabled and Elderly (TIDE), Equity Empowerment and Development (SEED), Department of Science and Technology and R & D in Convergence Communications & Broadband Technologies (CC&BT) Group, Ministry of Electronics and Information Technology (MeitY). At present, his research at 'Human Factors & Applied Cognition Lab' concentrates on broad domains of- Automotive & Transport UX, Community Systems, Interactive Systems, Smart Environments & Automated Systems, Medical & Healthcare UI, Assistive Systems for Rehabilitation, and Performance. He is a founding member of HCI Professional Association of India and is actively associated with Indian Society of Ergonomics. He is currently a member of the Technical Committee of Visual Ergonomics, International Ergonomics Association.

Major Awards and Recognitions

Sajad Ahmad Najar's doctoral work "Visuospatial Working Memory and Distracted Driving: Deciphering Gaze Behavior, Cognitive Workload, and Driving Errors" featured in Visual Ergonomics Technical Committee Newsletter (April 2020), International Ergonomics Association.

Courses Taught

- HS 203: Psychology (U.G.)
- HS 671: Human Factors and Higher Cognitive Processes (P.G.)
- Swayam Course, Introduction to Human Factors and Ergonomics (Course Category: Design Engineering, Host: IDC School of Design, IIT Bombay)
- "Eye movement and visual cognition" EQIP-III STC on "Artificial intelligence driven biomedical data analysis for disease diagnosis", 05-10 November, 2020.
- "Human-System Interaction: Challenges and Opportunities" QIP Sponsored Short Term Course (STC) on "Computational Methods in Signal Processing and Machine Learning" 14-19 December, 2020.
- "Visuospatial Processing and Human-System Interaction" AICTE QIP-Short Term Course on Visual Cognition 04 to 09 October 2021, National Institute of Technical Teachers Training and Research, Chandigarh.

Conferences and Workshops Organized

- Conference (One of the General Chairs)

  IndiaHCI2020, Emerging Trends in Technology Design, 5-8 November, 2020. https://www.indiahci.org/2020/conference/

- Workshop (One of the Organizers and Expert Speaker)

  IEEE International Conference on Advanced Networks and Telecommunications Systems, 14–17 December, 2020, Workshop on Transformation through Rural Connectivity: the Role of 5G and B5G Technologies.

- HCI in Rural Contexts: Distinctions, Opportunities, and Possibilities. https://ants2020.ieee-comsoc-ants.org/transformation-through-rural-connectivity-the-role-of-5g-and-b5g-technologies/

Dr. Neeraj Mishra

Assistant Professor
nmishra@iiti.ac.in

Dr. Neeraj Mishra is an Assistant Professor in Sociology in the School of Humanities and Social Sciences (HSS), Department of Sociology, IIT Indore. He has received his Ph.D. from the University of Bonn, Germany and his Postdoc from the University of Amsterdam. Working in the field of democracy, public sphere and development, Dr. Mishra's research interests include rural and tribal development studies, sociological theory, Adivasi development in Jharkhand, Sociology of Development, Environmental Sociology, Politics of Water Governance and Computer Assisted Qualitative Data Analysis (CAQDA).

Courses Taught

Dr. Ashok Kumar Mocherla

Assistant Professor
ashokmocherla@iiti.ac.in

Dr. Ashok Kumar Mocherla is an Assistant Professor of Sociology in the School of Humanities and Social Sciences, Department of Sociology, IIT Indore. He received his doctorate from the Indian Institute of Technology Bombay. Before joining IIT Indore in March 2018, he was a faculty member in the School of Humanities and Social Sciences at IIT Mandi. His areas of academic interest are Sociology of Religion, Caste, and Indian Christianity, Sociology of Faith Healing and Public Health. He also has a keen interest in Sociology of Education (with reference to the growing transnational migration and commodification of engineering education in India).

Courses Taught

HS 302: Environmental Studies: Social Aspects IHS 482: Introduction to International Development & Area Studies HS 616: Advanced Sociological Theory HS 205: Understanding Sociology

Selected Publications

Book : Dalit Christians in South India: Caste, Ideology and Lived Religion (Routledge, 2021).

Dr. Akshaya Kumar

Assistant Professor
akshaya.kumar@iiti.ac.in

Dr. Akshaya Kumar is an Assistant Professor of Sociology in the School of Humanities and Social Sciences (HSS), Department of Sociology, IIT Indore. He received his doctorate from the University of Glasgow. His research in Film, Media and Cultural Studies revolves around South Asian Film and Media. He has published extensively on News Media, Crime and Reality Television, Hindi Cinema, Stardom, Language Politics and the question of provinciality in Regional Cinema. Most of his work, drawing upon his Ph.D. dissertation, discusses the explosive growth of Bhojpuri Cinema and its attendant complexities with respect to labour, gender, urban resettlement, and region- formation. He also spent two months as an exchange fellow at Columbia University, New York. Prior to joining at IIT Indore, he taught for a year at Ambedkar University, Delhi.

Courses Taught

Dr. Ananya Ghoshal

Assistant Professor
aghoshal@iiti.ac.in

Dr. Ananya Ghoshal is an Assistant Professor of English in the School of Humanities and Social Sciences (HSS), Department of English, IIT Indore. She received her doctorate from the Department of English Literature at the English and Foreign Languages University (formerly CIEFL), Hyderabad, on the influence of music in literature (2016). Her pre-doctoral research was conducted in the Department of English at the University of California, Berkeley, on a Fulbright-Nehru Fellowship. Her primary areas of interest include Word and Music Studies, Narratives of the Anthropocene, Performance Studies, Digital Humanities and Visual Culture. Ananya is also an Official Alumni Ambassador of UC Berkeley and represents her alma matter in outreach and mentoring events across India and the USA.

Ananya has previously taught at the English and Foreign Languages University and Forum on Contemporary Theory, Baroda (as an academic fellow). She has lectured and presented her work in various universities, at Oxford, Chicago, Berkeley, MIT; and most recently, at Stanford. At IIT Indore, she guides the 'Literature, Performance, and Other Arts' Research Group. The members of the group study the distinct yet deeply interconnected ways of understanding literature and the other arts. Working at the intersections of texts and the social, historical, and cultural contexts that produced them, the group examines the meaning, form, and style of literary and artistic works while exploring their imaginative and creative potential on a performance stage/screen.

Courses Taught

Autumn 2020: HS 159: English Language and Communication (co-instructor), IHS 444: Literature of the Twentieth Century (Coordinator and sole instructor), HS 641: English Communication Skills (Coordinator and co-instructor), HS 743: Indian English Fiction (Coordinator and sole instructor)

Spring 2021: HS 159: English Language and Communication (co-instructor), HS 641: English Communication Skills (Coordinator and co-instructor), HS 742: Twentieth Century and the European Novel (Coordinator and sole instructor)

Selected Publications

Book chapter- "Reading Interrupted: Translating Disability in 'Subha" in Disability in Translation: The Indian Experience, edited by Someshwar Sati and G. J. V. Prasad. Abingdon, Oxon ; New York, NY : Routledge, Taylor & Francis Group, 2020.

Invited talks/lecture

- 'Integrating Eco Cinema, and the Digital Anthropocene in Education: New Temporalities and Creative Responses' at Stanford University on July 15, 2021. This invited talk was part of the "Exploring Humanities Pedagogies: Conversations, Commonalities, and Connections", virtual conference organized by the Humanities Pedagogy Collective and the Center for Teaching and Learning at Stanford.
- 'How to Write a Statement of Purpose', workshop at IIT Indore, organized by the Students' International Affairs Cell, on June 17, 2021.
- 'Of Luminous Presence: the portrayal of women in Satyajit Ray's Devi/Goddess (1960), Mahanagar/The Big City (1963), and Agantuk/The Stranger (1991)' at the Women's Studies Research Centre, the Maharaja Sayajirao University of Baroda, on April 8, 2021.
- 'Ekphrasis in Literature' for Intersections: Where Ideas Meet under the aegis of Arts faculty, Banaras Hindu University, on December 21, 2020.
- "The 'Short Story'- A Reappraisal" for the inaugural Webinar Series of DOT Talks organized by Tetso College, Dimapur, Nagaland. Press Report on the talk is available on Nagaland Page of April 25, 2020.

COVID-19 Initiatives: Outreach and Research

Outreach initiative:

As the Convener of the Swachh Bharat Abhiyan, Ananya initiated and coordinated a project on "Visual content as an aid to spreading awareness against the spread of COVID-19" in May 2020.

Project Description: As the COVID-19 outbreak continues to spread in India, awareness and dissemination of information are the need of the hour. During the first wave, most information concerning spreading awareness of the pandemic was disseminated through text-heavy posters, documents, and bulletins, even though a significant number of our countrymen and women cannot read. While ordinarily, this would not

have been a problem as the information would have eventually circulated through word-of-mouth, the new norm of social distancing restricted the scope of such interactions. Ananya conceptualized a unique digital and social media-based project where all information would be exclusively disseminated through art and visual cues. She worked alongside the Swachh Bharat Team, Avana as well as students across disciplines to design new innovative posters aimed at raising awareness of COVID-19 as well as busting common myths/false information regarding the pandemic. On completion, the posters were submitted to the Government of India's Swachh Bharat Mission digital repository for pan-India circulation. At a more localized level, two posters created by the student members have also been published by the Indore daily English newspaper, Free Press (dated May 13 & May 22, 2020). This is also a dynamic project as the situation regarding COVID-19 continues to be fluid.

Research initiative(s):

Ananya also delivered two invited talks:

- 'Art in the Times of the Coronavirus' for the Online Faculty Development Program sponsored by AICTE at the Department of Electronics & Communication Engineering, Acropolis Institute of Technology & Research, Indore on September 5, 2020.
- An invited Plenary lecture titled 'Revisiting The Seventh Seal (1957): Black Death in Europe and A Game of Chess' at the International Webinar on 'Epidemics, Body, and Medicine: Inquiries through Literary and Cultural Texts' organized by the Department of English, Gokhale Memorial Girls' College, University of Calcutta, on June 14, 2020.

Dr. Shomik Dasgupta

Assistant Professor
shomikdasgupta
@iiti.ac.in

Dr. Shomik Dasgupta is an Assistant Professor of History in the School of Humanities and Social Sciences. His work pertains to the study of South Asian History. His research interests include the intellectual history of the 18th and 19th century, 18th-century social history and the everyday histories of work in early-colonial government and administration. At a broader level, he is interested in Indian responses to colonialism from the point of view of the role of language in the creation of social facts, intentionalities, collectivities, and institutions. He completed his PhD. from King's College, the University of London. His book, Ethics, Distance and Accountability: The Political Thought and Intellectual Context of Rammohun Roy, c.1772-1833, is scheduled to be published by the Oxford University Press (India) in November 2021.

Awards

Dr. Dasgupta received the Best Teacher Award in 2021.

Courses Taught

Dr. Kalandi Charan Pradhan

Assistant Professor
kcpradhan@iiti.ac.in

Dr. Kalandi Charan Pradhan is an Assistant Professor in the School of Humanities and Social Sciences (HSS), Department of Economics. He received his doctorate from the Indian Institute of Technology Bombay. His research interests include: Development Economics, Sustainable Development. Applied Econometrics, Migration Studies, Labour Economics and Socio-Economic impacts of Climate Change.

Awards

Dr. Pradhan received the Excellence in PhD Research Award from IIT Bombay in August 2020 for his doctoral thesis and associated publications.

Publications

KC Pradhan and K Narayan, 'Does climate change induce labour migration ? Evidence from Semi Arid Tropics region of India', Journal of Public Affairs (August 2020), 1-15. DOI:10.1002/pa.2323

Wiley Publisher, listed in Scopus and B Index in ABDC list

Accepted for publication: KC Pradhan and Priyabrata Sahoo, 'Poverty reduction among Social and Religious groups in undivided Andhra Pradesh of India: An Analysis of inclusiveness during the Post Reform Period', The Indian Economic Journal, Sage Publisher.

Listed in B index in ABDC list and UGC-Care list.

Courses Taught

Autumn Semester 2020-21 Fundamentals of Economics (HS 108) for UG International Economics (HS 323) for UG Sustainability Studies (HS 618/HS 418) for UG and PG Spring Semester 2020-21 Fundamentals of Economics (HS 108) for UG Autumn Semester 2021-22 Econometrics (HS 624) for PG Development Economics (HS 622/HIS 422)

Conferences and workshops organised

Dr. Pradhan coordinated invited talks on "Budget 2021: A Panel Discussion, India" on 4th February 2021. Resource Persons Invited: Prof. Neeraj Hatekar, Mumbai School of Economics and Policy, University of Mumbai, Maharashtra, and Prof. N. R. Bhanumurthy, National Institute of Public Finance and Policy, New Delhi.

COVID-19 related initiatives on research and outreach

Dr. Pradhan initiated the construction of an COVID-19 spread index and COVOD-19 Active case index and their determinants across Indian states by geographical regions and by income level along with one of his internship students.

Dr. Mohanasundari Thangavel

Assistant Professor
mohana@iiti.ac.in

Dr. Mohanasundari Thangavel has joined as Assistant Professor in the Department of Economics, School of Humanities & Social Sciences in Feb 2021. She completed her Ph.D. in Agricultural Economics with a Specialization in Natural Resource and Environmental Economics from Tamil Nadu Agricultural University, Coimbatore. Her research interests include Agricultural Economics, Resource Economics: Energy, Water and Agroforestry, Environmental Economics, Climate Change Adaption and Impact Studies, Consumption Pattern, Farmer Producer Organizations. Before joining IIT, she was working as the CEO of Karur Velaan Farmer Producer Company in Tamil Nadu. In addition, she also has worked on international projects such as AVRDC-World Vegetable Centre and IWMI-TATA Tank Irrigation Project. She was working as an Assistant Professor at PGP College of Agriculture Science, Tamil Nadu where she was teaching various undergraduate courses in the Department of Agricultural Economics.

Awards and Recognitions

Young Women Educator & Scholar Award given by National Foundation for Entrepreneurship Development (NFED) in the year 2017

Publications

K. Palanisami, and Mohanasundari T. (2020). Sustaining tank irrigation in south India through time-tested measures. In K. Fujita and T. Mizushim (Eds.), Sustainable Development in India. Taylor & Francis group. Pg. 88-108.

Shri. Ambassador Gurjit Singh

Honorary Professor
International Relations

The School of Humanities and Social Sciences (HSS) is also proud to host the Honorary Professor of International Relations Studies, **Ambassador Gurjit Singh**. Appointed to the Indian Foreign Service in 1980, Ambassador Gurjit Singh has served in Indian Missions in Tokyo (twice), Colombo, Nairobi, Rome and was the Ambassador of India to Ethiopia (2005-2009), Indonesia (2012-2015), Germany (2012-2015), Djibouti, Timor-Leste, ASEAN, and the Representative of India to the African Union, the Economic Commission for Africa and IGAD. He was also the Deputy Permanent Representative of India to UNEP and UNHABITAT.

Ambassador Singh chairs the CII Task Force on the Asia Africa Growth Corridor and comments on current issues pertaining to International affairs, development, and investment promotion in India and abroad. He frequently contributes essays and articles to journals and books on issues related to economic development and trade. Currently, he is an Honorary Professor in the School of Humanities and Social Sciences at IIT Indore.

Ambassador Singh has published The Abalone Factor: An overview of India-Japan Business Relations in 1997, which won him the Bimal Sanyal Award for Research by a Foreign Service officer. His subsequent books included The Injera and the Parantha: Enhancing the Ethio-India Relationship (2009) and Masala Bumbu (2015). Ambassador Singh is also the author of an Amar Chitra Katha comic book on the legacy of the India -Indonesia relationship. His edited book Opportunity Beckons: Adding Momentum to the Indo-

German Partnership was released in January 2017 in Berlin. He is presently working on his next book on Africa. Ambassador Gurjit Singh has contributed to several journals and news papers as well as appeared on TV and academic discussions. On TV he is frequently on Rajya Sabha TV explaining international matters. Recently he chaired a session on Revitalizing Africa's Healthcare at 16th CII Africa Conclave. With health ministers Dr Dikoloti of Botswana, Dr DVN Milang of Equatorial Guinea, Dr Rashid Aman from Kenya and Dr.Mangwiro of Zimbabwe. In February he Chaired a session for the Sankalp Africa Summit on Building Africa's Industry to Global Competitive Levels with Ethiopian Senior Minister Arkebe, President Trade Development Bank Admassu Tadesse, and VP EBID(ECOWAS Bank) Dr Diagne. https://www.youtube.com/watch?v=RErElctbr8I

Achievements

- He gave the keynote address at the National Defense College on India as a Net Security Provider in the Indian Ocean in June and Governance Challenges in Africa in May.
- He is a regular contributor to newspapers like Hindu Business lIne, Indian express, and Tribune. Some of his writings in these are:
  - https://www.tribuneindia.com/news/punjab/stronger-us-japan-ties-augur-well-for-india-239665

  - https://www.thehindubusinessline.com/opinion/theres-room-for-more-fdi-from-japan/article34369088.ece
- He also contributes regularly to think tanks like Observer Research Foundation, Vivekananda International Foundation, Gateway House and Chanakya Forum. A sample of this, is at:
  - https://www.orfonline.org/expert-speak/india-germany-at-70-four-big-ideas/
  - https://www.vifindia.org/2021/may/10/india-supports-asean-in-its-myanmar-initiative
  - https://www.gatewayhouse.in/uk-pivots-to-asia/
  - https://chanakyaforum.com/return-of-the-samurai-spirit-japan-defense-white-paper-2021/

Courses Taught

He has taken lectures for the courses of Economics, International Affairs and Cultural Studies.

Dr. Sanchita Verma

Visiting Assistant Professor
sanchitaverma@iiti.ac.in

Dr. Sanchita Verma is a Visiting Faculty in the School of Humanities and Social Sciences (HSS), Department of English, IIT Indore. She was awarded her Ph.D. in 2017 from the Indian Institute of Technology Delhi. Dr. Verma was previously employed as a Consultant in the National Institute of Educational Planning and Administration, New Delhi (NIEPA) from 2017-2020. She is also a Resource Person with NIEPA. Her current research interest is to work further on her Ph.D. topic (The Discourse of Silence in Multilingual and Multicultural Classrooms) and develop a robust spectrum and typology of silence in Indian classrooms. Her broad research area is in Discourse Studies, Pragmatics, Language and Communication and Ethnographical Studies. She is also an empaneled reviewer for the journal Springer Nature Social Sciences (SNSS).

Courses Taught

Autumn 2020: HS 442/642: Language and Mind, HS 641: English

Communication Skills, HS 159: English Language and Communication

Spring 2021: HS 641: English Communication Skills, HS 159: English Language and Communication (Coordinator)

Autumn 2021: HS 159: English Language and Communication (Coordinator)

Publications

02 journal articles have been communicated, one by invitation, for the inaugural issue of the journal Children First- A Journal on Children's Lives, published by Delhi Commission on Protection of Child Rights (DCPCR), Delhi.

Invited talks/lecture

- 'Appreciating Field Methods: An Ethnomethodological Perspective' at National Institute of Educational Planning and Administration (NIEPA), New Delhi in February 2021.
- 'Emerging Trends in Field Methods' by National Institute of Educational Planning and Administration (NIEPA), New Delhi in March 2021.

Any other major events/development: development of new courses

Two PG courses (Applied Linguistics and Advanced Discourse Studies) have been recommended by the SPGC to the Senate IITI.

COVID-19 Initiatives: Outreach and Research

Research initiative(s): Journal Article

Dr. Verma has written a research paper titled 'Mapping Children's Silence Through the Discourse of Pandemic Covid-19' which is concerned with the impact of the pandemic on the lives of children; on invitation, by DCPCR (Delhi Commission for Protection of Child Rights) for the inaugural issue of their journal.

Department of Biosciences and Biomedical Engineering

Research Thrust/Facility

- Fluorescence-Activated Cell Sorting (FACS) Sorter & FACS Analyzer (BD)
- Confocal Microscope
- Atomic Force Microscopy (AFM) & Field Emission

  Scanning Electron Microscopy (FE-SEM)
- Quad Time-of-Flight (Q-TOF), Liquid Chromatography- Mass Spectrometry (LC-MS) & Gas Chromatography- Mass spectrometry (GC-MS)
- Real Time PCR, Iso Electric Focusing, Photo-luminescence Spectroscopy

Application Areas

- Disease Diagnosis
- Personalised Therapy
- Drug Discovery & Delivery

Summary and Vision of the Group

The Biosciences and Biomedical Engineering (BSBE) group at the Indian Institute of Technology Indore was founded in July 2012 with a vision of establishing a Centre of Excellence that will focus on human resource development and research in Biosciences, Bioengineering and Biomedical Engineering. The BSBE group aims to be internationally recognized in Bio-related areas and produce the leaders of tomorrow in the field, with the integrated use of training, and career development efforts to improve individual, group and organizational effectiveness.

Our vibrant group of faculty members and research scientists aspire to create an ambience for the smooth pursuit of scholarly activities in research as well as training on the study of life and living organisms, ranging from simple bacteriophage to complex multi-cellular organisms such as humans; with the focus being on structure, function, growth, origin, evolution, distribution, and taxonomy. In addition to basic biology research, the BSBE group seeks to contribute towards applied research on practical problems in the country.

With the application of engineering principles, design concepts of biology, medicine and other sciences, the group hopes to devote its energy and expertise on translational technology innovations to achieve improved longevity, health, and well-being for humans; to pursue research and development activities resulting in discoveries in imaging techniques, diagnostic kits; and novel therapies. Additionally, the group actively engages with physicians and clinicians abroad and in India for undertaking patient-based research. The long-term vision is to pursue cutting-edge research that provides sustainable solutions for public health problems. A methodology is being developed by which active participation with clinicians guides patient-based research. This model must be widely practiced in India to achieve progress in improving the healthcare of its population. The group aims to take these discoveries up to clinical trials.

The group seeks to create a unique institutional environment to conduct multi-disciplinary research that translates scientific and technological advancements into innovations which will not only improve public health but also contribute immensely in the areas such as agriculture, energy, and environment.

IIT Indore is recognized for its science and technology research and offers many opportunities for interdisciplinary collaborations and involvement with various departments and research centres including the departments of Computer Science and Engineering, Electrical Engineering, Mechanical Engineering, Physics, Chemistry, Mathematics, Humanities, and Social Sciences. Biosciences and Biomedical research will be one of the thrust areas at IIT Indore.

Facilities

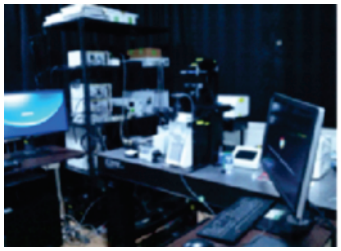

IIT Indore has many unique state-of-the-art laboratories in Chemistry, Physics and other Engineering departments. Such laboratories are also being built for Biosciences and Biomedical Engineering research. Additionally, the faculty, postdoctoral fellows, research scholars, and staff have access to the Institute library and e-resources- a combined collection of over 15,500 books and journals. Moreover, the Institute's

'Sophisticated Instrumentation Centre' (SIC) (equipped with Single Crystal X-ray Diffraction, Nuclear Magnetic Resonance, Atomic Force Microscopy, Mass Spectrometry, Elemental Analysis, and Single Molecule Imaging and Spectroscopy facilities) provides a unique opportunity to access these equipments for our research.

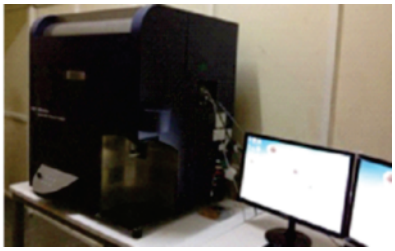

Currently, BSBE group have a Cell Culture Facility with Class II A2 bisafety cabinets, florescence microscopes, electroporator, CO2 incubators, LN2 storage. Additionally, we have wet laboratories for performing Molecular Biology, Biochemistry and Microbiology experiments that includes Real time PCR,

96 well plate reader, gel doc, etc. Moreover, we set up a Sophisticated Instrumentation Centre with the following Sophisticated Instruments:

1. FACS Sorter [BD FACS AriaIII Fusion – 4 laser]
2. FACS Analyser [BD LSRFortess – 5 laser]
3. Confocal Microscope [Olympus including FLIM (fluorescence correlation spectroscopy), FCS (fluorescence correlation spectroscopy), Multi-photon emission imaging, and Mai Tai Femto- second laser]
4. Proteomics facility [AKTA avant, Isoelectric focusing, 2D gel electrophoresis]

Confocal Microscopy

Introducing Faculty of BSBE

- Dr. Ganti S. Murthy
- Dr. Avinash Sonawane
- Dr. Prashant Kodgire
- Dr. Sharad Gupta
- Dr. Kiran Bala
- Dr. Mirza S Baig
- Dr. Hem Chandra Jha
- Dr. Parimal Kar
- Dr. Abhijeet B. Joshi

Dr. Ganti S. Murthy

Professor

ganti.murthy@iiti.ac.in

(PhD. in Agricultural and Biological Engineering, University of Illinois at Urbana-Champaign, 2006)

Previous Employment

(includes post-doctoral experience)

- 2019-Present, Professor, Department of Biosciences and Biomedical Engineering, Indian Institute of Technology Indore.
- 2017-2019, Professor (tenured), Biological and Ecological Engineering, Oregon State University, Corvallis, Oregon, USA
- 2013-2017, Associate Professor (tenured), Biological and Ecological Engineering, Oregon State University, Corvallis, Oregon, USA
- 2007-2013, Assistant Professor (tenure track), Biological and Ecological Engineering, Oregon State University, Corvallis, Oregon, USA

Academic associations with other institutions (Affiliate/Adjunct/Visiting posts)

- 2007-2019, Adjunct Professor, Water resources Graduate Program, Oregon State University, Corvallis, Oregon, USA
- 2007-2019, Adjunct Professor, Molecular and Cellular Biology Graduate Program, Oregon State University, Corvallis, Oregon, USA

Statement of Research Interests

a. Broad research area

- Technologies for sustainable bioprocessing and Systems analysis for sustainability and resilience

b. Research Highlights

Commercialized Technologies:

1. Advanced scale free fermentation controller.
2. A novel on-site landfill leachate treatment technology.

Pilot Scale Realizations of Technologies:

1. Novel mixed algal-bacterial cultures for treatment of domestic wastewaters.
2. High solid hydrolysis and fermentation reactors

Research that influenced industry practice:

1. Established that aflatoxin B1, does not affect dry grind ethanol process
2. Strategies to overcome stuck fermentations in modified dry grind ethanol processes

Patents, Publications, Events and Seminars

Patents

- Issued Patent: A dynamic optimal controller for control of fermentation processes. Office of technology management, University of Illinois at Urbana-Champaign. US Patent No: 7,862,992. Issued 4th January, 2011. This technology has been successfully tested in two commercial dry grind corn plants.
- Filed Patent: Wastewater treatment system and method. Office for Commercialization and Corporate Development, Oregon State University. US Provisional Patent No: 62/738,806. Filed 28th September, 2018. Mr. Steven White, my graduate student is a co-inventor on this application.
- Provisional Patent: A multi-scale control framework for sustainable management of engineered algae production systems. Office for Commercialization and Corporate Development, Oregon State University.

US Provisional Patent No: 62/190642. Filed 9th July, 2015. Dr. Ankita Juneja, my former graduate student is a co-inventor on this application.

Publications

(includes journal articles, books and book chapters)

(Partial list of 13 peer reviewed publications, 8 proceedings/abstracts, 1 edited book, 11 book chapters and 9 invited presentations in 2020-2021)

- Mitra, S. and Murthy, G.S.* 2021. Bioreactor Control Systems in Biopharmaceutical Industry: A Critical Perspective. Sys. Microbiol. Biomanufacturing.

Events/Seminars organized

- Session Moderator for Energy systems technical community poster session, Annual International Meeting (Since 2014) American Society of Agricultural and Biological Engineers, St. Joseph, MI.
- Course coordinator for QIP Course on "Understanding Classical Scientific Texts of India in an Immersive Sanskrit Environment" 22nd Aug. -2nd Oct, 2020 (62 hours)
- Course coordinator and chief instructor for TEQIP II Course on "Systems Analysis of Biofuels and Bioproducts" Dec 7-12, 2020 (30 hours).
- Course coordinator and chief instructor for TEQIP II Course on "Systems Analysis of Biofuels and Bioproducts" Jul 19 to 6th Aug., 2021 (45 hours).

Projects active during April 2019-March 2020

Title -

- Development of disinfection systems for the prevention and spread of CoVID-19 through indoor air. BIRAC, DST. (2021). Rs. 2,965,760. PI
- Design and evaluation of multi-objective controller for a continuous biocrude reactor. SERB, DST. (2021-2024). Rs. 5,180,164. PI
- Hours to Milliseconds: Leveraging machine learning methods to reduce the computation time for crop yield prediction. National Supercomputing Mission/High Performance Computing. (2021-2023). Rs. 1,258,000. PI
- India-Korea Joint Network Centre for Environmental Cyber Physical Systems
- Technology Innovation Hub DRISHTI (Investigator)

Duration :

- 2021-2021
- 2021-2024
- 2021-2023
- 2020-2024
- 2020-2025

Funding Agency :

- BIRAC, DST
- SER, DST
- NSM/HPC, DST
- DST
- DST

Brief Description

- In this project we are developing disinfection devices for use in crowded areas to remove the viruses, bacteria and fungus.

- In this project we are developing a state-of-the-art model predictive controller for a unique continuous hydrothermal liquefaction reactor.
- In this project we are developing new machine learning models to reduce the computation time of crop models and develop capability to analyse thousands of potential cropping scenarios.
- In this project we are collaborating with various Indian and South Korean institutions to develop integrated sensor and physical systems for applications in agricultural domain.

In this project we are developing various products targeted at multiple stakeholders for de-risking agriculture through greater understanding of the factors that contribute to resiliency in agro-ecosystems at the regional and farm level through systems-level modelling.

Dr. Avinash Sonawane
Professor
asonawane@iiti.ac.in

(PhD in Molecular Enzymology, at the University of Marburg, Germany, 2004)

Previous Employment

(includes post-doctoral experience)

2019-Present, Professor, Department of Biosciences and Biomedical Engineering, Indian Institute of Technology Indore, M.P

2018-2019, Associate Professor, Department of Biosciences and Biomedical Engineering, Indian Institute of Technology Indore M.P.

2015-2018 Professor, School of Biotechnology, KIIT University, Bhubaneswar, India

2010-14 Associate Professor, School of Biotechnology, KIIT University, Bhubaneswar

2009 – 2010 Assistant Professor, School of Biotechnology, KIIT University, Bhubaneswar

2007-2008 Post-doctoral Fellow, European Molecular Biology Laboratory (EMBL), Heidelberg, Germany

2006 – 2007 Post-doctoral Fellow, Max-Planck Institute for Infection Biology, Berlin, Germany

2004 – 2006 Post-doctoral Fellow, Department of Medicine, Infectious Diseases, University of Florida, Florida, USA

International Fellow

- Humboldt Fellow (Experienced Researcher), Leibniz Center for Medicine & Biosciences, Research Centre Borstel, Borstel, Germany
- EMBO Fellow, Therapeutic Immunology Group, Karolinska Institute, Stockholm, Sweden,
- Swiss National Science Fellow, Institute for Medical Microbiology, University of Zurich, Zurich, Switzerland
- EMBO Fellow, Institute for Medical Microbiology and Hygiene, University of Ulm, Ulm, Germany
- Swedish Institute Fellow, Department of Clinical Sciences, University of Lund, Sweden
- JSPS Fellow, NARA Institute for Science and Technology, Takayama, Japan

Academic associations with other institutions (Affiliate/Adjunct/ Visiting posts)

- Humboldt Visiting Professor, Leibniz Lung Center, Borstel, Germany

Statement of Research Interests

a. Broad research area

- Tuberculosis pathogenesis
- Acute lymphatic Leukemia therapy

b. Research Highlights

- Demonstrated that Mycobacterium tuberculosis modulate peptide synthesis in stem cells to facilitate its survival in bone marrow
- Demonstrated that M. tuberculosis inhibit calcium ion channel to bipolarize host immunity during tuberculosis disease progression
- Developed novel asparaginase enzyme that can improve treatment of primary and relapse acute lymphatic leukemia

c. Awards and Achievements

- Elected as Fellow of Royal Society of Biology, UK
- Elected as Fellow of Maharashtra Academy of Sciences

Patents, Publications, Events and Seminars

Events/Seminars organized

1. Distinguished Lecture by Prof. Anil Sahasrabudhe, Chairman, AICTE, January 13, 2020
2. Distinguished Lecture by Prof. J. B. Joshi, February 5, 2020
3. Distinguished Lecture by Prof. N. K. Ganguly, Former DG, ICMR, February 17, 2020

Projects active during April 2020-March 2021

Title :

1. Phase I/II Clinical trial of a novel asparaginase mutant for the treatment of primary and relapse acute lymphatic leukemia
2. Development of Novel Benzo Fused Heterocycles to Improve the Treatment of Drug Resistant Tuberculosis.
3. To study the role of mesenchymal stem cells in the pathogenesis of tuberculosis in bone marrow.
4. Pharmacological evaluation of a novel asparaginase used for the treatment of acute lymphoblastic leukemia (ALL).
5. Development of theranostic targeted magnetic nanoparticles for diagnostics and treatment of tuberculosis.
6. Chemical modification of novel asparaginase mutants to improve the treatment of acute lymphatic leukemia.

Dr. Prashant Kodgire

Associate Professor
pkodgire@iiti.ac.in

(PhD from IIT Bombay, Powai, Mumbai, Maharashtra)

Previous Employment

(includes post-doctoral experience)

- Postdoctoral Scholar / Fellow, University of Chicago (2008-2012): Department of Molecular Genetics and Cell Biology, Chicago, IL, USA
- Research Associate, Wockhardt Research Centre (1999-2001): Biotechnology Group, Wockhardt Research Centre, Aurangabad, India

Academic associations with other institutions (Affiliate / Adjunct / Visiting posts)

- Management Council Member at Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon, Maharashtra
- Academic Committee Member of Vidyarthi Vigyan Manthan (VVM), an initiative of Vijnana Bharati (VIBHA), in collaboration with Vigyan Prasar, an autonomous organization under the Department of Science and Technology, Government of India and National Council of Educational Research and Training (NCERT), an institution under the Ministry of Human Resources and Development.

Statement of Research Interests

a. Broad research area

- Molecular Biology, Molecular Immunology, Somatic hypermutation, Chromatin structure and gene regulation

b. Research Highlights

- Our ongoing research is broadly in the area of Molecular Immunology and Molecular Biology, especially focusing on immunoglobulin gene regulation and understanding the molecular basis of somatic hypermutation (SHM) of immunoglobulin genes. Our group's current efforts are on identifying the molecular mechanisms of action and targeting of activation-induced cytidine deaminase (AID) on the immunoglobulin (Ig) genes.

c. Awards and Achievement

1. Excellence in Teaching Award from IIT Indore in 2016.
2. Ramanujan fellowship from the Department of Science and Technology, Govt. of India, India
3. Irvington Institutes postdoctoral fellowship from the Cancer Research Institute, USA
4. International postdoctoral fellowship award from the Lady Tata Memorial Trust, UK, for research in Leukaemia
5. Senior Research Fellowship from the Council of Scientific and Industrial Research (CSIR), India
6. Junior Research Fellowship from the Council of Scientific and Industrial Research (CSIR), India

6. Singh AK, Tamrakar A, Jaiswal A, Kanayama N and Kodgire P*, SRSF1-3, a splicing and somatic hypermutation regulator, controls transcription of IgV genes via chromatin regulators SATB2, UBN1 and histone variant H3.3, Mol. Immunol., 2020, 119:69-82.

Events/Seminars organized

1. Non-genetic heterogeneity in Saccharomyces cerevisiae: Causes and consequences. Prof. P.J. Bhat, Professor, Department of Biosciences and Bioengineering, IIT Bombay, Mumbai.
2. Biopharma: 222 & Road-ahead, Mr. Bedadyuti Chakraborty, Associate Director – Training, Dr. Reddy's Laboratories, Hyderabad. Projects active during April 2020-March 2021

Title - Splicing, chromatin and somatic hypermutation of immunoglobulin genes

Duration - 2021-2024

Funding Agency - SERB_DST

Brief Description - In the proposed study, in addition to understanding whether the process of splicing and splicing factors involved in SHM, we are interested to study the role of chromatin modulator UBN1 in somatic hypermutation, as well as potential interactions of UBN1 with AID.

Title - Structural Insights of Outer Membrane Proteins(OMPs): Combating Gram-negative Bacterial Pathogens

Duration - 2021-2024

Funding Agency - ICMR

Brief Description - In this proposal, we are studying OMPs of pathogens associated with clinical cases using various biophysical, imaging and molecular approaches. These studies will be beneficial for the development of synthetic inhibitors, antagonist and recombinant vaccines.

Title - Flourimetric biosensor for detection and quantification of insecticides and pesticides using recombinant organo-phosphorus hydrolase expressed in E. coli

Duration - 2017-2021

Funding Agency - DBT

Brief Description - We are working towards the development of reliable, selective, cost-effective, as well as sensitive methods of detection of organophosphates in the environment, because of potentially fatal consequences of hazardous organophosphate pesticide exposure and limitations of the available treatment methods necessitate.

Title - Quantum dot based biosensor for early detection of prostate cancer using multiple biomarkers in biological samples

Duration - 2018-2021

Funding Agency - DBT_NER Twinning Project

Brief Description - Proposed study is for novel reliable and timely detection of fatal prostate cancer using multiple biomarkers in biological samples.

Dr. Amit Kumar
Associate Professor

(PhD from IIT-Roorkee, Roorkee, Uttarakhand, India)

Previous Employment

(includes post-doctoral experience)

Assistant Professor, IIT Indore

Research Scientist IIT Indore

Post Doctoral Research Associate The Scripps Research Institute USA

Post Doctoral Fellow SUNY Buffalo USA

Statement of Research Interests

a. Broad research area

- Drug Discovery, Target Identification for Cancer and Neurological Diseases, NMR Spectroscopy, Structural Biology.

b. Research Highlights

We basically work on nucleic acid repeats that form stable non-canonical secondary structures in various neurological disorders, cancers, and human pathogens including bacteria and viruses. We are the first in India working for targeting tri-nucleotide repeats disorders, one of the major cause of Huntington disease, myotonic dystrophy, spinocerebellar ataxias (SCAs), and Fragile-X-syndrome by using various small molecules including natural compounds like Myricetin, Piperine, Curcumin, etc., that have received good response from the scientific community Similarly, another class of secondary structure present in the Guanine rich nucleic acids; G-quadruplex motifs, and are used as drug targets in various cancers and pathogenic bacteria.

c. Awards and Achievements

- Associate Editor Scientific Reports 2016
- Brand Ambassador Bentham Publishers 2017
- Best Paper Award IIT Indore 2016
- Young Scientist DST 2013

Patents, Publications, Events and Seminars

  Curcumin regulates the r(CGG)exp RNA hairpin structure and ameliorates defects in fragile X-associated tremor ataxia syndrome. Frontiers in Neuroscience. 2020

Projects active during April 2020-March 2021

Title - Recognition of Human G-quadruplex structure by natural product Piperine and its derivative for mechanistic insight of its anti cancer activity

Duration - 2017 - 2020

Funding Agency - Science and Engineering Research Board (SERB)

Dr. Sharad Gupta

Associate Professor

shgupta@iiti.ac.in

(PhD from IIT Kanpur)

Previous Employment

(includes post-doctoral experience)

1. Postdoctoral Fellow, Department of Biomedical Engineering, Tufts University
2. Academic Coordinator, Department of Bioengineering, University of California Riverside
3. Assistant Project Scientist and Lecturer, Department of Bioengineering, University of California Riverside
4. Assistant Project Scientist, Department of Physics and Astronomy, University of California Riverside
5. Assistant professor, Department of Biosciences and Biomedical Engineering, IIT Indore

Statement of Research Interests

c. Broad research area

I am interested in interdisciplinary science and technology. My research lies at the intersection of Optics, Biology, and Biomaterials with a focus on its application in biomedical science and engineering, especially in diagnostics and therapy.

d. Research Highlights

Dr. Gupta has published 40 international peer reviewed research articles, 16 international peer reviewed conference proceeding papers, and 4 patents. His group has developed near infrared absorbing biocompatible iron-oxide and biologically inspired nanoparticles for biomedical applications. These particles have shown photothermal ability and improved contrast in NIR imaging.

e. Awards and Achievements

1 Department of Science & Technology, India and Abdus Salam International Center for Theoretical Physics, Trieste, Italy (DST-ICTP-2004) Fellowship: To attend the college on Medical Physics in Trieste, Italy.

2 Council of Scientific and Industrial Research (CSIR-2002) Travel Grant award: To present the research work at SPIE conference in San Jose, California, USA.

3 SPIE student travel grant award (2002).

Projects active during April 2020-March 2021

Title - Optically active biocompatible nanoparticles for imaging and photothermal therapy

Duration - 3 years

Funding Agency - ICMR, India

Brief Description - In this project we will be developing new type of nanoparticles for improved photothermal therapy of disease.

Title - Development of polarized angular light scattering and microfluidics technology for bovine sperm sexing

Duration - 2 years

Funding Agency - DBT, India

Brief Description - In this project we will develop a new technology for differentiating X and Y chromosome bearing bovine sperms using angularly polarized light scattering spectroscopy technique.

Title - Development of a portable nanotrap enhanced Raman spectroscopy (NTERS) system for disease diagnosis via body fluid analysis

Duration - 18 Months

Funding Agency - MSME, India

Brief Description - In this project we will develop a new technology for body fluid analysis for disease diagnosis.

Dr. Kiran Bala
Associate Professor
kiranb@iiti.ac.in

(PhD. - 2007)

Previous Employment

(includes post-doctoral experience)

- Associate Professor-Department of Biosciences & Biomedical Engg., Indian Institute of Technology Indore (Dec., 2018 – till date)
- Assistant Professor-Department of Biosciences & Biomedical Engg., Indian Institute of Technology Indore (Feb., 2017 – Dec., 2018)
- INSPIRE – Faculty, Indian Institute of Technology Indore (Nov., 2012 – Feb., 2017)
- DBT scientist DAVV, Indore (July 2012 – Oct., 2012)
- UGC Post-Doctoral Fellow Anna University, Chennai (Feb., 2009- Feb., 2011)
- Research Associate-TERI, Delhi (Nov., 2007 – Feb., 2009)

Statement of Research Interests

a. Broad research area

- Bioenergy, Bioremediation, Bioplastic production.

b. Research Highlights

- Nanoparticle biosynthesis and induction of biodiesel precursors simultaneously in the microalgal cells. Main focus of the study is to use unicellular eukaryotes (microalgae) as source of multiple products simultaneously.

c. Awards and Achievements

- Distinguished Alumni Award - 2021
- SERB Early Career Research Award - 2018.
- International Travel Support by DST, Delhi to attend 11th International Phycological Congress, held at Szczecin, Poland from 13th – 19th August, 2017.
- Fellowship under "Netherlands Fellowship Programmes (NFP) - NUFFIC" funded by Netherland govt. for refresher course in Bandung, Indonesia, 2015.
- International Travel Support by DST, Delhi to attend 4th International Conference on Algal Biomass, Biofuels and Bioproducts 2014, held at Santa Fe, New Mexico, USA.
- INSPIRE FACULTY Award - 2012 by DST, Ministry of Science & Technology, Delhi.
- Women Scientist Award by DBT under Bio- CARe Programme.
- Awarded UGC - Dr. D. S. Kothari Post Doctoral Fellowship sponsored by University Grants Commission.
- Awarded scholarship for Laboratory Capacity Training Program on "Air nicotine monitoring and analysis" at Johns Hopkins Bloomberg School of Public Health (JHSPH), Baltimore, MD, USA in 2008 funded by Institute of Global Tobacco Control, JHSPH.
- Awarded Fellowship under "Netherlands Fellowship Programmes (NFP) 08" for short course on "Water Treatment Processes and Plants" at UNESCO-IHE Institute for Water Education in Delft, The Netherlands.

Patents, Publications, Events and Seminars

Publications

(includes journal articles, books and book chapters)

- International Journals: 46
- Research papers in Proceedings of conferences: 02
- Book chapters: 07

Projects active during April 2020-March 2021

Title : Mobility grant LUH-IIT Indore Partnership under the " A New Passage to India Program"

Duration : 2019-2023 (4 years)

Funding Agency : German Academic Exchange Service (DAAD) funded project for LUH-IIT Indore Partnership under the " A New Passage to India Program"

Brief Description: Exchange grant to develop joint publications, and research work in the area of algae-bacteria consortia for biopolymer production.

Title : Innovative and efficient algae based system to reduce carbon dioxide emissions: A possible remedy to climate change

Duration : 2018-21 (3 years)

Funding Agency : Ministry of Earth Sciences, GOI

Brief Description : Usage of algae for carbon dioxide fixation has numerous benefits such as mitigation of carbon dioxide with simultaneous production of biofuels and other secondary metabolites. Carbon dioxide is fixed by green algae and cyanobacteria into sugar using light and water as source of energy and electron, respectively. This multistep photosynthetic reaction is main hypothesis behind current research plan.

Title : An innovative approach for development of an efficient and integrated algae bioenergy production system using biosynthesized nanoparticles

Duration : 2018-21 (3 Years)

Funding Agency : DST-SERB

Brief Description: Proposed research plan would help in development of an integrated solution for energy source and wastewater treatment using algae. Successful development of technology can lead and help authorities to take decision and implement this at centralized /decentralized level for treatment of wastewater simultaneously generating energy.

Title : Isolation, purification and therapeutic evaluation of novel peptides and bioactive compounds as DPP-IV inhibitors from magneto-primed soybean seeds and microalgae for diabetes treatment

Duration : 2021-2024 (3 years)

Funding Agency : DST-SERB (TARE scheme)

Brief Description: This project would explore potential of magnetic field to target enhanced in protein synthesis and novel peptides in soybean seeds and algae, which might act as effective inhibitors for DPP-IV.

Dr. Mirza S. Baig
Associate Professor
msb.iit@iiti.ac.in

(Ph.D. from Department of Biochemistry, CSIR-Central Drug Research Institute (CSIR-CDRI), Lucknow)

Previous Employment

(Includes post-doctoral experience)

- Associate Professor: Indian Institute of Technology Indore (IITI) (2018-present)
- Assistant Professor: Indian Institute of Technology Indore (IITI) (2015-2018)
- Research Scientist: Mayo Clinic, Rochester, USA (2014-2015)
- Postdoctoral Research Scientist: The University of Illinois at Chicago, USA (2010-2014)
- Research Associate: Indian Institute of Toxicology Research, Lucknow (2009-2010)

Academic associations with other institutions (Affiliate/Adjunct/Visiting posts)

- International Visiting Professorship, Bio-Medico University of Rome, Italy
- The Lady Davis International Professorship, Technion-Israel Institute of Technology, Israel
- IUBMB Mid-Career Research Fellowship, the University of Illinois at Chicago, USA
- ASM-IUSSTF Indo-US Professorship, University of California, USA
- INSA Visiting Scientist Fellowship, SMS Medical College, India
- Technical University Munich (TUM), Germany- Visiting Professor
- Cambridge University, United Kingdom- Visiting Professor and Research Collaboration
- Institute of Microbial Chemistry (IMC), Tokyo, Japan- Reserch Collaboration
- Middle East Technical University (METU), Ankara, Turkey-Visiting Professor and Research Collaboration
- KoC University, Istanbul, Turkey-Visiting Professor
- University of Cape Town, Rondebosch, South Africa-Research Collaboration
- University of Illinois at Chicago, USA- Reserch Collaboration Max Planck Institute for Heart and Lung Research, , Bad Nauheim, Germany-Reserch Collaboration University of Miami, Miami, USA-Research Collaboration

Statement of Research Interests

a. Broad research area

- Innate Immunity and Inflammation
- Drug discovery and development for inflammatory diseases

b. Research Highlights

- Inflammation and cancer- Our research focuses on the understanding of cell signaling pathways and transcriptional mechanisms that regulate the activation of macrophages in inflammation and cancer. Macrophage activation by microbial pattern recognition receptors, such as Toll-like receptors (TLRs), is critical for innate and adaptive immunity and has been extensively studied. However, these cells also play essential roles in resolving inflammation, maintaining tissue homeostasis and immune tolerance. We understand relatively little about the signaling pathways and molecular mechanisms that control the functions of macrophages in the context of their role in various chronic inflammatory conditions, including some cancers, rheumatoid arthritis, atherosclerosis, etc.

c. Awards and Achievements

- Virtual drug screening and repositioning- We utilize virtual or computer-aided drug design methods to model new compounds complementary to a target protein's shape and charge against inflammation and cancer. These virtually designed lead-like compounds could later be synthesized for biochemical and cellular testing. Drug repositioning can provide a safer alternative to developing new compounds as the repurposed drugs are clinically approved, have proven bio-availabilities, and well-characterized side-effect profiles.

1. International Visiting Professorship (2020), Bio-Medico University of Rome, Italy
2. The Lady Davis International Professorship (2020), Technion-Israel Institute of Technology, Israel
3. IUBMB Mid-Career Research Fellowship (2020), the University of Illinois at Chicago, USA
4. ASM-IUSSTF Indo-US Professorship (2020), University of California, USA
5. INSA Visiting Scientist Fellowship(2020), SMS Medical College, India

Title - Role of neuronal nitric oxide synthase (NOS1) in the TLR4-triggered inflammatory response via the SOCS1-P38-AP1 signalling axis.

Duration - 3Years

Funding Agency - Department of Science and Technology (DST), New Delhi Brief Description - These studies provide a new mechanism of inflammatory response. Further identification of novel targets and designing the novel small molecule/peptide will serve the new approaches for therapeutic strategy for inflammatory responses.

Dr. Hem Chandra Jha

Assistant Professor
hemcjha@iiti.ac.in

PhD. Birla Institute of Technology & Sciences, Pilani, Rajasthan India

Previous Employment

(includes post-doctoral experience)

- Junior research fellow at Bose Institute India (July 2003- Feb 2005)
- Senior Research Fellow at National Institute of Pathology (March 2005-Feb 2010)
- PDF and RA from University of Pennsylvania, Philadelphia, USA (March 2010-June 2016).
- Ramanujan Fellow at IIT Indore from July 2016-Feb 2017.
- Assistant Professor at IIT Indore from Feb 2017- till date

Statement of Research Interests

a. Broad research area

- Pathogens like virus (Epstein Barr Virus and SARS-CoV-2), bacteria (Helicobacter pylori) and parasite (Plasmodium Falciparum) associated disease pathogenesis.
- Host-pathogens interactions
- Drug discovery

Research Highlights

- Our research articles on SARS-CoV-2 have been highlighted by honorable Minister of Education, DD News, Outlook, The Week magazines and various national and e-portals.
- Virus infection cycle and pathogenesis mapping has been highlighted by DST, India.
- Several key points from this year research-
- Worldwide SARS-CoV-2 structure proteins mutation analysis from Jan 2020 to July 2020.
- Possible medicinal plants therapeutics for SARS-CoV-2 Spike and Nucleocapsid proteins.
- Possible drug repurposing for COVID-19 Wastewater treatment and environmental factors analysis in ongoing COVID-19 pandemic.
- Comorbidities such as neural and gastric system in COVID-19.
- Various age group and sex-based understanding in COVID-19
- Case studies in Indian COVID-19 patients with Malaria infection, Neurological complications and cancer patients.
- First time Epstein - Barr virus infection demonstration in glial cells and their consequences at cellular levels.
- In Gastric cancer- Establishment of co-infection model from Helicobacter pylori and EBV for the analysis of early markers from Kinases and other oncogenes.
- First time demonstration of co-infection models for Plasmodium falciparum and Epstein Barr Virus in cerebral malaria model.

Awards and Achievements

- Selected for Ramanujan fellowship in the year 2016 from Department of Science and Technology, India in Life Sciences stream.
- Selected for Ramalingaswami re-entry fellowship in the year 2015 from Department of Biotechnology, India. (Not availed).

- Appointed as Research Associate (junior faculty) at University of Pennsylvania, Department of Microbiology, Perelman School of Medicine, Philadelphia, USA on March 22, 2015.
- Qualified CSIR- UGC/ NET (National Eligibility Test), December -2002 for UGC – JRF (Junior Research Fellowship) in Life Sciences discipline.
- Awarded to Senior Research Fellow in independent fellowship from ICMR on July 30th, 2008, at National Institute of Pathology (ICMR), New Delhi.

- Visiting Research Associate, Michigan State University, USA (June 2012-February 2016)
- Postdoctoral Fellow, Max Planck Institute of Colloids and Interfaces, Potsdam, Germany (January 2010 – May 2012)
- Graduate Intern, Los Alamos National Laboratory, USA (June 2009- December 2009)
- Visiting Research Fellow, Research Center Juelich, Germany (February 2008 – July 2008)

Statement of Research Interests

a. Broad research area

- Computational Biophysics

b. Research Highlights

- Computational modelling of PTM (post-translational modification) in proteins
- Multiscale modeling of biomolecular recognitions, including protein-protein, protein-nucleic acids, and protein-ligand interactions.
- Computer Aided Drug Discovery
- Free energy simulations and enhanced sampling methods.
- Computational modeling of host-pathogen interactions
- Interaction of carbohydrates (glycans) with proteins and membrane.

c. Awards and Achievements

- Early Career Research Award, DST-SERB, Govt of India (2017)
- Ramalingaswami Re-entry Fellowship, Department of Biotechnology, Govt. of India (2015) Postdoctoral Independent Career Potential Award, Michigan State University (2014).

Events/Seminars organized

- Cloud-based 2-days hands-on workshop on drug discovery, June 1-2, 2021.
- Faculty Training Program on : Data Science & Analytics, March 2-12, 2020
- QIP-sponsored 5-days course on Nano-biotechnology in Drug Discovery, Development and Delivery March 11-15, 2020.
- TEQIP-sponsored 3-days course on: Introduction to Scientific Computing in Engineering January 15-17, 2020. Projects active during April 2020-March 2021

Title: Redesigning of antibody and finding novel inhibitors for dengue virus using computational approaches

Duration: 23rd March 2021 – 22nd March 2023

Funding Agency: DST

Brief Description: The goal of the project is to find novel inhibitors against target proteins of dengue virus using computational approaches as well as optimize the already available antibody for antibody therapy against dengue.

Title : Multiscale Simulations of Protein-Glycan Complexes: Toward Understanding the Molecular Basis of Host-Pathogen Interactions and Immune Response

Duration : March 2016 – February 2021

Funding Agency : DBT

Brief Description: The goal of the project is to elucidate the biophysical basis of recognition of glycans by proteins using atomistic molecular dynamics simulations in conjunction with the free energy calculations

Title : Investigating Conformational Dynamics of N-Glycans and the Effect of Glycosylation on the Structure and Dynamics of Hepatitis C Virus Glycoproteins via Molecular Dynamics Simulations

Duration : September 2017 – September 2020

Funding Agency : DST-SERB

Brief Description: The goal of the project is to investigate the effect of covalently linked glycans on the structural dynamics of HCV glycoproteins E1 and E2 via all-atom molecular dynamics simulations.

Dr. Abhijeet B. Joshi

Assistant Professor
abhijeet.joshi@iiti.ac.in

(PhD from IIT Bombay, Powai, Mumbai, Maharashtra)

Previous Employment

(Includes post-doctoral experience)

- Assistant Professor, Department of Biosciences and Biomedical Engineering, IIT Indore (2018-Till Date)
- INSPIRE Faculty, Centre for Biosciences and Biomedical Engineering, IIT Indore (2015-2018)
- IYBA Fellow, Department of Biosciences and Bioengineering, IIT Bombay, Mumbai (2012-2015)
- Lecturer, Department of Pharmaceutics, NIPER-Ahmedabad, Gujarat (2011-12)

Statement of Research Interests

a. Broad research area

- Biomedical Engineering

b. Research Highlights

- Interdisciplinary areas of biosensors, drug delivery, novel materials for biomedical applications, nano-biotechnology and theragnostic.
- Fabricating novel materials and methods to develop them to enable advances in healthcare and environmental areas.

Projects active during April 2020-March 2021

Title: Nasal delivery of anti-retroviral theranostic nano-enabled carriers Duration: 2015 - 2020 (ongoing) Funding Agency: Science & Engineering Research Board (SERB)

Brief Description: Synthesis and delivery of nano carriers containing HIV drugs, nanocarriers enabled targeted delivery as therapeutics against brain cancer, co-delivery of chemotherapeutic drugs against solid tumors.

Title: Multi-analyte nano-engineered quantum dot based fluorescent biosensors for clinical quantification of biomarkers in diabetes related kidney diseases Duration: 2017 - 2020 (ongoing) Funding Agency: Science & Engineering Research Board (SERB)

Brief Description: Development of biosensors for kidney diseases using nanomaterials.

Title: Flourimetric biosensor for detection and quantification of insecticides and pesticides using recombinant organo-phosphorus hydrolase expressed in E. Coli Duration: 2017 - 2020 (ongoing) Funding Agency: Department of Biotechnology (DBT)

Brief Description: Detection of organophosphate pesticides using recombinant OPH expressed in E. coli

Title: Quantum dot based biosensor for early detection of prostate cancer using multiple biomarkers in biological samples Duration: 2018 - 2020 (ongoing) Funding Agency: Department of Biotechnology (DBT)

Brief Description: Detection of prostate cancer using quantum dots and sensing method development.

Department of Astronomy, Astrophysics & Space Engineering

From the Head's Desk

Dr. Abhirup Datta
Associate Professor
abhirup.datta@iiti.ac.in

"Post hoc ergo propter hoc - after this therefore because of this"

The Department of Astronomy, Astrophysics and Space Engineering has expanded significantly from such a thought and expanded significantly from 2015 and in the last academic year. I am happy to report that our strength has grown to seven regular faculty members, one Ramanujan Faculty Fellow and thirty one PhD research scholars.

The number of external sponsored projects in the discipline has shown an equally significant growth, with projects ranging from DST-SERB Early Career Research, DST-EMR and CSIR-EMR projects, ISRO-sponsored projects exploring capabilities of NaVIC, to international collaborations supported by two SPARC grants, one ASEM-DUO grant, one MATRICS and one Max-Planck Partner Group funding. This has led to DAASE being involved in major indigenization efforts in Remote Sensing, Space Applications, Machine Learning, simulations, big data analysis and Space communications / radio frequency instrumentation.

This year we saw the graduation of our second M.Sc. Astronomy batch. This is a unique program in India. There are lots of achievements of the seven students who graduated in this first batch. One of them has published his M.Sc. research in a major international journal. A number of graduating M.Sc. students have already been admitted to some of the best International Universities and Institutes which shows the quality of the students as well as the strength of the guidance and mentorship from our faculty members. Our first batch of Ph.D. students are graduating in 2021. Most of them are already offered postdoctoral positions abroad or from ISRO.

Over the year 2020-21, we organized one Solar Eclipse event, the annual meeting of Astronomical Society of India, winter school on Observational Astronomy for Central India. We have extended our strong collaborations with M.P. Council of Science and Technology, NCRA-TIFR, IUCAA, etc.

DAASE IIT Indore is now involved in the following major national and international projects:

1. ISRO NavIC Constellation for Navigation and Atmospheric Studies.
2. Square Kilometre Array (SKA)
3. Cherenkov Telescope Array (CTA)
4. ISRO Astrophysics Space Mission of SEAMS

Faculty members of DAASE are also looking forward to strengthening and advancing their collaborations with other departments within IIT Indore through several new initiatives like Technology Innovation Hub and several focussed Centres. These are exciting times ahead. As always, we wish to continue with and build on our successes from last year.

"Excellence... is not an act, but a habit." —Aristotle

Introducing Faculty of DAASE

- Dr. Amit Shukla
- Dr. Anjali Rao
- Dr. Bhargav Pradeep Vaidya
- Dr. Manoneeta Chakraborty
- Dr. Rajkumar Hajra
- Dr. Saurabh Das
- Dr. Siddharth Savyasachi Malu
- Dr. Suman Majumdar

Dr. Abhirup Datta

Associate Professor
abhirup.datta@iiti.ac.in

Ph.D : New Mexico Tech/National Radio Astronomy Observatory (February, 2011)

Previous Employment

(includes post-doctoral experience)

- 2013- 2015 Senior Research Associate at University of Colorado, Boulder, USA
- 2011-2013 NASA Post-Doctoral Fellow at University of Colorado, Boulder, USA

Academic associations with other institutions

- Associate of Inter University Center for Astronomy and Astrophysics (IUCAA) since July, 2016.

Statement of Research Interests

a. Broad research area

- Observational Cosmology and Astrophysics - statistics, machine learning, and simulations.
- Radio and X-ray Astronomy - Observations, Data Analysis and Instrumentation (Square Kilometre Array, GMRT)
- Statistics and Machine Learning related to Space Applications
- Space Weather and Ionosphere: NaVIC and GPS applications
- Space Instrumentation - Payloads and future missions

b. Research Highlights

- Exploring the Early Universe using the redshifted HI 21cm signal – pathfinder studies with the uGMRT and future observations with the SKA.
- Developed a novel methodology power spectrum detection of redshifted 21cm signal using foreground avoidance.
- Application of Machine Learning techniques to extract faint cosmological signal in presence dominant interfering signals from the foregrounds and instrumental systematics.
- Demonstrated the need of future Astronomy space missions to pursue low radio frequency astronomy from the space (either orbiting around the Moon or from Lunar farside).
- Demonstrated for the first time that NaVIC constellation can be used to probe ionosphere above the Indian subcontinent.
- Demonstrated that radio interferometer like the GMRT can be used for space weather studies
- Designed a pipeline to make high fidelity x-ray temperature maps for galaxy clusters and compare them with high fidelity radio maps to study shocks in intra-cluster medium to determine physics behind formation of radio diffuse emission in radio relics and halos.

- Developing radio instrumentation in IIT Indore using the demonstration array of four element radio interferometer at 1.4 GHz.
- Ground Based prototype testing for SEAMS project – ISRO approved Astrophysics Mission.

c. Awards and Achievements

- Member of International Astronomical Union (IAU) since 2018
- Early Career Research Award, DST-SERB, India, July, 2017
- Member of Astronomical Society of India (ASI), since 2017
- Visiting Associate at IUCAA, Pune, India since July, 2016
- NASA Post-Doctoral Fellowship, 2011
- Coordinator for the ICARD (IUCAA Centre for Astronomy Research and Development) in IIT Indore, 2019 onwards.
- Co-Investigator on SEAMS Astronomy Space Mission proposal – accepted for funding from ISRO.
- Science team member CMB-Bharat Consortium and the ECHO mission proposal submitted to ISRO, May 2018.
- Scientific Referee for Nature Astronomy, The Astrophysical Journal (ApJ), The Astrophysical Journal Supplement Series (ApJSS), Topic editor in Galaxies, Proceedings of the Astronomical Society of the Pacific (PASP).
- Executive Committee Member of SKA India Consortium
- Member from India in the Square Kilometer Array (SKA) CD/EoR Science Team Board since January 2017.
- Science Co-Chair of International SKA CD/EoR Science Working Group since January, 2020.
- Senior Member of IEEE

Events/Seminars organized

- Coordinator for one Faculty Development Program in Artificial Intelligence and Machine Learning held in December 2020 and supported by TEQIP.
- Co-Coordinator for a Short-Term Course on Applications of Machine Learning held in December 2020 and supported by TEQIP.
- Organized Winter School on Observational Astronomy in collaboration with MPCST (Madhya Pradesh Council for Science and Technology) in 1- 12 February, 2021 for undergraduate and graduate students from colleges and Universities of M.P. and other states of Central India.
- Organizing Chair and SOC/LOC member of international conference on "The First Billion Years of the Universe Using Next Generation Telescopes", January, 2020.

- VOC Co-Chair of Annual Meeting of Astronomical Society of India, February, 2021.
- SOC member of conference on "SAZERAC sip: The 21-cm Signal from Cosmic Dawn and the Epoch of Reionisation", January, 2021
- Co-organized RASS, DAASE Colloquium Series (August-December, 2020)

Projects active during April 2020-March 2021

Title : Unveiling Mergers of Galaxy clusters with radio haloes/relics: Using high Fidelity Radio and X-ray observations.

Duration: April 2018 – March 2021 (PI: Dr. Abhirup Datta)

Funding Agency : DST-SERB ECRA scheme

Brief Description : This project aims to study a complete sample of merging galaxy clusters in x-ray and radio wavelengths to answer critical questions related to propagation of shocks in the Intra-cluster medium and link to radio halo and relic formation.

Title : Pilot survey of CMB polarized foregrounds using a Single Dish

Duration : April, 2019 – March 2022 (PI- Dr. Abhirup Datta; Co-PI: Dr. Siddharth Malu)

Funding Agency: Scheme for Promotion of Academic and Research Collaboration, MHRD, India

Brief Description: Main aim is to develop high radio frequency expertise and infrastructure in India in order to accelerate scientific progress in future CMB and high-frequency science projects in India. As a first initiative, this proposal aims to establish necessary infrastructure for a pilot study fo CMB polarized foregrounds in India.

Title: Differential NavIC and GAGAN aided Inertial Navigation with applications to Air, Land and Space Vehicles

Duration : April, 2017 – December, 2020 (PI: Dr. Abhirup Datta; Co-PI: Prof. H.B.Hablani)

Funding Agency ISRO GAGAN and NaVIC UP Scheme

Brief Description : Main aim is to develop capabilities with the India's NavIC constellation with respect to navigation in land, air and sea. Also, one of the aim is to study space weather using the NavIC satellite constellation.

Title : 21CM Cosmology with The Square Kilometre Array (SKA)

Duration : July, 2019 – July, 2022 (PI: Dr. Abhirup Datta)

Funding Agency : CSIR-EMR

Brief Description : Main aim is to develop high radio frequency expertise and infrastructure in India in order to accelerate scientific progress in future CMB and high-frequency science projects in India. As a first initiative, this proposal aims to establish necessary infrastructure for a pilot study fo CMB polarized foregrounds in India.

Title: Imaging the first billion years of the universe with next-generation telescopes

Duration: 15/03/2019-14/03/2022 (PI- Dr. Suman Majumdar, Co-PI- Dr. Abhirup Datta)

Funding Agency: Scheme for Promotion of Academic and Research Collaboration, MHRD, India

Brief Description: The project aims at finding novel techniques of analysing upcoming Square

Kilometre Array observations of the Cosmic Dawn era (the era of the first sources of light) to quantify the

role of galaxies as ionizing sources, taking into account different uncertainties for different future surveys in other wavelengths (other than radio).

Title: Imaging Diffuse Emission and Possible SZ signatures in Galaxy Cluster Mergers at High Frequencies.

Duration: July, 2019 – July, 2022 (PI: Dr. Siddharth Malu; Co-PI: Dr. Abhirup Datta)

Funding Agency CSIR-EMR

Title: C and L-Band Interferometer as Galaxy Cluster Observatory Pathfinder

Duration : March 2017 – December 2020

Funding Agency: DST-SERB EMR Scheme PI: Siddharth Malu, Co-PIs: Abhirup Datta,Somaditya Sen

Brief Description: This project proposes to build a 4-element radio interferometry pathfinder at 1.4 GHz, with at least 100 MHz bandwidth. In order to build this small pathfinder radio array, simple analogue equipment and circuitry is to be used. The correlator would be digital and state-of-the-art, based on a reconfigurable FPGA (Field Programmable Gate Array) architecture. This pathfinder would be capable of detecting bright radio sources in the sky when completed, as well as characterizing their spectra over a 100 MHz bandwidth.

Dr. Amit Shukla

Assistant Professor
amit.shukla@iiti.ac.in

PhD. Indian Institute of Astrophysics, Bangalore

Previous Employment

(includes post-doctoral experience)

1) University of Würzburg, Gemany (16-03-2016 to 30-09-2018)

2) ETH, Zurich (12-11-2014 to 11-11-2015)

3) Tata Institute of Fundamental Research (20-05-2013 to 11-11-2014)

Statement of Research Interests

My primary research interest is to study gamma-ray Astronomy, Active galactic nuclei, Blazars, High Energy Astrophysics using Multi-wavelength & multi-messenger observations. In particular, my research interests include the study of astrophysical jets Active Galactic Nuclei (AGN), GRBs.

a. Broad research area :

- High Energy Astrophysics

b. Research Highlights

Particle acceleration in astrophysical sources:

Using a multi-waveband analysis of blazars, we have found supporting evidence of Fermi II order particle acceleration in a few quasars.

- Magnetic reconnection drives mini-jets in blazar : Powerful magnetized jets are common features of the spinning supermassive black holes that occupy the centres of large galaxies. A gamma ray flare originating from a distant blazar was likely generated by magnetic reconnection within a black hole's relativistic jet. This magnetic reconnection is triggered by instabilities disrupting the collimated jet flow.

Publications

(includes journal articles, books and book chapters)

- Pair Cascades at the Edge of the Broad-line Region Shaping the Gamma-Ray Spectrum of 3C 279, Wendel, C., Shukla, A., & Mannheim, K., 2021, ApJ, 917, 32.
- Gamma-ray flares from relativistic magnetic reconnection in the jet of the quasar 3C 279, Shukla A., Mannheim K., 2020, NatCo, 11, 4176.
- X-ray and Gamma-ray Variability of NGC 1275, Chitnis V., Shukla A., Singh K.~P., Roy J., Bhattacharyya S., Chandra S., Stewart G., 2020, Galax, 8, 63.

c. Awards and Achievements

August 2021: An Associate members of Inter University Center for Astronomy and Astrophysics (IUCAA), Pune

Events/Seminars organized Title

Science with CTA (workshop)

Date: 19 February 2021

Speakers: Dr. D. Bose, Dr. V. R. Chitnis, Dr. A. Shukla, Dr. S. Chandra, Dr. E. Lindfors, Dr. M. Theshima, Dr. R. Moharana, Dr. L. Tibaldo, Dr. S. Schlenstedt, Dr. A. Sjinha, Dr. N. Mankuzhiyil.

Dr. Anjali Rao
DST INSPIRE
Faculty Fellow
anjalirao@iiti.ac.in

PhD. 2016

Previous Employment

(includes post-doctoral experience)

- University of Southampton, UK (Commonwealth Rutherford Fellow): 2018 March to 2020 February
- IUCAA, Pune (Postdoctoral Fellow): 2016 September to 2018 March
- PRL, India (Postdoctoral Fellow): 2015 September to 2016 September

Statement of Research Interests

a. Broad research area

- Black hole binaries, Accretion Physics, Advanced timing analysis, Astrometry, Globular Cluster, Distribution of X-ray binaries in Milky Way, OB associations, Kinematic properties of star clusters.

b. Research Highlights

- We have measured peculiar velocity of 7 black hole binaries for the first time using astrometry data from Gaia
- We estimated distances to 11 black hole binaries using optical parallaxes from Gaia
- Our work revealed the distribution of black hole binaries as a function of orbital period in the Galaxy
- We revisited the membership of the high mass black hole binary Cyg X-1 and found that its astrometric solution suggests that the binary is a member of the Cyg OB3 association.
- We estimated mass, spin, distance and inclination of the black hole candidate IGR J17091-3624 using its heartbeat oscillations.

- We studied the high mass black hole binary LMC X-1 using AstroSat which is India's first dedicated multi-wavelength observatory in space.

Awards and Achievements

- 2020: DST INSPIRE Faculty Fellowship, Department of Science & Technology (DST), Government of India, India (September 2020 – August 2025)
- 2018: Commonwealth Rutherford Fellowship, University of Southampton, United Kingdom (March 2018 – February 2020)
- Former member of Royal Astronomical Society, United Kingdom (February 2019 - March 2020)

Publications

- Anjali Rao and Santosh V. Vadawale (2012), Why is IGR J17091-3624 so faint? Constraints on distance, mass, and spin from 'phase-resolved' spectroscopy of the 'heartbeat' oscillations, Astrophysical Journal, 757, L12, https://doi.org/10.1088/2041-8205/757/1/L12 (Impact Factor = 7.413)
- Anjali Rao, Poshak Gandhi, Christian Knigge, John A. Paice, Nathan W. C. Leigh, Douglas Boubert (2020), Kinematic study of the association Cyg OB3 with Gaia DR2, MNRAS, 495, 1, 1491-1500, https://doi.org/10.1093/mnras/staa1217 (Impact Factor = 5.287)
- Poshak Gandhi, Anjali Rao, Michael A. C. Johnson, John A. Paice, Thomas J. Maccarone (2019), Gaia Data Release 2 distances and peculiar velocities for Galactic black hole transients, MNRAS, 485, 2, 2642-2665, https://doi.org/10.1093/mnras/stz438 (Impact Factor = 5.287)

Projects active during April 2020- March 2021

Title: Exploiting the new astrophysical frontiers for study of accretion, space distribution, and origin of X-ray binaries and their mapping in Globular Clusters

Duration: September 2020 – August 2025

Funding Agency: Department of Science & Technology (DST), Government of India

Brief Description: To study distribution of X-ray binaries in the galaxy, their origin and accretion properties. The project also aims to study Globular Clusters and their X-ray binary population.

Dr. Bhargav Pradeep Vaidya

Assistant Professor
bvaidya@iiti.ac.in

PhD.: Max Planck Institute for Astronomy, Heidelberg (Klaus Tschira Stipendium Fellow)

Previous Employment

- Postdoctoral Fellow, University of Leeds, Leeds UK
- Postdoctoral Researcher, University of Torino, Italy

Academic associations with other institutions

- Affiliate Faculty at the Center of Excellence in Space Sciences India, IISER Kolkata
- Associate of Inter University Center for Astronomy and Astrophysics (IUCAA)
- Member of the International Astronomical Union (IAU)

Statement of Research Interests

a. Broad research area

- Astrophysical and Space Plasma simulations : Magnetohydrodynamics and Radiative Transfer
- Numerical Space Weather Modelling.
- Multi-physics simulations, High Performance Computing, Astrophysical Code Development

b. Research Highlights

- A full fledged model for launching of jets from accretion disks around black hole was developed to demonstrate for the first time interaction between jets and disk winds using general relativistic magneto-hydrodynamics. (Dihingia et. al. 2021)
- Applied a state-of-the-art hybrid module of the PLUTO code for application to study particle acceleration mechanisms at shocks and non-thermal emission from relativistic jets at kilo-parsec scales. (Borse et. al 2021)
- A full scale 3D relativistic MHD model of the blazar jet was modelled using PLUTO code to connect the dynamical features with observed variability signatures and have provided a clear evidence of application of geometry model on long term variability signatures (Acharya et. al. 2021)
- A detailed modelling was carried out to understand the particle acceleration in magnetic reconnection in shearing layers that is relevant to understand emergence of Solar energetic particles due to solar flares and also generation of Flux transfer events close to the magnetosphere (Paul et. al. 2021)
- A state-of-the-art numerical framework to simulate the interplay of shock and turbulent acceleration in astrophysical plasma is developed with the hybrid framework of PLUTO code (Kundu et. al. 2021)
- Developed a pilot numerical model for understanding and prediction of solar wind properties at L1 point. This will serve as an integral framework towards the scientific contribution for Space Weather Framework as part of the Science Team of ISRO's Aditya L1 mission. (Kumar et. al. 2020)

c. Awards and Achievements

- Student from the research group (Mr. Gourab Giri) was awarded the Prime Minister's Research Fellowship (PMRF).
- Awarded the Max Planck India Partner group award from Max Planck Society.
- Member of the core team that was awarded to establish tha Technology Innovation Hub (TIH) at IIT Indore by the National Mission of Interdisciplinary Cyber Physical System (NM-ICPS) on the vertical System Simulation, Modelling and Visualisation.
- Member and International collaborator of the DFG (German Research Foundation) Research Unit on Relativistic Jets in Active Galaxies that was awarded in 2021.
- M.Sc. students within the research group published their thesis work in reputed journals and have been placed at reputed institutions at national and international level for higher studies.
- Involvement and participation as part of National Collaborations : Aditya L1 (Science Team) and International Collaborations like : LSST, CTA.

Publications

- Dihingia, Indu K., Vaidya, Bhargav, and Fendt, Christian, Jets, disc-winds, and oscillations in general relativistic, magnetically driven flows around black hole, Monthly Notices of the Royal Astronomical Society, (2021), 505, 3596

- Acharya, Sriyasriti, Borse, Nikhil S., and Vaidya, Bhargav Numerical analysis of long-term variability of AGN jets through RMHD simulations, Monthly Notices of the Royal Astronomical Society, 2021, 506
- Paul, Arghyadeep and Vaidya, Bhargav Effects of a velocity shear on double current sheet systems: Explosive reconnection and particle acceleration, Physics of Plasmas, 2021, 28

Events/Seminars organized

- International Online Conference on "Extragalactic jets at all scales : Launching, Propagation and Termination" with Max Planck Institute of Astronomy as part of the Partner Group at IIT Indore.

Link: https://www2.mpia-hd.mpg.de/jets2021/

- Virtual Workshop on "Computational Astrophysics : An emerging avenue for Indian Astronomy Community" as part of the 39th Astronomical Society of India Meeting Link : https://astron-soc.in/asi2021/asi_workshops/workshop1
- Organized seminar under the series 'Recent Advances in Astronomy and Space Sciences' : Seminar was given by Dr. Christian Fendt on the topic : Making astrophysical jets - MHD simulations of accretion, ejection & dynamo action (October 14, 2020)

Projects active during April 2020-March 2021

Title: Synthetic Observatory for X-shaped Radio Galaxies

Duration: 36 Months (start date: August 16, 2018)

Funding Agency: CSIR EMR-II Grant.

Brief Description: This projects aims to unravel the formation mechanism of very atypical

X-shaped radio galaxies using hybrid relativistic magneto-hydrodynamic simulations.

Title: Max Planck Partner Group Grant

Duration: 36 Months (start date : 01 July 2019)

Funding Agency: Max Planck Society, Munich, Germany

Brief Description: The aim of this project is to develop a working group at IIT Indore in collaboration with Max Planck Institute for Astronomy, Heidelberg to work on developing state-of-the-art simulation models for studying multi-messenger aspects of AGN jets.

Dr. Manoneeta Chakraborty

Assistant Professor
manoneeta@iiti.ac.in

PhD : Tata Institute of Fundamental Research, Mumbai, India, Mumbai, India, December 2014

Previous Employment

- DST INSPIRE faculty fellow, Department of Astronomy, Astrophysics and Space Engineering, Indian Institute of Technology Indore, June 2017 – July 2019
- Post-doctoral research fellow, High energy astrophysics group, Sabanci University, January 2015 – April 2017
- Visiting Researcher, Inter-University Centre for Astronomy and Astrophysics and INAF-Brera, October 2014 – December 2014

Statement of Research Interests

a. Broad research area

- Compact Objects
- Neutron stars
- Black holes
- Pulsars and magnetars
- X-ray binaries
- EM counterparts of Gravitational waves
- Transients and Fast Radio Bursts
- Multi-wavelength high time-resolution Astronomy

b. Research Highlights

- Investigated the multi-peaked burst behavior of the neutron star LMXB 4U 1608-52 using NICER
- Investigated the long-term spectral and timing evolution of a neutron star atoll LMXB source for characterizing the emission mechanism with unprecedented broadband coverage.
- Observations of the simultaneous X-ray/UV data of the ultra-luminous X-ray source Holmberg II X-1 using Astrosat in response to successful proposal.
- X-ray/UV correlation studied to infer about the irradiated disk scenario and the origin of the ultra-luminosity.
- Studied thermonuclear bursts using high time resolution wideband data to probe the ignition mechanism and the evolution of nuclear burning with the radiative behaviour of the source.
- Observations of accretion behaviour of LMXBs carried out using Astrosat and NICER (occasionally simultaneous).
- Multi-frequency single pulse observations of radio pulsars were carried out using MWA and uGMRT giving unprecedented spectral behaviour of the pulse properties like sub-pulse drifting.
- Studied the broadband behaviour of the only Galactic Ultra-luminous X-ray pulsar and the variation of its pulsation properties across the super-critical state transition.
- Comparative study between short gamma-ray bursts (sGRBs) and magnetar giant flares shedding light on one of the possible origins of the sGRBs.
- Application of machine learning techniques for global prediction of nature of compact objects based on its spectral behavior.

c. Awards and Achievements

- Life member of the Astronomical Society of India (ASI)
- Invited talk in annual meeting of Astronomical Society of India 2021
- Associate of the ASI POEC team
- Member of SKA-India Working Group on Education and Outreach, 2021-ongoing
- Recipient of grant under "AstroSat Data Utilization project" from ISRO (2020)
- INSPIRE Faculty Award under Department of Science and Technology (DST) in the July-2016 Session

Publications

- Kashyap, Unnati ; Ram, Biki ; Guver, Tolga ; and Chakraborty, Manoneeta, 'Broadband time-resolved spectroscopy of thermonuclear X-ray bursts from 4U 1636-536 using AstroSat', MNRAS, accepted (2021)

Events/ Seminars organized

- Organizer of several outreach events as DAASE outreach coordinator involving lectures on astrophysical concepts.
- Co-organizer of National science day events
- Volunteer Member of organization of Winter school on Observational Astronomy 2021 at IIT Indore

Projects active during April 2020-March 2021 Title

Probing the extreme physics around compact objects in binary and isolated systems through investigations of their burst and outburst behaviour

Duration: 01.06.2017 to 31.05.2022 Funding Agency: DST (Department of Science and Technology)

Brief Description: Under this 5-year INSPIRE project, we plan to investigate the spectral state evolution and transition of compact objects in low-mass X-ray binary systems. The multi-wavelength correlation and variability of the emission in the active and quiescent phase will be studied to reveal the disk-jet connection and the disk topography. We aim to study thermonuclear ignition and flame propagation. Furthermore, pulse, spin evolution of isolated systems will be investigated to probe the magnetic field morphology. For this purpose, we plan to use multi-wavelength from missions like RXTE, Chandra, Swift, XMM-Newton, NuStar, Astrosat, GMRT, VLA, SALT, DOT.

Title: Study of Accretion and Outflow Mechanisms in Compact Objects in X-ray Binaries Duration: 3 years (starting April 2021). Funding Agency : ISRO, Department of Space PI: Dr. Manoneeta Chakraborty Brief Description: This project is granted by ISRO under the "AstroSat Data Utilization project". The aim is to study unprecedented simultaneous broadband correlated spectro-timing behavior of LMXBs with the goal of understanding the accretion mechanism and binary geometry, using Astrosat Archival data.

Dr. Rajkumar Hajra

Ramanujan Fellow
rhajra@iiti.ac.in

PhD. 2012

Previous Employment

- INPE, Brazil (Postdoctoral Fellow): 2012 August 1 to 2015 September 30
- CNRS, France (Postdoctoral Fellow): 2016 March 7 to 2018 October 31
- NARL, India (Ramanujan Fellow): 2018 November 22 to 2019 October 31

a. Broad research area

- Space Science; Space Weather; Heliospheric research; Cometary plasma dynamics; Solar wind interaction with planets and comets; Solar wind-magnetosphere-ionosphere coupling; Radiation belt dynamics and prediction; Ionospheric variability; Ionospheric irregularity; Ionospheric modeling

b. Research Highlights

- Ionospheric (regional) modeling: Developed ionospheric regional model using TEC – applicable for Indian GPS navigation
- How topside ionosphere is affected by HSS? – first study: For the first time studied the impacts of HSSs on topside (~250-1300 km) ionosphere using Incoherent Scatter Radar at Arecibo Observatory. Although the HSS did not lead to any significant geomagnetic storm, the ionosphere became hotter and expanded significantly in altitude as compared to a non-HSS interval
- What in severe magnetic storms lead to power outage? Super substorms – first study: Studied extremely intense substorms or super substorms (SSSs). Extremely rapid auroral electrojet currents during SSSs at ~100 km altitude may cause geomagnetically induced currents (GICs) on the ground that are the major danger for power grids
- Complex space weather – first study: For the complex and multiple space weather events occurring during 2017 September, presented a complete study on the impacts of solar flares, CMEs, CIRs, HSSs on magnetosphere in forms of interplanetary fast shocks, waves, geomagnetic storms, substorms, SSSs and HILDCAAs
- Cometary TEC – first study: Developed a technique to estimate cometary altitude-integrated electron density or TEC from singe point in-situ plasma measurement by Rosetta spacecraft. This was utilized to study the cometary plasma dynamics dependence of solar activity and heliocentric distance for the first time.

c. Awards and Achievements

- 2019: A grant by National Science Foundation (NSF), USA
- 2018: Ramanujan Fellowship by Science & Engineering Research Board (SERB), Department of Science & Technology (DST), Government of India, India (22 November 2018 – 21 November 2023)
- 2018: A grant by National Science Foundation (NSF), USA
- 2017: Postdoctoral Research Fellowship by Centre National d'Etudes Spatials (CNES), France for research activities at Laboratoire de Physique et Chimie de l'Environnement et de l'Espace (LPC2E), Centre National de la Recherche Scientifique (CNRS), Orléans, France (1 December 2017 – 31 October 2018)
- 2016: Postdoctoral Research Fellowship by Agence Nationale de la Recherche (ANR), France, for research activities at Laboratoire de Physique et Chimie de l'Environnement et de l'Espace (LPC2E), Centre National de la Recherche Scientifique (CNRS), Orléans, France (7 March 2016 – 30 November 2017)
- 2015: Bolsa Estágio de Pesquisa no Exterior (BEPE) by Fundação de Amparo à Pesquisa do Estado de São Paulo (FAPESP), Brazil for research activities at Jet Propulsion Laboratory (JPL), Pasadena, California, USA (1 June 2015 – 31 March 2016)
- 2014: Bolsa Estágio de Pesquisa no Exterior (BEPE) by Fundação de Amparo à Pesquisa do Estado de São Paulo (FAPESP), Brazil for research activities at Arecibo Observatory/AO, Arecibo, Puerto Rico (1 December 2014 – 31 March 2015)
- 2012: Postdoctoral Research Fellowship by Fundação de Amparo à Pesquisa do Estado de São Paulo (FAPESP), Brazil for research activities at Instituto Nacional de Pesquisas Espaciais/INPE, Brazil (1 August 2012 – 25 January 2015 and 26 March 2015 – 30 September 2015).

Projects active during April 2019-March 2020

Title : Investigation of Space Weather Effects on the Equatorial Ionosphere over Indian Region

Duration : 22 November 2018 – 21 November 2023

Funding Agency: Science & Engineering Research Board (SERB), Department of Science & Technology (DST), Government of India.

Brief Description: To study space weather impacts on ionosphere and magnetosphere of the Earth and other solar system bodies like comets.

Dr Saurabh Das

Assistant Professor
saurabh.das@iiti.ac.in

PhD. Yes

Previous Employment

- Indian Institute of Technology Indore, DST INSPIRE Faculty, 2018-2019
- Indian Statistical Institute, DST INSPIRE Faculty, 2015-2018
- University of Calcutta, Assistant Professor, 2009-2015
- Space Applications Centre, ISRO, Junior Research Fellow , 2006-2009

Statement of Research Interests

a. Broad research area:

- Space and atmospheric science

b. Research Highlights

- Investigated atmospheric effect of Ka-band satellite communication link and channel model for the same.
- Developed a model for site diversity gain prediction using copula based Bayesian approach. This will be helpful for mitigating the excess fade and maintaining the link.
- Investigated precipitation microphysics over India using satellite, radar and ground sensor. The study improves the understanding of rain formation process and radar retrieval of rainfall estimation.
- Working on machine learning based forecasting of space weather. A deep learning based model for solar wind prediction has already been developed.
- Working on machine learning and deep learning in atmospheric prediction, particularly cyclone and thunderstorm prediction. A new approach for identification of homogenous rain region of India is proposed using machine learning technique.

- Automated detection of coronal holes are important for understanding and prediction of space weather. Fuzzy based segmentation techniques has been developed and applied on solar coronal hole detection. The results indicate better performance than other existing algorithm for such application.
- Thunderstorm detection using Indian NavIC satellite constellation has been attempted and a successful model based on time warping technique has been developed for the same.
- The effect of thunderstorms on rain microphysics has been investigated. The results are useful for improvement of satellite radar based remote sensing studies.

c. Awards and Achievements

- Ph.D. student Mr. Soumen Datta working under my supervision has received the Young Scientist award by URSI GASS 2020.
- Young Scientist Award, URSI Asia-Pacific Radio Science Conference, Seoul, South Korea, 2016
- DST-INSPIRE Faculty Award, Department of Science and Technology, Govt. of India, 2014
- Young Scientist Award by International Union of Radio Science (URSI) GASS 2014, Beijing, China, 2014
- First prize in 'Young Scientist award competition' organized by Indian committee of URSI in Regional conference in Radio Science (RCRS), Pune, India, 2014
- Best paper award in Satellite communication session in ICMARS 2010, Jodhpur, India, 2009.

Publications

- K. Chakravarty, R. Bhangale, S. Das, P. Yadav, B.A.M. Kannan, G. Pandithurai, Unraveling the characteristics of precipitation microphysics in summer and winter monsoon over Mumbai and Chennai – the two urban-coastal cities of Indian sub-continent, Atmospheric Research, Volume 249, 105313, 2021

- Bandyopadhyay, S., Das, S. & Datta, A. , "Comparative Study and Development of Two Contour-Based Image Segmentation Techniques for Coronal Hole Detection in Solar Images. Solar Phys, 295, 110 (2020).

Events/Seminars organized

- Young Professional Chair, IEEE International India Geoscience and Remote Sensing Symposium 2020, Ahmedabad India
- Coordinator, QIP Sponsored Short-Term Course on Satellite Based Navigation System, November 23-28, 2020, IIT Indore
- Coordinator, QIP Sponsored Short-Term Course on GNSS and Space Weather, September 14-19, 2020, IIT Indore
- Technical Program Committee member, 2nd International Conference on Soft Computing and its Engineering Applications (icSoftComp202)

Past Projects

Title: Retrieval of atmospheric water vapor from NavIC/GAGAN data and prediction of extreme weather events based on machine learning techniques.

Duration : 3 years

Funding Agency : ISRO

Brief Description

Total budget Rs. 43.92 Lacs.

Objectives

- Feasibility study of extracting water vapour information from IRNSS.
- Assessment of tropospheric errors in IRNSS position accuracy and modelling of the same.
- Study of the water vapor estimated from GAGAN data and its relation to the extreme weather events.
- Development of machine learning based algorithms for forecasting extreme events like flash flood and thunderstorm utilizing the real-time water vapour data.

Title: Integrated studies of cloud-aerosol-precipitation system in the Indian region in a climate change scenario.

Duration: 5 years

Funding Agency - DST-INSPIRE

Brief Description :

Total budget Rs. 35 Lacs

Objectives

- Physical understanding of the precipitation formation process, especially the role of collision and coalescence of liquid-phase cloud droplets in convective rain.
- Understanding the role of aerosol concentration and type on microphysical evolution of the precipitating system in short and long term scale.
- Characterization of precipitation features for the period 1998-present over India using satellite and ground based data with an emphasis on extreme weather events.
- Study of drop size distribution over Indian region and simulation of multi frequency sensors for improved remote sensing capability for future generation's systems.

Project active during April 2020-March 2021 Title

Modelling of major weather disturbances, especially cyclones, using Deep Neural Networks

Duration 3 years

Funding Agency – SERB

Brief Description

Total budget Rs. 6.6 Lacs.

Objectives

- Modelling of tropical cyclones and extreme weather event based on deep learning techniques.

Dr. Siddharth Savyasachi Malu

Associate Professor
siddharth@iiti.ac.in

PhD. - Physics (Astrophysics) - University of Wisconsin-Madison, 2007

Previous Employment

- Assistant Professor, Physics, IIT Indore, 2012-15
- Chief Research Officer, Redwood Associates, 2011-12
- Postdoctoral Fellow, Raman Research Institute, 2010-11
- Postdoctoral Fellow, IUCAA, 2007-09

Statement of Research Interests

a. Broad research area

- Radio Astronomy Instrumentation, Galaxy clusters and Cluster Mergers

b. Research Highlights

- The Centre has received funds from DST-SERB to make a 4-element radio interferometer at L and C bands. The idea is to use reconfigurable hardware that uses FPGAs (Field Programmable Gate Arrays) in order to 'program' a Spectrometer and a Correlator, following CASPER (Collaboration for Advanced Signal Processing and Electronics Research) tools; thus, a simple RF frontend and a sophisticated Digital Backend can be combined to form a working radio telescope.

Publications

- Pritpal Sandhu, Siddharth Malu, Ramij Raja and Abhirup Datta, The peculiar cluster MACS J0417.5-1154 in the C and X-bands, Astrophysics and Space Science, vol. 361, article 8, 2018
- Paul, Surajit; Datta, Abhirup; Malu, Siddharth; Gupta, Prateek; John, Reju Sam; Colafrancesco, Sergio, Rings of diffuse radio emission surrounding the Bullet cluster, Cornell University Preprint Server , vol. arXiv:1804.02588, pp. 10, 2018
- Sandhu, Pritpal; Raja, Ramij; Rahaman, Majidul; Malu, Siddharth; Datta, Abhirup, Study of diffuse emission in cluster MACSJ0417.5-1154 from 76 MHz to 18 GHz, Journal of Astrophysics and Astronomy, vol. 40, pp. 17, 2019. Projects active during April 2020-March 2021

Title: C and L-Band Interferometer as Galaxy Cluster Observatory Pathfinder

Duration: 3 years + extension upto 31 December 2020

Funding Agency - DST-SERB Amount: Rs. 84 lacs

PI: Siddharth Malu, Co-PIs: Abhirup Datta, Somaditya Sen

Brief Description

- This project proposes to build a 4-element radio interferometry pathfinder at 1.4 GHz, with at least 100 MHz bandwidth. In order to build this small pathfinder radio array, simple analogue equipment and circuitry is to be used.
- The correlator would be digital and state-of-the-art, based on a reconfigurable FPGA (Field Programmable Gate Array) architecture.
- This pathfinder would be capable of detecting bright radio sources in the sky when completed, as well as characterizing their spectra over a 100 MHz bandwidth.

Title : Imaging diffuse emission and possible SZ signatures in galaxy cluster mergers at high frequencies.

Duration - 3 years.

Funding Agency - CSIR Amount: Rs. 12 lacs

PI: Siddharth Malu, Co-PI: Abhirup Datta

Brief Description: The main aim of this project is to conduct a Sunyaev-Zel'dovich Effect (SZE) survey of galaxy cluster mergers, in order to study the pressure sub-structures in cluster mergers, as well as the effect of these sub-structures on the overall SZE power spectrum – this has been studied in simulations, but not through actual SZE measurements [McCarthy et al. MNRAS 440: 3645

(2014)].

Dr. Suman Majumdar

Assistant Professor
suman.majumdar
@iiti.ac.in

PhD. - Indian Institute of Technology Kharagpur (April, 2013)

Previous Employment

- Postdoctoral Research Associate, Department of Physics, Imperial College London, UK (December, 2015 - April 2018)
- Postdoctoral Fellow, Department of Astronomy, Stockholm University, Sweden (December, 2012 - November, 2015)

Academic associations with other institutions

- Academic Visitor, Scuola Internazionale Superiore di Studi Avanzati (SISSA), Trieste, Italy (since November, 2019)
- Academic Visitor, International Centre for Theoretical Physics (ICTP), Trieste, Italy (since June, 2019)
- Academic Visitor, Department of Physics, Imperial College London, UK (since May, 2018).

Statement of Research Interests

a. Broad research area

- Cosmology with Large Scale Structure
- Cosmic Dawn and Epoch of Reionization
- Large Scale Simulations of the Universe
- N-body Simulations
- Statistical Inference
- Machine Learning and Artificial Intelligence
- BIG DATA Cosmology.

b. Research Highlights

- The topological distribution of neutral hydrogen during the Cosmic Dawn is non-Gaussian in nature, however this non-Gaussianity cannot be captured through the traditional statistic of 21-cm data e.g. power spectrum. We have proposed and demonstrated that a higher order statistic can quantify this non-Gaussianity in the signal and thus can provide a more comprehensive picture of this early stage of the Universe.
- We have provided an upper limit on the 21-cm bispectrum from the epoch of reionization using the actual observational data from the Murchison Widefield Array in Australia.
- We have demonstrated by building state-of-the-art simulations of the Cosmic Dawn that the 21-cm bispectrum can distinguish between various IGM physical processes during this period.

- We have also studied various heating and ionizing source properties during the Cosmic Dawn that can be identified using the 21-cm bispectrum.
- We have shown that using the 21-cm bispectrum one can in principle distinguish between different dark matter candidates and their role in the structure formation.
- We have developed a new simulation for CII line emission from the early galaxies. This line can be used for intensity mapping experiments e.g. CONCERTO, CCAT-p etc to map the galaxies from Cosmic Dawn.
- We have developed an Artificial Neural Network based 21-cm signal statistic e.g. bispectrum emulator, which helps in speeding up the parameter inference from the Cosmic Dawn observations.
- We have shown that the bispectrum of 21-cm signal from the post-reionization era can help us to put independent constraints on the linear bias parameter and can provide us a measure of the primordial non-Gaussianity.
- We have demonstrated that Largest Cluster Statistics of the 21-cm images can be used to constrain the reionization models from future 21-cm observations of this era.
- We have developed a novel image analysis technique with which one will be able to constrain the role of galaxies and quasars in reionization by combining the future 21-cm observations with the SKA and infrared observations with Euclid, JWST, ELT etc. This will be a major step towards solving one of the fundamental problems related to this era of first dawn.
- We have compared different methods to simulate the 21-cm signal from the epoch of reionization and have shown that the one dimensional radiative radiative transfer methods are optimal in terms of accuracy and computational time.
- We have also shown that the Multi-frequency Angular Power Spectrum can optimally extract the reionization history from a radio interferometric observation of the early universe.

c. Awards and Achievements

- Three M.Sc. students within the research group published their thesis work in reputed journals and have joined PhD Programmes at the Groningen University (The Netherlands), Curtin University (Australia) and Melbourne University (Australia).
- Scientific Referee for The Astrophysical Journal (ApJ), The Astrophysical Journal Supplement Series (ApJSS) and The Monthly Notices of the Royal Astronomical Society (MNRAS).
- ASEM-DUO Faculty Fellowship (2020).
- Fellow of the Royal Astronomical Society, UK (since January, 2017)
- Alva and Lennart Dahlmark Research Grant, Sweden (2014, 2015)
- Jubilee Donation Grant, K & A Wallenberg Foundation, Sweden (2014)
- Member of the "Epoch of Reionization and the Dark Ages" international science working group for the Square Kilometre Array (since February, 2015)
- Member of the "Epoch of Reionization" science working group for the LOFAR International Telescope (since 2015)
- Member of the "Square Kilometre Array - India" collaboration for the "Cosmic Dwan and the Epoch of Reionization" (since 2015)
- Postdoctoral Fellowship, Department of Physics, Imperial College London, UK (December, 2015 - April 2018)
- Postdoctoral Fellowship, Department of Astronomy, Stockholm University, Sweden (December, 2012 - November, 2015)

- Senior Research Fellowship, from the Council of Scientific and Industrial Research, India (2011-2012)
- Senior Research Fellowship, from IIT Kharagpur (2009-2011)
- Junior Research Fellowship, from IIT Kharagpur (2007-2009)
- Best Speaker Award in the Research Scholar Day, Department of Physics, IIT Kharagpur (2009)
- Best Speaker Award in the Young Astronomers Meet, India (2009)

Publications

Events/Seminars organized

- Main organizer, Chair of the LOC and Convener of the SOC of the International Conference and School on Observing the First Billion Years of the Universe Using Next Generation Telescopes (20-31 January 2020). An event funded by SPARC and SKA-India.

  Total participants: 90+, International: 50+, National: 40+.

  Website: http://www.iiti.ac.in/people/~firstbillion/
- Main Organizer and Chair of the Scientific Organizing Committee of the International Conference 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn and the Epoch of Reionization', (29 January 2021), jointly hosted by the University of Texas, Austin, USA and the Sussex University, UK.

  Total participants: 150+, International: 140+, National: 10+.

  Webpage: http://sazerac-conference.org/SIPS2021/3.html
- Member of the Virtual Organizing Committee of the '39th Annual Meeting of the Astronomical Society of India (ASI)'

  Webpage: https://astron-soc.in/asi2021/
- Organized two seminars under the series 'Recent Advances in Astronomy and Space Sciences'. Two seminars were delivered by:

  Prof. Matteo Viel, Scuola Internazionale Superiore di Studi Avanzati (SISSA), Trieste, Italy and

  Dr. Pratika Dayal, Kapteyn Institute, Groningen University, the Netherlands.

Projects active during April 2020-March 2021

Title: Imaging the first billion years of the universe with next-generation telescopes.

Duration 15/03/2019 - 31/03/2022

Funding Agency Scheme for Promotion of Academic and Research Collaboration (SPARC), MHRD, India.

Brief Description: The project aims at finding novel techniques of analysing upcoming Square Kilometre Array observations of the Cosmic Dawn era (the era of the first sources of light) to quantify the role of galaxies as ionizing sources, taking into account different uncertainties for different future surveys in other wavelengths (other than radio).

Project webpage: https://sparc.iitkgp.ac.in/detailpage.php?id=39

Title: Unveiling the Cosmic Dawn: Novel Techniques to Study the Reionization of the Early Universe.

Duration - January 2020 - December 2021

Funding Agency - ASEM-DUO http://www.asemduo.org/index.php

Brief Description - The project aims at finding optimal statistics to quantify and interpret the redshifted 21-cm signal coming from the early universe and to be observed by the next generation radio interferometers like the SKA.

Courses/conferences/workshops organized in 2020-21

- DAASE, IIT Indore organized an International Conference and School on Observing the First Billion Years of the Universe Using Next Generation Telescopes (20-31 January 2020). The event was funded by the SPARC project P39 (PI: Dr. Suman Majumdar) and SKA-India consortium of institutes. There were a total of 90+ participants among which 50+ were international and 40+ were national. Main Organizer: Dr. Suman Majumdar.
- DAASE, IIT Indore organized an International Virtual Conference on "Extragalactic jets at all scales: Launching, Propagation and Termination" with Max Planck Institute of Astronomy as part of the Partner Group at IIT Indore (June 14-18, 2021). Organizer: Dr. Bhargav Vaidya
- Data Science and Analytics - a major Faculty Training Workshop organized under the National Project Implementation Unit (NPIU) / Technical Education Quality Improvement Program (TEQIP) was organized in March 2020, with 70 participants. Resource Person: Dr. Abhirup Datta
- TEQIP-3 sponsored Faculty Development Program on AI-ML on December 7-17, 2020 with about 36 participants. Coordinators: Dr. Abhirup Datta, Dr. Somnath Dey
- TEQIP-3 sponsored Short Term Course on Applications of AI-ML on December 21-26, 2021 with about 35 participants. Coordinators: Dr. Somnath Dey and Dr. Abhirup Datta
- Dr. Suman Majumdar organized an international conference as the Chair of the Scientific Organizing Committee titled 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn and the Epoch of Reionization', (29 January 2021), jointly hosted by the University of Texas, Austin, USA and the Sussex University, UK. Conference webpage: http://sazerac-conference.org/SIPS2021/3.html
- DAASE organized '39th Annual Meeting of the Astronomical Society of India (ASI)'. https://astron-soc.in/asi2021/. LoC Co-Chair: Dr. Abhirup Datta. Member of Technical Committee: Dr. Suman Majiumdar.
- Dr. Bhargav Vaidya organized a one day workshop on "Computational Astrophysics : An emerging avenue for Indian Astronomy Community" as part of the 39th Meeting of the Astronomical Society of India (February 18, 2021).
- Organized the Winter School on Observational Astronomy in February 1-12, 2021 in collaboration with IIA and MPCST. Coordinator: Dr. Abhirup Datta, Dr. Bhupesh Saxena and Prof. P. Parihar.
- TEQIP-3 sponsored Faculty Development Program on AI-ML on June 16-26, 2021. Resource Person: Dr. Abhirup Datta.

Major awards, achievements, recognition 2020-21

- Dr Abhirup Datta is Science Co-Chair of International SKA CD/EoR Science Working Group since January, 2020.
- Dr. Abhirup Datta is now Senior Member, IEEE.
- Mr. Arnab Chakraborty and Mr. Sumanjit Chakraborty, PhD students of Dr. Abhirup Datta have been selected as URSI Young Scientist Award in Union Radio Scientifique Internationale (URSI) GASS 2021, Rome, Italy.
- Dr Bhargav Vaidya was Invited as a Plenary Speaker at the Conference organized by Astronomical Society of India in February 2020.
- Plenary Talk by Dr. Amit Shukla at 39th Annual Meeting of Astronomical Society of India
- Invited Talk by Dr. Amit SHukla at Jets Facilities 2021, 05-09 April 2021, ARIES
- Dr Amit Shukla's publication in Nature Communications: Gamma-ray flares from relativistic magnetic reconnection in the jet of the quasar 3C 279, Amit Shukla, K. Mannheim, accepted for publication in Nature Communications, 17 July 2020 (In press).

- Mr. Soumen Datta, Ph.D. student under Dr. Saurabh Das, has been awarded the prestigious URSI Young Scientist Award in Union Radio Scientifique Internationale (URSI) GASS 2020, Rome, Italy.
- Dr. Manoneeta Chakraborty became a lifetime member of the Astronomical Society of India (ASI)
- Mr. Gourab Giri, PhD student of Dr. Bhargav Vaidya has been awarded with the Prime Minister's Research Fellowship (PMRF).
- Dr Bhargav Vaidya was awarded the Max Planck India Partner group award from Max Planck Society.
- Dr. Suman Majumdar received ASEM-DUO Faculty Fellowship.
- Dr. Suman Majumdar organized an international conference as the Chair of the Scientific Organizing Committee titled 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn and the Epoch of Reionization', (29 January 2021), jointly hosted by the University of Texas, Austin, USA and the Sussex University, UK. Conference webpage: http://sazerac-conference.org/SIPS2021/3.html
- Dr. Suman Majumdar gave an invited talk at the 'SKA-India Workshop on 21-cm Cosmology and Reionization', (19-23 April 2021). The video of the talk can be found here -- https://www.youtube.com/watch?v=MySYiF6O1MM
- Dr. Suman Majumdar gave an invited seminar at the South Western Institute for Astronomy Research, Yunnan University, (China) -- http://www.swifar.ynu.edu.cn/index.htm .
- Dr. Suman Majumdar gave a series of invited lectures in the 'School and Workshop on the Data Analysis in Cosmology and Astroparticle Physics' organized by the Technology Innovation Hub on Data Science, Big Data Analytics, and Data Curation at the Indian Statistical Institute, Kolkata. Video link to the lectures: https://www.youtube.com/watch?v=WXFFHuYk3x8&list=PLk-GmAwDItwZ92_uxoal6oV_-UmL6BvFu

Student Presentations

- M.Sc. student Aadarsh Pathak supervised by Dr. Suman Majumdar gave an oral presentation on his M.Sc. project work in the international conference 'A Precursor View of the SKA Sky' (15-19 March 2021) organized at the SKA Office Manchester, UK. Video of his talk is available here -- https://youtu.be/NyVBVof8hrc
- PhD student Mohd Kamran supervised by Dr. Suman Majumdar gave an oral presentation on his work in the international conference 'A Precursor View of the SKA Sky' (15-19 March 2021) organized at the SKA Office Manchester, UK.
- PhD student Chandra Shekhar Murmu supervised by Dr. Suman Majumdar presented a poster on his work in the international conference 'A Precursor View of the SKA Sky' (15-19 March 2021) organized at the SKA Office Manchester, UK.
- M.Sc. student Aadarsh Pathak supervised by Dr. Suman Majumdar presented a poster on his M.Sc. project work in the international conference 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn and the Epoch of Reionization (29 January 2021)', organized by University of Texas, Austin, USA and the Sussex University, UK.
- PhD student Mohd Kamran supervised by Dr. Suman Majumdar gave an oral presentation on his work in the international conference 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn and the Epoch of Reionization (29 January 2021)', organized by University of Texas, Austin, USA and the Sussex University, UK. Video of his talk is available at -- https://www.youtube.com/watch?v=HjFNYiamSjg
- PhD student Chandra Shekhar Murmu supervised by Dr. Suman Majumdar gave an oral presentation on his work in the international conference 'SAZERAC-SIP on The 21-cm Signal from Cosmic Dawn

and the Epoch of Reionization (29 January 2021)', organized by University of Texas, Austin, USA and the Sussex University, UK.

- M.Sc. student Aadarsh Pathak, PhD students Mohd Kamran and Chandra Shekhar Murmu, all supervised by Dr. Suman Majumdar, gave oral presentations on their works in the SKA-India Workshop on 21-cm Cosmology and Reionization (19-23 April 2021). Video links to their talks can be found here -- https://www.youtube.com/channel/UCqchYLf6OY6yjV6nwdiVycw
- M.Sc. student Aadarsh Pathak and PhD student Chandra Shekhar Murmu, both supervised by Dr. Suman Majumdar, presented posters on their work in the Astronomical Society of India Meeting 2021 (18-23 February 2021). https://astron-soc.in/asi2021/
- Parul Janagal participated and took part in the discussion in the SpaceGen United conference, held in July 2020.
- Parul Janagal gave a talk titled Space, Time, and Gravity in a webinar series by IEEE NCU Student Branch in June 2020.
- Unnati Kashyap presented a poster titled 'Broadband Spectro-timing Analysis of Neutron Star LMXB 4U 1724-30 Using AstroSat' at 'The 38th Annual Meeting of the Astronomical Society of India' at Indian Institute of Science Education Research (IISER) Tirupati, held during 13 - 17 February 2020.
- Unnati Kashyap presented a poster at The 9th International Conference on Gravitation and Cosmology (ICGC), at IISER Mohali held during 10-13 December 2019.
- Parul Janagal participated in and gave a talk titled Search for Radio Transients using Machine Learning, at the RASS (Recent Advances in Space Sciences) international workshop, held at IIT Indore in November 2019.

Outreach Activities at DAASE 2020-2021

- Solar Eclipse Observation event, June 21, 2020
- Despite the lockdown due to Covid-19, faculty members of DAASE, led by Dr. Shukla and Dr. Chakraborty, live-streamed the solar eclipse event for the IIT Indore community
- National Science Day, February 28, 2021
- Lectures given by DAASE faculty members at the Winter School in Observational Astronomy 2021 organized by DAASE, IIT Indore in association with IIA, MPCST held from 1-12 February 2021
- Rashtriya Avishkar Abhiyan (RAA) - lectures given by Dr. Siddharth Malu, Dr. Amit Shukla
- Lecture by Dr. Manoneeta Chakraborty at Astro adda organized by Nehru Planetarium, Delhi
- Lecture by Dr. Manoneeta Chakraborty, Dr. Amit Shukla, Mr. Kishlay Singh at IIT Indore's first Astronomy fest Nakshatra in June 2021
- Colloquium series: "Recent Advances in Astronomy and Space Science", 2020
- Popular talk on astronomy: Searching for life in outer space by Erik Zackrisson, Uppsala University, Sweden on 30th January 2020
- Celestial Silhouette [Solar eclipse observation], December 26, 2019
- Astronomy outreach and night skywatch event by the DAASE on October 18, 2019. This was attended by 30 students from The Shishukunj International School alongside many from the IIT Indore community.
- Visit by school students from local villages and government schools under Unnat Bharat Abhiyan, 05, July 2019. Lectures and demonstrations by DAASE members.
- Guest lectures by DAASE faculty members during Astronomical Telescope Making Workshop organized by Vigyan Prasar at Kendriya Vidyalaya-I, Bhopal on 22nd June 2019.

Centres

Center of Innovation, Incubation, Entrepreneurship, and Industry Relations (CIIEIR)

Centre for Innovation and Entrepreneurship (CIE) was established in 2016. CIE is an umbrella setup at IIT Indore for fostering entrepreneurship and nurturing the start-ups. Later it was renamed as Center of Innovation, Incubation, Entrepreneurship, and Industry Relations (CIIEIR) and was established in September 2020 at IIT Indore by the Director (Officiating) Professor Neelesh Kumar Jain. It administers a business incubator which provides 'Start to scale' support for technology-based entrepreneurship and facilitates the conversion of research activity into entrepreneurial ventures.

Vision and Mission: CIIEIR aims to transform knowledge and innovation into the creation of successful innovative entrepreneurs. Our main vision is to develop competitiveness and inculcate innovation among IIT Indore community members as well as enhance links between industry and students for developing useful products based on emerging technologies.

CIIEIR team reports to Professor Anand Parey, Dean of Resources Generation.

Dr. Swaminathan R. (Head, CIIEIR), CIIEIR Committee, Dr. Kumar Gaurav (AR, CIIEIR), and Ms. Kavita Enamdar, are managing incubation and entrepreneurship activities with the joint efforts from students of Entrepreneurship Cell (E-Cell) IIT Indore.

Support and Facilities:

1. Fully furnished air-conditioned offices, Board Room, Conference Room.
2. Wi-Fi and IT support.
3. Mentorship for innovation, research, testing, prototyping.
4. Timely guidance for seeking financial aids.

Collaborations for Funding with Ministry of MSME:

- MoUs have been signed with Ministry of MSME for various Government of India funding schemes.
- Design Expertise to Manufacturing MSME Sector (Design scheme).
- Support for Entrepreneurial and Managerial Development of MSMEs through Incubators (Incubation Scheme).

MoUs and Collaborations:

- MoU has been signed with FICCI FLO for Women Entrepreneurship.
- MoU has been signed with Digital Futuristic Angels Network Private Limited for unlimited seed funding.
- MoU has been signed with NNM Next Gen (CoKaCo) Angels Investor.
- MoU has been signed with Inocorn Angels Network Private Limited.
- CIIEIR with the help of R&D section at IIT Indore procured YNOS Technology platform for innovation, entrepreneurship, intellectual property, industry linkages and start-ups.

Major Achievements:

- 20 Startups are currently incubated at CIIEIR, IIT Indore.
- One of our previous incubatee Swaaha Resource Management Pvt. Ltd. was awarded as the "Best Start-up Initiative by Smart Cities" by ET Global Smart City Forum 2020.
- Scas Technology, a startup developing Semi-autonomous AI-enabled UAVs, has been shortlisted as

one of the 30 finalist teams in Swadeshi Microprocessor Challenge organized by MeitY, Govt. of India, amongst 6169 Teams (with over 10,000 participants) .

- Five innovative Ideas of our faculty members were approved by the Ministry of MSME for funding of Rs. 90 Lakhs under Incubation scheme.
- Recently, three proposals submitted to Ministry of MSME under Design scheme were approved with total GoI funding of Rs. 45 Lakhs.

Webinar/Major Event/Awareness Programs Organized During COVID 19 Pandemic:

Webinars:

- Mrs. CA Vanita Rathi delivered webinar on How to Register a New Company and Start Business.
- Mr. Nilesh Trivedi, Assistant Director, Ministry of MSME, delivered webinar on Various Government Policies for Easy Setup of Startup.
- Mr. CS Raj Kapadia delivered webinar on Understanding the Forms of Business Entities and Procedures for Registration.
- Dr. Abrar Ali Saiyed delivered webinar on Bright and Dark Side of Entrepreneurship.
- Professor Sunil Shukla, Director, Entrepreneurship Development Institute of India (EDII) delivered webinar on Accelerating Entrepreneurship in New India.
- Mr. Sandeep Bommireddi, Co-founder of Adonmo, IIT Indore Alumnus, delivered webinar on Incredible Journey in Entrepreneurship.
- Dr. Pankaj Borkar, Head-RGNIIPM delivered webinar on Intellectual Property Rights.
- Mr. Tarun Sharma, CGM-EXIM Bank, delivered webinar on Supporting Sustainable Enterprises and Export Development.
- Professor Thillai Rajan A, Department of Management studies IIT Madras, delivered webinar on Incubation and Venture Funding: Implication of the evolving trends for the startup founders.
- Dr. Amit Kumar Dwivedi and Dr. Satya Ranjan Acharya from EDII delivered a webinar on Entrepreneurship opportunities and ecosystem during and post COVID pandemic.
- Professor N. S. Dinesh, Department of Electronic system engineering (DESE), Indian Institute of science, Bangalore, delivered a webinar on Challenges in developing automated puppetry under the theme Rebranding of Indian Toys.

Major Events:

- E-Summit 2020-2021 with the theme A Virtual Forum of Excogitation was organized by E-cell, IIT Indore.
- i5 Summit with the theme, which is the largest entrepreneurship summit of central India, was jointly organized by E-cell, IIT Indore and IIM Indore.
- One-day Workshop on Creating Lab-to-Land Ecosystem: Challenges & Opportunities was jointly organized by IIT Indore and RRCAT Indore.

Awareness Programs:

1. Awareness program was conducted in association with MSME Development Institute (DI), Indore on Establishment of Toy Cluster in Budhni and training was given to various Toy artisans at Nasrullaganj, Sehore in the month of Feb-2021.

2. Awareness program on Safety & Standards Related to Toy was organized in association with MSME DI Indore for Toy industrialists, manufacturers, and artisans at Indore in the month of Feb-2021

Startups associated with IIT Indore: -

1. FundsSMEs.
2. Spark Green Venture & Innovation
3. InnovationOne.com
4. Freebird Aerospace
5. Seashell Services
6. MiBi Services Private Limited
7. Smart I -Fab Technology Private Limited
8. OTomator Technologies Private Limited
9. THINK -VLSI
10. Interview Prep
11. IRIS Heath Care
12. Green ECHO
13. WasteHai
14. VLAB4U
15. Padmapriya Technovat Private Limited
16. Scas Technology
17. Smiling India Healthcare Pvt. Ltd.
18. Xohani Solutions Pvt. Ltd.
19. Cymbient Technologies Private Limited
20. Food Kamp

List of Entrepreneurs of IIT Indore (Alumni)

✓ Sandeep Bommireddi, Co-founder of Adonmo.
✓ Jwalant Shah, Co-Founder of SWAAHA Resource Management Pvt. Ltd.
✓ Ankit Goyal, Director of Unacademy Brands-GATE
✓ Rohit Nitin Joshi, Co-Founder at Kreatryx
✓ Gaurav Parchani, Co-Founder at Turtle Shell Technologies Private Limited.
✓ Rohit Agarwal, Co-Founder of SWAAHA Resource Management Pvt. Ltd.
✓ Ravi Shankar, Founder & Director of Esmartify Private Limited & Boosters Edutech
✓ Shikhar Bansal, Founder & Director at Boosters Edutech.
✓ Anmol Arora, CEO- DocVita.
✓ Vikram Patel, Co-Founder & CTO at DocVita.
✓ Venkata Sai Vamsi Penupothu, Co-Founder @ Runo.
✓ Tushar Rokade, Co-Founder at Artpillz.
✓ Ravi Shankar, Owner of Juicilicious CAFÉ

List of Faculty Entrepreneurs of IIT Indore

The following faculty members are associated with the startups incubated at CIIEIR in a non-executive role

1. Dr. I. A. Palani - Smart I -Fab Technology Private Limited
2. Dr. Santosh K Vishvakarma – Scas Technology
3. Dr. Gourinath Banda - Cymbient Technologies Private Limited

CIIEIR Committee Members (Faculty Mentors)

Dr. Manish Kumar Goyal
Dr. Santosh K Vishvakarma
Dr. Anirban Sengupta
Dr. Kiran Bala
Dr. Sumanta Samal
Dr. Ashok Kumar Mocherla
Dr. Rajesh Kumar
Dr. Devendra Deshmukh
Dr. Shaikh M Mobin
Dr. Gourinath Banda
Dr. Jayaprakash Murugesan
Dr. Abhishek Rajput
Dr. Ruchi Sharma
Dr. Suman Majumdar
Dr. Tridib K Sharma
Dr. I. A. Palani

Sophisticated Instrumentation Centre (SIC)

Sophisticated Instrumentation Centre: A National Facility
IIT Indore

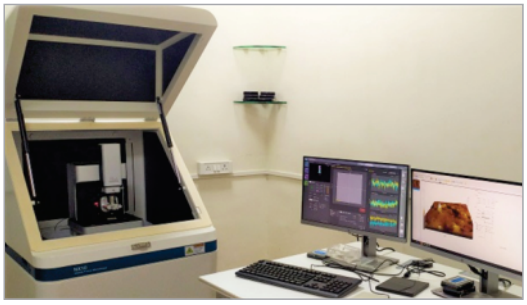

Sophisticated instrumentation centre (SIC) was established in September 2011 with institute funding to expedite the research program at IIT Indore. The mission of SIC is to support and foster the research initiatives, at the Indian Institute of Technology (IIT) Indore, by providing state-of-the-art instrumentation and ancillary equipment and expertise in its use and application. The SIC at IIT Indore houses a plethora of analytical facilities such as Single Crystal X-ray Diffractometer, Nuclear Magnetic Resonance Spectrometer, ESI-Mass Spectrometer, Elemental Analyzer, Photo luminescence Spectrometer, etc. and various microscopic facilities such as Single-Molecule Imaging and Spectroscopy, Confocal laser scanning microscope, Field-Emission Scanning Electron Microscope, Atomic Force Microscopy, etc. These instruments are housed under one roof to provide the highest quality of data analysis to stakeholders of both research and teaching. With our excellent facilities and high level of expertise, we are offering our analytical services across the Institute's departments and external commercial organizations.

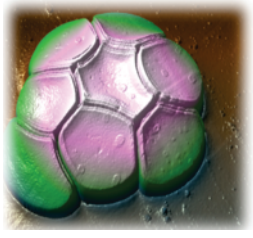

SIC has now emerged as one of the first such centers in central India, providing extensive support to users across the country. It is working towards being a self-sustained center by generating funds from services provided to external users from academia and industry.

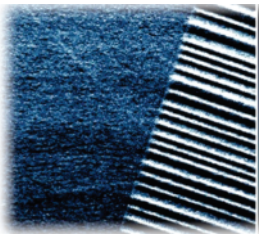

A significant advantage of SIC is its accessibility to the students within the institute; a very healthy ratio of students to the time availability on instruments is maintained by allotment of specific slots to the users.

The SIC instruments strengthen the following research areas: Fundamental Research in Inorganic Chemistry, Organic Chemistry, Organometallic Chemistry, Various aspects of Material Science, BioScience and Engineering, including work on biosensors, Metallurgy Engineering and Materials Science,, Electrical Engineering, Mechanical Engineering, and Condensed Matter Physics.

Some Major Facilities:

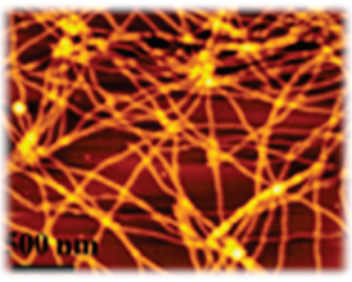

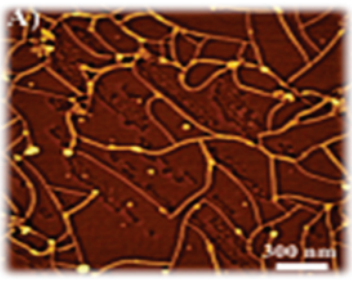

Atomic Force Microscopy (AFM)

Atomic Force Microscopy (AFM), Park Systems NX10, is one of the first 100% automated systems that offers its cutting-edge technology of ultra-fast, metrological and high resolution measurements for the most advanced materials research at the nano scale in all AFM and STM modes. Various Measuring modes, Contact AFM in

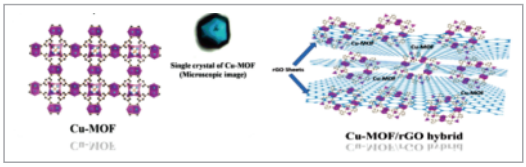

air/liquid; Semi-contact AFM in air/liquid; Non-contact AFM; Phase Imaging; Magnetic Force Microscopy (MFM); Kelvin Probe (Surface Potential Microscopy); Electric Force Microscopy (EFM); Piezo Response Force Microscopy; Force curve measurements; Nanolithography; Conductive AFM; Scanning Tunneling Microscopy STM (optional); Photocurrent Mapping; Volt-ampere characteristic measurements.

Single Crystal X-ray Diffraction (SCXRD)

Single Crystal X-ray Diffraction Facility at SIC is equipped with state- of –the- art dual core Agilent Technologies (Oxford Diffraction) Super Nova CCD System. It gives access to micro-focus Cu and Mo sources which allows even small size crystals data collection and fairly good structure solutions. It is also equipped with Oxford cryo systems which enable temperature range from 90 to 400K. There are also high definition microscopes for separations and mounting of crystals.

Services provided include:

Crystal screening and mounting, including air-sensitive samples.

Diffraction data collection under various conditions, including temperatures as low as 90-degree Kelvin.

Structure solution, refinement, and interpretation up to publication level.

Cambridge Structure Database searching.

Single Crystal X-ray Diffraction Facility is an independent National Facility. Currently, it is offering service to School of Basic Science within the Institute, other academic institutes and Industries throughout India for X-ray crystallographic studies.

Dual Ion Beam Sputtering Deposition (DIBSD)

The goal is to encourage and foster the research initiative in the Engineering Department, at Indian Institute of Technology Indore, by providing state-of-the-art research facility, and expertise in its use and application. The diverse novel research performed by this unique facility will be a platform to attract top-seeded researchers and experimentalists in key semiconductor opto-electronic and nanotechnology industries, research laboratories, and academic institutions across the entire globe to establish a strong collaborative research programme with IIT Indore. Research activities, boosted by the DIBSD facility, are mainly focused on growth of novel nanostructures and high-quality thin films having enormous applications in semiconductor opto-electronics, sensors, solar photovoltaics, detectors, biotechnology, microelectro-mechanical systems (MEMS), nanoelectromechanical systems (NEMS) etc.

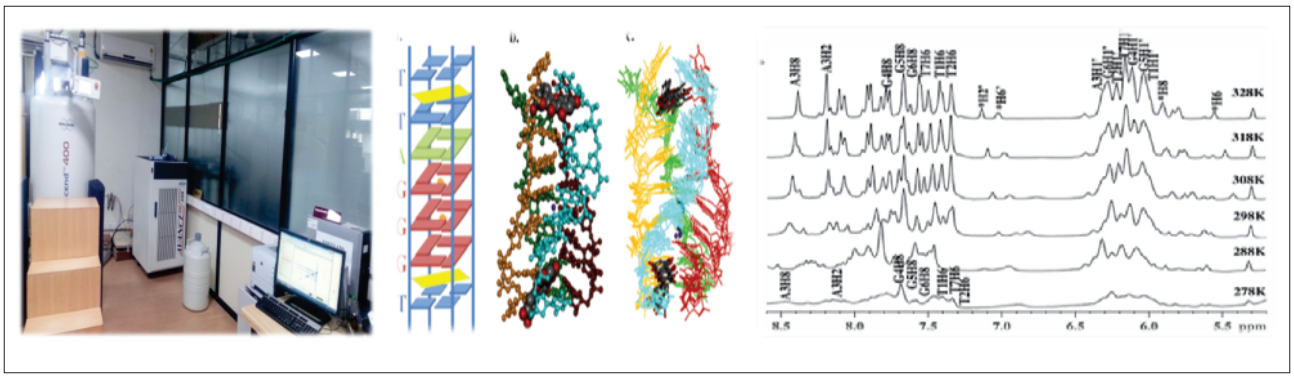

In a broad sense, the research work accomplished by this facility would be extremely beneficial to showcase our expertise in the emerging areas of current research and development.

Diverse novel research activities would have major impact on following industries:

- Automobile
- Nanotechnology
- Pharmaceutical (Nano-Bioelectronics)
- Electronics
- Chemical
- Renewable Energy

Nuclear Magnetic Resonance 400 MHz (NMR)

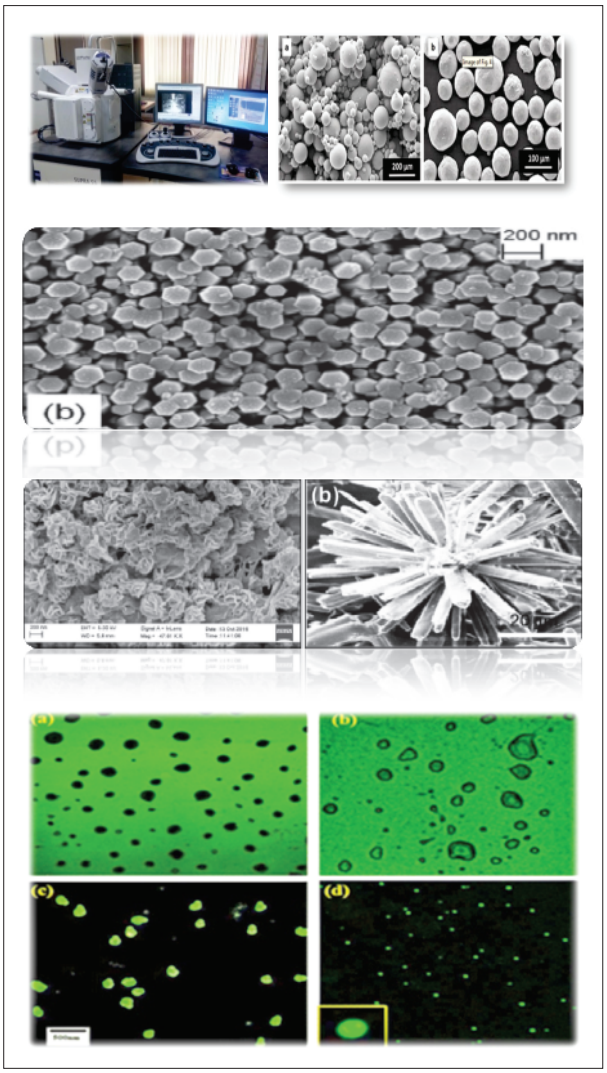

NMR spectrometer: Fourier Transform Nuclear Magnetic Resonance spectrometer, Model AVANCE III 400 Ascend Bruker BioSpin International AG, Switzerland. Magnet: 8.96 Tesla (Superconducting), 50 mm bore Probes Available: For Solution State NMR 5 mm Broad Band Fluorine Observe Probe with gradient along Z-axis and Automated Tuning & Matching (ATM) accessory. 5 mm Broad Band Inverse Probe with gradient along Z-axis and Automated Tuning & Matching (ATM) accessory. Console: The state of the art Avance III 400 NMR console with digital lock and 2 independent RF channels providing 60 W 1H/19F transmitter and 150 W transmitters and broad band Preamplifier. In addition 5 W 2H transmitter for deuterium observe and decoupling.

Field-Emission Scanning Electron Microscope (FE-SEM)

Supra55 Zeiss, provides excellent imaging properties combined with analytical capabilities makes this high end FE-SEM suitable for a wide range of applications in materials science, life science and semiconductor technology. The large specimen chamber for the integration of optional detectors and accessories enables the user to configure the SUPRA for specific applications without sacrificing productivity or efficiency.

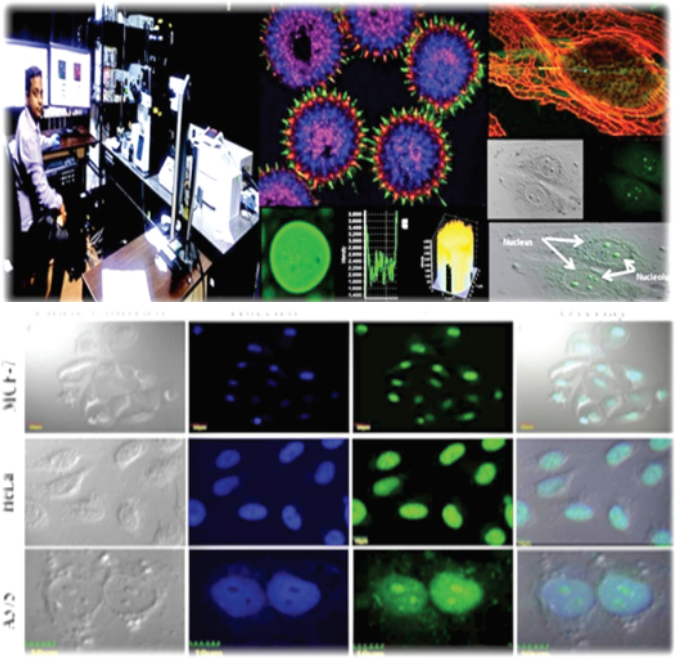

- GEMINI Technology with high efficiency in-lens detector and no magnetic field at specimen level
- Superb resolution and image quality at high and low operating voltages
- Extremely wide operating voltage range from 0.02-30kV
- Designed-in ease of use with minimal adjustments required when changing operating conditions
- Short analytical working distance of 8.5 mm for simultaneous high resolution imaging and X-ray analysis
- High probe current (up to 100 nA) with high stability (better than 0.2%/h) for precise analytical results
- Multi-User friendly with Windows® based SmartSEM control software

Confocal Laser Scanning Microscope (CLSM)

IIT Indore confocal microscopy facility is located at sophisticated instrument center (SIC) building, Simrol campus, IIT Indore. The facility has a state of the art imaging system with a fully motorized inverted microscope based multiphoton system capable of confocal imaging, fluorescence lifetime imaging microscopy (FLIM), fluorescence correlation spectroscopy (FCS), IR imaging, live cell imaging. The microscope is also fitted with Mai Tai DeepSee femtosecond tunable laser.

- Confocal laser scanning microscopy
- Two-photon laser scanning microscopy
- Fluorescence lifetime imaging microscopy
- Fluorescence correlation spectroscopy
- Live cell imaging

Scientific Publications:

Upcoming Instruments :
500 MHz NMR, DSC,

Summary of Cumulative Sample Tested on some of the Major Facilities

Instruments	Internal Samples	External Samples
SC-XRD	3068	1026
NMR	48350 {on 400 MHz NMR)	155
LCMS	11432	135
SEM	8048	348
AFM	2495	14
Confocal Microscopy	1048	27

Centre for Advanced Electronics (CAE)

Centre for Advanced Electronics (CAE) has been established at IIT Indore as an interdisciplinary research centre which aims to develop materials, devices & technologies for multidisciplinary applications including computing, communication, medical and energy. The CAE has brought some of the academicians at IIT Indore, working in electronics and its allied areas, under one technical roof to enable high quality applied research for the benefit of mankind. We are honored to have on board some of the renowned academicians, in electronics and related areas, across the globe as our advisors. The CAE is committed to come up as a platform for applied research, device development, skill & manpower development in the nationally important area of electronics.

Research Areas:

Nanoelectronics/Microelectronics
Integrated photonics/Optoelectronics
Advanced Materials and Devices
Advanced Porous Organic Electronics
Computational Electronics and Materials
2D Electronic Materials

Ongoing Projects:

On-chip biochemical sensors for healthcare applications

Integrated silicon photonic devices: optical modulators, photodetectors and optical switches

Associated Faculty:

Following is a non-exclusive list of IIT Indore faculty associated with CAE

Dr. Mukesh Kumar (Head)
Dr. Shaibal Mukherjee
Dr. Vimal Bhatia
Dr. Santosh Kumar Vishvakarma
Dr. Ajay Kumar Kushwaha
Dr. Vinod Kumar
Dr. Apurba K. Das
Dr. Rajesh Kumar
Dr. Srimanta Pakhira
Dr. Ram Bilas Pachori

Computer and Information Technology Centre (CITC)

The Computer and Information Technology Center is solely responsible for keeping the Information and Communication Technology & Computation related facilities available to each and every member of IIT Indore.

These facilities are constantly upgraded to meet the evolving standards of IIT. The Computer Labs remain open for twelve hours (8:00 AM to 8:00PM) in a day and the students visit the labs for their general and routine computing tasks. Many departments use the facilities of the Computer Lab to conduct their practical classes & examinations. The campus LAN will be extending to all the hostels and residences. New hardware and software are procured on a regular basis so as to provide a state-of-the-art computing facility to the IIT Indore family.

The services provided by the Computer and Information Technology Center include:

The Centre is also engaged in designing and facilitates the NKN Project with NIC in the Simrol Campus. National Knowledge Network (NKN) project is aimed at establishing a strong and robust internal Indian network which will be capable of providing secure and reliable connectivity. Using NKN, all vibrant institutions with vision and passion will be able to transcend space and time limitations in accessing information and knowledge and derive the associated benefits for themselves and for the society towards ushering in a knowledge revolution in the country. NKN is intended to connect all the knowledge and research institutions in the country using high bandwidth / low latency network.

- **Installation & Maintenance of Servers for:**
  - Internet access.
  - E-mail facilities.
  - Samba sharing facility.
  - Proxy based authentication access.
  - Computation facilities.
  - VPN facilities for accessing Journals and E-contents from outside of the Institute.
- Management and upkeep of the Official IIT Indore website.
- Management of the Institute wide Wi-Fi enabled environment.
- Management of the Centralized Computer Lab accessible to all the students of the institute as well as all researcher/ project students.

- Maintaining 1 Gbps NKN Internet Leased Line, 16 Mbps stand-by Internet Leased Line, seamlessly connected about 900 nodes.
- Providing technical assistance to the Academic and Administrative Staff of the Institute.
- Providing facilities to the Students who come from various academic institutes from all over the India for their short-term courses, mini project work and summer training etc.
- Provides and maintains different machines having Windows, Linux and Mac Operating Systems of the Faculty & Staff members.

CITC Team

Dr. Pankaj R. Sagdeo (Physics)	Triboelectric and Nano-generator
Dr. P.K. Sanjram (HSS)	Human Factors in Automobiles

Center for Indian Scientific Knowledge Systems (CISKS)

About CISKS

The grand vision of the Centre for Indian Scientific Knowledge Systems was established at IIT-Indore in 2020. The grand vision of the Center for Indian Scientific Knowledge Systems is to train generations of scholars who will show the 'Indian way' to the world.

The centre will focus on understanding, preserving, teaching and adapting the science and technology heritage of India. The center will focus exclusively on the scientific and technology heritage of India and its relevance to modern world. The focus is on hard sciences such as mathematics, astronomy, metallurgy, biology, agriculture, engineering and medicine among others. This center will not focus on the language studies or humanities or social science aspects of Indian knowledge systems.

Vision: The grand vision of the Center for Indian Scientific Knowledge Systems is to train generations of scholars who will show the 'Indian way' to the world.

Mission: This center will focus exclusively on the research and education of the Indian scientific heritage by studying original texts in all Indian languages and understanding their relevance to address current technological challenges to sustainable societal development. This center will focus on developing specific courses for various engineering disciplines in Samskrit aimed at undergraduate/graduate students, research into texts and identifying their relevance in modern context and serve as a center for dissemination of knowledge and training the teachers and students in the engineering colleges of India.

Objective of Centre

The objectives of Centre for Indian Scientific Knowledge Systems (CISKS) are to:

1. research classic scientific texts of India
2. educate students about the scientific texts of India
3. nurture scholarship in Indian scientific Knowledge Systems
4. preserve classic scientific texts of India
5. collaborate with other HEIs of India in the field of Indian Scientific Knowledge Systems

Focus areas of the centre

1. Knowledge Paradigms;
2. Sustainable Agriculture;
3. Novel Materials;
4. Holistic Medicine;
5. Preserving Traditional knowledge

Ongoing Projects

The centre's first internal competitive grant program of the CISKS funded by the annual budget of the centre allocated by the institute was initiated and following projects funded. The unique aspect of this initiative is that the proposals can be submitted not only by the faculty members, but the students (UG and PG) can be the principal investigator (PI) of the grants. The success of this initiative is reflected in the fact that 75% of the proposals received and funded have a student PI.

S. No	Project Title
1	Positional Astronomy with the Ancient Ved-shala in Ujjain
2	Traditional liquid fertilizer as a substituent to conventional inorganic chemical fertilizers and solid manure
3	Investigating 'Panchgavya' (cow dung, urine, milk, ghee, curd) for synthesizing graphene and carbon quantum dots
4	Identification and purification of Phytochemicals derived from Indian medicinal plants as Cancer therapeutics

Associated Faculty

Following is a non-exclusive list of IIT Indore faculty associated with CISKS

Prof. Ganti S. Murthy (Founding Head)
Prof. Krushna Mavani (Physics)
Prof. Ram Bilas Pachori (EE)
Prof. Sandeep Chaudhary (CE)
Dr. Abhirup Datta (AASE)
Dr. Aruna Tiwari (CSE)

Centre for Futuristic Defence and Space Technology (CFDST)

From Head of Center's Desk: The center of futuristic defence and space technology (CFDST) was established in 2020. It is a multidisciplinary center with primary objective to provide a platform to the students and researchers for their contribution in "Nation-Building" through developing various forefront and futuristic technologies for Defense and Space Sectors towards "Aatmanirbhar Bharat". The canter is contributing to the premier laboratories of defense institutions of country such as the Defense Research and Development Organization (DRDO) by providing technological solutions to some of their research problems. The center is also planning to offer specialized and dedicated M.Tech./MS (research) and Ph.D. programs in the broad area of defence and space in near future.

Members in CFDST:

- Professor Neelesh Kumar Jain
- Professor Rajneesh Misra
- Professor Ram Bilas Pachori
- Professor Vimal Bhatia
- Dr. Abhinoy Kumar Singh
- Dr. Abhirup Datta
- Dr. Abhishek Rajput
- Dr. Avinash Sonawane
- Dr. Ajay Kumar Kushwaha
- Dr. I A Palani
- Dr. Lalit Borana
- Dr. Mrigendra Dubey
- Dr. Neelima Satyam
- Dr. Pankaj Sagdeo
- Dr. Puneet Gupta
- Dr. Fvan Maurya
- Dr. Sanjay Kumar Singh
- Dr. Saurabh Das
- Dr. Shaibal Mukherjee
- Dr. Vinod Kumar
- Dr. Vivek Kanhangad
- Dr. Hem Chandra Jha
- Dr. Jayaprakash Murugesan
- Dr. Mukesh Kumar
- Dr. Nirmala Menon
- Dr. Ruchi Sharma
- Dr. Somaditya Sen
- Dr. Sumanta Samal
- Dr. Surya Prakash
- Dr. Swaminathan Ramabadran

Major Achievements: Webinar Organized During COVID 19 Pandemic

- Expert Talk Dr. Ajay Kumar IAS Defence Secretary Ministry of Defence, Govt. of India webinar on Indian Defence Industry The Sunrise Sector.
- Expert Talk Maj Gen A K. Channan, PVSM, SM Additional Director General Army Design Bureau webinar on Technology as a disruptive influence on military warfare.
- Expert Talk Lt. Gen VG Khandare PVSM, AVSM, SM (Retd.) Military Adviser, National Security Council Secretariat webinar on Role of technology in national security and comprehensive national power.
- One day Workshop on Opportunities in Research and Developments in Armament Establishments (ARMREB-2020)" on 26th August 2020.
- CFDST organized a presentation and weapon display by National Security Guard (NSG) 26 Special Composite Group in IIT Indore campus on August 20, 2021.
- CFDST organized the visit of 66 student-officers (60 Indian and 6 foreign nationals) from MCTE, Mhow to IIT Indore campus.

Centre for Rural Development and Technology (CRDT)

IIT Indore is the premier technology institute in Central India and is located in Indore, Madhya Pradesh. Located in a historically backward state (as per HDI index and other government parameters), the institute has undertaken various activities during a decade of its establishment to support and facilitate the improvement of the various indices. Different research projects across various disciplines have focused on the challenges and problems of a largely rural population and worked with agencies to develop solutions to improve people's quality of living. Apart from adopting two villages located adjacent to the institute, research projects in sustainability, water, sanitation, solid waste management, right to education, Governance have addressed some major issues with some success. Additionally, student groups such as Avana have collaborated with Government projects as Unnat Bharat Abhiyan (UBA) to develop innovative directions and strategies. The institute has now established The Centre for Rural Development (CRDT) to harness and coalesce all the efforts mentioned above with specific aims and objectives. The Centre will become a nodal hub for researchers, volunteers, practitioners, educators, and others to collaborate and facilitate rural empowerment and progress solutions.

Vision: CRDT shall strive to facilitate empowering and enabling the Rural population to improve their living conditions by development and application of appropriate and people friendly technologies adopting participatory, sustainable, democratic, transparent and gender sensitive processes.

Objectives: The Centre for Rural Development, IIT Indore, aims to work into the following broad areas:

- Skill development and training programs for various trades
- Small scale entrepreneurship, sustainable cottage industries, development of value-added products
- Access and Opportunities for Gender justice
- Developing user-friendly interfaces for launching e-platforms for various rural activities that require outreach to larger communities
- Evaluation and policy recommendations for government welfare schemes.
- Harnessing Forest products and helping rural entrepreneurs to develop and sell their products with easy access to technology
- Identifying gaps between skills and outreach and facilitating in filling that gap
- Outreach to NGOs, Govt organizations, international bodies such as UNICEF to have a broad-based approach
- Right to Education (RTE) Act- Efficacy and Outcomes

- Technology Development in Food Processing, Food Packaging and Food Storage

1. Prof. Sandeep Chaudhary (Head)
2. Dr. Pritee Sharma
3. Dr. Neeraj Mishra
4. Dr. Neelima Satyam D.
5. Dr. Santosh Kumar Vishvakarma

7. HOD, Electrical Engineering
8. HOD, Mechanical Engineering
9. Associate Dean-II, Infrastructure Development
10. Associate Dean-III, Infrastructure Development
11. Dr. Shaibal Mukherjee

Activities

- Meetings and Talks
- Gandhi Jayanti Celebration
- Providing a platform to local artisan on the occasion of Gandhi Jayanti
- Collaborative Research Activities to develop products and technologies for rural people
- Training Programs proposed

Gandhi Jayanti Celebrations

- Khadi Gramodyog Bhandar, Indore - Khadi items of Health and Clothing.
- Kasturba Gandhi National Memorial Trust, Indore – Charkha & organic products.
- Local tribal and forest dwellers from Simrol-Choral Forest area - handmade bamboo products and crafts

CRDT: COVID RELATED ACTIVITY

Fluorescent bricks and coatings with self-illuminating properties for applications in UV disinfection building chambers

Prof. Sandeep Chaudhary, Dr. Rajesh Kumar and Mr. Vivek Gupta

Passenger luggage in public transportation can be a potential source of disease spread, for which large number of UV disinfection chambers will be required. For such a purpose, existing concrete buildings can be converted into the closed UV chambers or the new UV disinfection rooms can also be constructed for disinfection of public luggage at mass scale. Research studies are being carried out to develop the sustainable construction materials with self-illuminating properties for existing as well as for new UV disinfection building chambers. These materials will give the visible fluorescence under UV light and can illuminate the goods inside the chamber without any additional visible light source. For existing buildings, coatings are being developed whereas for new construction, functionally graded bricks are being developed for the required applications. These materials will be helpful for enhancing the visibility and monitoring the operations in UV disinfection rooms using normal visible range cameras without any additional visible light source in the existing as well as in the new infrastructure.

After relaxation of lockdown, public transports will be at high risk of becoming hotspot due to the movement of passengers, and their luggage. Thermal screening of passenger are being carried out and sanitization measures are being taken at regular interval as a preventive measure. However, passenger luggage can be a potential source of spreading the disease for which disinfection measures are to taken to break the chain. To disinfect the passenger goods, large number of UV disinfection chambers will be required. For such a purpose, existing concrete buildings can be converted into the closed UV chambers by

completely packing the openings (doors, windows, and ventilators) to avoid the exposure of UV light. Besides these, the new UV rooms or chambers can also be constructed at the entrance of mass public transportation places (i. e. bus stand/railway station/airport) for disinfection of public luggage at mass scale. Both the converted and newly constructed UV chambers can be used for disinfection of goods by keeping the goods for sufficient time before handing over to the passenger. For higher efficiency of system, automatic transfer of goods inside and outside the chamber can be implemented. Robotic appliances can also be used for performing the operations in these room considering the human safety against the disease as well as the exposure of UV radiations. In such rooms, visibility for performing and monitoring the operations under UV light will be a key concern which is being worked out by a group of civil engineers and physicists at IIT Indore.

(a) (b)

Fig. 1 (a) Fluorescent cementitious material prepared using hydrated lime, and (b) visible florescence in UV light

To develop the low-cost bricks for such applications, two layered functionally graded bricks are being conceptualized, and as of now, manufacturing feasibility has been assessed through monolithic casting of two layered bricks taking the two different brick mixes. Only a thin layer of the developed fluorescent material will be used as top coating (3 – 5 mm), and for remaining thickness (85-87 mm) of brick (size: 90×90×190), normal brick mix can be used. The trials for producing such bricks are in progress along with the development of fluorescent materials using hydrated lime and other ingredients.

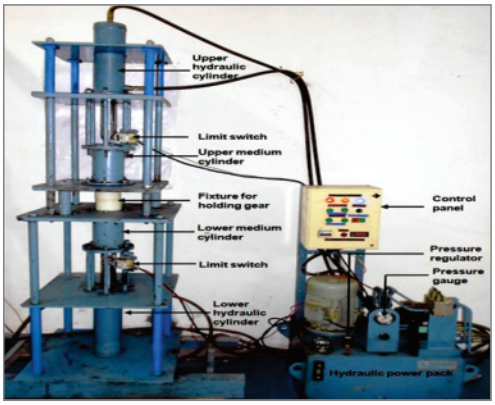

DST-FIST Centre of Excellence in Gear Engineering

Center of excellence (COE) in gear engineering was established in the year 2016.It involves in manufacturing and quality inspection of the cylindrical and conical gears. The center having state of art facilities for gear manufacturing, gear metrology, surface roughness analysis, microstructure analysis, noise and vibration analysis, and functional testing facilities. The center is continuously involved in research and development work to assist academic institutions and industries in all aspects of gear engineering. COE have a CNC gear metrology machine(SmartGear 500, from Wenzel Gear Tech Germany), 3D surface roughness tester(MarSurf LD-130, from Mahr Metrology, Germany), Noise and vibration analyzer (OR 35 from OROS, France), CNC wire electric discharge machine (Sprint Cut WIN from EMTL Sales & Service Limited).

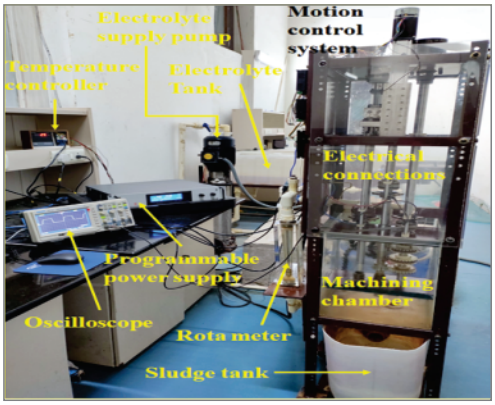

Faculty of Centre of Excellence in Gear Engineering

Prof. Neelesh Kumar Jain, Prof. Anand Parey, Dr. B K Lad, Dr. I. A. Palani

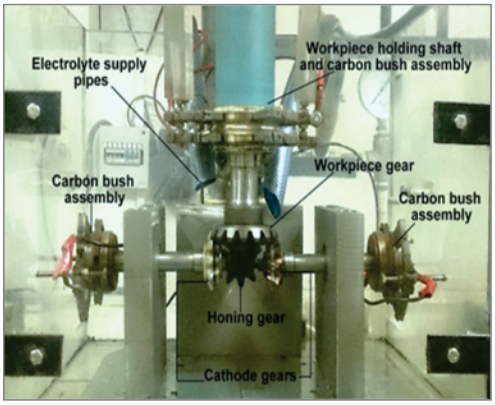

Major research work undertaken by the center are listed in the photographs.

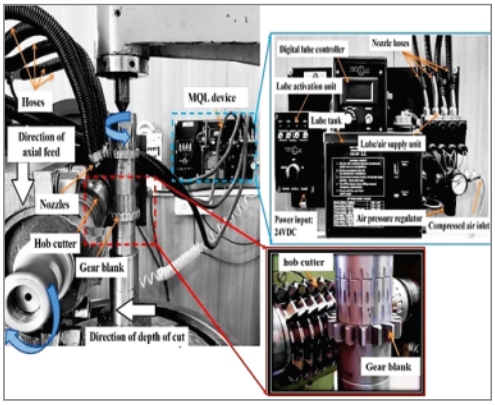

Apparatus developed for abrasive flow finishing of gears

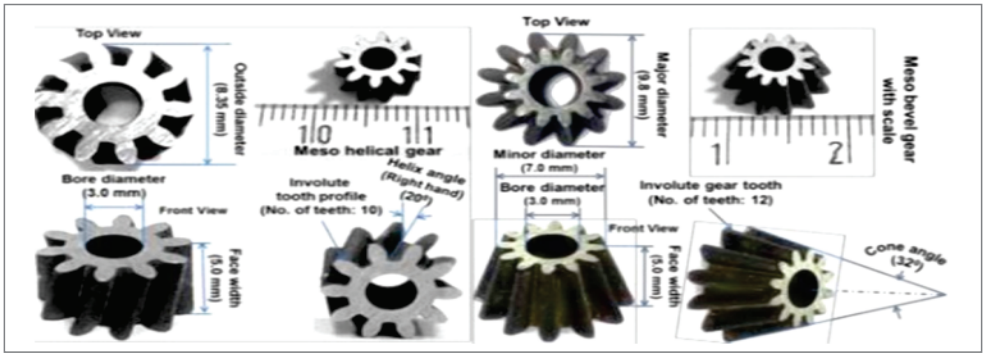

Apparatus developed for cylindrical gear tooth flank modification by electrolytic dissolution-based process

Finishing chamber for conical gear finishing by electrochemical honing

MQL assisted gear hobbing

Meso helical & bevel gear manufactured by WEDM

Staff associated with COE are Mr. Santosh Sharma, Sandeep Gour, Deepak Rathore and Vinay Mishra.

Research scholars who completed their Ph.D. in gear manufacturing and finishing are Kapil Gupta, Shaikh Javed Habib, Sunil Pathak, Sujeet Kumar Chaubey, Anand Petare, and Vishal Kharka. Research scholars who completed their M.Tech in gear engineering are Praveen Rai, Gaurav Kumar, Rahul Kashyap, Rajat Kasliwal, Shivam Goswami, Vivek Rana, Gaurav Deshwal, and Sandeep Gour.

A research scholar working in the field of gear engineering presently is Vivek Rana.

International Cell

International Affairs & Outreach Update 2020-2021

IIT Indore has played a significant role to internationalize its teaching and research portfolio by achieving competitiveness and performance in higher education partnerships, international academic and research mobility, exchange programs etc. across the globe. IIT Indore is committed to increase their global outreach by organizing various international events, Nobel Laureate Talks, public lecture series and mutual partnerships etc. In continuation to the previous years, this year also we had notable progress in recruiting and hosting many international students in our degree programs (from ASEAN and SAARC regions).

We secured multiple grants from our Ministry of Education, which is feeding well into our internationalization endeavors. We expanded our footprint further in Europe, USA, Australia, and Asia. Currently, we are collaborating intensely with countries like Germany, USA, UK, France, Switzerland, Canada, Portugal, Japan, Russian Federation, Taiwan, Korea, Hungary, Greece, Croatia, South Africa, and many more for the International bilateral projects.

Recruitment of Foreign Students

This year IIT Indore hosted 04 numbers of International Students in our degree programs from 03 countries i.e. Nepal, Nigeria and Indonesia. Moving ahead with our national ranking and global recognition we have received many applications of the prospective international students this year. We have received 50+ applications for admission under various scholarship programs i.e. DIA-ASEAN Fellowship-05 Applications, Study In India-30 Applications, ICCR-19 Applications and Nepal Scholarship (EdCIL)-03 Applications. This year we also increased the intake of international students up to 25% in each Department/School.

Now we are also a member of Heritage Network with aim to strengthen Higher Education Cooperation (research and training) between Europe and India in the field of Engineering Sciences.

MHRD Initiatives

GIAN, VAJRA, SPARC, and ASEM-DUO are the recent Ministry of Education initiatives that aim to improve the research and teaching ecosystem of India's higher education. In the year 2020-21, a substantial number of such projects were awarded to IIT Indore, the currently active projects/fellowships are as below:

VAJRA Fellowships – 06+

SPARC Projects – 09+

ASEM-DUO Fellowships – 06 European Collaboration

OVDF Visits - 06

MoU Signed

In the last one year (October 2020-September 2021), IIT Indore signed various MoUs with the globally reputed institutes and Universities which are listed below:

- Swinburne University of Technology, Australia
- Wigner Research Centre for Physics, Hungarian Academy of Sciences, Budapest, Hungary
- Aristotle University of Thessaloniki, Greece
- University of Gothenburg, Sweden
- Universitàdeglistudi Di Udine, Italy

- The faculty of Electrical Engineering, Computer Science and Information Technology Osijek, within Josip Juraj Strossmayer University of Osijek, Croatia
- Forschungszentrum Borstel - Leibniz Lung Center, Germany
- Dipartimento di Scienze Biomedichedell' Università di Sassari (UNISS); Sassari, Italy
- University of Johannesburg, South Africa
- Foundation for Innovation and Social Entrepreneurship (FISE), Texas Global Health Security Innovation Consortium (TEXGHS) and Health Innovation Exchange (HIEx), UN
- The University of Alberta, Canada

Foreign Collaborations

Spreading our wings globally including major countries like USA, UK, Germany, France, Italy, Australia, Croatia, Japan, Russia, Finland, South Africa etc., we have signed more than 50 MoU's for active collaborations by next year. We took a lead in Hosting number of international internships and student exchange programs. We are also planning to set up India's First Health Intelligence Hub on pandemic diseases. Our pleasure for taking over 30 bilateral research grants around the globe and over 74 approved projects under GIAN course. Several webinars and talks by reputed scientists and foreign faculty members are the key highlights for our outreach events online. Recently the Consulate General of Embassy of France in India visited IIT Indore for the future prospective of collaborations.

Outreach Events

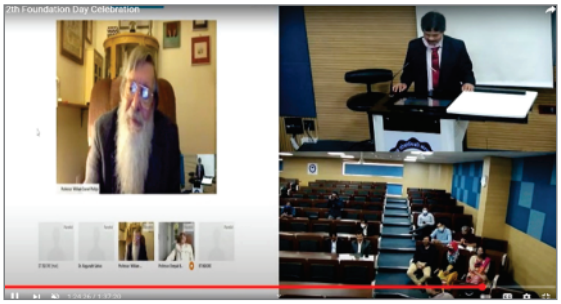

The Outreach domain has been started in 2020 with International Affairs Office. We have conducted various online events to explore the visibility of IIT Indore across the globe. We have adopted 05 nearby Engineering Institution to provide all possible support to improve the engineering education. An Outreach committee has been formed including members from all the departments to increase the outreach activities. Recently, prof. Avinash Sonawane, Dean, IAO visited IHT, New Delhi to attend Partner's Institute Workshop under Study In India Program.

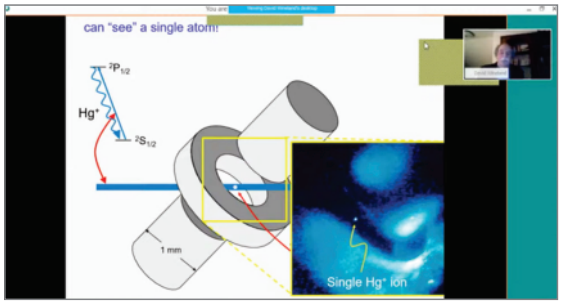

This is a subject of pride to organize successful webinars and talks by eminent speakers from various streams on E-platforms during the pandemic situation as given below:

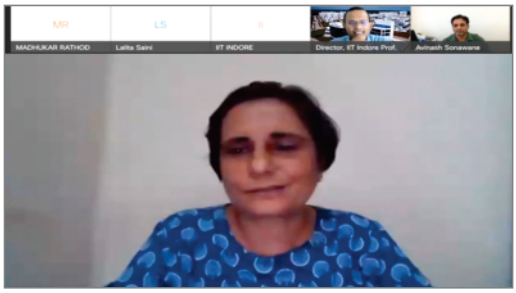

Talks	Speakers
Atomic Clocks	Prof. David J. Wineland- Noble Laureate in Physics
The revolutionary quantum reform of the international metric system	Prof. William D. Phillips- Noble Laureate in Physics
Nobel Prizes-2020	Eminent Speakers from Inter-University Centre for Astronomy and Astrophysics, Pune, CSIR-Northeast Institute of Science and Technology, Jorhat, Assam, Indian Institute of Management Ahmedabad, University of Delhi, United Nations World Food Programme (WFP) in India and Indian Institute of Science.
Frontiers in Physics (Public Lecture Series-2020)	Speakers from Chennai Mathematical Institute, Tata Institute of Fundamental Research, Mumbai, NASI, BARC, Mumbai., Inter University Accelerator Centre, Delhi, NISER, Bhubaneswar, TIFR, Mumbai, IISER, Pune and NIAS, Bengaluru
Impact of the digital revolution on higher education	Dr. Aruna Tiwari, Associate Professor, CSE represented IIT Indore as an Artificial Intelligence expert in the Internationalist Podcast series by the Association of Commonwealth Universities, UK on June 8, 2021.
National Science Day & Chemistry Talks	National Science Day 2020 was organized at IIT Indore on Feb. 28, 2020the Department of Chemistry, IIT Indore had organized Chemistry based research talks by several eminent speakers from various countries.
Role of Science in Nation Building during Global Health Crisis	Prof. Anil Sahasrabudhe- Chairman of the All-India Council for Technical Education (AICTE), New Delhi, Prof. J. B. Joshi- Padma Bhushan as the Director of Institute of Chemical Technology and Prof. N. K. Ganguly, Padma Bhushan and Former Director General, ICMR and Prof. Gagandeep Kang, Professor of Microbiology, Wellcome Trust Research Laboratory, Division of Gastrointestinal Sciences, Christian Medical College, Vellore, India
Mathematics Talk	A public Lecture by Prof. Bruce C. Berndt from the University of Illinois at Urbana-Champaign, USA.

Committee and Media

To stretch the thread of global existence the Outreach Committee and ISMAE Committee (Institute Student Mobility, Admission and Exchange Committee) have been formed. As a helping hand to IAO office and active involvement of students the SIAC (Student International Affairs cell) is formed. A Complete data related to Institute and International office is showcased on our newly launched IAO website (https://iao.iiti.ac.in/) and a short informative video of IIT Indore along with the brochure is made to represent our global existence.

Talk by Prof. Gagandeep Kang under Outreach Program of the Public Lecture Series "Role of Science in Nation Building"

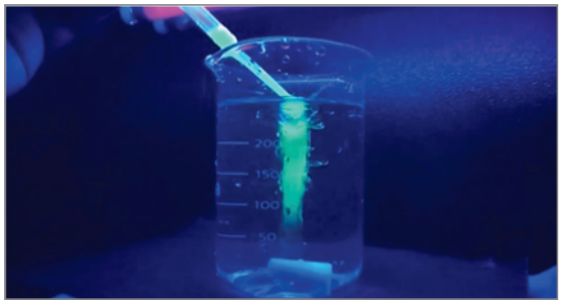

Visit of French Embassy Delegates on 3rd September 2021

Officials from National Institute of Design, Bhopal visited IIT Indore on 23rd August 2021

Indian Institute of Technology Indore organized a special half-day program on National Science Day on 28th February 2021, in virtual mode to cultivate interest in young school students towards pu

Research and Development Report

Research & Development IIT Indore

IIT Indore envisages the convergence of traditional disciplines as the key to accomplish the previously unimaginable. With this foresight, IIT Indore has been promoting inter- disciplinary research programmes focusing on basic and applied research, technology development and innovation. This vision has helped the institute to excel in all spheres of science, engineering, and humanities and social sciences.

A key competency of IIT Indore is research driven academic programme as it forms a core component of the undergraduate and postgraduate teaching. IIT Indore has consciously promulgated the idea of involving undergraduate students in forefront research projects. This led to the initiation of a formal undergraduate research scheme, Promotion of Research and Innovation for Undergraduate Students (PRIUS).

Research at IIT Indore has been recognized at both international and national level. Faculty members and scientists are actively involved in several key international projects and joint collaborations with research organizations in Japan, South Korea, Russian Federation, Portugal, France, Germany, UK, USA, and many other countries.

Mission

The driving force behind the 21st Century is the development of knowledge-intensive societies. It has led to establishment of new Institutes of higher learning in India. Indian Institute of Technology Indore, established in 2009, is part of the initiative that envisages India as a global knowledge and technology leader. Continuing with the tradition of the older IITs, IIT Indore aims to play an active role in propelling India on her growth-trajectory by focusing on research-based education and innovation driven research and entrepreneurship. IIT Indore aims to achieve this mission with humanistic concerns.

Vision

- Promote inter-disciplinary research in science, engineering, and humanities and social sciences
- Conduct disruptive and social impacting research some chosen areas such as sustainable development, climate change, food and water security
- Promote industry-oriented research leading to new products, processes, and technologies
- Focus on convergence of life sciences, medical sciences, and agricultural sciences with engineering.
- Promote culture of start-ups and entrepreneurship by establishing of Industrial Research Park which will be a focal point in Central India
- Aggressive patenting and protection of IPR

Objectives

- Enhancement of academic, technological, and social outreach of the Institute through societal research, education, healthcare, sanitation, and rural development.
- Development of world class research and learning facilities for industries, teaching and research institutions.
- Skill development and scaling up the research and innovation towards the national requirements.
- To contribute to development of world class technological innovation in Engineering and Biomedical instrumentation, Defense, E-vehicles, alternate energy resources, etc.

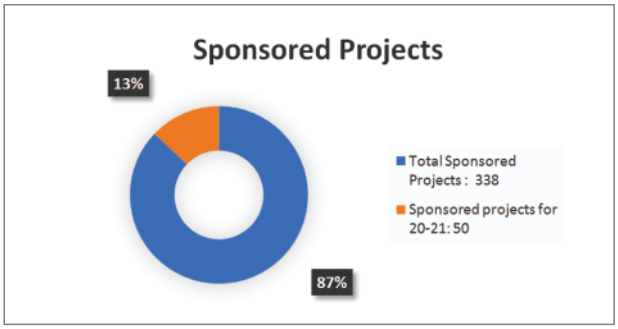

(A) Significant research work:

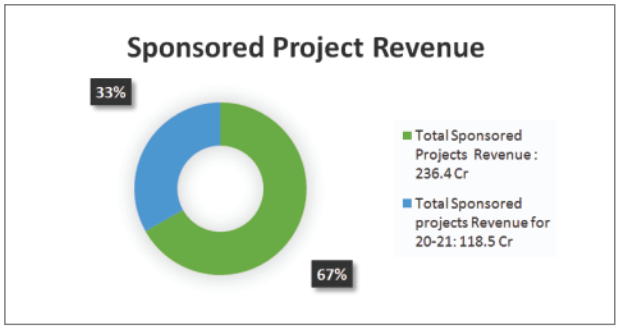

- Development of new asparaginase drug (M-ASPAR) for treatment of a type of blood cancer namely Acute Lymphoblastic Leukemia (ALL) which is prevalent among children.

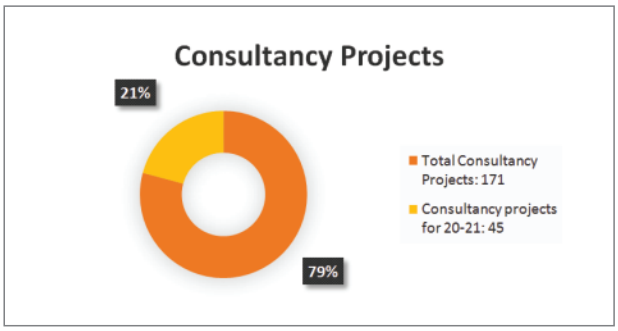

- Development of a cost-effective and instantaneous method to detect brain tumors and other cancer-causing viruses using Raman Spectroscopy.
- Identification of presence of 5647 mutations of SARS-CoV-2 surface proteins globally and possible impacts of these mutations on the host cells. These mutations include 42 mutants of E-protein, 156 mutants of M and 5449 mutants of S protein.
- Study on neurological impacts from dual infection of the malaria parasite and COVID-19 causing virus due their overlapping symptoms.
- Developing a vaccine against SARS-CoV2 using vesicular stomatitis virus (VSV, a mild animal virus which does not cause any disease in humans) and SARS-CoV-2 Spike proteins in collaboration with NCCS Pune. Present focus is to improve antigenicity and broadness of the vaccine to contain spreading of double mutant (B.1.617) strain of SARS-CoV2.
- Development of electronic memory storage devices from chemicals from Aloe Vera flowers.
- Study on response of Himalayan-Karakoram (HK) rivers to the Climate Change which is crucial for more than 1 Billion people who largely depend on water resources. This work was appreciated by different international media and got published in the prestigious SCIENCE.
- Development of sophisticated surveillance system using AI and ML tools and wireless sensor network (WSN) to detect forest fires so as save wild animals and tribal peoples.
- Energy harvesting device integrated shoes for soldiers for charging gadgets in Warfield.

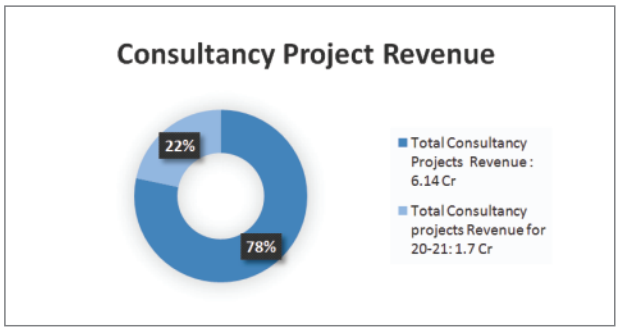

(B) Patents: For the year 20-21 Total 66 patents have been filed of which 2 patents have been granted.

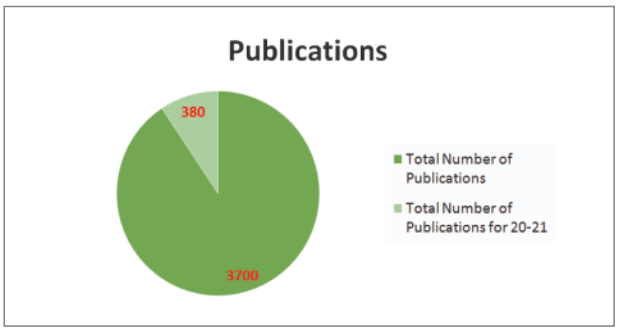

Glimpses of R&D:2020-2021

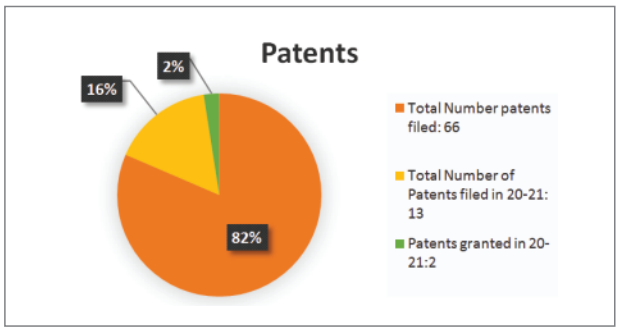

Significant research work:

- Development of new asparaginase drug (M-ASPAR) for treatment of a type of blood cancer namely Acute Lymphoblastic Leukemia (ALL) which is prevalent among children.
- Development of a cost-effective and instantaneous method to detect brain tumors and other cancer-causing viruses using Raman Spectroscopy.
- Identification of presence of 5647 mutations of SARS-CoV-2 surface proteins globally and possible impacts of these mutations on the host cells. These mutations include 42 mutants of E-protein, 156 mutants of M and 5449 mutants of S protein.
- Study on neurological impacts from dual infection of the malaria parasite and COVID-19 causing virus due their overlapping symptoms.
- Developing a vaccine against SARS-CoV2 using vesicular stomatitis virus (VSV, a mild animal virus which does not cause any disease in humans) and SARS-CoV-2 Spike proteins in collaboration with NCCS Pune. Present focus is to improve antigenicity and broadness of the vaccine to contain spreading of double mutant (B.1.617) strain of SARS-CoV2.
- Development of electronic memory storage devices from chemicals from Aloe Vera flowers.
- Study on response of Himalayan-Karakoram (HK) rivers to the Climate Change which is crucial for more than 1 Billion people who largely depend on water resources. This work was appreciated by different international media and got published in the prestigious SCIENCE.
- Development of sophisticated surveillance system using AI and ML tools and wireless sensor network (WSN) to detect forest fires so as save wild animals and tribal peoples.
- Energy harvesting device integrated shoes for soldiers for charging gadgets in Warfield.

IIT Indore exemplary research in combating the COVID 19 challenges and the following research contributions

Sr. No	Faculty	Title of Research	Brief description
1	Principal Investigators: Dr. Debasis Nayak (IIT Indore) Dr. Akanksha Chaturvedi (NCCS, Pune)	Candidate Vaccine against SARS-CoV2.	**Candidate Vaccine against SARS-CoV2.** **Progress report: May 13, 2021.** In this project, we partner with NCCS Pune using a pseudovirus vector-based platform to develop a candidate vaccine against SARS-CoV2. We have successfully established pseudotype generation using vesicular stomatitis virus (VSV) backbone and SARS-CoV-2 Spike proteins. The VSV is a mild animal virus and does not cause any disease in humans. Following this, we have completed in vitro characterization of our candidate at IIT Indore. Subsequently, our collaborator at NCCS Pune, has performed immunogenicity studies in the mouse model. We are extremely excited to see that our candidate performed well in these animal experiments. The injected animals showed a high-quality

			neutralizing antibody response to the first and booster dose of the candidate vaccine. Currently, we are improving the antigenicity and broadness of the candidate to accommodate the spreading of the **double mutant (B.1.617) strain of SARS-CoV2**. In the next step, animal challenge studies are about to be performed. We have sent the proposal to CCMB Hyderabad and the Institute of Life Sciences (ILS) Bhubaneswar to conduct animal challenge studies in a BSL-3 environment with live viruses.
2	Dr. Sharad Gupta (Biosciences and Biomedical Engineering)	Sterlization Chamber	The departments of Biosciences & Biomedical Engineering and Electrical Engineering jointly are working on the development of sterilization chamber. The chamber uses 254 nm ultra-violate (UV) rays to sterilize personal objects i.e. mobile phone, wallet, etc. of duty-bound police, doctors, and associated personnel. This is being done on the request of **Shree Vivek Sharma, IG of Indore Zone**.
3	Dr. I A Palani, Dr. Indrasen Singh (Mechanical Engineering)	Reusable Mask	Developing customized 3D printed reusable masks having a provision to have reusable filters and straps. These 3D printing is done on the fabrics and they will have a provision to be cleaned and reused. Few masks are already printed for trial purposes. In addition, the group is also in the process of developing customizable mask based on the different face features of an individuals.
4	Dr. Vipul Singh (Electrical Engineering) Dr. I A Palani (Mechanical Engineering) Dr. Abhishek Srivastava (Computer Science and Engineering)	Wearable optical body temperature sensor	Development on Shape Memory Alloy based optical temperature sensor for sensing the body temperature. This device can be fitted into the fabric of the patient and the body temperature can be continuously monitored without physical contact or thermometer or thermal scanner. The group is working on the process to further enhance the resolution of the sensor to continuously monitor the body temperature and make it and IOT enabled system, so that the doctors can monitor the patient's temperature even at remote locations.
5	Dr. Vipul Singh (Electrical Engineering)	UVC LED	Development of UV-C LEDs and UV-C photodetectors for disinfection of surfaces/ PPEs against COVID-19 and other pathogens. The exposure to UV-C radiations is known to kill and inactivate pathogens by destroying their nucleic acids by disrupting their DNA.

6	Dr. Amit Kumar (Biosciences and Biomedical Engineering)	SARS-CoV-2 protein	Dr. Amit Kumar, faculty in Biosciences and Biomedical Engineering has been scrutinizing the SARS-CoV-2 protein information for the designing an effective vaccine encompassing both the T-cell and B-cell epitopes. He and his group has screened all the proteins of SARS-CoV-2 to search for the patches that can be used for immunity generation against this pathogen. These patches were thoroughly analyzed by using various computational tools to generate a model vaccine candidate having a propensity to elicit protective immune response. The work is currently under peer review and represents preliminary data that can act as an initial platform for the rapid generation of an efficacious protective vaccine against SARS-CoV-2 infection.
7.	Prof. Avinash Sonawane (Biosciences and Biomedical Engineering)	Stopping Covid-19 Pandemic	Six research groups representing different countries i.e. India, Norway, Sweden, USA, France and Denmark have been invited to be a part of the International Network Research Project "Stopping Covid-19 Pandemic", funded by Norwegian Research Council. The Indian research group led by Dr. Avinash Sonawane, faculty in Biosciences and Biomedical Engineering at IIT Indore. The objectives of this project are to study Covid-19 virus interaction with human host cells, pathology of Covid-19 in human and identify susceptibility-resistance factors, Cloud computing, Machine Learning (ML) and artificial intelligence (AI) as tools to identify primary drivers of COVID-19 infection. The Indian Research Group will be studying on the Proteomic and antibody generation.
8.	Prof. G.S. Murthy, Dr. Debasis Nayak, Dr. Sharad Gupta (Biosciences and Biomedical Engineering)	Disinfection Tunnel for Covid-19	Development of Disinfection Tunnel using ICMR approved water-soluble biocompatible disinfectant
9.	Dr. Parimal Kar (Biosciences and Biomedical Engineering)	Drug discovery for Covid-19	Computer-Aided Drug Discovery against COVID-19
10.	Dr. Parimal Kar (Biosciences and Biomedical Engineering)	Covid-19	Identifying Possible Potent Inhibitors against COVID-19 via Computational Drug Repurposing Study
11.	Dr. Mirza S Baig (Biosciences and Biomedical Engineering)	Fusion peptide for SARS-CoV-2	Designing of a novel fusion peptide as a preventive as well as therapeutic, agent against SARS-CoV-2 infection

12.	Dr. Mirza S Baig (Biosciences and Biomedical Engineering)	Covid-19	Structure-based design of novel peptidomimetics targeting the SARS-CoV-2 spike protein Expected Outcome: The study is expected to explore novel peptide derivatives, which could inhibit the interaction of SARS-CoV-2 with ACE2 thereby blocking its Entry into the Host Cells.
13.	Dr. Mirza S Baig (Biosciences and Biomedical Engineering)	Covid-19	Dual Targeting of 3CLpro and PLpro of SARS-CoV-2: A Novel Structure-Based Design Approach to treat COVID19 infection
14.	Dr. Mirza S Baig (Biosciences and Biomedical Engineering)	Covid-19	Identification of a Potential Peptide Inhibitor of SARS-CoV-2 Targeting its Entry into the Host Cells
16.	Dr. Shanmugam Dhinakaran (Mechanical Engineering)	Simulation for Covid-19 spread	Experiments and lattice Boltzmann simulations of infectious virus transport in the air from humans
17.	Prof. Sandeep Choudhary (Civil Engineering) Dr. Rajesh Kumar (Physics)	Fluorescent disinfectant bricks	Prof. Sandeep Choudhary of Civil Engineering and Dr. Rajesh Kumar of Physics are working on the development of self-illuminating fluorescent bricks and coatings for UV Disinfection Building Chambers to disinfect the passenger luggage. This will be done by converting existing concrete buildings into closed UV chambers by completely packing the openings (doors, windows, and ventilators) to avoid the exposure of UV light.
18.	Dr.Pankaj Sagdeo (Physics)	Covid-19	Development of UV based set up to deactivate Covid19 VIRUS
19.	Dr. Shantanu Manna (Mathematics)	Time dependent Mathematical Model for Covid-19	Working on the time dependent Mathematical Model based on the following parameters a)Total Population b) Susceptible Population c) Infected Population infected d)Undetected infected Population e) Expected recovery of quarantined population f)Recovered Population
20.	Dr. M Tanveer (Mathematics)	Machine Learning for virus detection	Detection of Coronavirus using advanced machine learning techniques

1) Total Projects: 388, Amount: Rs 2,36,40,03,168/-
2) Projects in FY 20-21: 50, Amount: Rs 1,18,50,03,310/-
3) GIAN courses, TOTAL: 74, in FY 20-21: 3
4) Workshop: in FY 20-21:3, Estimated Amount: Rs 3,50,000/-
5) Conference in FY 20-21: 2, Estimated Amoun : Rs 39,50,000/-
6) Project / Research Staff: In FY 20-21: New 37 added, Total : 172

Counselling Cell

Counselling cell has been an integral part of IIT Indore since its inception in December 2011. The function of this cell is to offer supportive and conducive environment for students wherein he/she can discuss personal issues or academic challenges and seek help from counselling committee members. With primary focus on prevention of mental health issues - prevention of suicide and chronic mental health problems, counselling cell works for early identification and intervention for various mental health issues in students.

The team of Counselling Services is headed by Dr. Pavan Kumar Kankar, Associate Professor, Mechanical Engineering. In addition, the Counselling Cell comprises of a professional counsellor Ms. Monika Gupta and a visiting consultant psychiatrist, Dr. Ashutosh Singh (MBBS, DNB Psychiatry). The Institute also has a counselling committee consists of one faculty member from each discipline as faculty counselling coordinators and student representatives from Ph.D, PG and UG as Student Counselling Coordinators. The committee members provide guidance and advise on counselling related matters to the students of the respective discipline. Student gymkhana general secretary counselling , outreach and alumini facilitate various counselling cell activities in coordination with counselling committee and student Gymkhana.

Counselling cell undertakes various activities as mentioned below:

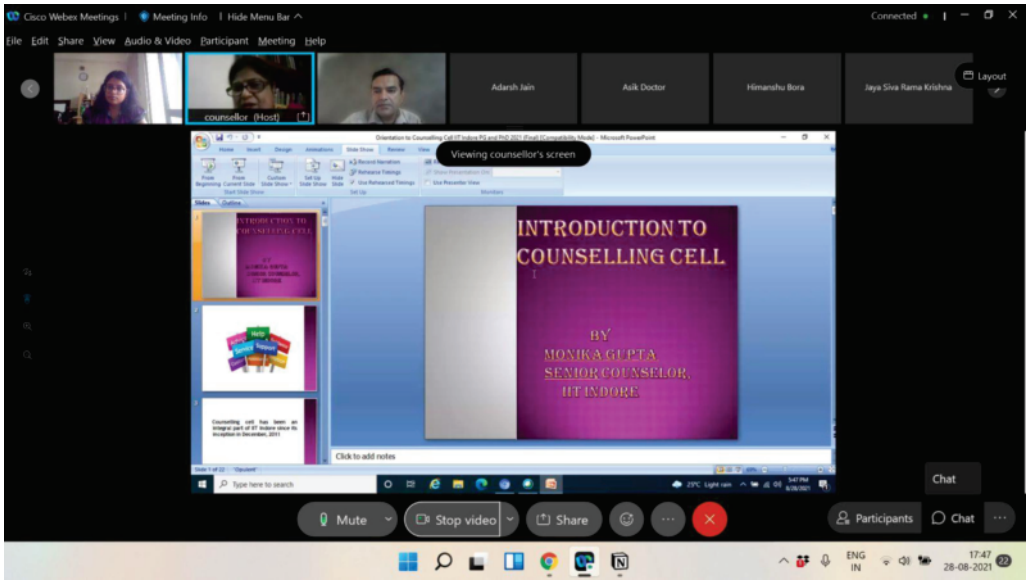

- Individual counselling sessions are carried out by the cell to assist the students in dealing with a wide range of concerns; be it academic, personal, emotional, family or peer related as well as wide range of psychological concerns including clinical depression, anxiety spectrum difficulties, suicidal tendencies, difficult personality traits. Psychological interventions are also provided for students undergoing treatment for COVID-19 infection at the campus.
- In view of COVID 19 pandemic, an online counselling facility (tele-counselling, via googlemeet or skype) was made available to the students and their parents.
- In person-counselling sessions were also conducted for those students who were residing inside the campus by following the COVID -19 protocols.
- During the re-entry of the students in campus post lockdown, the psychological concerns of the students were assessed by administering an online questionnaire. This has helped in prevention and early identification and intervention of emotional concerns of the students.
- With the aim to foster a healthy stress-free environment for the student community, the Counselling Cell with the support of gymkhana general secretary counselling and outreach, oversees a student mentorship Programme. The student mentors help freshers by extending their helping hand both for academic and non-academic concerns.
- The counselling cell prepares the list of faculty advisors for the new students of B.Tech and masters Programme. The faculty advisors regularly interact with the delegated students and guide them for academic concerns. The students are further referred to the student counselor in case of student shows any signs of distress.
- Creating a good liaison with various departments and services at the Institute to facilitate the implementation of the intervention plan.
- Working towards creating a strong referral system as a basis for enhancing mental health services, where students are being referred by academic office, health center, faculty advisors, sports and security officers, wardens and hostel office, parents and friends, apart from walk- in students who approach the counselling cell on their own.
- To Organise webinars and expert talks to create awareness on mental health issues and enhancing positive well-being.

- De-stigmatising counselling services to a considerable extent and enhancing the positive perception of the cell.

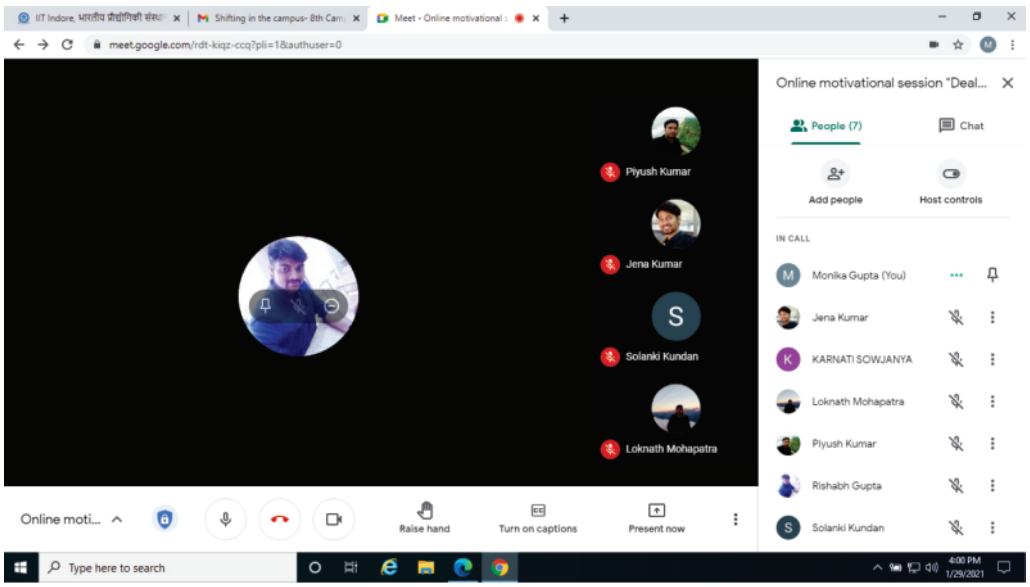

The group sessions organised by Counselling Cell are as follows:

- e- Orientation – e -Orientation of Introduction to Counselling Cell for 2021 batch for PG and Ph. D students was conducted on August 28, 2021. During the session, Head counselling services, Dr. Pavan Kumar Kankar and institute Counselor , Ms. Monika Gupta, discussed the functions of counselling cell services and its structure at IIT Indore. The process of counselling was also explained to the students.

- E-orintation to Counselling Cell for PG students 2021

- Online group motivational sessions titled "Dealing with new normal and Stress management" were conducted by the institute counselor for students in quarantine at the campus post lockdown. Further to facilitate the smooth transitioning post lockdown at the campus, small group online interactive sessions were held.

Learning Resource Center

The Learning Resource Center (LRC) has a collection of 37015 books at present while new books are being added to the collection continuously. These include books on all relevant subjects for teaching and for reference. The LRC also boasts of a select collection of fiction, literature, and general interest books such as current events, sports, etc. to take care of the leisure and recreation reading needs of the users. Special Collections such as the Gandhian Studies Collection, Hindi Collection and Children's Books Collection take pride of place in the LRC. The LRC shifted to its own building in March 2020 and the procurement of furniture for different reading spaces and other facilities are going on at rapid speed.

Figure 1. The Learning Resource Center (LRC) Building

Library Usage: (January 2021 to September 2021)

User category wise book issue:

The number of books borrowed by various categories of users during the period January 2021 to September 2021 are displayed below.

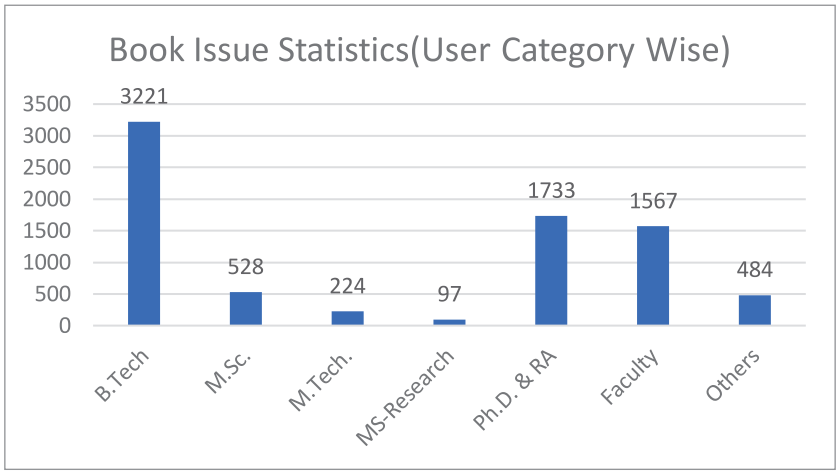

Figure 2. Book Issue Statistics (User Category Wise) (Jan. 2021 - Sept. 2021

Department wise book issue: Books borrowed by users belonging to various departments are as displayed below.

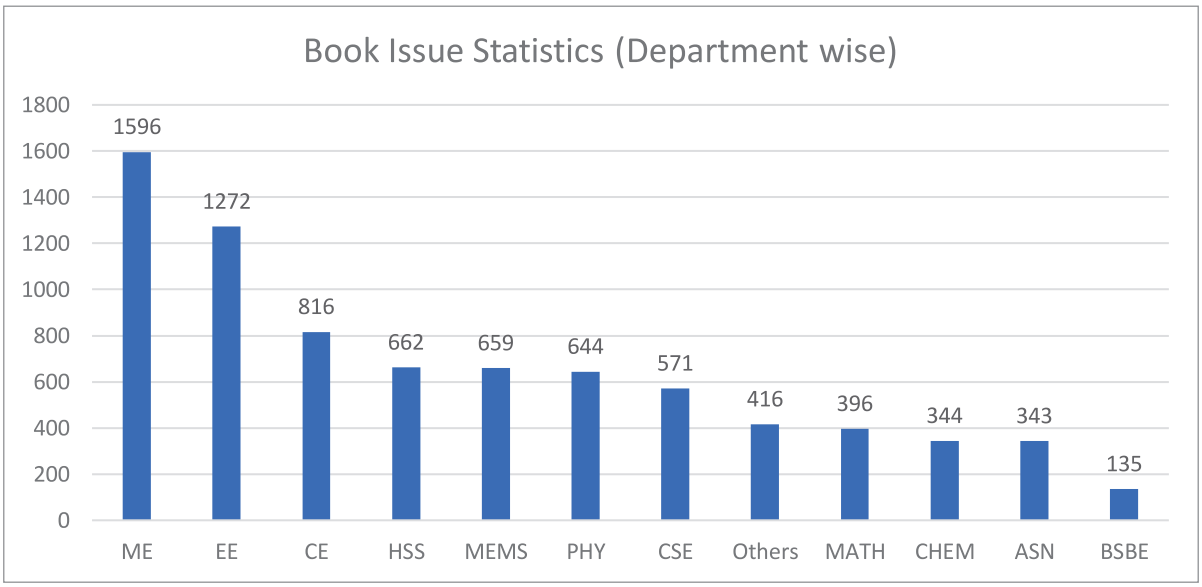

Figure 3. Book Issue Statistics (Department wise) (Jan.2021 – Sept. 2021)

Electronic Resources: In today's world of Information explosion, access to electronic information resources is essential, particularly in an academic environment. The LRC has developed a collection of Electronic Resources which includes thousands of journal articles, research papers, e-books, and other resources in the digital format.

E-journals in various disciplines published by reputed societies such as American Mathematical Society, American Chemical Society, American Institute of Physics, Royal Society of Chemistry, IEEE, among others are being made available to the patrons by the LRC. In addition to this, journals published by publishers such as Elsevier, Springer and Taylor & Francis are also available to users of the LRC. The LRC provides access to 8410+ e-journals and 7600+ e-Books from various publishers. Apart from this, major databases such as SciFinder -n, Scopus, CMIE ProwessIQ and MathSciNet are also made available to users of the LRC.

The complete list of e-resources with hyperlinks is available on the LRC website for users' convenience, so that users can access the resources from the LRC website itself.

New Initiative: Matrubhasha Collection: The LRC has started to develop a unique 'Matrubhasha Collection' through a participatory mechanism to showcase the wonderful diversity and richness of Bharatiya Bhashas. This unique collection will demonstrate the love for Matrubhasha of the IIT Indore community. At present, the LRC has received 200+ books in Telugu and Hindi Languages as donations from IIT Indore community under this campaign.

Reading Spaces and Facilities: Creation and development of different reading spaces and other facilities such as Mini-conference Hall, Discussion Rooms, Silent Reading Zone, Matru-Bhasha Collection, Children Spaces, Textbook Reserves, etc. are under process for new LRC building.

The LRC Services during Covid-19

The LRC team have worked tirelessly during lockdown period to make the library services available to its users to the extent possible. During this period, the LRC has purchased requested textbook in e-book

format and provided access through RemoteXs to users. Many publishers have offered free access/trial access to their content in view of Covid-19 situation. The LRC has provided link on website and informed users. We have provided research papers/articles and similarity check reports to students and faculty as per their requirement. The LRC team has co-ordinated with students and hostel team to collect issued books for providing no dues to students.

The LRC Services:

At present, the LRC offers services as described below:

- **Lending Facility:** Undergraduate students can borrow up to 08 books for the period of 15 days, whereas M.Sc., M.Tech. and Ph.D. students can borrow up to 08 books for the period of 1 month. Faculty members can borrow up to 40 books for a period of 6 month.
- **Overnight Lending:** Overnight lending facility is provided to students who wish to borrow a book from the reserved section, or have crossed their entitlement limit. Books on overnight issue have to be returned by 9.30 a.m. the next day.
- **Claims/Reservations:** Users can claim/reserve books which are issued out. Claimed/ reserved books are kept in the LRC for the user for 3 days from the date of return by the previous borrower, before they can be issued to the next claimant.
- **Renewals:** Books can be renewed only if there are no claims.
- **Reading Room:** The LRC provides air conditioned and Wi-Fi enabled Reading Room with a seating capacity of 350 students. In addition to this, several PCs are placed in the reading room for the use of research scholars and faculty members for the purpose of accessing e-resources, and checking the Web OPAC.

Figure 4. Reading Space alongside Stack Area

- Inter Library Loan & Document Delivery Services: The LRC has an informal Inter Library Loan and Document Delivery Services arrangement with institutes such as IIM Indore, RRCAT Indore, IIT Bombay and other IITs. Under this facility, access is provided to books or electronic materials which may be needed by users but are not available in our library.
- Book Bank: Under the Book Bank scheme, text books are provided to students belonging to the reserved categories for the period of a semester.

- Reprography Services: Users are provided Photocopies or Printouts of selected portions of library resources as required by them, subject to the provisions of the Copyright Act.
- Orientation Program: The LRC conducts orientation programs for new students to make them aware of the library resources and services and to help them utilize the LRC resources optimally.
- Originality check: The LRC provides originality reports to users for their assignments and papers, using Turnitin.
- Remote access to the LRC resources: The LRC provides 24x7 access to its digital resources for the users of the LRC, through RemoteXs.
- CCTV Surveillance: The LRC has installed high tech cameras to ensure the safety and security of its users and resources.
- Bar Coding: Bar Code Technology is being used for issue/ return of books at the Circulation Counter.
- RFID implementation: RFID implementation is under process in the LRC.
- QR Codes: The LRC is using QR code technology to provide quick access to users to the LRC website, LRC OPAC, and recommendation forms for books and journals.
- Trial Access: The LRC requests trial access to various e-resources from publishers, so that users can get an opportunity to use and evaluate the resource. After the trial is over, the LRC Committee discusses the subscription option based on the recommendations/feedback received from users.
- Children's Collection: The LRC started the Children's book collection to support the recreational needs of children of IITI employees and to promote the reading habit among young children. At present, nearly 900+ titles are available for children in the age groups ranging from 04 to 14.

Koha is an Open Source Integrated Library Management Software which provides various user-friendly features and functions such as My Account, Online Reservations, Online Renewals, etc.

Users can browse the LRC collection by checking the Web OPAC (Online Public Access Catalog) at koha.iiti.ac.in.

- Library Website: Detailed information about the LRC can be accessed through the LRC website at: http://library.iiti.ac.in/

Annual Placement Report

The Placement Office of IIT Indore handles all activities related to the Campus Placements of the graduating batch, which includes communicating with Organizations, arranging necessary logistics to conduct the Placement Drive, Compiling Data, and reporting. The Office is managed by a motivated and dedicated team head by 'Head-Training and Placement', Training and Placement Staff and the Student representative from both Undergraduate and master's program of all branches.

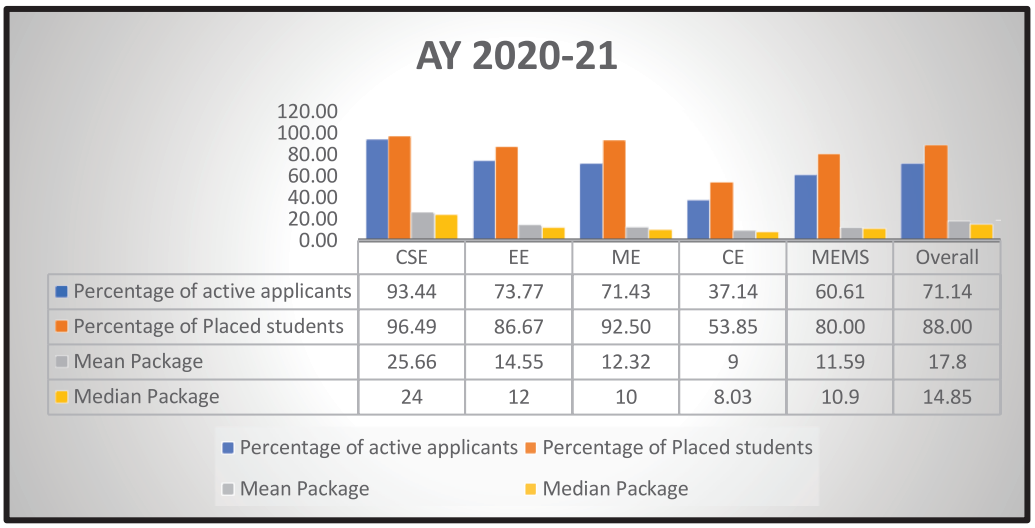

The final placements at the IIT Indore have been successfully completed for the Academic Year 2020-21. Placement Office, IIT Indore has always strived for building a long-term mutually beneficial association with the both the Domestic and International recruiters and hence creating better opportunities for the students in terms of Full- time placements and Internships.

The team ensures that it invites top-notch organizations including PSUs to the Institute. The Placement Office strive to unanimously achieve Placement Figure above par with respect to each consecutive year taking into consideration the multi-disciplinary approach as adopted by the Institute. Despite the Detrimental effects of Pandemic on the employment status, IIT Indore has achieved an Overall Placement Percentage of 89.2 % for the Academic Year 2020-21. Students were offered various job roles in areas like Automobile, Software Engineering/Developing, Technology Consulting, Analytics, Research & Development, Graduate Engineering Trainee, Data Scientist, Associate Engineering, etc. The companies from various sectors visited IIT Indore which mainly includes

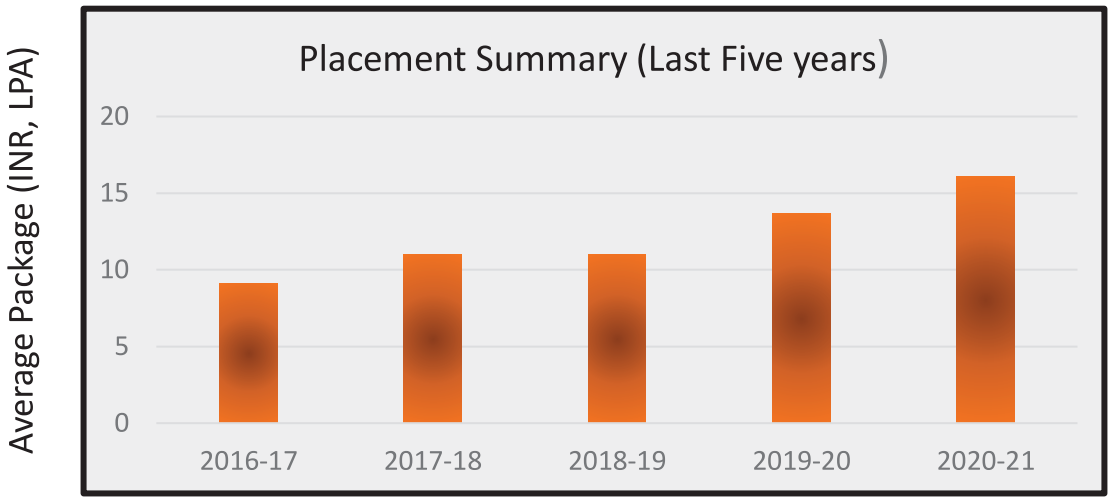

Microsoft, Amazon, DE-Shaw, Goldman Sachs, Reliance Jio, Arcesium, Works Applications, ISRO, HPCL, Salesforce, Razorpay, Intel, TESCO, Cognizant, Oracle, MathWorks, Capgemini, Code Nation, L&T, Seagate, Analog Devices, STMicroelectronics, Mentor Graphics, Bharat Seats, Maruti Suzuki, MAQ Software, Innovaccer Analytics, Wipro, TCS, Tata Motors, Quantile Analytics, Evalueserve, KPIT Technologies, Go-Jek, Finisar, and many more.

The average salary package is INR 17.8 LPA and highest package received is INR 47.25 LPA, (domestic) and 6.11 million ¥ (overseas). Many of these companies offered better internship opportunities to our students along with full time offers. The highest stipend received is 1.5 lakh per month. Almost 20% students opted for higher studies at IIMs, IITs, and top-rated foreign institutions while many others have shown their interest to prepare for competitive exams. Few were found to be interested to start their own venture.

Placement Statistics for the Academic Year 2020-21

This section conducts activities to enhance the confidence, leadership qualities, attitude, management, communication and creative skills of the students. Inspite of the lockdown and conduct of only online activities, the period from March 2021 to September 2021 witnessed a buzz of activity across various domains with some necessary adaptation in the activities pertaining to the pandemic situation.

(d) Few of the activities conducted by the students are subsequently mentioned.

Technical Clubs Events

(a) **IITISOC:** IITISoC is the annual month-long event of The Programming Club, IIT Indore, conducted in collaboration with the Cynaptics& Developer Student club, to introduce the students to Software Development and Open-Source. The pattern followed by IITISoC is similar toGSoC, so that the students get an idea of what GSoC is and how it works.

This year, IITISoC was successfully conducted from June 19 to August 9, 2021. This was a great success this year with almost 120+ students as participants and completion of a total 25+ projects in the field of Web and App development.

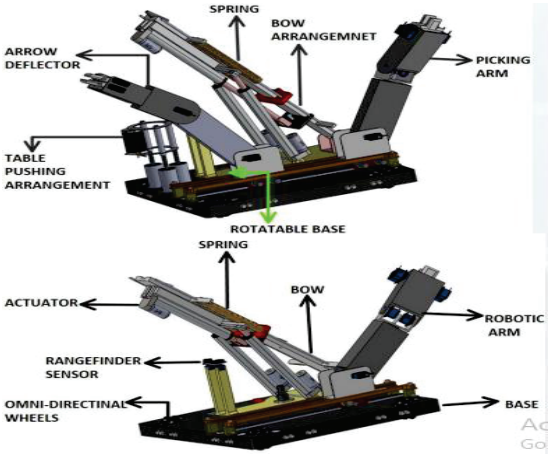

(b) **Nakshatra:** The Astronomy Fest was IIT Indore's first astronomy festival from June 19 to 21, 2021. Events held under Nakshatra were as follows:

- **StarTalks:** A series of 3 public talks related to Black Holes and stellar remnants by Dr. Amit Shukla, Dr. Manoneeta Chakraborty and Mr. Kishlay Singh.
- **Solstice Quiz:** A general astronomy quiz held on 21st June 2021 (Summer Solstice)
- **Workshop on Programming Tools for Astronomy:** Held for 1 hour each evening of the fest. Included introduction to Python, use of libraries like numpy, scipy and astropy for science and engineering work, use of ML and various examples of astronomical programming and data analysis.
- **Crossword Shower:** A crossword competition held via D2C.
- **Meme-o-mania:** A competition on making Astronomy related memes.
- **Scribble Competition:** A competition where participants drew and guessed words related to astronomy.
- **Ground Control:** A case study competition held via Webex.

(c) **Robocon:** ABU Robocon 2021 was held at Jimo, China. The game was based on the traditional game of East Asian countries' pitch-pot(throwing arrows to a pot). The Robotics club (Team Robocon) represented IIT Indore & designed the bots.

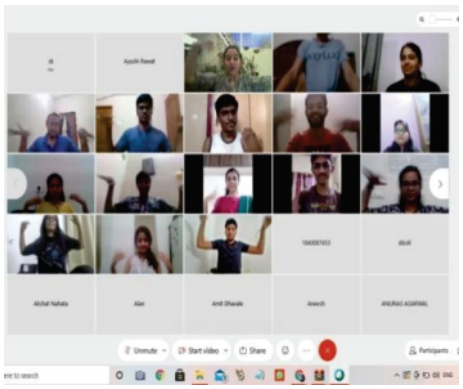

Cultural Clubs Events

(a) **Culturals Mela:** Students' Gymkhana IIT Indore has successfully conducted the online cultural event, The Cultural Mela-Beyond Borders. The event included 15+ events from various cultural clubs. From filmmaking to live performances, writing chronicles to poetry recitations, diverse competitions to expert talks, this event was a cultural extravaganza. There were a total of 1000+ participants from all over India who showcased their talents in the competitions held. We witnessed a vast variety of creative entries which just blew our minds. Apart from the stellar entries this event served a purpose to make people aware of the environmental problems that we are facing. Expert talks were held on how to conserve and take preventive measures to stop further damage to our earth. Overall the event served its purpose to bring joy and smiles to all our IITI family.

(b) **Monochrome:** Monochromatic art can be used to embody a dramatic effect to convey simplicity and peacefulness. It may include different shades of one colour, but by definition should contain only one base colour. As a part of Cultural mela' 21, Kalakriti organized a competition, where participants had to create artwork using shades of only one color or hue. Huge participation was received with about 180+ entries in just a week. All the artworks were posted on the social media page and Top 15 entries were selected based on number of likes on the post. The winning entries were selected by the judging team and results were announced on May 3, 2021.

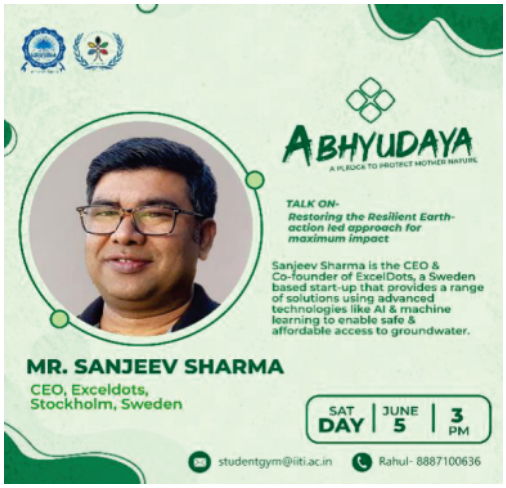

(c) **Divided By Covid United by Art:** In times of Covid, reality became more and more surreal. Confined by the four walls of our homes, but at last got united by art, dispelling the darkness of our hearts. It's tough to see the light in times of darkness but painting gave a sense of completeness in and at one with the world and we felt happiness we lost ourselves totally in the process and hours passed in a moment, away from the harsh reality of the crisis. These collaborative artworks were prepared by various members of Kalakriti, each person contributed in some significant way to the final artwork.

(d) **Abhyudaya:** IIT Indore is has celebrated Abhyudaya, an initiative dedicated to Health, Hygiene and well-being of the individual as well as the IITI community. The event was conducted between June 5 to 21, 2021 i.e. from World Environment Day to International Yoga Day. The event witnessed many prominent speakers some of them are Mr. Sanjeev Sharma, CEO Exceldots, and Shri Ripu Daman Bevli, Plogging Ambassador of India, at 6 PM.

e) **Swachhtha Pakhwada 2021:** A series of events were planed from September 1 to 15, 2021.

(i) **Swachhtha Pledge:** Swachhtha Pakhwada started with students taking the swachhtha pledge to protect Mother Nature and spreading the idea of cleanliness among peers. Pledge taking ceremony was followed by a small act by the Drama club with the aim to promote cleanliness in a humorous way.

(ii) **Photography Competition:** Photography Club of IIT Indore conducted a theme-based photography competition to spread awareness on the importance of cleanliness and saving water in our day to day life. This was an online competition which saw 20+ entries with wide creativity. Overall, this competition served its purpose of spreading the right awareness on social media platforms

(iii) **Art Competition:** Kalakriti (Fine Art club) successfully conducted a theme-based poster making competition. The theme of the event was Nature Protection. Participants showed at most creativity while sticking to the theme. There were more than 20 entries from the students. This event was huge success as the amount of creativity shown by the participants was jaw dropping.

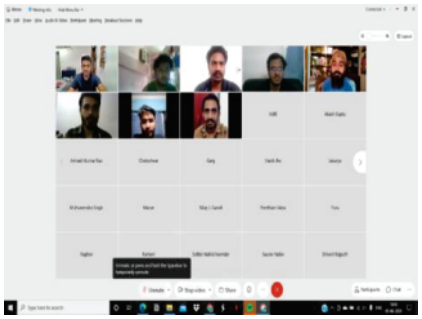

(iv) **Online Plantation Drive:** Prakriti Club of IIT Indore conducted an online plantation drive where in students were encouraged to plant a tree and post a selfie on their social media handle and tag the club.

(v) **Slogan Writing Competition:** Srijan Club conducted an online slogan writing competition. There were a total of 10 entries for the event. This competition mainly focusses on how cleanliness the nation towards having a better and safer environment. Slogans which were given uploaded on all social media handles.

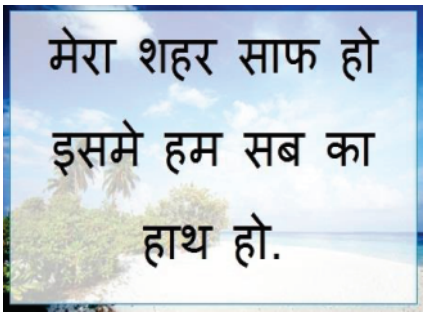

(vi) **Water Conservation Drive:** A unique competition was held in order to bring awareness about water conservation. In this event students were asked to make posters on what they feel are some of the methods which a person can adopt to conserve water. There were over 10 entries which stood out and gave a clear message on how to save water.

(vii) **Hostel Cleanliness Drive:** Students inside the campus were asked to clean their rooms and spread the word among their fellow roommates to follow the same. Specific guidelines were sent on mail on how to keep their rooms clean which included throwing plastic waste inside the dustbins provided, changing the sheet covers every week so that dust which might accumulate can be removed, trying not to wear footwear inside the dorm rooms or use separate foot wear for their flat, keeping different dustbins for food waste and plastic waste, trying to help other roommates cleaning their room, so that they don't feel the task to be a burden.

Some of the Glimpse of the events are as follows:

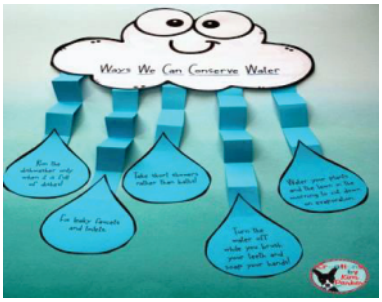

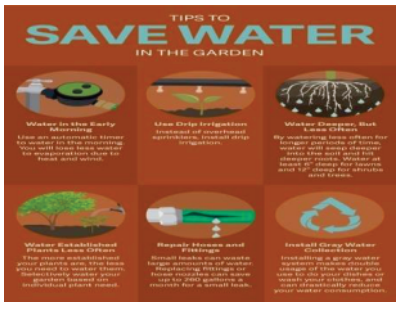

Sports Clubs Events

(a) **Yoga & Fitness:** Owing to the ongoing pandemic, academic pressure and giant career ambitions, stress has become an inevitable part of our lives. To get relief from some extent Yoga & Fitness Club, IIT Indore has successfully organized an online meditation session and an enriching talk on July 10,2021 by the speaker Mr. Saket Kakkar. He is Senior Art of Living teacher and IIT Bombay, IIM Lucknow Alumnus. He is currently working as an Associate Director with Accenture.In the session, the speaker talked about how to develop soft skills and its importance in our life. He organized a live quiz to introduce everyone how our breathing is during quiz as everyone go through the stress of answering question rapidly. Then he taught everyone how through the meditation practice we can control our stress. He organized a live meditation session which has initially Bhastrika exercise and then the guided meditation. He discussed the personal anecdotes and insights and also answered the queries of the participants which is related to meditation and other stress related problems.

(b) **Yoga Week:**

(i) **Meditation Session:** In this session, Yoga and Fitness Clubof IIT Indore in association with ISHA FOUNDATION organised a meditation session. In this session, speakers informed about various kinds of meditation techniques and safe way to practice them. He also talked about various benefits of meditation and promoted the importance of peaceful mind, especially amidst this pandemic which is taking toll on people's mental health.

(ii) **Yoga Quiz:** In this session, students were asked various questions related to yoga and its benefits. This was done to spread awareness about the history of yoga, benefits of yoga and role of India in declaration of 21 June as International Day of Yoga.

(iii) **Yoga Competition:** In this session, students were asked to perform various yogasans and were informed about its benefits. This was done to spread awareness about various important yogasans which can change the lifestyle in a positive way. Also, surya namaskar task was given and its benefit were informed to the students.

(iv) **Yoga Workshop Session:** In this session, students were informed about various yogasans and kriyas which they can perform according to modern lifestyle of the students.

(c) **IIT Indore Fit India Freedom Run 2.0 Report:** The country is celebrating 75 years of Independence - "Azadi Ka Amrit Mahotsav". In this regard, "Resolves@75", Fit India Mission has conceptualized Fit India Freedom Run 2.0 to commemorate the occasion. Nationwide Virtual launch of Fit India Freedom run 2.0 was held on August 13, 2021. The Fit India Freedom Run 2.0 lasted till October 02, 2021. In view of the pandemic, the Fit India Freedom Run ideated in a unique way. Participants could run at their own place (wherever they are) and at their own pace (at a time convenient to them) between August 13, and October 2, 2021.The staff, students, and faculty members of IIT Indore were active participants in this event. Together a distance of 2269.59km was covered. We also conducted a 3km run challenge in our institute while following covid 19 protocols. More than 100 faculty, staff, students, family participated in this event.

Other Activities

(a) **EBSB:** Rastriya Avishkar Abhiyan under Ek Bharat Shrestha Bharat, IIT Indore Team launched a program "Vigyan Par Charcha" in association with the State Education Department, Madhya Pradesh since January 13, 2021. This programme is designed for students of Class 6 to 8 to develop their basic scientific concept as well as for teachers to develop their teaching skills by using Internet based tools and reduce stress level created due to online teaching. Renowned Professors from different stream delivered lecture online. The program saw large viewership amongst students and teachers.

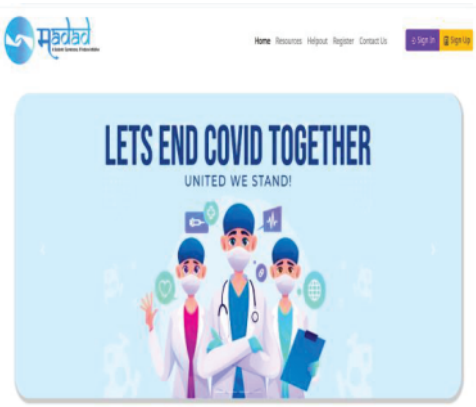

(b) **Best out of Waste- Art, Craft and Innovation Competition:** Team Avana conducted event aimed to spread creative ways of reusing everyday materials that will reduce waste and provide useful household products. Participants used all sorts of waste materials like newspaper, plastic bottles, jute threads, aluminium foils, used coconut shells, candles, mirrors, unused cables and more. The waste was used productively to create very artistic things. It was observed that students came up with enthusiasm and built some of the valuable items that no one could ever think of at first on watching those wastes.

(c) **MADAD: An initiative of IIT Indore against COVID-19:** IIT Indore launched an online public welfare portal "MADAD" on May 10, 2021. It is a portal that provides authorized data of covid relief resources along with their authentic sources. Developed by a group of 10 students of Student Gymkhana IITI, MADAD aims to bridge the gap between the providers of covid relief resources and those who need support. When the whole nation was suffering from an acute shortage of oxygen cylinders and various other relief commodities, MADAD acted as a boon for the people affected by the pandemic. Through MADAD, a common platform was provided where both seekers and donors could register their details and connect instantly. Keeping the rural population of India in mind, the portal's User-Interface is designed to be simple and can be navigated without much hassle. While people in need of the relief resources can use MADAD directly, those willing to contribute must go through a quick registration process that involves mobile no. OTP verification. Moreover, for licensed services like oxygen cylinders, ambulances and many others, the service providers must upload their Aadhar card and the license, which will be verified by volunteers of the premier institute. This step was necessary to prevent fake information from being uploaded on the website and to provide authentic data to the needy ones as far as possible. This website can be accessed from www.madad-covid.in and people can make the best use of the same in the interest of humanity.

Ek Bharat Shresth Bharat

भारत श्रेष्ठ भारत

The "The Ek Bharat Shrestha Bharat" programme, an idea of a continual and intended cultural linkage between residents of different regions, was introduced by Prime Minister Shri Narendra Modi during the Rashtriya Ekta Divas held on 31st October 2015, to venerate the birth anniversary of Sardar Vallabhbhai Patel. This program was initiated to celebrate the cultural diversity through mutual interaction and exchange between people of different states and union territories so that a common spirit of understanding reverberates throughout the country.

Under the leadership of its Convener, Dr. Niraj Kumar Shukla, Ek Bharat Shrestha Bharat team of IIT Indore is actively conducting various activities. Recently, Govt. of India has nominated IIT Indore as a mentor institute under the RAA scheme to promote online academic activities for the school children of Madhya Pradesh. So far, more than 23 sessions have been delivered by the prominent faculty of IIT Indore on various topics which has been greatly appreciated by Govt Schools teachers, children's and their parents.

80	1903171007	Sharddha Ameria	Biotechnology
81	1903171008	Kumod Kishore	Biotechnology
82	1903171009	Aarpita Baa	Biotechnology
83	1903171010	Rohan Kumar Panda	Biotechnology

INDIAN INSTITUTE OF TECHNOLOGY INDORE

List of graduating students for PhD Program-2021

S.No.	Roll Number	Name	Department
1	1010102	Rajkumar Jain	CSE
2	11115106	Ajay Pratap Singh	Physics

3	1301131006	Ramesh Reddy B	Chemistry
4	1301141005	Nitin Bisht	Maths
5	1301201002	Navneet Pratap Singh	CSE
6	1301203006	Patil Digvijay Ankush	ME
7	1401151008	Kavita Soni	Physics
8	1401171003	Mena Asha Krishnan	BSBE
9	1401203006	Rajendra Singh Rajpoot	ME
10	1401203008	Vishal Sharma	ME
11	1401231001	Amit Pandit	Chemistry
12	1401231007	Siddarth Jain	Chemistry
13	1401241001	Prince Kanhya	Maths
14	1401251002	Ankit Soni	Physics
15	1501102006	Pooja Bohara	EE
16	1501102015	Arjunan M S	EE
17	1501102019	S. Rathinavelu	EE
18	1501102021	Vinay Kumar Tiwari	EE
19	1501103004	Debjit Misra	ME
20	1501103006	Debashis Panda	ME
21	1501131001	Sourabh Kumar	Chemistry
22	1501131002	Premansh Dudhe	Chemistry
23	1501131003	Pramod Kumar Gavel	Chemistry
24	1501131006	Daisy Sarma	Chemistry
25	1501131008	Sayan Maiti	Chemistry
26	1501131009	Jamuna Kanaram Vaishnav	Chemistry
27	1501131011	Madhurima Poddar	Chemistry
28	1501131014	Shagufi Naz Ansari	Chemistry
29	1501131015	Shweta Jindal	Chemistry
30	1501131018	Ankan Biswas	Chemistry
31	1501131020	Jadhav Rohit Gajanan	Chemistry
32	1501131021	Neha Thakur	Chemistry
33	1501131022	Nishu Kanwa	Chemistry
34	1501151002	Gowthama Raju P	Physics
35	1501161001	Arun Kumar Bairwa	HSS (Eco)
36	1501161002	Manu Jose	HSS (Eco)
37	1501161006	Shaifali Arora	HSS (Eng)
38	1501161007	Sidheswar Panda	HSS (Eco)
39	1501171003	Rinki Singh	BSBE
40	1501171004	Monika Jain	BSBE
41	1501171009	Anjali Roy	BSBE
42	1501171010	A V R Krishna Rao	BSBE
43	1501171011	Prativa Majee	BSBE

44	1501181005	Alfa Sharma	MEMS
45	1501201001	Aditya Anand Shastri	CSE
46	1501201006	Aaditya Prakash Chouhan	CSE
47	1501202001	Uday Kumar Singh	EE
48	1501202002	Biswajit Mandal	EE
49	1501231002	Topi Ghosh	Chemistry
50	1501251001	Priodyuti Pradhan	Physics
51	1501251002	Rode Sudhir Pandurang	Physics
52	1501261002	Rajesh Barik	HSS
53	1501271001	Basanta Pravas Sahu	BSBE
54	1501271014	Vishal Anand	BSBE
55	1501281001	Lichchhavi	MEMS
56	1502103009	Vijay Choyal (MTech+PhD)	ME
57	1503151003	Anil Kumar (M.Sc.+Ph.D.)	Physics
58	1503151004	Anjali Chaudhary (M.Sc.+Ph.D)	Physics
59	1601102001	Pragya Swami	EE
60	1601102002	Lalit Singh	EE
61	1601102004	Sulabh	EE
62	1601102006	Sourabh Jain	EE
63	1601102006	Sourabh Jain	EE
64	1601102010	Gaurav Siddharth	EE
65	1601102015	Sajid Khan	EE
66	1601103001	M. Muralidharan	ME
67	1601103003	Rohit Kothari	ME
68	1601121004	Chiranjit Mondal	MEMS
69	1601121006	Sumanjit Chakraborty	AASE
70	1601121009	Arnab Chakraborty	AASE
71	1601131004	Soumitra Guin	Chemistry
72	1601161002	Mohd. Shadab Danish	HSS (Eco)
73	1601181001	Pranav	MEMS
74	1601271002	Nisha Amarnath Jonniya	BSBE
75	1601271003	Charu Sonkar	BSBE
76	1701103003	Akash Sharma	ME
77	1701104001	Vivek Gupta	CE
78	1701105003	Kitchamsetti Narasimharao	MEMS
79	1701105008	Sheetal Kumar Dewangan	MEMS
80	1701105009	Aditya Kumar Litoria	MEMS
81	1701105011	Reliance Jain	MEMS
82	1701105013	Rameshwar Lal Kumawat	MEMS
83	1701151002	Aanchal Sati	Physics
84	1701151003	Devesh Kumar Pathak	Physics

85	1701202008	Neha Gupta	EE
86	1701203008	Shingare Kishor Balasaheb	ME
87	1701204003	Srinidhi Jha	CE
88	1701205002	Kathavate Vaibhav Sanjay	MEMS
89	1701205005	Parameshwar R. Chikate	MEMS
90	1701241001	Bharat Richhariya	Maths
91	1801103009	Vijay Kumar Choyal	ME
92	1801204002	Meghna Sharma	CE
93	1801204006	Nitin Tiwari	CE
94	1801103008	Ankit Rathi	ME

Student Enrolment and Graduation

Courses Offered	:	870
Undergraduate Courses	:	410
Post Graduate Courses	:	345
Cross Listed Courses	:	115

Enrolments									
Academic Year	**2013-14**	**2014-15**	**2015-16**	**2016-17**	**2017-18**	**2018-19**	**2019-20**	**2020-21**	**2021-22**
Doctoral Students Admitted									
PhD (Including Dual Degree)	87	93	118	83	117	89	189	106	129
Post Graduate Students Admitted									
MTech	5	24	30	31	34	62	41	78	74
MSc	15	20	24	47	56	69	80	102	112
MS (Research)	-	-	-	-	-	7	21	24	32
Undergraduate Students Admitted									
BTech	119	117	111	258	249	265	283	351	Awaited
Preparatory Course	-	-	-	-	-	-	4	-	Awaited

Graduation									
Convocation Year	**2013**	**2014**	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**	**2021**
Doctoral Students Graduated									
PhD (Including Dual Degree)	-	6	23	24	38	67	83	58	94
Post Graduate Students Graduated									
MTech	-	-	5	22	25	26	29	57	41
MSc	-	-	14	20	22	41	55	58	83
MS (Research)	-	-	-	-	-	-	-	6	19
Undergraduate Students Graduated									
BTech	101	117	114	108	118	112	108	233	246
